## BEFORE THE ARKANSAS DEPARTMENT OF EDUCATION CHARTER AUTHORIZING PANEL

#4 CAPITOL MALL LITTLE ROCK, AR 72201

November 19, 2015

#### APPEARANCES

#### PANEL MEMBERS:

Ms. Deborah Coffman	Chairman/Chief of Staff
Dr. Debbie Jones	Vice Chair/Asst. Commissioner of
	Learning Services
Ms. Ivy Pfeffer	Asst. Commissioner - HR/Educator
	Effectiveness & Licensure
Dr. Eric Saunders	Asst. Commissioner - Fiscal &
	Administrative Services
Ms. Annette Barnes	Asst. Commission - Public School
	Accountability
Mr. Greg Rogers	Asst. Commissioner - Fiscal &
	Admin. Services
Dr. Mark Gotcher	Deputy Commissioner
Ms. Jennifer Liwo	PLSB Attorney
Mr. Bobby Lester	Director of Federal Programs

#### ALSO APPEARING:

Ms. Mary Perry Coordinator - Learning Services
Ms. Alexandra Boyd Public School Program Coordinator

#### ADE LEGAL COUNSEL:

Ms. Kendra Clay ADE General Counsel
Ms. Jennifer Davis ADE Deputy General Counsel
Mr. Cory Biggs ADE Deputy General Counsel

#### INDEX

	Page
Welcome and Preliminary Matters	3
Hearing Procedures	3
A-1: Gentry High School	5
A-2: Hot Springs World Class High School	55

CHAIRPERSON COFFMAN: Good morning, Ladies and The November 19, 2015 meeting of the Gentlemen. Charter Authorizing Panel is now called to order. Welcome, everyone, to the Arkansas Department of Education. If you would, please silence all electronic devices. The Charter Authorizing Panel oversees the authorization, renewal, revision, and revocation of charters. The Arkansas Quality Charter Schools Act of 2013 requires the Commissioner to appoint ADE staff to the Panel. On July 1, 2015, Commissioner Key named nine members to the Charter Authorizing Panel and we sit before you today. As chair, my goal is to facilitate a fair and responsible hearing. I will request that each person speaking please state your name and title for the record. I will ask that you continue to speak clearly into the microphone for the benefit of the Panel, the audience and the viewing audience. This entire meeting is being live-streamed and recorded, and our court reporter will be providing a transcript of the meeting and it will be placed on the ADE website. So good morning to all. And, Ms. Clay, if you will go over the procedures for us today? MS. CLAY: Good morning. Kendra Clay, General

1	Counsel for the Department of Education. The
2	procedures are the same that you have followed the
3	past two days, but I'll review them again for the
4	people that are new here today and the people that
5	are watching the live-stream. The district
6	conversion applicants will have 20 minutes to present
7	their case for approval of their application and then
8	any parties opposed will have 20 minutes to present
9	their opposition. After that the applicants will
10	have 5 minutes for closing statements and rebuttal
11	and then you will take questions and have discussion.
12	You can vote on the matter today or take it under
13	advisement and vote at a later meeting. If you do
14	that, you can allow the applicants to receive
15	technical assistance or provide additional
16	information to you. After you vote, you have access
17	to a Google doc. and you will go in and record how
18	you voted and the reason for your vote. This Google
19	doc. will then be shared with the State Board at
20	their December meeting to facilitate whether they
21	want to review your decision or not. As always, this
22	is basically a contract negotiation. A charter is
23	considered a contract. So anything that the
24	applicants say or agree to here today that is in
25	addition to or different than their application they

will be held to. Do you have any questions about the procedures today? Okay.

CHAIRPERSON COFFMAN: Thank you. Do we have any legislators in the room this morning? If not, then Ms. Boyd, you are recognized to begin action item one.

A-1: HEARING OF DISTRICT CONVERSION PUBLIC CHARTER SCHOOL
APPLICATION: GENTRY HIGH SCHOOL CONVERSION CHARTER

MS. BOYD: Thank you, Madam Chair. Item one,
Hearing of District Conversion Public Charter School
Application: Gentry High School Conversion Charter.
Gentry High School Conversion Charter is a proposed
district conversion public charter school. The
applicant is requesting to serve grades 9-12 with a
maximum enrollment of 500. ADE staff reviewed the
application, and concerns were shared with the
applicant for response. The application, the ADE
evaluation, and the applicant's response are included
for your review. From Gentry we have Dr. Barrett to
begin their presentation.

CHAIRPERSON COFFMAN: If all the representatives from Gentry High School Conversion Charter and anyone speaking in opposition will please stand to receive the oath. Raise your right hand. Do you swear or affirm that the testimony you're about to give shall

be the truth, the whole truth and nothing but the truth?

(ALL SPEAKERS ANSWERED AFFIRMATIVELY)

SUPT. BARRETT: So help me God.

CHAIRPERSON COFFMAN: Dr. Barrett, you're recognized.

SUPT. BARRETT: Good morning, Madam Chair,
Members of the Panel. It's our pleasure and we thank
you for the opportunity to present to you today. Ms.
Winslett, Judy Winslett will be -- our assistant
superintendent at Gentry will be presenting the bulk
of our presentation; Mr. Brae Harper, high school
principal and I will be part of the group that will
respond to your questions; and I will be giving the
5-minute closing. So, Ms. Winslett.

MS. WINSLETT: Good morning. I'm Judy Winslett, Gentry School assistant superintendent; very happy to be with you today. Okay. I believe our PowerPoint is up and visible now. I want to begin by giving you just a little bit of an introduction about Gentry and the community around the school system. We are oftentimes thought of as a Mayberry. We're a small town. You'll see there where we're located in the top right. We're in the far northwest corner of Arkansas, just nine miles north of Siloam Springs.

We're not too far from XNA Airport. And to the right there you'll see three slides of communities that also send children into our district. Highfill has an approximate population of 353. We have Cherokee City, which is on the Oklahoma border, and then Springtown, which is also to the east of Gentry. No matter where I go people will say, "Oh, Gentry, that's where the Wilderness Safari is." So that is our claim to fame in Gentry, and you'll see some shots there of the safari.

This is a slide that will give you a little picture of the industry in our area. As we are rural and somewhat small, you'll see along the bottom we have Tyson, Cobb, and Simmons. While none of those particular industries are within our school district, they do border our perimeters and we have families that grow for these companies. Cargill is located there to the bottom right. You'll see a picture of SWEPCO. And then in the top left, a picture of McKee, Little Debbie as we all refer to it. I met her just recently for the first time and she does very much look like her picture there on the side of the truck. So a great partner for the Gentry district.

I'm having just a little trouble with our

clicker. Next slide; thank you.

This is a picture, a quick picture of our demographics there on the left. That was pulled the first of November. And then the aerial shot of our campus, which you will see our high school, our middle school and our primary school back in the distance there. We have another building which is on the other side of town in our intermediate, which houses grades 3-5.

I don't want to talk through these next two slides. I inserted these so that you would see that this process is not something we began in August. We have been giving lots of thought and having multiple meetings with business industry in our community.

And in my 17 years with Gentry I can't remember more engagement and excitement about something that may come to pass for us.

These are some events that began -- continued on into this particular school year. And in the process of this collaboration we began working with Decatur and Gravette, which are to our north. We're all relatively small in comparison to the big four on the 49 corridor. And we recognize that we can't do everything for every child and so we have started working together to try to provide opportunities for

them. For example, we have a student traveling to Gravette now to be part of their HVAC program.

This is our mission statement that was drafted for the charter and it simply says recognizing that we do have a responsibility to students, parents and stakeholders, business and industry, and our community. And we have a need to provide safe and productive school experiences for our students; that we are going to purpose to deliver an education that's designed to prepare our students for successful transition to opportunities beyond us in Gentry, whether that is college or career. We also want to commit to being fiscally responsible with our resources and provide the very best teachers, technology and facilities that we have available.

So as we begin talking about our conversion charter, these are the things that we saw great opportunities for us to have: to build those partnerships with business and industry, to provide opportunities for our students to go out and work with business and industry in an internship environment; to expand our course offerings outside what we traditionally offer as a high school; to foster opportunities for our graduates to leave us with an industry certificate; and to create these

23

24

25

following pathways in that process -- healthcare, transportation, and IT.

In this process we have the innovations that we looked closely at. Through the internship opportunities, that provides our students with training and it also gives them an opportunity to build relationships with those potential employers. The vocational programs that we hope to offer, once approved by you guys, would be taught by industry professionals and these professionals can bring upto-date training for our students and give them authentic examples of what's happening in real world situations. We would also strive to have individualized instruction for our students by having a customized education plan for them, offering selfpaced courses, college courses, and these specific vocational and technical specialized courses.

So you would ask us why do we want to change and we want to increase the options for our students. We want to provide them with that value added diploma that will help them in that next part of their journey and to help them identify a pathway for their future story.

Our friends at Northwest Arkansas Council conducted personal interviews with business and

industry in our region and they -- this was a slide that they allowed me to use. And questions that they had with business and industry is, "Do you have recruiting problems?" And you will see that over half of the industries that were interviewed said yes. "And of these problems, what are they related to?" And you can see it's related to not only the ability to get people to come to work but to also be able to employ people that are trained and have the skills and ability to work for their company.

Another slide that they provided for us. As a result of that study were areas that they saw had difficulties in filling. And so since we began talking about this last fall we got excited about the opportunities for our students. And because some of the things we want to do needed your approval we started looking at what can we do now, what can we do to springboard us into our future plans. So there on the right you will see the things that we were able to plan and implement from last fall. And if you'll look, they'll coordinate very closely with the Northwest Arkansas Council's recommendations. We began a new program of study in banking; we looked to begin -- we did begin intro professional development in medical terminology; we had discussed with

25

Gravette the opportunity to send our students to them for a CNA program, as with their HVAC. And we had enough students to hold our own class, so we partnered with Northwest Arkansas Community College and they provided us a teacher and we have a full class of students from Gentry that will be graduating with a CNA certificate. Personal care assistant will be our second semester course in that area. education as third on our list. Dr. Barrett did a little data-gathering and for Gentry specifically over half of our teaching staff is over 50 years old. So we need to look to start growing some of our own and so we've implemented an Orientation to Teaching class. As I visited with business and industry, the immediate response from everyone, when I said, "What are we not doing in Gentry that you need us to do," and it all went back to soft skills; "We need folks that know these things, know how to get to work, to pass a drug test, to look you in the eye, shake your hand," those things. So we implemented the college and career readiness class.

This slide will show you in the northwest

Arkansas region where the percent of change is. and
you will see in those areas, those pathways the
growth in double-digits is signified for you and

2

3

15

16

17

18

19

20

21

22

23

24

25

those are the areas that we have sought and gone after. We didn't select areas that we just thought would be easy to provide things for or that we thought kids would enjoy; we looked at things that would help them to become employable and proceed forward.

One of the things we talked about in our planning is that for years now we have said, "Go to college, go to college, go to college." And even as a small district we've had great opportunities for our students to leave our walls with 24 to 26 college credits. We feel like we are doing a pretty good job in that area. But students need other options. We're not sending 100% of our students to college. So we want to start looking at those industry certificates, the workforce readiness certificate that is coming out of Northwest Arkansas Community College. And then there will be students that will want to pursue a two-year program, whether it's an associate's degree or something that would take place at a vocational school.

You all heard repeatedly in the news about the school that -- school loan crisis that our nation is under, and so I thought it would be interesting for our parents to see what they may be faced with. And

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

so there on the left is a list of the schools that typically our students attend, and then I gathered the most recent data I could find on those following And then look at the far right, at the columns. And I don't think it would be a situation student. uncommon to find a student who would have difficulty achieving chemistry or physics or that fourth math beyond Algebra II that would keep them from having the Academic Challenge Scholarship. And if they are one of those students, and if they fall in a family that would not qualify for a PEL grant, then they're looking at student loans. And so you can see if they go and if they finish in four years what they'll be faced with with student debt over the long haul. ranges from \$522 a month for 15 years to \$1100 a month.

So in this process we asked the question, "How can we help parents, students and industry?" And so we look at some of the ideas that we fleshed out in this process. We can help our students clarify their goals for the future. We can provide additional college courses for them. We can deliver articulated courses with our community college and the ones we teach at Gentry. We can allow savings to our parents for that post-secondary education. We can offer

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

opportunities for industry certifications. We can arrange opportunities for our students to participate in internships. We can create those value-added diplomas and increase employability for our students. And for our industry we can help them by providing skilled and ready students to fill those openings as we hear about the retiring workforce.

So just a little snapshot on Gentry, pulling this data from the ADE college-going rate report. You can see that the number of our graduates -- you can see how many actually left us and enrolled in So about 60% of our students are not going college. to college in Arkansas. The next-to-the-last column lets you get a snapshot of our students when they That represents 20 of the 102 students graduated. who took some college credit -- our college courses at our high school. Of those 20 students, they earned 230 college hours before they left us. Because the community college offers us a discounted rate, or those students a discounted rate on their tuition those families for those 230 hours were able to save over \$23,000 in tuition. So when you total those columns our families have saved \$91,000 in tuition costs.

So the three pathways that we look to implement

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

would be transportation as being one, and we would offer a diesel mechanics or diesel technicians And once fully implemented these would be program. the courses that we would hope to have in place: the preventative maintenance, electrical, tractor trailer brakes, welding, heavy duty drivetrain, diesel engines, hydraulics, suspension, you can see electronic and climate control. We have had conversations with NTI who also has a program, but they are not accessible to us in the sense that travel time is an hour one-way from our district to And when I consulted with our get there. transportation department last fall, \$55,000 a year to take a bus over there, not to mention the fact that our students are involved in a lot of activities in our school and some would have to give up some of those extracurricular activities if they were going to participate and make that trek over.

Logistics is another program that we would find underneath that transportation umbrella with multiple pathways. Not all students, as we said, are going to college and so we want opportunities for them to begin preparation for that associate's degree, if they want. We want them to have an opportunity to have a certificate and be ready to work when they

leave, if that's what they choose. And the courses that we would have available to them, as you see, supply chain, transportation management, inventory management, logistics, and an entrepreneurship. You know, when you think about the transportation industry it's more than just someone that's dispatching a truck. It's more than someone working on a truck. It's those small businesses that spring out to the side of those, those folks that make the trips out to repair trucks when they're down, tire shops, so multiple things that go into the transportation industry.

Healthcare pathways -- we are -- baby boomers are going to need some healthcare in the future. And you will see that healthcare pathways in our offerings would be current courses that we're teaching our medical professions, the CNA, followed by the PCA, and medical terminology. Addition course offerings, once we're up and running, are listed there. Three of these four pictures are our students in our first CNA class, which began in August. Their instructor assures me that we are going to have all of them pass the test; they're great students and they're excited about this opportunity. Because of the competitive market in entering into nursing

school, we believe that having that CNA is a little bonus for them. Because not only do they get to get a taste of is this what I really want to do, but it also shows those schools on their applications that they are committed and interested in pursuing that career. I would say to you that starting up this program was very minimal for us because our community donated money, supplies, equipment for this. It was amazing to see how they came to us without us really even asking very much.

The IT program pathway that we would like to pursue would involve opportunities for our students to train for networking, programming, information management. Those areas leading to just a few of the high producing or high-in-demand jobs that you'll see listed there. You'll notice in that listing that the IT piece also bleeds over into healthcare very easily.

Working with our partners at Northwest Arkansas Community College, these are the workforce readiness certificates of proficiency that are available to us currently and technical certificates that follow that. The parenthesis represents the college hours required to achieve those. And then the online courses that are made available to help in this

process too. We currently have three distance learning labs within our facility that make this very easy and very manageable for us.

And then we focus on our industry certificates.

These are the things that are relatively new to us -or will be new to us in this charter process. We've
already talked about our CNA students. You'll see
the Comp TIA deals directly with the networking
piece. And then we would have the student
certifications that go with our diesel program, our
technician program.

So with that, I will conclude my part of the presentation and I suppose ask Dr. Barrett --

CHAIRPERSON COFFMAN: Let me ask if there is anyone to speak in opposition.

