NOTE: We use fuzzy suppression to prevent indirect disclosure of cell sizes less than 10 or indirect disclosure through uniformity such as top or bottom values (0 or 100%) that would reveal all students belong to a category (graduated or not graduated). For fuzzy suppression we use the size of the denominator (N) to create uncertainty around the number of students contributing to the rate or percent and when the rate or percent equals the top or bottom percent value (0 or 100). Nc10 and RV* (Restricted Value) are part of this. See "Suppression Rules" document for further explanation.
