

In addition to the Arkansas Teacher Standards, the Chemistry teacher, grades 7-12, shall demonstrate knowledge and/or competencies in the following areas:

<p>1. Central concepts or current theories of Chemistry</p> <p>NRC Framework ACS Guidelines</p>	<p>1.1 Knowledge of the conservation of matter and energy</p> <p>1.2 Knowledge of the behavior and properties of matter and energy</p> <p>1.3 Knowledge of the particulate nature of matter</p> <p>1.4 Knowledge of equilibrium and driving forces</p>
<p>2. Principles of Chemistry</p> <p>NRC Framework ACS Guidelines</p>	<p>2.1 Ability to demonstrate a deep understanding following active investigations in the principles of the conservation of electricity and magnetism of</p> <ul style="list-style-type: none"> • Atoms are not destroyed in chemical reactions; they are rearranged • Forms of energy; energy changes in chemical reactions • Stoichiometry and balancing chemical reactions <p>2.2 Ability to demonstrate a deep understanding following active investigations in the principles of the behavior and properties of matter and energy of</p> <ul style="list-style-type: none"> • The periodic table of elements as the master organizer of chemistry • Gas laws • Distinguishing among elements, compounds, and mixtures • Chemical bonding • Intermolecular forces <p>2.3 Ability to demonstrate a deep understanding following active investigations in the principles of the particulate nature of matter of</p> <ul style="list-style-type: none"> • Kinetic Molecular Theory • Structure of atoms, ions, and molecules <p>2.4 Ability to demonstrate a deep understanding following active investigations in the principles of the equilibrium and driving forces of</p> <ul style="list-style-type: none"> • Le Chatelier's Principle • Reaction rates • Thermodynamics (entropy and enthalpy) • Acid-base reactions • Redox reactions • Combustion

ACS Guidelines and Recommendations for Teaching of High School Chemistry. American Chemical Society (ACS). (2012)

Praxis II (5245) = Praxis II Chemistry: Content Knowledge

<p>3. Incorporate Crosscutting Concepts</p> <p>NRC Framework</p>	<p>3.1 Ability to understand and exhibit knowledge of patterns</p> <p>3.2 Ability to understand and exhibit knowledge of cause and effect and mechanism and explanation</p> <p>3.3 Ability to understand and exhibit knowledge of scale, proportion, and quantity</p> <p>3.4 Ability to understand and exhibit knowledge of systems and system models</p> <p>3.5 Ability to understand and exhibit knowledge of energy and matter, flows, cycles, and conservation</p> <p>3.6 Ability to understand and exhibit knowledge of structure and function</p> <p>3.7 Ability to understand and exhibit knowledge of stability and change</p>
<p>4. Incorporate Science and Engineering Practices</p> <p>NRC Framework</p>	<p>4.0 Knowledge and practice of the eight practices of science and engineering that the Framework (NRC) identifies as essential for all students to learn and describe in detail as listed below:</p> <ul style="list-style-type: none"> • Asking questions (for science) and defining problems (for engineering) • Developing and using models • Planning and carrying out investigations • Analyzing and interpreting data • Using mathematics and computational thinking • Constructing explanations (for science) and designing solutions (for engineering) • Engaging in argument from evidence • Obtaining, evaluating, and communicating information
<p>5. Incorporate History and Nature of Science</p> <p>NRC Framework</p>	<p>5.1 Ability to apply appropriate practices and knowledge to show scientific investigations use a variety of methods</p> <p>5.2 Ability to apply appropriate practices and knowledge to show scientific knowledge is based on empirical evidence</p> <p>5.3 Ability to apply appropriate practices and knowledge to show scientific knowledge is open to revision in light of new evidence</p> <p>5.4 Ability to apply appropriate practices and knowledge to scientific models, laws, mechanisms, and theories that explain natural phenomena</p> <p>5.5 Ability to apply appropriate practices and knowledge to show science is a way of knowing</p> <p>5.6 Ability to apply appropriate practices and knowledge to demonstrate scientific knowledge assumes an order and consistency in natural systems</p>

ATS (InTASC) = 2011 Arkansas Teaching Standards (Interstate Teacher Assessment and Support consortium)