(BRIEF MOMENT OF SILENCE)

CHAIRPERSON COFFMAN: All right. We'll turn it over to you, Dr. Barrett.

DR. BARRETT: And, again, I thank you for this opportunity to speak to you today. You have heard or will hear many different ideas about how a conversion charter would work. I listened on life-stream to Cave City yesterday; I listened to the Virtual Academy from Fayetteville. You've heard us today with this approach. You're going to hear Hot

Springs; Dr. Hernandez is out there raring to go. 1 And our friends from Springdale. This truly is a 2 time where one size does not fit all anymore in 3 education. I have heard the Governor, I've heard the 4 State Board of Education, I've heard the people from 5 ForwARd Arkansas, and they're all saying the same 6 7 thing: there's going to need to be an education today, a new approach, one that not only provides for 8 9 those students that are going to college, but also for those students who are not. Ms. Wetsell I think 10 has made very clear that we feel like in years past 11 12 at Gentry we've worked very hard and have done things 13 that allows our students a good opportunity to go to a four-year program. We also think we have not done 14 15 the same type job in preparing those students who do 16 I heard -- former Senator John Riggs spoke at the AAEA conference and he basically said to us --17 18 and if you know Mr. Riggs and you know he's very forward with what he thinks about things -- and he 19 said to us, "We are investing a lot of money in the 20 21 state in education and we don't feel like maybe we're 22 getting an equal return for business. We need 23 students that will come with those soft skills, ready 24 to go to work, maybe with some type of pre-25 preparation for the jobs that industry and business

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

will need in the state." I heard Randy Zook echo those same sentiments at that same meeting. And while I have said to you that there are many different approaches, different types of charter schools that you're going to be approving or not, there is a commonality there that I believe we all agree on: we need to do a better job of understanding that college is just one of the many options that students have in this future that is really this present that we're living in. More importantly, I have heard from our local partners -- McKee, we have had very close communications; we've been working hand-in-hand. McKee needs diesel mechanics. Airola and I had, from J.B. Hunt, had that same conversation. J.B. Hunt needs diesel mechanics. Patrick Kerrwood, CEO at Siloam Springs Hospital, they need nurses. Our community doesn't have multiple businesses and industry for us to go to and get involved. Our scope is somewhat bigger. Our partners are more of a regional approach. And we do have partners and I think that they are pretty excited; I know that we are.

Finally, I want to say with all these important people, important entities, there's another group of people that I believe, my concern, may be the most

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

important, and that's our students and our parents. And I can say I've worked in education now 40 years; the last 24 has been as Superintendent at Gentry. And of all the things that our school district has done, good and some not so good, I believe this idea of trying to address the needs of all of our students is the most exciting thing and the most supportive that our community has felt in a long time. And I appreciate our community and I appreciate them standing behind us when we do things. Since I've been superintendent at Gentry they've raised the millage three times; we've built buildings. always supported us and when they see the need -- and I believe they have clearly agreed that they see the need -- they will support us in this. I thank you for your consideration today. believe that we are in a point in time in Arkansas education to where there is momentum building from many sectors to balance out college and career readiness, and we would like the opportunity to play our small part in that venture. Thank you. CHAIRPERSON COFFMAN: Thank you, Dr. Barrett.

CHAIRPERSON COFFMAN: Thank you, Dr. Barrett.

Questions? Ms. Pfeffer, we'll start with you.

MS. PFEFFER: Okay. Ms. Winslett, this may be for you. Thank you for your presentation. I had a

1	general idea, but your walking us through that the
2	specifics of your presentation really helped me to
3	really visualize kind of the changes that you all
4	have made. So I'm going to ask a couple of questions
5	about the waivers. With the licensure waiver you're
6	asking to be able to employ instructors in those
7	career areas only. Is that correct?
8	MS. WINSLETT: That's correct. Yes, ma'am.
9	MS. PFEFFER: Okay. So and I'm just trying
10	to think, you would actually be employing people to
11	work at your school who have the career experience
12	and industry certification; they're not licensed
13	educators. Is that correct?
14	MS. WINSLETT: That is correct.
15	MS. PFEFFER: Okay. So they would be your
16	employees?
17	MS. WINSLETT: Well
18	MS. PFEFFER: Or it could be concurrently or
19	they could be employees at like the college as well?
20	MS. WINSLETT: They could be college employees,
21	they could be our employees, or they could be
22	provided to us by one of our partners at no cost to
23	us.
24	MS. PFEFFER: Okay. So, and I'm just trying to
25	think through they would be teaching courses

	24
1	for example, some of the diesel mechanics, that would
2	be part of what students would be taking as their
3	required graduation credit within their career
4	pathway. Is that right?
5	MS. WINSLETT: They would count as elective
6	credits. Yes, ma'am.
7	MS. PFEFFER: Okay. Elective credits within
8	their required units or above the minimum graduation
9	requirements?
10	MS. WINSLETT: Depending on the course, it could
11	be both or either.
12	MS. PFEFFER: Okay. And I'm asking all that
13	because I want to make sure that Ms. Barnes and I are
14	both thinking about that from and Dr. Jones with
15	course codes and licensure codes and things like
16	that. Because in the past you know, normally, if
17	it's done as a concurrent class then that's a
18	different kind of a different thing. But if
19	you know if they're an employee, as an employee
20	just without the certification, then that will have
21	an impact when those students are scheduled into some
22	of those courses. Questions are going to come up
23	about course codes and things like that.
24	MS. WINSLETT: Right.
25	MS. PFEFFER: So

	25
1	MS. WINSLETT: We're following very closely the
2	NTI model and they are operating through the career
3	and tech area.
4	MS. PFEFFER: Okay. Which model?
5	MS. WINSLETT: The Northwest Arkansas Technical
6	Institute.
7	MS. PFEFFER: Okay. We may have a few more
8	questions here in a second. Will all of the will
9	all the high school students be part of the charter?
10	MS. WINSLETT: All the high school students,
11	this will be a charter that encompasses the entire
12	school. And those students that are in 9th and 10th
13	grade will be doing prep work or prep courses that
14	would lead into whatever particular, you know,
15	pathway they choose, whether it is a college pathway
16	or whether it's one of the three that we're proposing
17	today.
18	MS. PFEFFER: Okay. I think that answers mine,
19	but just a minute; I want to see if they
20	MS. WINSLETT: Okay.
21	MS. PFEFFER: have some thoughts on the other
22	areas that touches.
23	MS. WINSLETT: Okay.
24	CHAIRPERSON COFFMAN: Ms. Barnes, do you want to
25	follow-up with that?

1	MS. BARNES: Sure. Okay. So based on Ms.
2	Pfeffer's question, I was under the assumption, I
3	think, or at least I was thinking through it as these
4	students would be utilizing these courses as a part
5	of the requirements to graduate. But it would fall
6	within the elective portion since they would have six
7	elective courses that could be in the career and
8	technical path.
9	MS. WINSLETT: Right.
10	MS. BARNES: Okay. And that's why I didn't
11	MS. WINSLETT: Yes, ma'am.
12	CHAIRPERSON COFFMAN: Dr. Jones, do you want to
13	follow-up on the credits?
14	DR. JONES: I do know you had a list there of
15	all the courses that might've been offsite, and we
16	were in a meeting this week with ACE. Have you had
17	the opportunity to sit down and discuss the different
18	courses, certifications, and all that with them
19	credits?
20	MS. WINSLETT: We have had a few emails back and
21	forth with them, but it seemed prudent to make sure
22	you were going to allow us to do this before we spent
23	hours
24	DR. JONES: That makes sense.
25	MS. WINSLETT: in lining out all the course

	27
1	codes and things.
2	DR. JONES: Well, we discussed some of the very
3	same things and they were very accommodating in
4	working with several schools doing the same sort of
5	thing. And so I just for clarity in my head, the
6	programs that y'all have on-site will be IT, medical,
7	diesel mechanics, and logistics. Correct?
8	MS. WINSLETT: Yes, ma'am.
9	DR. JONES: And then the other programs will be
10	off-site, you have that kids can pursue at NWACC. Is
11	that correct?
12	MS. WINSLETT: The courses that NWACC is
13	providing are all on our site at this time.
14	DR. JONES: Okay. And then, did you say you
15	share students with Gravette?
16	MS. WINSLETT: That's correct, yes, for those
17	DR. JONES: Okay.
18	MS. WINSLETT: Because we can't house
19	everything.
20	DR. JONES: HVAC?
21	MS. WINSLETT: Yes, ma'am. HVAC.
22	DR. JONES: Okay. And I commend you for doing
23	that because certainly school districts can't afford
24	to run all these programs and I think that is a very
25	innovative way to look. I also commend you for

starting with your community data, looking where the jobs are and spending your efforts there because that's what we need to do. Can I help clarify -- or can I ask you about some of the goals you have in your application? When you talk about meeting the ACT, the math and the English, clarify for me what your benchmark is. Is it that when the state sets a proficiency level that you will increase that 1% annually? It's the proficiency level we set? MS. WINSLETT: Yes, ma'am. DR. JONES: Thank you. In this time of transition for MS. WINSLETT: us, it's become -- the water is a little muddy on what our baseline would be. And so we always look to the ADE to set their standards and then we hope to rise above those. DR. JONES: Okay. I'm clear on that now. And then I think having the multiple measures is certainly the industry certificates in those areas, increasing concurrent credit -- those are all good measures by which we can watch the progress of the I'm finished for now. program. CHAIRPERSON COFFMAN: Dr. Saunders.

-- I'm in the unresolved issues, in particular, item

DR. SAUNDERS: Yes.

Looking at the application

1	C6, where it says the students will receive a
2	reduction in tuition to approximately one-third of
3	the cost of other students attending NWACC. Would
4	that cost prohibit some students from participating?
5	MS. WINSLETT: It has not up to this point in
6	time because we have assured that anyone who wants to
7	take a class and doesn't get to that we will be
8	asking, once granted a charter, for support from some
9	of our partners to help with that cost.
10	DR. SAUNDERS: And I wanted to clarify also that
11	you mentioned would and I wasn't clear on this
12	would all students in the high school be part of the
13	charter?
14	MS. WINSLETT: They'll all be attending this
15	school, which will be designated as a charter. It
16	will be their choice on whether they pursue one of
17	those pathways or whether they continue on a college-
18	bound route, taking Gen. Ed. classes with us.
19	DR. SAUNDERS: So every student would be
20	considered part of the charter school. So you would
21	have one LEA? Am I understanding that correctly?
22	MS. WINSLETT: Yes, sir. That's correct.
23	DR. SAUNDERS: Okay.
24	MS. WINSLETT: One LEA. Yes, sir.
25	DR. SAUNDERS: All right. And on the licensure,

it would be -- you asked for a waiver of licensure and that would be limited to which courses?

MS. WINSLETT: The vocational courses specifically.

DR. SAUNDERS: Okay. One more follow-up, if I may. I think this one might be for you, Dr. Barrett, concerning the waiver on the teacher's salary fund and the warrants void, 6-17-908 and 919. Could you just explain the need for that?

DR. BARRETT: When you are beginning to deal, of course, with people that don't normally fall on the salary scale that we're required to have by the state then there becomes some questions -- for example, on an unlicensed teacher, where would they fall? Are they a classified employee? Are they certified? Obviously, you know, you can only pay out of the teacher's salary fund, \$1,000, you know; you guys know how that works. So what we tried to do was to give ourselves as much flexibility as possible so that we didn't inadvertently violate some of the state standards in asking for that waiver.

DR. SAUNDERS: And just to clarify that, there is not a limit on the funds that are available within that -- those particular funds; so therefore, it would not take away from the general teaching

	31
1	salaries so-to-speak.
2	DR. BARRETT: No. No, not at all.
3	DR. SAUNDERS: That's all for now.
4	CHAIRPERSON COFFMAN: Ms. Liwo.
5	MS. LIWO: This mic and I are not friends. But
6	I just needed a simple clarification. I want to make
7	sure that the non-licensed teachers that you have
8	will go through criminal background and child
9	maltreatment checks, because I didn't see that
10	anywhere.
11	DR. BARRETT: Yes, ma'am. And that's stated in
12	the application, I believe.
13	MS. LIWO: Okay. I'm sorry; I missed that.
14	DR. BARRETT: Well, it's 123 pages; it would be
15	pretty easy to miss. But, yes, ma'am, it is part of
16	our application.
17	MS. LIWO: Okay. Thank you.
18	CHAIRPERSON COFFMAN: Dr. Barrett, I'd like to
19	recognize whoever submitted the Town Hall notes.
20	Who's the recordkeeper for the Town Hall notes?
21	MS. WINSLETT: Renee Bradshaw.
22	CHAIRPERSON COFFMAN: She does a fabulous job.
23	MS. WINSLETT: Yes, she does.
24	CHAIRPERSON COFFMAN: They were very helpful to
25	me as I was reading through this application, to help

me understand -- or put the application into context.

So kudos to her; she did an excellent job.

In looking through your notes I see that you were really diligent in working with the community on this project. But we did receive a letter from one of your educators that did not feel that maybe the communication had been as aggressive with the staff. So could you kind of talk through the kind of meetings you had with staff to keep them informed all along the process?

MS. WINSLETT: Absolutely. Of course, they're all invited to any of the outside meetings that we host in the evening. I also went to the high school in the spring and did a specific presentation to them explaining the whole charter piece. And then I believe again in the fall we had another conversation.

DR. BARRETT: And let me follow-up on that, as well, Ms. Winslett. They had an opportunity to actually look at that email this morning. Ms. Clay shared it with me. The teacher that sent that is one of our very best teachers, a good guy, a long-time employee of our district. And I read that -- and this is the first thing I thought, "Thank God, we all live in America." Okay? If we all thought the same

thing every time, it wouldn't be that great of a place to live. But I am going to say this: in that application somewhere -- I believe, Ms. Liwo, it's in those 123 pages -- part of our documentation you'll find a letter that I personally wrote to staff. And at the end of it it says, "Please come to the meeting." It also said in that last paragraph, "Hey, if you're not comfortable about coming to meetings and asking questions in public, if that makes you nervous, come to my office. Come down and sit and talk with me one-on-one and I'll answer any questions you have about it." The person that sent you that email did not avail himself of that opportunity.

CHAIRPERSON COFFMAN: And I certainly understand that. I just want to continue to encourage you to reach out to your educators. And I think you said it very well earlier, "Times they are a-changing."

DR. BARRETT: Yes, they are.

CHAIRPERSON COFFMAN: And so sometimes it takes people a while to process it, think about it, and --we've been doing education the same way for a long time; people are really comfortable in their knowledge and expertise and making changes while it is unknown what the education world is going to look like is going to continue to require that constant

conversation with people. So I invite you to reach out to your staff again and just keep supporting them. It's big changes.

Ms. Barnes.

MS. BARNES: Well, you just hit on it. What I was going to ask though is approximately what percentage of your staff would you say is completely comfortable with this move to a conversion charter since it does encompass your whole high school?

MR. HARPER: I would answer that by -- there are some that are uncomfortable.

CHAIRPERSON COFFMAN: Your name, sir?

MR. HARPER: Brae Harper, high school principal. There are some that are uncomfortable. I think it's the unknown, like you said. But we've had a lot of support, as well.

MS. BARNES: Well, let me ask it this way, because, I mean, I'm a firm believer. I understand change. And I say this often, it's usually only difficult until you change. But when you have a lack of buy-in sometimes then you struggle in areas where you wouldn't have to. And so I'm simply -- you know -- I asked approximately what percentage of your staff and you said some. Majority, minority, about half-and-half?

