School(s): Cross County High School
Proposed Charter School Name: Cross County New Tech High School
Location: Cross County New Tech High School will be located at the current Cross County High School Campus, at 21 CR 215, Cherry Valley.

Grade Levels: Grades 7-12

Charter School Description: Cross County New Tech High School will be a whole school conversion charter with no cap on enrollment. It will provide an additional academic choice to parents and students in our area by transforming the classroom environment to one where learning is focused on project, problem, process based learning that is relevant to students and utilizes research-based strategies that engage students at deep levels in hands-on, authentic interactive learning. Each learner will be equipped with his or her own computer to make learning available 24/7. A variety of technologies will be used across the curriculum to both enhance and authenticate the learning experience as well as a means to provide students with the opportunity to gain expertise in using a wide variety of the most current technologies available. The charter includes four areas of emphasis including restructuring time, implementing a cross-curricular curriculum, implementing project/problem/process/inquiry based learning, and teaching more than one subject simultaneously. Another component of the charter will center around bringing in outside experts to help in the assessment of the students on their projects. Essentially, we want to foster a true partnership with the students, parents, business and community. We want to create a school that actually prepares its students for real skills that are needed in the real world regardless of whether that means, post-secondary, workforce, or vocational.

Dr. Matt McClure,
Superintendent
Cross County School District