Praxis II (5245) = Praxis II Chemistry: Content Knowledge

	<p>5.7 Ability to apply appropriate practices and knowledge to demonstrate science is a human endeavor</p> <p>5.8 Ability to demonstrate that science addresses questions about the natural and material world</p>
<p>6. Incorporate Mathematical Skills and Concepts Related to Chemistry</p> <p>CCSS – Mathematics, grades 7-12</p>	<p>6.1 Ability to demonstrate proper knowledge and practice of appropriate arithmetic skills including percentage, fractions, decimals, ratios, and proportions</p> <p>6.2 Ability to demonstrate proper knowledge and practice of measurement skills including linear, volume, mass, and temperature using English and Metric Units</p> <p>6.3 Ability to demonstrate proper knowledge and practice of probability of an event occurring</p> <p>6.4 Ability to demonstrate proper knowledge and practice of algebraic skills including solving and graphing equations</p> <p>6.5 Ability to demonstrate proper knowledge and practice of trigonometric functions to solve problems</p> <p>6.6 Ability to demonstrate proper knowledge and practice of scientific notation and significant digits</p>
<p>7. Incorporate Disciplinary Literacy</p> <p>CCSS - English/Language Arts: English Language Arts & Literacy in Science, and Technical Subjects, grades 7-12</p>	<p><u>Reading in Science and Technical Subjects, Grades 7-12</u></p> <p>Reading competencies for literacy in science and technical subjects for grades 7-12 include the ability to read informational texts in science and technical subjects closely and critically to analyze the key ideas and details as well as craft and structure with the purpose of integrating knowledge and ideas both within and across texts by</p> <p>7.1 Citing specific textual evidence to support analysis of science and technical texts, attending to important distinctions the author makes and to any gaps or inconsistencies in the account</p> <p>7.2 Determining the central ideas or conclusions of a text; summarize complex concepts, processes, or information presented in a text by paraphrasing them in simpler but still accurate terms</p> <p>7.3 Following precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks; analyzing the specific results based on explanations in the text</p> <p>7.4 Determining the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 7-12 texts and topics Analyzing how the text structures information or ideas are organized into categories or hierarchies, demonstrating understanding of the information or ideas</p> <p>7.5 Analyzing the author’s purpose in providing an explanation, describing a procedure, or discussing an experiment in a text,</p>

Praxis II (5245) = Praxis II Chemistry: Content Knowledge

	<p>identifying important issues that remain unresolved</p> <p>7.6 Integrating and evaluating multiple sources of information presented in diverse formats and media (e.g., quantitative data, video, multimedia) in order to address a question or solve a problem</p> <p>7.7 Evaluating the hypotheses, data, analysis, and conclusions in a science or technical text, verifying the data when possible and corroborating or challenging conclusions with other sources of information</p> <p>7.8 Synthesizing information from a range of sources (e.g., texts, experiments, simulations) into a coherent understanding of a process, phenomenon, or concept, resolving conflicting information when possible</p> <p>7.9 Reading and comprehending a variety of scientific and technical documents appropriate for instruction within the 7-12 text complexity band</p> <p><u>Writing in History/Social Studies, Science, and Technical Subjects, Grades 7-12</u></p> <p>Writing competencies for literacy in history/social studies, science, and technical subjects for grades 7-12 will be demonstrated by</p> <p>7.10 Writing arguments focused on discipline-specific content by</p> <ol style="list-style-type: none"> a. Introducing precise, knowledgeable claim(s), establishing the significance of the claim(s), distinguishing the claim(s) from alternate or opposing claims, and creating an organization that logically sequences the claim(s), counterclaims, reasons, and evidence b. Developing claim(s) and counterclaims fairly and thoroughly, supplying the most relevant data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form that anticipates the audience's knowledge level, concerns, values, and possible biases. c. Using words, phrases, and clauses as well as varied syntax to link the major sections of the text, creating cohesion, and clarification of the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. d. Establishing and maintaining a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. e. Providing a concluding statement or section that follows from or supports the argument presented <p>7.11 Writing informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or</p>

 Praxis II (5245) = Praxis II Chemistry: Content Knowledge

	<p>technical processes by</p> <ul style="list-style-type: none"> a. Introducing a topic and organizing complex ideas, concepts, and information so that each new element builds on that which precedes it to create a unified whole; including formatting(e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension b. Developing the topic thoroughly by selecting the most significant and relevant facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience’s knowledge of the topic c. Using varied transitions and sentence structures to link the major sections of the text, creating cohesion, and clarifying the relationships among complex ideas and concepts d. Using precise language, domain-specific vocabulary and techniques such as metaphor, simile, and analogy to manage the complexity of the topic; conveying a knowledgeable stance in a style that responds to the discipline and context as well as to the expertise of likely readers e. Providing a concluding statement or section that follows from and supports the information or explanation provided (e.g., articulating implications or the significance of the topic) <p>7.12 Producing clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience</p> <p>7.13 Developing and strengthening writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience</p> <p>7.14 Using technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information</p> <p>7.15 Conducting short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation</p> <p>7.16 Gathering relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the strengths and limitations of each source in terms of the specific task, purpose, and audience; integrating information into the text selectively to maintain the flow of ideas, avoiding plagiarism and overreliance on any one source and following a standard format for citation</p> <p>7.17 Drawing evidence from informational texts to support analysis, reflection, and research</p>