	35
1	MR. HARPER: If I had to put a number to it, I
2	would say 70% are in support.
3	MS. BARNES: Okay. Thank you.
4	CHAIRPERSON COFFMAN: Dr. Jones.
5	DR. JONES: Can you and this is Ms. Winslett
6	probably. Let's talk a little bit about core
7	classes. Do you intend to move to online instruction
8	for your core classes in the future?
9	MS. WINSLETT: We do have we utilize Virtual
10	Arkansas for some now, especially with scheduling
11	issues. You know, we have a requirement of a digital
12	course for every student before they graduate and so
13	we utilize it to meet that need. But as far as
14	moving out of our core classes and going completely
15	online, absolutely not.
16	DR. JONES: Okay. Thank you. And then the
17	second question; I think you've clarified this in
18	your application. You intend to go through the
19	regular process we have established to get blended
20	courses approved?
21	MS. WINSLETT: Yes, ma'am.
22	DR. JONES: Okay.
23	MS. WINSLETT: We see a very nice fit with oral
24	communication in the career ready class. And we have
25	a gentleman teaching that who is also certified for

1	oral	comm.

DR. JONES: Okay.

MS. WINSLETT: And so he's already prepared a crosswalk for me and we'll follow the process by the State Department to ask for that.

DR. JONES: Okay. Thank you.

CHAIRPERSON COFFMAN: Dr. Gotcher.

DR. GOTCHER: Good morning.

MS. WINSLETT: Good morning.

DR. GOTCHER: In your application you listed three innovative pieces, part of the application, but number one was apprenticeship opportunities. That's not necessarily a new or innovative concept. So how -- explain more of why or how the apprenticeship opportunities would be something more innovative than a traditional school that might have an opportunity like that?

MS. WINSLETT: Well, it's new and innovative for Gentry. We have not had an opportunity for our students to go out and work as a partner with business and industry, for them to have that opportunity to maybe become an employee for that company and employer. You know, I think it's so great for our local business and for those that are without, outside our local community, to get to try

1 someone out before they want to hire them. And at the same time, that student gets to see the real-life 2 expectation in that business and industry. 3 DR. GOTCHER: And to your point earlier, that's 4 an excellent opportunity for a student to develop 5 those soft skills. 6 7 MS. WINSLETT: Yes, sir. DR. GOTCHER: Because we all know that we want 8 9 to hire people in our world more than just the cognitive knowledge, how they can get along with 10 others and show up to work on time and, to your 11 12 points earlier. Sp that's real intriguing; I think 13 that's awesome for Gentry kids should this work. 14 MS. WINSLETT: Thank you. 15 CHAIRPERSON COFFMAN: Dr. Saunders. 16 DR. SAUNDERS: Yes. On one of the waivers for the required clock time for unit of credit, I'm just 17 18 having a tough time trying to bridge how that would be required under your proposal. 19 20 To free up time for students to MS. WINSLETT: 21 be able to be outside of us and involved in that 22 internship opportunity we want to have the ability 23 that if a student can excel through self-paced 24 learning to be able to complete a course without

having to have 120 hours of seat time involved.

24

25

DR. SAUNDERS: What type of course would that apply to, I think is what I'm asking?

MS. WINSLETT: Well, an assortment of courses, not necessarily English 9 or 10 but when you start looking at electives that you could work through either in digital delivery or in blended learning situations, and you meet the standards and you're done.

DR. SAUNDERS: Okay. That's all for now. CHAIRPERSON COFFMAN: Ms. Pfeffer.

MS. PFEFFER: So following up on your answer to Dr. Saunders, with the -- because when I was reading that I was thinking in terms of the internships, you know, students needing that waiver there for them to be able to complete those. And you say you're not intending it for maybe that to be part of the core So are you pretty much tying this waiver to classes. the career opportunities to that part of it? Because I guess in asking about that, if there are some hesitations and reservations for your faculty, could -- or potentially could their day look very different with the way they're instructing students and the students actually become more self-paced? Or is, you know, pretty much this waiver going to apply to your career courses?

1	MS. WINSLETT: We'd want to limit it solely to
2	our career courses. And when you think back years
3	ago we had opportunities for students and would've
4	utilized them for those in a crunch to do
5	correspondence courses or independent courses, and
6	those were not specifically tied to 120 hours of
7	that. And so we are living in a day where technology
8	is available and we could have some courses, as
9	needed, for students that were in the core area that
10	would free up their time.
11	MS. PFEFFER: Okay. So this very well could be
12	waiving that required time for any course offered at
13	the high school?
14	MS. WINSLETT: We would certainly like the
15	ability.
16	MS. PFEFFER: I'm asking because I know that's
17	probably going to lead to some other questions. And
18	as we're thinking through this, I just don't want six
19	months down the road for these questions to come up
20	and create issues, so
21	MS. WINSLETT: Certainly.
22	MS. BARNES: Okay. So I think Ms. Pfeffer was
23	punting to me and I did take note of your response.
24	I wanted to give her time to finish doing what
25	she was doing; she might not hear me.

Okay. So I was listening to your response and I believe you said not necessarily 9 or 10 English.

MS. WINSLETT: Uh-huh.

MS. BARNES: So I tried to put that into context in my mind because we already talked about basically this is a conversion charter request for the high school and that the 9th and 10th graders primarily, unless they are probably accelerated in their career paths, may or may not be engaging into these particular pathways.

MS. WINSLETT: That's correct.

MS. BARNES: So quite naturally, then, you know, my ears did perk up a little bit more because we are talking about consideration of a waiver that ultimately, once granted, could give you the authority to just -- any class. That makes me uncomfortable. I'm just -- you know -- I have to go ahead and state that. So maybe you could try to help me with my comfort level with that and talk me through how you would exercise cautions in insuring that we are not opening a door to simply say, "Okay, when you finish or meet all of the established standards or skills you can move on." I mean, it's a possibility that this could open the door, in my mind, for any student who may come through, finish

24

25

up, and move on. I don't want to limit a student's opportunities and I don't think you would necessarily put the district in a situation where you would not have students who would be able to mature in their educational experience. But I need a little more information now, since we're talking about core courses or all courses. I was under the assumption it was more in line with the career and technical pathways.

MS. WINSLETT: Okay. Let me start by saying while I'm very passionate about this opportunity for our students and believe wholeheartedly in it, our first responsibility is to keep our school out of any kind of academic distress. And I will not be able to do that if I just willy-nilly let children move through courses when somebody says, okay, they've ticked that box. So as we work through these courses and they take these courses, there are interim assessments given and we look to see how students are progressing. And so if they've completed a selfpaced course, it would be once they had proven that they were proficient in that area. Does that help any? And I'm not looking to send masses of children through those.

MS. BARNES: Thank you.

And I think what would help me 1 MS. PFEFFER: feel more comfortable with it is if you tied that to 2 the goals of your charter. So with what you were 3 describing there -- because there have been charters 4 where -- for example, that were focusing on 5 standards-based grading or -- I can't recall what I'm 6 7 trying to explain. But it almost sounds like this could be almost a separate goal from the real intent 8 9 of your charter here to develop these career pathways 10 and provide these opportunities. So in order for a student maybe to move through a self-paced and 11 accelerate their learning, how does that tie back to 12 13 the goals here for this charter for them to be able to get into these career pathways? That would help 14 15 me, I think. And I think if it's done along those 16 lines we would feel better about knowing there's a process in place where all of a sudden a certain 17 18 course won't be completed in three weeks. Does that make sense, what I'm asking? 19 20 MS. WINSLETT: Maybe you could ask me -- what do 21 you need me to do to make this happen? 22 MS. PFEFFER: I think my thought is if a student 23 needed to complete -- in order for a student to be 24 able to do an internship where they were going to be

off-site for two hours a day, they needed to complete

25

a particular course in an accelerated manner; that way, it's linked to the whole goal of getting them to a career pathway. Otherwise, my question is would there be a time that, you know, a science student could just complete their science in three weeks?

Because this waiver would grant you that option.

MS. WINSLETT: Well, I can assure you there's not -- I haven't come across a child who could finish a requirement in three weeks for any course that's offered at the state level. I would say to you that we put this in place as an option to help students to be able to do those internships once they are there. We have 32 opportunities for credits and 24 is what our school requires. Some of those credits though are assigned to activities for those students to take place in. So we just need to -- and, again, on a limited basis -- and if we need to establish a number, a child would not take more than X-number of self-paced classes, I don't think that would be a problem at all.

DR. JONES: I think the discomfort that you're hearing is competency based instruction, which is -- and I know that you already know this; it's very extensive work in developing competencies and assessments. And it's a pretty comprehensive system

and we see it done and done well and it's part of personalized learning. I guess that with the lack of information within the application regarding that, that's probably lending to some of the discomfort. It's not that we don't support competency-based instruction or promotion; it's just a very new concept and it would take great trust and recognition that you know -- that the whole system has developed for that. Does that help or does it confuse?

MS. WINSLETT: Again, I would say that we're going to do whatever we need to do to make this happen.

CHAIRPERSON COFFMAN: Let me see if I can fish us out of this. So, Panel, are you asking them to consider this waiver in light of core classes?

MS. BARNES: I think that's a lot of my discomfort, because it covers grades 9-12. And in its current state at some point or juncture along the way it could easily apply to any core course or any child. And that does give me some pause because, as Ms. Pfeffer stated, and several others, we're looking at the core foundations and preparatory work for students to be successful. And I know that you will take great care in that, but it also opens the door because we set precedents when we make decisions.

And so that's what's, you know, concerning me.

Because, you know, in 9th grade we're looking at core

DR. JONES: Have y'all implemented standardsbased report cards at the lower levels? In what grades?

MS. WINSLETT: No, ma'am.

courses and I'm uncomfortable.

24

25

DR. BARRETT: Let me talk to this issue just a little bit, if you'll allow me. And what Ms. Barnes said is very valid. You said earlier this morning when we were talking about the teacher that sent the email, there's a lot of us that are very traditional, and I've already confessed 40 years in the business. Okay? So I understand that concern. But, you know, we all are breaking some new ground here. Okay? We have said to our teachers for 40 years "let's don't teach every one of those students the same way. you've got some that's already got through, let's give them enrichment activities within the classroom." So what we really did was we let them move ahead while we dealt with the students that hadn't reached proficiency. You know, if you to approve our charter say limit it to those non-core classes, we'll do that. But I don't want to give that away too quickly because we are trying to change

2

23

24

25

the way we're doing things in education. So what if you have a student that can master the science standards and they can demonstrate proficiency? We're going to leave them in that classroom the rest of the year with that teacher till the rest of the students are able to demonstrate that? That's all I'm saying to you, and I may not be clear. We'll do what you suggest because in all of our lists of partners that we talked to you about being partners with us, we consider the Arkansas Department of Education a partner. And if you approve our charter, we're going to consider you a partner in our charter I'll just let -- instead of trying to read school. pink notes, I'll let Ms. Winslett do her own pink notes. Please, talk about it. No, seriously; talk about what the means.

CHAIRPERSON COFFMAN: I think, Dr. Barrett, just for a point of clarification, we are breaking new ground; we just want to make sure you've assembled all the right tools to do it successfully.

DR. BARRETT: I understand.

CHAIRPERSON COFFMAN: So we're a little cautious, and it's not that we're not willing to go out on the edge with a school district. We just want to make sure that we've put in as many parachutes as

possible when we take that leap.

23

24

25

MS. PFEFFER: And can I just respond to Dr. Barrett, because -- and I don't disagree with anything that you said. But my question would be -the situation you described, if a student has met all of the competencies or requirements for instruction in the science class, do we want to hold them there? But, to me, that was not really clear in your charter and I think that's where we're struggling; it's because that's kind of emerged today. So I think part of this negotiation is making sure that we all really fully understand. And so my question would be: is your faculty prepared to move to that kind of a system? I mean, do you foresee that there are going to be students in your math, English, science classes this next school year who might complete the course in advance of the school year? And if that is part of this, you know, are your teachers prepared for that? And, you know, I don't think that it's a matter of anybody necessarily being against it; we just want to make sure that when the standards report comes out or, you know, there are questions that we don't say, "Well, you know." And I was reading here, it says, "If mastery is determined, students would advance on to the next course in their individual

education plan." So maybe the question goes back to what does that individual education plan look like, how is that structured for each and every student and does that begin with their 9th grade courses. So --

DR. BARRETT: Guys, you know, those of you that's known me for any length of time, that sometimes, you know, I can be the bull in the china shop. But in listening to the conversation here and in reading and understanding my pink Post-It note, the prevailing opinion on our team seems to be, Ms. Barnes, we should take your suggestion, and Ms. Pfeffer, and limit this to the non-core classes. Education hopefully is not going to end in this same five-year period that our charter is going to exist and we would have an opportunity to come back in five years -- after demonstrating it working successfully in the non-core classes perhaps to come back and ask that that be extended to all classes. But for this point in time please let the record show that we are limiting this to those non-core classes.

DR. SAUNDERS: I want to jump in on that. And I think that this type of system -- I commend you for looking down this path. I think it's a good way to look. I think there are -- as people have mentioned, there's lots of structures that need to be in place

1	for that to take place. And also I think you would
2	have the opportunity possibly to employ some of that
3	in the non-core classes and perhaps get some of the
4	learning out of the way. And you wouldn't
5	necessarily have to wait the five years before coming
6	back for an adjustment. We just felt that that plan,
7	I think, would be in place where you could come
8	before us and ask for that at a later date.
9	CHAIRPERSON COFFMAN: Dr. Barrett, you could
10	work with our Charter Office at a later time to
11	consider an amendment before your five years.
12	DR. BARRETT: Okay. Thank you.
13	MS. BARNES: Thank you. I appreciate you all
14	indulging our concerns.
15	CHAIRPERSON COFFMAN: Any other questions or
16	comments?
17	MS. PFEFFER: The only thing I was going to say
18	to Mr. Harper is just to work closely with our office
19	and with Thomas Coy in Learning Services in terms of
20	course codes, if there's any questions between course
21	codes and licensure codes, just as you work on that
22	master schedule early on so that we can troubleshoot
23	any areas.
24	MR. HARPER: (Nodding head up and down.)
25	CHAIRPERSON COFFMAN: Ms. Clay, are there any

issues remaining regarding this request?

MS. CLAY: A few issues with the waivers and I think that I can go through them and then they can just agree to them at the end. The first one is they requested a waiver to imbed the oral communications curriculum. I believe we heard from them today that they were going to go through the course approval process. So if that's the case, then they would just need to confirm that they no longer need that waiver.

The second one is in school day and attendance they also need a waiver of Section 10.01.4 of the Standards for Accreditation. This is the companion piece to 6-16-102 that deals with six hours of instructional time.

And the last one is under the required clock hours that you all discussed. This is really unrelated, but 6-18-213 -- they only need a waiver of (a)(2) of that section. That deals with the teacher actually visually noting the students' attendance in class. If they were to get a waiver of the entire section of 6-18-213, it would look like they wouldn't even have to take any attendance. So I think we need to limit it just to that visual notation of the student being in class. They would have other ways to document the students' attendance. So if they

	21
1	will agree to those, I have no remaining issues.
2	DR. BARRETT: We agree.
3	CHAIRPERSON COFFMAN: Dr. Barrett, will you
4	speak into the microphone for the record?
5	DR. BARRETT: Oh, yes, ma'am; my apology. I
6	certainly have great respect for Ms. Clay and her
7	expertise and we certainly agree with the suggestions
8	that she made.
9	CHAIRPERSON COFFMAN: Any other? All right.
10	Then I'll accept a motion regarding the request for
11	Gentry High School Conversion Charter.
12	DR. SAUNDERS: So moved.
13	MS. BARNES: Second.
14	CHAIRPERSON COFFMAN: To approve?
15	DR. SAUNDERS: Yes, ma'am. I thought that's
16	what you said.
17	MS. BARNES: She said she'd accept a motion.
18	DR. SAUNDERS: Oh.
19	CHAIRPERSON COFFMAN: I have a motion from Dr.
20	Saunders and a second from Ms. Barnes to approve the
21	request for Gentry High School Conversion Charter.
22	Any questions or comments? All those in favor of the
23	motion?
24	(UNANIMOUS CHORUS OF AYES)
25	CHAIRPERSON COFFMAN: Any opposed? The motion

	52
1	has passed.
2	If you will wait patiently, our panel members
3	will type their responses and we'll go around and
4	read those to you aloud for the record.
5	DR. BARRETT: If I might have one quick word
6	before you do?
7	CHAIRPERSON COFFMAN: Go ahead.
8	DR. BARRETT: Our vendor, one of our partners,
9	McKee Foods, Little Debbie, we're going to work on
10	that truck. They're up here on the table for you at
11	your next break.
12	MS. BARNES: I'm so thankful you waited.
13	CHAIRPERSON COFFMAN: In the future, we'd like
14	to meet Little Debbie.
15	MS. WINSLETT: Please know he refrained from
16	passing those out till you voted. Thank you very
17	much.
18	CHAIRPERSON COFFMAN: We'll open those up to the
19	audience, as well.
20	All right. If our board members will another
21	thing, Dr. Barrett, while they're typing in, the
22	camel at the Wilderness Safari is aggressive. And so
23	I hope that you will be as equally aggressive in
24	helping to grow your own on those educators. Because
25	I'm very excited that your application includes

	53
1	educators as one of those groups of future employers
2	in your plan, that we are thinking about education,
3	not just welding and all those other great jobs. But
4	education is one of those great jobs also.
5	DR. BARRETT: Absolutely.
6	CHAIRPERSON COFFMAN: Dr. Saunders.
7	DR. SAUNDERS: Yes. I voted for this as an
8	opportunity to provide the needed personalized
9	education for the students.
10	CHAIRPERSON COFFMAN: Thank you. Dr. Gotcher.
11	DR. GOTCHER: I voted for the motion to approve.
12	The applicant has presented a plan for a quality
13	conversion charter that serves the individual needs
14	of the students and the community. I am encouraged
15	by the plan.
16	CHAIRPERSON COFFMAN: Mr. Lester.
17	MR. LESTER: This applicant has the resources
18	and the program and the partnerships currently in
19	place to meet the goals as outlined in their
20	application.
21	CHAIRPERSON COFFMAN: Mr. Rogers.
22	MR. ROGERS: I voted for the motion because the
23	conversion charter allows the students more
24	educational and job opportunities in the local
25	community.

