Data Sources

Parents or legal guardians who choose to provide a home school for their children are required by law to submit current year Notice of Intent to Home School and Waiver forms to the superintendent of their local school district each year within the established deadlines. Meeting this annual requirement maintains legal home school status for the parents or legal guardians.

School districts are required to submit a copy of each form to the Arkansas Department of Education (ADE) for statistical and testing purposes. This report comprises data submitted by the 254 school districts in Arkansas. The accuracy, completeness and timeliness of the data are reliant upon the parents/guardians' compliance with legislation and the school districts' submissions of the information to the ADE.

Estimates of grade level completed are based on date of birth when incomplete information was submitted regarding grade level.

In the upper left part of this report, averages are printed for the tests, totals, or composite. Several types of scores are reported, including the national percentile rank (NPR), which is the percent of students in this grade in the nation with a lower score on that test, total, or composite.

The graph to the right of the scores provides a visual display of the performance of the state for each test relative to other test areas. The NPRs for the various scores are displayed in horizontal bars. The varying lengths of these bars permit identification of the stronger and weaker areas of achievement for this state.

The lower part of the report provides detailed information about skills in each test. The number of items for each skill, the average number attempted, the average percent correct for the state, and the average percent correct for students in this grade in the nation are reported. The difference between the percent correct for the state and the percent correct for students in the nation is displayed as a horizontal bar. These bars permit identification of skills that stand out as high or low when compared with similar groups in the nation.

SS = Standard Score, NS = National Stanine, NCE = Normal Curve Equivalent, NPR = National Percentile Rank

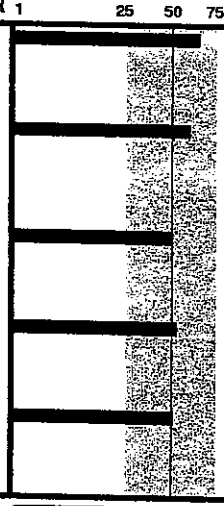
PERCENTILE RANK (Low 1 — 25 — 50 — 75 — High 99)



In the upper left part of this report, averages are printed for the tests, totals, or composite. Several types of scores are reported, including the national percentile rank (NPR), which is the percent of students in this grade in the nation with a lower score on that test, total, or composite.

The graph to the right of the scores provides a visual display of the performance of the state for each test relative to other test areas. The NPRs for the various scores are displayed in horizontal bars. The varying lengths of these bars permit identification of the stronger and weaker areas of achievement for this state.

The lower part of the report provides detailed information about skills in each test. The number of items for each skill, the average number attempted, the average percent correct for the state, and the average percent correct for students in this grade in the nation are reported. The difference between the percent correct for the state and the percent correct for students in the nation is displayed as a horizontal bar. These bars permit identification of skills that stand out as high or low when compared with similar groups in the nation.
