Findings: Reviewing and comparing the school district's December claim to the December daily records indicated 15 free meals were over claimed for breakfast and 437 free meals were over claimed for lunch. After observing, manually counting students during a lunch meal service, and discussing the issue with the Child Nutrition Director (CND) and Point of Service (POS) system coordinator, we concluded the meal count discrepancy for the month of December was due to their current procedures for meal counting during meal service times. Their current meal counting procedure included each teacher scanning their students during meal service time, which was causing inaccuracy in meal counting. The school immediately changed their meal counting procedures to one person being responsible for scanning each student with a reimbursable meal during meal services.