	54
1	CHAIRPERSON COFFMAN: Ms. Barnes.
2	MS. BARNES: I voted in support of the charter
3	because I believe that this is an excellent
4	opportunity to open doors for innovation to merge
5	with the current educational activities in this area.
6	And it allows students to have real world work
7	experiences contributing to community growth.
8	CHAIRPERSON COFFMAN: Ms. Pfeffer.
9	MS. PFEFFER: I voted for the charter. This
10	charter will be good for kids and for the community.
11	CHAIRPERSON COFFMAN: Dr. Jones.
12	DR. JONES: I voted for the charter. The
13	charter applicants are commended for their
14	collaboration with higher ed. and the business
15	community. They have developed career pathways that
16	are of high need and high pay and provide additional
17	options for students.
18	CHAIRPERSON COFFMAN: Ms. Liwo.
19	MS. LIWO: I voted for the charter. I have the
20	same reasons as my other panel members have
21	mentioned.
22	CHAIRPERSON COFFMAN: Thank you.
23	Congratulations to the Gentry High School
24	Conversion Charter School. And congratulations to
25	the audience and you are welcome to Little Debbie

	55
1	snacks.
2	DR. BARRETT: Thank you.
3	CHAIRPERSON COFFMAN: You're welcome. We'll
4	pause for a 10-minute break.
5	(BREAK: 9:50-10:05 A.M.)
6	A-2: HEARING OF DISTRICT CONVERSION PUBLIC CHARTER SCHOOL
7	APPLICATION: HOT SPRINGS WORLD CLASS HIGH SCHOOL
8	CHAIRPERSON COFFMAN: Ms. Boyd, you are
9	recognized for action item two. We are having a
10	great day today.
11	MS. BOYD: Yes, we are. Thank you, Madam Chair.
12	I'm enjoying my cupcake from Little Debbie. Item A-
13	2, Hearing of District Conversion Public Charter
14	School Application: Hot Springs World Class High
15	School. Hot Springs World Class High School is a
16	proposed district conversion public charter school.
17	The applicant is requesting to serve students grades
18	9-12 with a maximum enrollment of 1200. ADE staff
19	reviewed the application; the concerns were shared
20	with the applicant for response. The application,
21	the ADE evaluation, and the applicant's response are
22	included for your review. And here from the Hot
23	Springs World Class High School we have Principal
24	Lloyd Jackson to begin their presentation.
25	CHAIRPERSON COFFMAN: If all the representatives

from Hot Springs World Class High School and anyone speaking in opposition will please stand to receive the oath; raise your right hand. Do you swear or affirm that the testimony you're about to give shall be the truth, the whole truth and nothing but the truth?

(ALL SPEAKERS ANSWERED AFFIRMATIVELY)

CHAIRPERSON COFFMAN: Thank you. Mr. Jackson, you are recognized.

MR. JACKSON: Good morning to the Chairman and also to the Board -- the Panel. With us today we have -- I am Lloyd Jackson, principal of Hot Springs High School, and excited to be the principal possibly after today's opportunity of the Hot Springs World Class High School. We have presenting with us today our superintendent Dr. Mike Hernandez, also our Director of Secondary Education, Dr. Stephanie Nehus; our district GT Coordinator is here as well, Becky Rosburg; our IB Coordinator, Paula Redding; our Career and College Counselor at Hot Springs High School, Ms. Amy Schneider; and our Career and Technical Coordinator, Mr. William Harris.

For the next few moments it is our goal to describe an opportunity for our students that will give them a choice in their future as they pursue

excellence in all they do. We hope to inspire young minds and open them to the possibilities of a future which is within reach for each of them along relevant pathways toward and beyond graduation. Springs World Class High School wants to do more than provide a high school diploma. It is our desire to provide our students with exposure to careers as well as experience in their interested fields of study, having our students leave with technical certificates which gives them a leg-up amongst graduates in the Hot Springs community. Hot Springs World Class High School: a place where students are going to be excited about their education, take ownership of their education, and the community and students see and understand the value in graduating from Hot Springs World Class High School.

Let's take a journey to this place called Hot Springs World Class High School, a school of choice, excellence and opportunity.

DR. NEHUS: Good morning. My name is Stephanie Nehus; I am the Director of Secondary Education for Hot Springs School District, and I'm excited to be here today to share with you our journey. As we begin, of course, as you heard earlier this morning, the focus has been so much on getting everyone ready

to go to college which is not reality for 100% of our 1 students, and we realized that, and so preparing 2 everyone for a career is a reality. So we want to 3 shift that focus to 100% career readiness, whether 4 5 that be through a path that takes a four-year college route, a two-year college route, a technical school 6 7 route, or they leave us directly to the workforce. 8 We looked at our graduation rate and that was really 9 the data that we dug into, and we saw that 77% of Hot 10 Springs High School in the 13-14 school year graduated in the four years on time. That is not 11 12 acceptable to us. And so what can we do to encourage 13 students, to inspire students and to help them to see that graduation is important, and that numbers will 14 15 You couple that with our college-going rate of 32.9%; so 77% of our students who graduated only 16 32.9% of them went directly to college. Again, that 17 18 is not acceptable for us. And we looked at the unemployment rates by education level and it's clear 19 20 that those students who do not graduate, they have a 21 14% unemployment rate versus those students who do graduate that comes to like 10%, and then those who 22 23 do go on to get some sort of college that then drops 24 amazingly as well. So that whole concept of the 25 value added diploma where they're leaving us with

1 college credit, concurrent credits, where they're leaving us with industry certifications, and when 2 they're leaving us with workplace readiness skills we 3 know it's going to set them up for success in their 4 5 future. And so we looked at the research and we tried to determine what direction do we want to take 6 7 our charter school that would make it different than 8 that traditional school. And the research is clearly 9 stating that the academy concept results in those 10 significant positive impacts on graduation rate, on academic outcomes, on student behavior, and on post-11 12 high school outcomes. In a recent northwest Arkansas 13 Tech Summit, they highlighted the need for those skilled technical workers as they leave the high 14 15 school level. And so our timeline began and we did 16 begin this whole discussion back at the beginning of the 2014-15 school year where we started just talking 17 18 to our staff and saying, "If there were no rules, if we could do anything we wanted to do for our kids, 19 20 what could we do? What are some innovative ideas?" 21 And everything that came out of that was more 22 vocational offerings, workplace skills, internships, 23 the ability for our students to do more than they can do in the traditional cookie cutter approach to 24 25 education, the 8-hour days, everyone is taking the

same thing. And so we began this process and we did meet as a steering committee beginning this past summer and we met every two weeks up until that charter application deadline. And on that steering committee we knew it was important to have our key stakeholders, so we had district and building administrators, of course, but we had school personnel; we had teachers, we had students, we had parents, and we had our community. We had the Chamber of Commerce represented and we had higher ed. with our partnership currently with National Park College and National Park Technical Center.

In hopes that we will be approved, we are already thinking of implementation. We knew that was important. We've got the application submitted. We knew the next step was to start deciding how are we going to make this happen and how are we going to make this happen by 2016-17. And so we've begun implementation meetings as to what this will look like; we've started our business partnership conversations. We're very excited with the progress we've made with those, and we'll share some of those as we go through our presentation. We've got phases for implementation because we realize we can't do everything beginning 2016-17; we're going to have to

2

3

4

5

6

7

8

9

10

11

21

22

23

24

25

implement this in phases. And we know that scheduling is going to be important because we're going to start scheduling for next year end of February, first of March, and so we've got to be ready for that and what that will look like for our school.

So here are our phases. In phase one we do want to implement our innovations and some of those innovations you may ask are they truly innovations. And so first thing in phase one is the academies and we do have a freshmen academy that we began last year, so we're in the second year of that. However, adding the career academies is going to be something very new for us and we feel that that is an innovation. We will be having pathways in these academies, career pathways. And we are very proud to be a K-12 IB, International Baccalaureate school district and we are the only K-12 school district in the state of Arkansas, and so we're really proud of But what's new -- and we put that as an innovation, being IB -- what's new is that we've added the career related program. We are the first school in the state of Arkansas to implement that and there are only 50 schools in the nation. brand-new with the International Baccalaureate

2

16

17

18

19

20

21

22

23

24

25

organization. And so that is very exciting to us because it merges perfectly with this whole concept of career academies. We're going to imbed courses and we did ask for some waivers in that and we do realize that we don't need waivers to imbed courses, so we will be going through the ADE approval. we've actually decided that we're going to be asking for course approval for a citizenship seminar which would imbed civics and oral communications. we're beginning that process of getting that course approval ready to get that approved by the Department of Ed. And then internships -- and that's that third innovation and that will be new to us. And we realize internships isn't really a new thing, but it's going to be new to us. And those connections with the business community, as well as not only students going out and interning but actually bringing business in and doing seminars, being mentors in our school building. All of that fits into that piece.

In phase two we're going to add additional pathways as student interests change and as our business community needs change, because we realize that will take place. We're going to have advisory committees established for each academy with the

business and industry, with our school stakeholders, with our community and our parents involved. And then we hope to establish the night school blended learning opportunity possibility. Extending every opportunity for our students to complete credits outside of a traditional school day may require those waivers of seat time and that full day attendance for us. But, again, that whole concept of having internships that might need to take place during the school day and students might need to be doing their schooling after regular school hours.

And phase three would be the possibility of satellite programs, students actually going off our site possibly for cosmetology, those types of areas. Again, we want to focus on the needs of our community and the businesses. Cosmetology is a huge interest to our students, but it's not a huge need in the business community at this stage. So that's, again, a phase three possibility for us.

We shared our proposed bell schedule, again going ahead and adding that zero hour, that extended hour, so new opportunities for our students to get what they need to be successful.

Here's what our academies are going to look like. Grade 9 is our freshman academy. The life of

2

23

24

25

a 9th grader is going to be pretty typical. going to change a lot with this conversion charter. They will be involved in the freshman academy; they're going to be working on those core classes and electives that they need to get taken care of in the They do have mentoring there and some 9th grade. one-on-one individualized attention and they will have a part of this four-year, six-year plan. that will be where they'll be established. In grades 10-12 we have determined we're going to begin with these four academies: liberal studies, education and healthcare, business and technology, and industrial technology. And we chose these based on surveys of our students and surveys from our community.

In the liberal studies, that's where we see our current IB diploma program primarily fitting; not that an IB diploma level student could not take courses within any of the career academies, but we do already have pathways established and those are listed here up on the slide. And we are thinking ahead to that phase two, food production. We know we want to add that. We're already in conversation with Chartwells, our food service management. Those students will be able to do some internships right there on our campus and get that -- those

certifications needed for food production and that 1 experience. Education and healthcare, we also see a 2 need to grow our own. We will be adding teaching and 3 training, we hope, in the 2016-17 school year. 4 hopefully -- we already have partnerships with 5 National Park College. We are talking with Henderson 6 7 State University, since they now have a satellite center in Hot Springs. And our own district, we're 8 9 looking to utilize our students to go down and intern in our elementary schools, get their paraprofessional 10 certification, and be able to provide some 11 interventions for our students at that level. 12 13 Business and technology, phase two, I'd like to highlight the mobile application development. We are 14 15 thrilled about the computer science initiative by our 16 Governor and we are having great success with our Essentials of Computer Programming class this year 17 18 and our students are begging for "what can I do next." And so we are adding a definite pathway for 19 them that they can continue to pursue their dreams in 20 21 that area. You'll also see on these slides the IB 22 career related programs. We see those fitting --23 those classes, those requirements fitting very nicely 24 in all of these academies and these career pathways. 25 Industrial technology -- again, we have phase two

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

opportunities there, as well as other pathways that we already have ready to go. Welding is one that I'll highlight here. That could be available through Job Corp, and Job Corp is located in our district currently. It would possibly necessitate the flexibility of full-day attendance and seat time though for our students to be able to go out to Job Corp, get into that program and then also handle their credits at the high school.

And so I want to share with you one of these pathway examples. We have them prepared for all of our career pathways that we have established. this shows that we have a plan in place -- this is the four-year and even beyond plan for each child. We have it connected to career cluster, education and training; we have the core curriculum credits there, plus their additional credits, and we have what a 9th, 10th, 11th and 12th grade year will look like. And I highlight this because you see -- in that 11th grade year in our current eight period day you'll see a line in that very last column because students will have been able to receive their credits that they need and that's where we see those internship openings in their schedules already set to go. We have the post-secondary piece so they see what

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

technical center programs, what community college programs, what university programs would apply to this career pathway. And even scrolling down just a little bit you can also see what the careers -- we may not be able to scroll down today -- there you go. You can see the careers that would be possibilities ranging from this pathway and the possible industry certifications. We want our parents and our students to know if this is the pathway you want to pursue these are the opportunities that you're going to have as you go on into your future. So a typical day for a sophomore, junior or senior would be completing those core credit requirements and then as they get those items completed then going to internships in the afternoon or even after school, before school, those types of scenarios.

Talked a little bit about business partnerships

-- we are excited about the business partnerships and
progress, and the business partners are excited to be
having these conversations with us. We are
collaborating with Fountain Lake who is also a
conversion charter school in Garland County to meet
with business and industry partners to share our
needs, what we would need for our students in their
internships, and for them to share with us what they

1	need from us for a successful experience. If we
2	cannot for age restrictions for example, Oaklawn
3	concerned with age of our students, we've already
4	talked with them about them coming in and providing
5	seminars in our school building or being mentors to
6	our students that might be in that career pathway for
7	general management. So we're really excited and
8	we've got business partners already in communication
9	in every academy and we're trying to get one for each
10	pathway, as well.
11	And so we'd like to finish just sharing a video.
12	This video was created by our students from digital
13	communications and we're really excited about that.
14	And due to technology we're going to shift and go to
15	Plan B.
16	(COURT REPORTER'S NOTE: A video was shown. It
17	is available for viewing on the ADE website, under
18	the archived videos the Charter Authorizing Panel
19	meetings.)
20	DR. NEHUS: That completes our presentation, and
21	Dr. Hernandez will follow-up in our 5-minute time.
22	CHAIRPERSON COFFMAN: Thank you. Anyone to
23	speak in opposition?
24	(BRIEF MOMENT OF SILENCE)
25	CHAIRPERSON COFFMAN: Dr. Hernandez, you're

recognized.

SUPT. HERNANDEZ: I'm also doing lights back here.

CHAIRPERSON COFFMAN: Meeting the needs of the people.

SUPT. HERNANDEZ: That's right. I'm folding chairs out and doing lighting and all that. Good morning. Mike Hernandez, superintendent of Hot Springs School District. It's good to be here and be able to follow that presentation. I think our staff did well. You know, essentially what we're here trying to do in Hot Springs School District is -- and I feel like we've done that -- is we've got this spark. You know, we've got people from the business and industry community; we've got people from higher ed., adult ed.; you know, we've got all these people that are now taking a look at Hot Springs and being interested and saying, "What are the possibilities for our school district?" Now, you know, is everything perfectly fleshed out? No. You know, we've got a lot of conversations and a lot of long roads to go to get things where they want to be. We offer a lot. You know, we have the International Baccalaureate program; we do have concurrent credit; we do have AP courses; we have partnerships with Job

The biggest thing for us is we wanted to make sure initially everything was aligned. And the biggest thing that we had for kids is that they come from -- we have a high poverty rate. These kids come from places where they don't have those sometimes role models that say, "Hey, here's the way that you get from Point A to Point B." So a lot of this that we've been doing now is structuring what we do offer, and we offer quite a bit. And then as we roll-out, you know, one thing that we're looking at within these academies is that we're establishing these advisory committees with each one of them and bringing in business and industry and partnerships, higher ed., and saying, "How can we make each one of these better?" So what it starts out being in yearone, it's going to look different. A perfect example is the teacher academy. You know, we're having conversations with ADE about how can we start to grow our own teachers. You know, that data that's out there that says there's, you know, 8,000 some-odd people in educator prep programs in 2010, we're down -- in 2015, it's down to 5,200. That's a problem. You know, we've got to address that. And so, you know, we're taking it incumbent upon ourselves, you know, we're developing a unique high school.

know, it's really almost a two-year, four-year university career vo-tech center all meshed into one place. And, you know, I look at it in these common terms three buckets; you know, if you're really wanting that super rigorous curriculum, you know, the IB program is where you want to go. If you're not sure you still want rigorous curriculum, but you also want a career pathway, you know, the IBCP pathway is where you get kind of a little bit of both. If you know you want to go out into the workforce, you're going to go in that direction and so there's yet another pathway.

You know, I can't say enough about the folks that have really stepped up for us in our community and come to the table and say that "we want to help." You know, we -- you know, even Ms. Hill, the transcription lady, you know, approached us when we got here about, you know, having a partnership -- they need welders, and so how can we help serve those needs. And so that's, you know, what Representative Mickey Gates said about being sought after. We want our folks to be sought after and that's something that we're working really hard to do for our kids.

So, you know, in closing, we'd appreciate the opportunity to continue this journey for our kids and

then try to provide the best possible education. You know, not very long ago I sat up there with you guys and thought about -- you know -- this was my favorite part about being on the Charter Authorizing Panel, amongst many things working at the Department. But you get to sit up there and you started dreaming about, you know, hey, how can we do this better; so many neat ideas came from this area. And so, you know, my folks probably think I'm crazy, but I've kind of came out there and charged after it. I said, you know, "We're going to start doing the work and we're going to work hard every day to try to improve the lives for kids." So, thank you.

CHAIRPERSON COFFMAN: Thank you, Dr. Hernandez.

Dr. Gotcher, would you like to start --

DR. GOTCHER: I'd be honored.

CHAIRPERSON COFFMAN: -- with our guestions?

DR. GOTCHER: Sure. Thank you, team. It's an honor to have you folks here today and it's a pleasure to see the goals and dreams that you have for the Trojan students of Hot Springs. I think Dr. Hernandez mentioned the citizenship seminar, the blending of civics ad oral comm., so I don't need to ask anything on that. But I was concerned just one bit -- I think the plans were to already relocate the

	/3
1	ALE students prior to this proposal. So as you
2	consider relocation of your ALE students to the home
3	buildings, talk about some of the challenges that you
4	foresee and then how those students will be
5	integrated as well into the IBCP program and so-
6	forth.
7	MR. JACKSON: I don't necessarily see the
8	challenges; I see some opportunities for those
9	students
10	DR. GOTCHER: I understand.
11	MR. JACKSON: who are coming into our campus
12	to get involved in this particular idea, this concept
13	even more fully. And so the challenges are simply
14	going to be how do we make this work for them not on
15	campus; it's easier to do that.
16	DR. GOTCHER: Good. Thank you.
17	CHAIRPERSON COFFMAN: Dr. Saunders.
18	DR. SAUNDERS: I'd like to jump into some of the
19	waivers and ask some questions concerning those. If
20	I could look starting off on the oral
21	communications, you are asking for a waiver from that
22	requirement. Is that correct?
23	MR. JACKSON: That's going to be an actual
24	we're looking at that as part of our imbedded blended
25	piece. And so that waiver

	74
1	DR. SAUNDERS: So you're pulling that?
2	MR. JACKSON: Yeah. That waiver is going to be
3	pulled.
4	DR. SAUNDERS: Okay. As well as civics?
5	MR. JACKSON: Correct.
6	DR. SAUNDERS: Is that correct? Okay. I wanted
7	just to clarify that.
8	DR. NEHUS: Yeah. We will pull the civics and
9	the oral communications waivers because we do realize
10	that those will be imbedded
11	MR. JACKSON: Yeah.
12	DR. NEHUS: and we will do the ADE course
13	approval process for start of that.
14	DR. SAUNDERS: Okay. On the class size,
15	regarding class size there's two components to that
16	that I'd like to talk about, probably address each
17	one separately. The first one is to allow class size
18	not to exceed 40. So just talking about that one, it
19	says, "In the event of a specific career pathway"
20	so this would not be, as we have looked at formerly
21	with online learning or those types of environments;
22	this would be a typical classroom setting, asking for
23	a class size of up to 40. Is that correct?
24	MR. JACKSON: We're looking at internships.
25	Those are for our internships for those individuals

	,,,
1	who are involved in that, for those instructors that
2	have more than those 30 or 40 students that are
3	allowed there. So that's strictly for the internship
4	experience for the students. So it's not in any of
5	our core or any of the other courses outside the
6	internship experience.
7	DR. SAUNDERS: Okay. When you're saying in the
8	internship
9	MR. JACKSON: The supervisors the students
10	will be assigned to a supervisor.
11	DR. SAUNDERS: Okay.
12	MR. JACKSON: So if they're going into a
13	partnership that we have they'll have a supervisor
14	who was communicating with us, supervised by us, and
15	then they'll be supervising those students. And so
16	they may have more than just the 40 students per
17	class or per instructor there.
18	DR. SAUNDERS: So when you say I guess I just
19	want to try to understand that on an internship we're
20	not talking about a traditional classroom setting in
21	that sense?
22	MR. JACKSON: Correct.
23	DR. NEHUS: Correct.
24	MR. JACKSON: Correct.
25	DR. SAUNDERS: If I'm understanding you

1	correctly, you're talking about possibly the coding
2	within such a school, those things of assigning a
3	group of students
4	MR. JACKSON: You are correct.
5	DR. SAUNDERS: to a supervisor?
6	MR. JACKSON: Correct.
7	DR. SAUNDERS: But they may be different
8	locations as far as
9	MR. JACKSON: Where they're going.
10	DR. SAUNDERS: not all in one room?
11	DR. NEHUS: Correct.
12	DR. SAUNDERS: Okay.
13	DR. NEHUS: We requested that waiver for the
14	internship experience, specifically for those that
15	are supervising internships to make sure there would
16	be no problem if a specific pathway had 40 students
17	in it and one person needed to supervise more than
18	that 30 that would be allotted in their regular
19	teaching class size.
20	DR. SAUNDERS: Okay. I understand that. The
21	one number for allowing teachers to go up to 180, is
22	that needed or are you trying to circumvent the
23	DR. NEHUS: Same thing. It's for those that
24	would be supervising internships; they may be over
25	the 150 because they have students that are out in

the community working and they're just supervising 1 That's the only reason we ask for that waiver. 2 them. DR. SAUNDERS: And that waiver, that's currently 3 allowed for in law, my understanding; however, the 4 5 new law requires that -- Dr. Hernandez, could you --SUPT. HERNANDEZ: Yeah. And I think the new law 6 7 does -- and any person that's in the traditional 8 classroom setting where they're, you know, developing 9 a curriculum, they're actually teaching, grading, all 10 those types of things that we would want to take advantage of the law and make sure that if they're 11 12 doing that extra work we'd pay them. 13 internship setting where they're merely supervising and most of their time is spent, you know, just kind 14 15 of an administrative role over the program we want 16 that flexibility to not have to pay additional monies 17 for that. 18 DR. SAUNDERS: So that would be limited just to the internship? 19 20 SUPT. HERNANDEZ: Correct. 21 DR. SAUNDERS: And going down to the next item, 22 the seat time, would that be limited to just your 23 vocational courses on the waiver of the Carnegie 24 unit? 25 DR. NEHUS: That is -- we are requesting that

	70
1	for our elective courses. That seat time for us
2	would be digitally earned utilizing Virtual Arkansas,
3	those types of settings. But that would be for the
4	electives and/or vocational pieces only.
5	DR. SAUNDERS: Okay.
6	DR. NEHUS: Not core classes.
7	DR. SAUNDERS: If somebody else needs to
8	MS. BARNES: Okay. And I just wanted to make
9	sure I just heard you correctly. Because when I read
10	it, I read it as it would not impact any graduation
11	requirements. And since you do have some electives
12	in your graduation requirements, which I understand
13	the concept and I'm comfortable with it, but I did
14	want to make sure that what I'm hearing and what I'm
15	reading in your waiver is, you know, aligned. So
16	here it says, "High school Hot Springs High School
17	is only asking for a waiver of the 120 clock hour
18	requirement and not to waive any graduation
19	requirements."
20	DR. NEHUS: Correct.
21	MS. BARNES: Okay. So your seat time would not
22	be how many I'm sorry; how many credits do you
23	currently require, locally?
24	DR. NEHUS: Locally, we require 23 in
25	technology.

MS. BARNES: Okay. Okay. I'm okay; I just -when I heard it I had to ask the question because I
wanted to be sure that we're in alignment with what
you are actually asking for. And so if Dr. Saunders
is okay with that, I am as well. I do have a
question --

SUPT. HERNANDEZ: I want to make sure -- I apologize -- to clarify is that on that the seat time waiver that we -- we aren't asking for it for -- we are asking for it possibly for some of the core classes if it's blended learning and digitally, as well.

MS. BARNES: Okay.

SUPT. HERNANDEZ: In order to be able to -- and make sure we're clear on that. And there's lots of reasons for that, is that in our senior class what we want our senior -- and I'll give you an example -- we start out with about 400 kids in kindergarten.

Sometimes we end up with 180 to 200 kids in our senior class. And so some of those we lose to transfers, choice; some of them we lose to dropouts.

We're very -- we take everybody and so, you know, we have strong partnerships with Job Corp. When people come from all over the state of Arkansas and sometimes other states we get those kids and they

25

become our students. When they go to JDC we take those students. And so in that same vein, you know, a 9th or 10th grader may get that spark and they may decide, hey, you know, I want to get my act together. But when they have that long list of things that they have to accomplish we want to have that flexibility and that seat time, if they're able to do some blending learning, and opportunities to do that. know, we want our senior class to look like we want the seniors that aren't there because they graduated early; we want some that are going to do a little bit of later on components and that kind of blends into our third component of our concept of night school. You know, we want to get to a point where we partner with other school districts within our county. can't afford to do a night school by ourselves. as we roll this out a little bit further we want to have that flexibility to be able to have kids come in after hours from other school districts and things like that and be able to have a little bit more offerings where, you know, it's kind of a have-ityour-way education plan.

MS. BARNES: Yes, sir. And thank you; thank you for that additional information. You know, the blending piece, that's understandable. And I'm fine

25

because I thought I read it correctly the first time,
but I wanted to be sure I was understanding it
completely. I do have a question in the midst of all
of this of buy-in from your faculty.

MR. JACKSON: That's a great question because we started this conversation, as we mentioned in our presentation, last school year, and it was a conversation around if we could be our own bosses and we had no rules to follow what would this look like. And a lot of these concepts we have on the table come from our faculty. The freshman academy, two years ago, began because faculty said, "We ought to do something different for our freshmen." And so we created that concept with their buy-in and we move forward with their buy-in. A large majority of our faculty are on-board because they see the impact. And if I were to share with you some of -- we tried to make sure that -- at the table we have those who may say no, so we can get that particular buy-in along this journey.

CHAIRPERSON COFFMAN: Dr. Saunders.

DR. SAUNDERS: Do you want to follow-up? Are you still --

MS. BARNES: No.

DR. SAUNDERS: Then I'll switch subjects unless

1	you want to go. All right. I have questions on the
2	licensure waivers. I wasn't I wanted to be clear
3	on what's written. With the teacher licensure
4	waivers, would that only apply to non-core classes?
5	MR. JACKSON: That is correct. That is, again,
6	opportunities for partnerships, organizations to come
7	in and help and be involved in that process, or those
8	who are licensed in those particular areas
9	plumbing, electrician, that kind of thing; not in
10	math, science, social studies, language arts.
11	DR. SAUNDERS: And why the request for the
12	waiver from principal licensure?
13	SUPT. HERNANDEZ: I don't like Mr. Jackson, so
14	no. I think that was probably an oversight on our
15	part. We don't intend to waive the principal
16	licensure.
17	DR. SAUNDERS: You want to withdraw that?
18	SUPT. HERNANDEZ: We'll withdraw that.
19	MR. JACKSON: I am fully licensed.
20	CHAIRPERSON COFFMAN: Now he tells you.
21	DR. SAUNDERS: That's all I had right now.
22	CHAIRPERSON COFFMAN: Ms. Pfeffer, do you have a
23	follow-up to the licensure question?
24	MS. PFEFFER: I did. I just can you give me
25	an example; you said a career professional coming in

and teaching a course. So can you give me an example of what you think that might look like?

MR. JACKSON: Well, currently we partner with National Park College and they own the bulk of that licensure and making sure those two teachers are certified to do the work that they do. There may be opportunities for those teachers to come to our campus and teach a welding class or to teach automotives actually on our campus and not having our students to go out to those areas. And so making sure those individuals are still highly qualified but going through the process of background checks and malnutrition -- malnutrition? -- child maltreatment -- we have plenty of cakes, so I'm good. And so those kinds of opportunities we see down the road.

MS. PFEFFER: Okay. And this would also cover a situation where in your -- I can't even -- your technology, if you had someone from the business sector --

MR. JACKSON: Correct.

MS. PFEFFER: -- come in, a non-educator who came to teach on your campus they could potentially be teaching students courses for which they would get required graduation credit as an elective. Is that correct?

2

15

16

17

18

19

20

21

22

23

24

25

SUPT. HERNANDEZ: Yeah. And, you know, we're trying to be very entrepreneurial in our practices and so some of the things -- you know -- by doing things with technology, you know, we'll want -- we've got tech guys that have their degrees and stuff like that; we want to be very industrious with it. want to put our kids to work side-by-side with our guys and allow them to teach in some of these networking -- all these types of different things. One, we get a staff that saves us costs, the kids get certificates, and we have a lot more folks to fix our computers so our teachers are happy. Same thing with the Chartwells deal. You know, we want our kids to understand food production; we want them to understand how to do the things that people struggle with, and at the same time, you know, they can get that experience on what does it take to build a menu, what does it take to make sure that your plate cost is where it needs to be; what does it take to manage a staff. You know, learning all of those components, you know, through our partners I think would be very valuable, especially for us being that hospitality and tourism type of community. And so we think that's a good thing for us.

MS. PFEFFER: And the reason for my asking is,

kind of like with the previous charters, just to be sure that we're all clear that in terms of course codes and graduation credits that we're going to have to work as partners to make sure that there will not be negative implications, you know, down the road for students and that all of that has been thought through in terms of --

DR. NEHUS: And in any of those situations I will work directly with Mr. Coy to make sure that we have that. We have a very good working relationship, so any questions that we have on those course codes I always try to make sure I run that by the Department to make sure we are doing what's right for our kids.

MS. PFEFFER: And it has -- it is new for -kind of a new experience for us because we have to be
very careful that the licensure office, his office,
plus the career education office -- that everyone is
working together to be sure that we're -- that we
don't have miscommunication.

DR. NEHUS: Thank you.

CHAIRPERSON COFFMAN: Dr. Gotcher.

DR. GOTCHER: I noticed on the presentation -- I think it was you, Dr. Hernandez, who referenced advisory committees or advisory boards for each of the different academies. I appreciate that and

2

3

4

5

15

16

17

18

19

20

21

22

23

24

25

recognize that that ongoing partnership and conversation is important. What will that look like? How often? How do you respond to your partnership or to your advisory boards' requests or concerns and soforth? What would that look like, sir?

SUPT. HERNANDEZ: All right. I think what the intention is, pending the approval of this charter, we're going to form these advisories and probably meet pretty frequently over this semester. And then once we get into that mode, we're going to meet probably quarterly. But the conversation is going to be, you know, let's look at each pathway; let's see -- if you remember that chart that was up there, it talked about here are the different certifications you can get. Well, how can we -- you know -somebody in the aerospace manufacturing, advanced manufacturing say, "Well, if you can add this component or get this, this is what we're really looking for." And having those ongoing conversations gives us a lot of flexibility where we can modify programs and really be responsive to what industry needs at that time. You know, we're gearing up in our community to have lots of conversations about how we increase broadband; we're trying to attract more tech companies. So, knowing that, we want to make

25

sure that, you know, we have all those things. know, we talk about Oaklawn, you know, and people think about racing and horse races. Well, there is -- they have one of the largest technology staffs Because when you think about you can sit in the comfort of your home and do -- you can place your bets, if you will, and do all those kinds of things, well, that's technology. They can't afford for Wi-Fi systems to go down; they can't afford for service to And we know -- you guys know how much it costs to get programming and things like that fixed, and so we want to make sure that we're providing those kinds of opportunities for our kids so, you know, when they graduate they can see, you know, hey, I may have to go to -- I may have the certification I need to go right to work or I can go over to National Park and pick up these few classes and go. But we want to constantly be looking at that and not stay stagnant in what we're doing and so that's why it's important for us. You know, we can sit around as teachers and talk about what we think, but we don't know -- and that's why it's important for us to be very symbiotic with our community and say, you know, "When you're investing \$12,000 plus per kid each year to educate them, we want to make sure you're getting

that return on investment upon graduation." And so that's kind of the conversations that we're having and that's why we're having so much buy-in. Because, you know, when I put \$144,000 plus or \$150,000 into a kid, hopefully I'm getting something out of it as a community person. And so that's kind of the mindset and the approach that we're taking with this.

DR. GOTCHER: And I think that's a powerful piece. Recently, I had a chance to visit the Springdale School District. I know they're guests in our room today. But one of the things I asked Dr. Rollins was how do you maintain those partnerships. And he referenced something to the effect "if it's intentional and it's proactive," and I think having an advisory board is a very proactive piece. So I commend you guys for that and I appreciate it. Thank you, Dr. Hernandez.

CHAIRPERSON COFFMAN: Dr. Jones.

DR. JONES: Dr. Hernandez, or I guess anyone, do the students incur costs for National Park, attendance there?

DR. HERNANDEZ: They do not. We pay \$50, their registration fee, and then everything else is covered. So it's a -- you know -- we're heavily utilizing -- of course, with the new modification of

the state law allowing the ALE funds and NSLA funds to be used in partnership with those, that's something else that we're heavily exploring. And we've actually upped quite a bit our concurrent credit enrollment this year with National Park.

DR. JONES: Good. What about enrollment in IB?

I noticed you had AP and IB. Do students have to
meet certain criteria to go to either one of those
programs?

MR. JACKSON: If I may, I'd like to defer that one to our IB Coordinator, Ms. Redding.

DR. JONES: All right.

23

24

25

MS. REDDING: My name is Paula Redding. I'm the International Baccalaureate Coordinator at Hot Springs High School; I'm also the Coordinator for the IBCP. And as such I'm the academic advisor, mentor, social, emotional guide; I'm kind of their go-to We offer IB in grades 11-12. It's a program person. that you can be fully invested in and take the seven courses in 11th grade and the six or seven courses in 12th grade, but we also -- in some cases, we offer a concurrent AP/IB. For example, I teach the 12th grade IB English and AP Lit in the same class and the students take both sets of tests. We do the same thing with the IB and AP biology. The students take

the same curriculum; we imbed the two curriculum and they take both tests. We also offer AP literature. We have in the past offered some other AP courses; for example, there's nothing in the IB program like AP American Government. So when we have students that want that we've offered that. We've offered AP statistics; we've offered AP calculus. Those are offered on an as-requested basis.

DR. JONES: Thank you. What kind of training does an IB teacher have to have?

MS. REDDING: To teach the IB diploma programs the first year they must, either before they start teaching the class or during that year, go to the International Baccalaureate official training. It's three very -- three-and-a-half very intensive days of training. If for some -- then every seven years, or whenever the IB syllabus is adjusted, that teacher must either go back to the face-to-face training or if that is an experienced teacher they can do that course online. But the -- for example, I have to -- as the coordinator, I had to be trained and then every -- minimum of every seven years I have to go back to the training, as well.

DR. JONES: Okay. And so offerings -- students may go the AP/IB route --

MS. REDDING: They can go -- we have -- like Dr. Hernandez said, we have lots of offerings. You can be an IB diploma candidate --

DR. JONES: Right.

1

2

3

15

16

17

18

19

20

21

22

23

24

25

MS. REDDING: -- in which case you can pick up some AP courses, as well. You can take IB isolated courses; I only want to take IB English, that's the only course I want to take. We do that. But the new piece that we're offering, the IB career related, it was kind of our precursor in a way along with the freshman academy to what we're doing or hoping to do with our pathways. The IBCP, the IB career-related program, these students will be in the career pathways; they will be completers, and it's a requirement for them to receive the IBCP certificate. They also must take two IB courses which adds the rigor for them to go on to college. One of the courses must be a two-year IB course, the other one can be one or two years, and if they have room in their schedule they can take additional courses. then there's also an extra IB course for those students, called the IBCP Core.

DR. JONES: Okay. And so the students that don't prefer to take AP or IB, they have regular -- MS. REDDING: They will be in -- all those

students will be in one of the career pathways under 1 this new -- and those -- some of our IB students will 2 3 also be in those career pathways. DR. JONES: So what changes -- when you bring 4 ALE students back on campus, what's different? 5 they participate in any of those classes? 6 7 MS. REDDING: They can. DR. JONES: Okay. 8 9 MS. REDDING: That's part of my job is to Okay. But they will be able to. 10 advise. DR. NEHUS: Yeah. And bringing the ALE students 11 12 back on campus is going to provide them the 13 opportunity to be able to take these courses, which they have not been able to do when they've been off-14 15 site, whether it be that we actually bring the IB 16 teacher into that setting and teach them or whether they actually leave and go out for a class period to 17 18 take that course. We're really excited about that offer. 19 20 DR. JONES: And, Dr. Nehus, I want to compliment 21 you for the career pathways sheet. We have 22 encouraged that for about a year now because, 23 finally, it puts down a plan for the whole high

school career and we have found that it's very

difficult to counsel kids when we don't know what we

24

25

have available. And it gives them on paper a real plan and what are the possibilities. Where did you -- how did you start -- when did you start using that?

DR. NEHUS: So we have not implemented it yet.

That will be with this charter. We're real excited about that. But we found some examples -- and I have to compliment our college and career counselor and our career and technical ed. coordinator because they have put in the legwork to make sure that all those documents are complete for our current -- I think we have 16 pathways we're ready to go with and those documents are all ready. So we're real excited.

DR. JONES: That is a lot of work but it's so incredibly important. Thank you for doing that work. One more question and I will be finished. I'm curious what you're doing -- what's your plan for the extended hours, zero hour and after class?

MR. JACKSON: That's an opportunity again for those students who are part of any of our academies, but certainly those students in our IB program who -- you know -- we jam-pack a lot in for them during the normal school day. So for them to get some more elective opportunities, to have that zero hour before, also some extended time after benefits them.

1	But also that student who you know I may be
2	behind and I have not gotten I didn't get on the
3	right track my freshman year, so I need to take some
4	things before school, a little after school in order
5	to get caught up so that I'm graduating in four years
6	and I can have the internship experience my
7	junior/senior year. Just trying to provide
8	opportunities for those students to get on-track,
9	stay on-track, and to move in the right direction.
10	DR. JONES: Thank you. And I want you to answer
11	this as a principal. On the PBIS, is that new for
12	y'all?
13	MR. JACKSON: This first year and you don't
14	see that a lot on a high school campus but I came
15	from the middle school world where we made it work
16	and we're looking forward to that being a huge impact
17	across our campus of rewarding we oftentimes get
18	so caught up in cracking the whip that we can get
19	DR. JONES: That social/emotional component is
20	so important
21	MR. JACKSON: It's critical.
22	DR. JONES: to blend with your program, so I
23	commend you for that.
24	MR. JACKSON: Thank you.

MR. JACKSON: Thank you.

DR. NEHUS: Can I add one thing too, Dr. Jones, to that last question? Our community, our board at the public hearing, a lot of questions came up about what if a child wants to switch pathways, will they be able to do that. And that's another reason for those zero and extended hour is because if they choose to switch a pathway then they'll have the capability to get all their graduation requirements, but they might not be able to get that industry certification because they might be a little behind. But this would give them an opportunity, if they're motivated, to put in extra time even to be able to leave us with exactly what they want to be successful in their future.

DR. JONES: Thank you.

CHAIRPERSON COFFMAN: I have some questions, and you just answered one of them. But in keeping with that idea of flexibility for the students, which I'm really excited about, talk just a little bit about your plans for being flexible with your teachers.

MR. JACKSON: It becomes natural. I mean, it's the goal to be flexible for our students, but at the same time this may provide opportunities with our faculty schedule as well. Instead of coming in at

1	7:45 in the morning and going until 3:25, 3:24 in the
2	afternoon, we may have some of our faculty have a
3	shift in their schedule who are coming in at 9:00 and
4	going until that 4:45 time slot in order to
5	accommodate the needs of our students. So it's
6	certainly an option, an opportunity for us that we
7	look forward to as we move along this process.
8	CHAIRPERSON COFFMAN: I heard some overheard
9	someone in the bathroom say, "I'm not a morning
10	person." I thought, you know, and neither are many
11	of our
12	MR. JACKSON: Our teachers.
13	CHAIRPERSON COFFMAN: adolescents.
14	MR. JACKSON: Yeah.
15	CHAIRPERSON COFFMAN: So that I mean, they
16	would be a perfect parent
17	DR. NEHUS: We've actually had several who said,
18	"We love this idea of night school. Can I be the one
19	who comes in at 12:00 and I'll work until 6:00?" And
20	so we have a lot that are excited about that.
21	CHAIRPERSON COFFMAN: In keeping with the vein
22	of flexibility, in your video a student talked about,
23	you know, you might take a few classes, might go out
24	to local business or an internship and then might
25	even come back. Talk to us about transportation,

because I believe Dr. Hernandez talked about the free and reduced rate. So how are those kids going to get around?

24

25

1

2

DR. HERNANDEZ: Right now, you know, we do provide a lot of early morning -- some early morning tutoring opportunities and we have a lot of afterschool, so we have transportation that's flowing during those hours. Right now, we're in conversations with our city in talking about -- we have a transit, inner-city transit system, and so between -- that goes out to the college and different places. So we're trying to get some -- be able to pay those costs or have some kind of free coupon, if you will, type thing that if they're a, you know, Hot Springs student that's involved in this program or this internship, if they don't have transportation -in 11th and 12th grades many of our kids don't -- can we have that in place. So that's some of the conversation in regards to transportation that we're We want to make sure that we don't limit having. kids that want these opportunities. You know, there may be some businesses and industries, if we have enough, that they may send folks to us. We'll come pick them up and bring them out to our internship and bring them back. And we also have various -- we have

a lot of different things at Hot Springs School
District. But we have some of these liaisons and
stuff that work with us that come in and, you know,
take our kids to various places throughout the day.
And so we have kind of a -- I won't say
transportation fleet; we have other additional
methods of transportation that we can kind of get
kids around, if we need to.

CHAIRPERSON COFFMAN: Thank you. I too want to commend you on the preparation. One thing that I was really excited about is you are already talking about implementation and it wasn't couched in that "we're waiting on you as a panel to approve before we start." You're already starting, so we really commend you for that.

SUPT. HERNANDEZ: You know, and it's because -and I say that's a credit to our staff. I didn't do
anything but show up, but, you know, so far they
haven't done anything that I'm willing to not take
credit for. So, you know, it's because of our folks
all this work had begun. You know, I was concerned
about the timeline, you know, coming in and saying,
"Hey, let's have discussion about this charter." And
that was one of the first things I did when I got
hired is we went -- I took Mr. Jackson out here to

Outback Steakhouse and we had the conversation about some of this stuff just to see where they were, and so I figured if I fed him he'd be more amenable to listen to what I was talking about. And so -- but I was pleasantly surprised that the freshman academy was put in place and there was already conversations along these lines of thinking. And so, you know, having the implementation working group, I said, "Guys, we're going to do this whether they approve us or not." There may be some other issues we have to work through, but we just -- you know -- we have a lot of great things. You know, we're real fortunate in our district that we have Ouachita Job Corp. It's currently a residential program for kids; you know, they offer -- you can become union carpentry certified, you can become union painting, union masonry; there's urban forestry; there's welding, same welding certificate you get from anywhere else; and also office automation. You know, kids go out there and they live there and it's a good advantage But we're having conversations that in the spring we're going to start rolling out this day program where we let kids go out and do that stuff during the day and then they can come back. beneficial to them because they get to grow their

program, paid for with federal dollars. And then,
you know, we have that service as kind of a we're
kind of taking this mentality of an alternative
learning environment in our complete district. It's
almost an alternative learning environment because
it's you know you may be really ambitious and
you really want to do lots of things, like be in the
orchestra and be in the band and be an IB student.
Well, in our cookie-cutter approach you can't do
that; there's all these barriers to that. So we want
to open those doors and say, "If you want to do it,
we'll figure out a way to get it done for you." If
you you know you're way behind, we're going to
figure out how to catch you up," because we can't
afford to put we cannot graduate kids or not
graduate kids anymore in our district that we have
to, you know, take it upon ourselves because it's our
responsibility to put quality kids out in the job
market.
CHAIRPERSON COFFMAN: Amen.
SUPT. HERNANDEZ: Yes.
CHAIRPERSON COFFMAN: Any other questions?
MS. PFEFFER: Can I make a comment?
CHAIRPERSON COFFMAN: Yes, Ms. Pfeffer.
MS. PFEFFER: And kind of in response to what

you said there, I respect very much the commitment that you all have that this is something you're going to try to do regardless, because it's good for kids. And that's why I also see that this is exactly what this whole process is designed to do. And if we as a state have barriers in place, preventing you, I'm just very excited that we have an opportunity to work with you and provide you with some of that flexibility. And so I think this is a very good example of what this whole process is supposed to be and I just thank you for your hard work because it's -- and something that was said while ago that employers -- that the goal is for employers to be in pursuit of your students, and I think that's an awesome goal and I'm excited.

SUPT. HERNANDEZ: And, you know, we've tried to be very thoughtful in our goals. You know, noticing in those goals something that sometimes I know eluded me when we were -- when I was on the panel was that we gave you numbers. You know, we said, "We're doing 2%. We want to be held accountable." And, you know, even though we don't have -- we're going to be back; we're going to come back with waiver requests and amendments because as we move through this we know we're going to have issues. You know, we're really

encouraging folks in our county -- we meet pretty regularly, the superintendents, and we're having these conversations about how we can -- in Garland County how can we make education the best thing around. And that's something that this is just the start of it, as Fountain Lake started it before us, is that we're trying to work together. Because, you know, we don't care who you are or where you come from; we want to put you on the right path and ultimately, you know, serve the society that we live in. So we're really excited about it.

CHAIRPERSON COFFMAN: Ms. Clay, are there any remaining issues regarding this request?

MS. CLAY: One waiver that I would recommend that they seek is the 6-18-213(a)(2). This is the one we dealt with on the previous application that deals with visually noting the physical presence of students on digital courses. So if they would agree to that, then I have no other issues.

SUPT. HERNANDEZ: Thank you for the "Clayification." I wasn't going to get out of here
without being able to say that. We would much like
to seek that also.

CHAIRPERSON COFFMAN: Any other questions or comments? I'll accept a motion.

MS. PFEFFER: I move to approve the application for Hot Springs World Class High School.

DR. GOTCHER: Second.

CHAIRPERSON COFFMAN: We have a motion by Ms.

Pfeffer and a second by Dr. Gotcher to approve the application. Any comments, conversations? All those in favor of the motion?

(UNANIMOUS CHORUS OF AYES)

CHAIRPERSON COFFMAN: Any opposed?

Congratulations, Dr. Hernandez. If you'll wait patiently, we'll have detailed remarks.

Dr. Hernandez, as the Panel is completing their document, and they'll read those to you, I would ask you to consider ways that you will communicate your progress along, not only for the benefit of the other school districts in your county but for the benefit of school districts across the state. And one note that I wrote was as the only K-12 IB program in the state it falls upon you to be the voice of that opportunity for kids and to really share that. Other schools may be interested but they don't know how to get started or don't know enough about it. So it really falls upon you to be the communicator of that opportunity for children.

SUPT. HERNANDEZ: You won't have to worry about

us talking about all the things that we're doing in Hot Springs. We're going to try to get out there with the good and the bad, so -- and we're going to be very open. And we'll think of ways that we can maybe work on a quarterly report or something that we can, you know, have out there for our public and people to know, you know, what are our issues; you know, what are we running up against that are barriers; and then, what is it that we're doing well and feel like we're having success with.

CHAIRPERSON COFFMAN: There are many people pulling for you, so feel free to reach out. And, you know, we love a good link to a video.

SUPT. HERNANDEZ: Yeah. If we can get the voice to work; I think we're having issues with that, so -- CHAIRPERSON COFFMAN: Dr. Jones.

DR. JONES: I support this motion because the district has designed high level academic career opportunities for students and have done the planning necessary to expect this charter will be successful for students.

CHAIRPERSON COFFMAN: Mr. Lester.

MR. LESTER: I believe the applicant has an excellent plan for career readiness and has the resources, programs, partnerships currently in place

	105
1	to meet the goals outlined in their application.
2	CHAIRPERSON COFFMAN: Ms. Liwo.
3	MS. LIWO: I voted for. Simply put, this is a
4	very promising plan.
5	CHAIRPERSON COFFMAN: Ms. Pfeffer.
6	MS. PFEFFER: This application clearly
7	demonstrates a vision for the future of education for
8	Arkansas students. The district is commended for its
9	strong partnerships with the community and also with
10	the other districts in Garland County. And I'm
11	optimistic that students, parents and the community
12	will be excited about taking ownership for student
13	success and articulating the value of being part of
14	the Hot Springs World Class High School.
15	CHAIRPERSON COFFMAN: Mr. Rogers.
16	MR. ROGERS: I voted for the motion because the
17	career academy along the lines of everyone who
18	said the career academy will allow their students to
19	gain a high school diploma and obtain credit for
20	college or industry certification.
21	CHAIRPERSON COFFMAN: Dr. Saunders.
22	DR. SAUNDERS: I thought this would provide an
23	opportunity for the students, reflecting the needs of
24	the community.
25	CHAIRPERSON COFFMAN: Ms. Barnes.

1	MS. BARNES: I voted in favor of the motion. I
2	believe that this concept serves as an innovation
3	approach to student learning and college and career
4	proactive strategies. The phase-in is a very
5	responsible way to insure success.
6	CHAIRPERSON COFFMAN: Dr. Gotcher.
7	DR. GOTCHER: I voted for the motion to approve.
8	I feel this applicant provides an innovative yet an
9	aggressive approach towards a school that creates its
10	own distinctive version of a flexible framework for
11	kids. I further encourage you to remain close to
12	your community partners in this process.
13	CHAIRPERSON COFFMAN: Congratulations, Hot
14	Springs World Class High School.
15	SUPT. HERNANDEZ: Thank you.
16	CHAIRPERSON COFFMAN: We'll take a quick 7-
17	minute break and be ready for the next action item.
18	(BREAK: 11:11-11:23 A.M.)
19	CHAIRPERSON COFFMAN: I believe Representative
20	Eads came in. You're welcome to come to the podium.
21	REPRESENTATIVE EADS: I'm Representative Lance
22	Eads from Springdale, Arkansas, and I'm just here to
23	provide support for our school district and their
24	opportunity to get this charter. So any questions,
25	I'll be happy to answer. Thank you for allowing me

to join this morning. 1 CHAIRPERSON COFFMAN: Thank you for being here. 2 HEARING OF DISTRICT CONVERSION PUBLIC CHARTER SCHOOL 3 A-3: APPLICATION: SPRINGDALE SCHOOL OF INNOVATION 4 5 CHAIRPERSON COFFMAN: Ms. Boyd, you're recognized for action item three. 6 7 MS. BOYD: Thank you, Madam Chair. Action item three, Hearing of District Conversion Public Charter 8 9 School Application from the Springdale School of Springdale School of Innovation is a 10 proposed district conversion public charter school 11 with a full virtual component. The applicant is 12 13 requesting to serve students in grades K-12 with a maximum enrollment of 2,000. ADE staff reviewed the 14 15 application, and concerns were shared with the 16 applicant for response. The application, the ADE evaluation, and the applicant's response are included 17

DR. WITONSKI: Thank you.

affirm that the testimony you're about to give shall be the truth, the whole truth and nothing but the truth?

(ALL SPEAKERS ANSWERED AFFIRMATIVELY)

CHAIRPERSON COFFMAN: Thank you. Dr. Witonski, you're recognized.

DR. WITONSKI: We are so thankful to be here. So good morning; thank you for making sure that we were able to join you before lunch because I know how So hopefully everyone had an opportunity to meet Little Debbie in the front. My name is Megan Witonski; I am associate superintendent with the Springdale School District. And with me I have Mr. Joe Rollins, who is principal at the School of Innovation, and Dr. Mark Oesterle, who is assistant principal at the School of Innovation. So we're going to get started this morning and, Ms. Friedman, I know you're helping us back there. This is a photo -- and you can notice that it's a schematic, it's a drawing, but this is our multimillion dollar investment that is to open in August of 2016, which is going to be the new School of Innovation, which is where this charter will be living. And it is under construction; it is going forward. And I know that over the last three days we've talked a lot about

planning and implementation and development, and so we come to you today with this application. We don't take it lightly, we take it very seriously, and we are investing not only money but time and effort to make sure that we bring this model forward. There is not a building that exists like this in the state of Arkansas, and so we look forward to inviting you out to visit the building once it is open but it is going to be a beautiful facility.

We're going to go to a video and I know that Ms. Friedman is working that for us through YouTube. And this is a message from our superintendent, Dr. Jim Rollins, like he said.

(COURT REPORTER'S NOTE: A video was shown.

That video is available on the ADE website, in the archived videos of Charter Authorizing Panel meetings.)

DR. WITONSKI: So the School of Innovation is about helping students to find their direction and helping them find where do they need to go next.

Thanks, Ms. Friedman.

So justification -- look at that beautiful lady
-- all means all -- and when Dr. Rollins talked about
"all meaning all," it doesn't just mean a small
group; it doesn't just mean a small population. It

means every child. And when you look at our data as a district and you look at our data at individual schools across the 30 schools, until we reach 100% proficiency we are not meeting the definition of "all means all." We've learned a ton about personalization of learning, personalization of learning for students, personalization of learning for teachers -- and those are two different things.

21st century college and career ready learners, we have to have kids who are ready to lead; ready to lead us in our region and ready to lead us in the state, and we want them to be innovation ready.

So we have several waivers that are included in our application and some of those waivers harness the ability for us to go and access expertise, professional expertise from industry leaders, which we're going to talk about.

The digital access -- being able to insure that students have access to any-time learning and through that being able to show the mastery of that content through the Arkansas State Learning Standards.

School-wise enrichment opportunities and, of course, dual language instruction.

So regional awareness -- there's this misnomer that northwest Arkansas is this golden egg; you know,

24

25

we serve -- 70% of our students are free and reduced. We serve over 10,000 English Language Learners and we have about 42 different languages that we provide instruction and try to provide support and scaffold But one of the huge components that we have in our area is a strong local and business community and we are fortunate that although it is local, it is a national brand; it is a global competitor. And we have learned a lot from those interactions that we've had with those industry leaders, but we have also learned that we are not maximizing that industry knowledge. Our leaders are telling us in education that they are not able to find the employees that they need to be able to fill the jobs that they need to fill and those are right there in Springdale. we want to harness the ability to bring in instructors, to bring in the field knowledge, to have students go out and experience what that field knowledge looks like.

Competency-based learning -- this has not been an easy road for us. This is a ton of work. It is extremely expensive; it is extremely time-consuming, and we have some of the best master teachers in Springdale working to build this competency education model for our students. But it is all based on the

22

23

24

25

idea of insuring mastery for our students -- and not just some students, but for all students. And as you heard one of our students say in the video, "I do it again until I get it correct." And so the idea of failure or the idea of not being able to succeed is not an option. We have some unique needs that are also unique to our geographic area. Some of those are we have some -- we have recent immigrants. And in some cases, parents or students might be concerned about coming forward to work with the school as a partner because of their United States legal status. We also know that we have to maximize the ability for students to be able to attend and so having the ability to have a digital offering in situations that we may not be able to connect with students otherwise, who are not registered home-school students and they are not enrolled in another district, they are not enrolled anywhere. We need to be able to bring that population into Springdale.

Enrichment opportunities -- this is not about narrowing the focus; this is about broadening the opportunities, insuring that students have access to master teachers, industry experts, mentors, and, of course, hands-on application.

And I'm going to tell you a quick story and this

is not the PowerPoint, but this is to me very telling 1 of kind of where we're heading. We've done a lot of 2 We've spent a lot of time -- we've worked 3 research. on this model and this idea for the last three years. 4 Now we were thrilled to be designated in 2014 under 5 Act 601 as one of the first Schools of Innovation and 6 7 we take that endorsement very seriously. But from that and from those experiences it has taught us that 8 9 what we are doing is not enough. We have to be able to lift those remaining barriers and that is why we 10 are before you today. One of those barriers is 11 12 through dual language instruction. There was a 13 researcher, her name is Dr. Patricia Kuhl, and she is -- K-u-h-l, not cool, not like Clay-ification over 14 15 there -- but she has this ability to be able to show what that looks like, and how she did it is she did 16 it with a clear box and a toy. So she took two 17 18 groups of babies and she put them in two separate One group of babies, 9-month old babies had 19 groups. had exposure and had experience of multiple languages 20 21 in the home; any language, but they had had 22 experience with two languages. The other group of 9-23 month old babies came from a single language home, 24 whatever the language but single language. 25 them in two different groups and she puts a clear box

25

in front of them. And in the clear box she holds up a toy; she shows the baby the toy; she puts the toy in the box; the baby sees the toy in the box and the baby wants to do what -- reach for the toy. babies -- none of the babies in either study group were able to access the toy. And so she goes back and she sits down and for each group and each individual baby she models how you go through the clear box to grab the toy and extrapolate it out. And so what do the babies do? They go back and they try it the same way they did it before -- but this time, uh-huh, both groups used the model. And when they used the model they were able to go in and access the toy, which tells us teaching is important. Right? You've got to have a way; you've got to have a guide to show you initially. But the third time she did it she alternated the box. She put the hole in a different direction to alter the experience that the child was having, and the babies put themselves into two groups. And so what do you think happened? The group who had been exposed to one language kept trying the same way that had been modeled for them over and over again. The group who had been exposed to two or more languages, they figured out -- they modified their effort and they were all successful in

24

25

pulling out the toy. Those are 9-month old babies. And so if we can do the same thing to have our students to be able to problem-solve and to apply those skills and to think, teaching them how to think is huge. So it helps to foster the brain development, but it is also an obligation that we have for all students. That enrichment model for all students needs to be school-wise. We have to increase the progress. And, of course, in Springdale, it certainly helps us as we try to continue to address our achievement gap. And, of course, the last bullet that you see is the response to this in industry. They need bilingual employees who are ready to take over.

So I'm going to ask Mr. Joe Rollins to come up and talk with you about our community partnerships.

MR. ROLLINS: Dr. Gotcher, you mentioned it better than I ever could just a little while ago. We have the unique opportunity to bring the facility forward at the same time as our instructional program, which they don't always line up. At that same juncture we have the opportunity to involve our business community and our partners from day-one. So we had the chance to sit down and ask partners like our Chamber of Commerce, our Northwest Council, our

post-secondary partners like Northwest Technical Institute and Northwest Community College, and even the University of Arkansas, "How can we work together to move the needle for our kids?" Dr. Witonski alluded to the types of students that we have in our district and they're as diverse as I could ever describe to you. Our business partners rallied around the fact that they have two commonalities. No matter where they came from, no matter what their background is they have a future to prepare for and they have us collectively to give them that. That's kind of been our resounding focus within our community. So we participate with our Chamber of Commerce on a regular basis, even to the point of this week. We visited with them in terms of workforce development in our region. Those partners give us incredible feedback in terms of what can we offer to our students in terms of course offerings, in terms of soft skill development, professional The information that we got back skill development. was very timely, very relevant to us, and they indicated that we need the following fields in our region: medical trades, skilled trades, HVAC, mechanical systems, welding, plumbing, automation, mechatronics, business and information technology,

entrepreneurship, transportation, logistics,
education, human resources, and then again those 21st
century skills that we work into our school day every
day in the terms of what we call habits of mind.

That might be the ability to collaborate or to manage
your time or to be self-directed or to work with a
group of your peers, or maybe just get as simple as
what does it truly mean to think instead of memorize
and repeat; what can you do to problem-solve -- all
skills that our students are bringing to the table
infused in what they do every day.

Then we were allowed to explore student choice and voice in their education. We don't want our students to be passive bystanders in their education; we want them to be an active participant in the process. You're going to hear some stories about some of our students who are taking hold of some of the opportunities that they're given in school and really taking the next step in trying to prepare for a career. We have a mantra at school that "it's not enough to get to graduation day." If our students aren't prepared to take that next step, there's still more work to do. Those are the kinds of stories that you're going to hear. I want to give a very sincere congratulations to the efforts of our teachers in our

first year; they've really surpassed even my wildest dreams about what they could accomplish for our students. And our students are continuing to accelerate and personalize and prepare for a future.

I'd like to invite Dr. Mark Oesterle to the microphone to talk about how we personalize during the school day.

DR. OESTERLE: Thank you. In 18 years, this is the most exciting thing professionally I have ever had an opportunity to be a part of because it is what's right for kids. As we talk about personalizing a course of student and we talk about personalizing education for students, we follow some of the guiding questions of what if and why not. We've got to break down some of those walls that have kept us from being able to provide opportunities for our students over the years and really allow for that student voice. I want to introduce you to Claire; she's the girl that's in the photograph holding the J.B. Hunt badge and she is an 8th grader at the School of Innovation. She started with us in August and she is a future computer systems analyst, IT director. One of her goals was to be able to be involved in that opportunity and she went out and research her own internship as a 13-year old 8th

1 grader to go out and pursue those opportunities. it's not enough to just have this for her; we want 2 this for all of our students. Because we believe 3 that every student deserves a rigorous and 4 personalized education based on their needs, just 5 like Claire. It's not enough just to know the 6 7 standards, but we've got to teach our students how to take those standards and apply those standards 8 9 through deeper thinking and problem-solving activities. Part of that is developing a program of 10 study for each of our students, working with some 11 really outstanding counselors to really design over 12 that time what is their core. And then as we look at 13 our pathways for students, those explore 14 15 opportunities. When we look at the idea of mastery 16 learning it's research-based. Going back to one of our earlier researchers, Benjamin Bloom, one of his 17 18 pieces that he says is, "Time can no longer be the constant for our students. Students must be able and 19 20 allowed to advance when mastery is demonstrated." 21 And he believes, and we've seen, that given the right 22 conditions and opportunities every student can show 23 success and demonstrate mastery if we provide those 24 opportunities for them. How do we do that? We vary 25 the learning rate; we change the learning conditions;

we again make time the variable, not the box constant of 180 days; and we allow for those students to personalize and own that learning.

Some of the ways we support mastery learning at the School of Innovation -- that idea between blended and online learning, how do we effectively use technology to support the programs that we're doing in our building? How do we look at that dual enrollment coursework so that we can get students accelerated toward that college experience and our partnerships through NWACC, NTI and those continue to How do we continue to look at those grow? internships, like Claire? I was sharing on the break, I checked email because that's what we do and there was a message waiting from J.B. Hunt offering -- wanting to know how many of our girls were interested in engineering. And they don't have an idea yet, but they just wanted to come and talk about how they could partner to help increase the amount of women in engineering programs that they have. the excitement in our community that this has The other thing that we like to talk about created. is our rich advisory program. This is the glue that really holds us together. Every student on our campus is well-known by an adult on campus.

create their personalized learning plans; they look at their own academic data; they set those goals; they set those personal goals to where they want to be career-wise; and they work with those advisors and ultimately, as we pursue the charter application, the opportunity to work with industry mentors to be able to guide them toward that senior capstone project that will allow them to put together basically a senior thesis that will be a summary of all their learning and their experiences and present that to our community and their industry partners. look at that competency-based system, those multiple pathways to graduation, we know that one size does not fit all. It works for a lot, but it doesn't work for everyone. We want to be an efficient school; we want to be good responsible stewards of our taxpayer dollars; we want to provide the best opportunities for all of our students.

As we take a look -- you've heard from a couple of our students. There was Trevor and Savannah that were a couple of the students that spoke in the video. And they said school needs to be designed around their needs and their dreams. Students deserve a school that delivers more than a traditional education; they deserve a school

experience that prepares them for college and career. We do that through those multiple pathways and an approved application will insure that all the students in Springdale -- and as a dad with students in Springdale, my own kids will have that opportunity to lead to innovation and achieve at the highest level. Dr. Witonski.

DR. WITONSKI: So you heard from Dr. Rollins and hopefully I think from us that "all means all," which means that we have a duty to access students and to insure that they have access to learning. And as we've talked with you about Claire and several of our other students, it is about the student needs; it's about making sure that we are meeting them, we are meeting their dreams. It's about varying those learning experiences, just like Dr. Kuhl has taught us, with dual language and what that can look like in the classroom. And, ultimately, it's about looking at exploring career pathways and making sure that students have access to those.

So that is the conclusion of our presentation to kind of give you an overview. And so, Chairperson, I will turn it back to you.

CHAIRPERSON COFFMAN: Thank you. Is there anyone here to speak in opposition?

	123
1	(BRIEF MOMENT OF SILENCE)
2	CHAIRPERSON COFFMAN: Dr. Witonski, you have 5
3	additional minutes.
4	DR. WITONSKI: I will defer back to the Panel.
5	We hopefully can answer any questions that you have
6	and hopefully have provided you with enough
7	information to give you a clear overview, unless
8	anyone else would like to add anything on our team.
9	Thank you.
10	CHAIRPERSON COFFMAN: Thank you, Dr. Witonski.
11	Dr. Jones would like for you to send that picture of
12	her to the newspaper so they have a good one.
13	DR. JONES: Is Cynthia out there?
14	CHAIRPERSON COFFMAN: Yeah.
15	DR. JONES: Please tell them to stop printing
16	that picture.
17	DR. WITONSKI: And our students helped put this
18	together and did the video. And so when they figured
19	out and made the connection that you are who you are,
20	and that you are who you are and you were in the
21	building, and it was like, "Oh, we know her."
22	CHAIRPERSON COFFMAN: All right, Panel. Dr.
23	Saunders is eager to start.
24	DR. SAUNDERS: I have a lot of questions, but I
25	want to just start off with I'm trying to

understand as I'm looking at this -- if I'm -correct me if I'm wrong. If I'm understanding this
correctly --

DR. WITONSKI: Yes.

DR. SAUNDERS: -- the students that would be enrolled 100% online, would they be students of your School of Innovation?

DR. WITONSKI: Correct. Yes. This application only applies to receiving designation to have an LEA number assigned to School of Innovation and would only apply to those students.

DR. SAUNDERS: Okay. So there would be students
-- the online part, the students enrolled fulltime
online would be students of School of Innovation;
there would also be students that would be attending
on-site, as well. Correct?

DR. WITONSKI: Correct. So as we talk about personalization, one of the things that we have learned through the innovation process is students -- we really have to personalize that experience. And I know we've referred to it several times over the last few days, but we have students who do better and we have certain cultures who are equipped to living life or starting their day at a later time, so it truly is about flexibility. That may be completely online for

some students; that might be a blended model, which might be some face-to-face; it might be some online; and in some cases that may be strictly face-to-face. It truly will depend on the individual student.

DR. SAUNDERS: Okay. Is it okay if I address some of the unresolved, just -- I think we may all have some questions there.

CHAIRPERSON COFFMAN: Uh-huh.

DR. SAUNDERS: Looking at some of the unresolved on the application, I'll just try to go through these and I'll just read what it says concerning educational need. It remains unclear that the students with IEP's will receive the direct instruction from instructors with special education certification.

DR. WITONSKI: Absolutely. That's correct. We will follow all guidelines required by IDEA and that includes any screenings, any medical, or any guidance that's required.

DR. SAUNDERS: The schedule of courses offered
-- in that particular section it referenced the
requirement, the federal requirements to have a
lottery if over-subscribed. Would that -- would you
have a lottery there?

DR. WITONSKI: Our process that we proposed was

to have students -- because we are free and open it's to do it first-come first-serve if students want to attend the school, and then to keep a waitlist that's time-date stamped from those applications, and then follow that protocol.

DR. SAUNDERS: I'm not -- is that allowable? I guess I would defer. I don't know, since it's federal law, if we would have any --

MS. PERRY: It's actually just in the federal definition of a charter school that the lottery be there, and then it's in state law for an open-enrollment charter school to have the lottery piece. The federal piece is significant if the applicant -- if the charter wanted to try to obtain grant money from the feds for a charter school, either through the state or directly when the state does not have an active grant, as we won't for this group of charters that you've approved this semester to open next year. There is a process where they can apply directly to the federal government for the charter start-up money. However, if they don't meet the federal definition they would not be eligible for that federal money.

DR. SAUNDERS: Would it just be for that group of funds or would it be for all federal funds?

1	MS. PERRY: It's just for that group of funds.
2	DR. SAUNDERS: Okay.
3	DR. WITONSKI: Dr. Saunders, to clarify, if it
4	is a type of process that's not permissible, our only
5	pushback is not how we do it; it's that it is open
6	and that it's accessible to all students. That is
7	our only concern. So, yes, we will comply with
8	whatever those demands would be.
9	DR. SAUNDERS: I just I don't know what I
10	just didn't know with it being federal law if we had
11	any ability or flexibility within that. That was
12	what my concern mainly was, but I think you've
13	addressed that.
14	MS. PERRY: They would not be in violation of
15	any federal law by not having a lottery. They would
16	simply not be eligible for federal charter money.
17	DR. SAUNDERS: Thank you.
18	CHAIRPERSON COFFMAN: And let me just interrupt
19	here. As long as Dr. Witonski is well aware of that,
20	for the record?
21	DR. WITONSKI: Yes. And we're fine to follow
22	whatever the protocol is as long as the protocol is
23	open and accessible to students. And I can work with
24	Ms. Perry to further define that.
25	CHAIRPERSON COFFMAN: Okay. Go ahead, Dr.

	128
1	Saunders.
2	DR. SAUNDERS: I'll defer to the committee.
3	CHAIRPERSON COFFMAN: Ms. Barnes?
4	MS. BARNES: I don't have anything at this time.
5	CHAIRPERSON COFFMAN: Dr. Jones?
6	DR. JONES: I do. Hello.
7	DR. WITONSKI: Hello.
8	DR. JONES: Okay. So there were two different
9	places in the application. I was especially
10	concerned you know from the CREDO report
11	DR. WITONSKI: Yes.
12	DR. JONES: online totally is a concern
13	DR. WITONSKI: Okay.
14	DR. JONES: because of the lack of evidence
15	to show success. At one point I saw for the young
16	kids, the K-12 it said just online learning; in
17	another part it said blended or digital learning. Is
18	your plan to have both those that are at home
19	completely online?
20	DR. WITONSKI: Our plan is to we'd like to
21	propose to have three options.
22	DR. JONES: Okay.
23	DR. WITONSKI: Totally online, the blended
24	model, or face-to-face. And all of the instruction,
25	regardless of the mode of transportation the child

chooses or that the parent thinks is best for their child, it would be that they would have interaction with the competencies. So we have Arkansas learning standards and then from those standards we have developed curriculum to go along with those who have a sequence and a quide and a process. And then from those we've taken the big rocks, we've made smaller rocks, and then we've tried to group them together into these different competencies. So you still have a mentor, you still have an advisor, you still have a 10-year plan. You have specific requirements that are just components and requirements as part of being part of Springdale School District. But it is that you have access to a curriculum with a teacher who can help you to navigate through whatever that looks like for you.

DR. JONES: And I understand there will be those at home that are not going to come to school and you're trying to seek that population; I understand that.

DR. WITONSKI: Yes.

DR. JONES: What safeguards do you have in place when they start to fail and they're at home?

DR. WITONSKI: So we spent two years trying to find an appropriate learning management system, an

LMS that would speak to some of the problems that we found, and even with students who are physically attending, trying to make sure we have a connection with parents. Parents work or they're busy or whatever that looks like. And so the first go-round we selected an LMS that was not the best for us; it was not a good fit; it wasn't a good fit for our parents; it wasn't a good fit for our kids. And it has to be something that is very transparent and that is very user-friendly; very simple not just for the teacher to upload things and to download things but for parents to do the same and for kids to do the And so we have transitioned this year to a new LMS and it is amazing. It is similar to how you order something from eBay and you can click to have updates and it will either bombard you with every step that your package takes along the way -- and in this case, the analogy would be to an assignment or to a project -- and it also will text you; it will tweet you; it will email you. You can have as much on-demand information as a parent as you want. so what we found first is parents would sign up and they clicked all the buttons because they want all of the information, and then they kind of weaned themselves off because, you know, I don't need to

So we

know every time you walk or move through or click 1 through something. But if they want that high level 2 of information it's there and it's accessible. 3 have some parents who still have everything checked 4 5 and they want to know every time a child is in an assignment, what is the duration of the time that 6 7 they're in the assignment, what did they do when they 8 were in the assignment, and if they wanted to watch 9 it they could go back and look at that. We also have parents who have self-selected to receive less 10 11 information. So, it's customizable. And so how do we keep up with students and how do we track and 12 13 insure that? It is by that personal relationship. Because although it is an online virtual component it 14 15 still has to be about quality curriculum instruction; 16 it still has to be about insuring that they are meeting the standards; and it still has to be about 17 18 insuring that they have access to that. And that all goes back to -- whether you are using this mode of 19 20 transportation or not, it goes back to relationships. 21 And you can build those virtually but students have 22 to have the ability to have that relationship and to 23 have that trust. And sometimes with some of our 24 population that can be really difficult from the 25 onset for whatever reason. And so we are looking for

a way to try to bridge that gap so that if the fear factor is us, so take us out of the equation and let us partner you with someone that you are comfortable with and then help you through that continuum.

DR. JONES: Okay. And my concern is as much for the district as -- because you don't want to assign all these kids that are at home and then you see a huge failure rate.

DR. WITONSKI: Correct.

DR. JONES: Because they still have to participate in testing. And so --

DR. WITONSKI: Absolutely.

DR. JONES: -- having those -- that built-in safety net, when they fall below a certain amount contact has to be made with them. And I know that can be challenging, as well.

DR. WITONSKI: It is huge, especially when you are changing your phone number or don't have one, or you don't have an address or you're living out of a hotel or whatever the situation is for your family.

And so that is the reason we truly fell hard -- hard -- the first year when we realized that everything that is out there -- you can have the best technology and the fastest internet and put all of those things in place that are great practice. But if you don't

have that connection and have the system to manage that -- because it's a lot of information, it's a big volume, it's a big dataset -- it's tough. It's tough.

DR. JONES: I read that your courses were approved by your school board. Did you have a provider for those courses or did y'all build the content?

DR. WITONSKI: We are building our own content. We have courses that we engaged and we've worked with Kathy Swann on with Virtual Arkansas to try to build some additional partnerships. And we have taken the stance -- you know, we were fortunate to receive a grant and have invested a ton of money in curriculum and instruction from those grant funds. And what we've done is put everything out on the web; everything is free; any school district can access it; you can modify it, you can change it, whatever you want to do to it. And that is the same thing we're doing with the competencies. As we are building and developing them -- they're not perfect; you know, they go through a revision cycle, they have to be vetted in a classroom. We've got to get feedback from students to inform what does it need to look like next; you know, we have to get feedback

from parents, how did this work at home; we have to make tweaks. So it's this spiral that continues to go. But even if it's not perfect -- one of the things that we don't do well is we don't share our own stories with each other very well across the state. So putting it out on the web and saying, like, "This isn't perfect and you might find a misspelled word or whatever it is, but it's yours and you can do anything you want to with it." So it is a continual process, for sure.

DR. JONES: Have you gone through the process for NCAA to make sure all of those are approved courses? I'm sure you have.

DR. WITONSKI: Yes. And we've also worked with EQUIP. We worked with LDC and MDC, and there is a rubric that you can submit and vet each of your units of study. And so they go through and they either give you an exemplar rating or a not quite or "hey, you may want to do this and then you could be exemplar." And those levelized -- having a third-party review your -- sometimes what you think is so amazing, when a third-party reads it may not be as amazing. And so we are taking time to go through and vet those with someone else. It doesn't cost anything; it's totally free. And so that was a great

1	resource from the Division of Learning Services that
2	said, "Hey, you know, if you need this, this is a
3	great resource for you." So we are all about the
4	partnerships and then how do we do that. And so that
5	doesn't mean that it's perfect yet; it just means
6	that this particular one that's been revised and is
7	at this point has had some type of other eyes on it
8	to tell us if we're heading the right direction or if
9	we're not.
10	DR. JONES: Okay. And my last question: you
11	know how uncomfortable we are with
12	DR. WITONSKI: I know.
13	DR. JONES: waiving, you know
14	DR. WITONSKI: I know what you're going to ask.
15	Yes, ma'am.
16	DR. JONES: Imbedded courses.
17	DR. WITONSKI: Yes, ma'am.
18	DR. JONES: And I'm not comfortable with waiving
19	that because when we do
20	DR. WITONSKI: I understand.
21	DR. JONES: we waive that for all districts
22	that apply for that.
23	DR. WITONSKI: I understand.
24	DR. JONES: And that means that on any given day
25	they can say, "Hey, we're going to teach these three

	130
1	math classes in this one class and give credit."
2	DR. WITONSKI: Right. Right.
3	DR. JONES: And while you think or many may
4	think they won't do that, there's always someone that
5	will.
6	DR. WITONSKI: Yes. Yes.
7	DR. JONES: And so there is and you know
8	this; you know that there is a reason we do that
9	DR. WITONSKI: Yes.
10	DR. JONES: and it's to protect the student's
11	transcript and it's to insure that they have
12	they'll have an opportunity to take a math every
13	year. And that's just one example. And make sure
14	their course codes are correct.
15	DR. WITONSKI: Yes. Yes.
16	DR. JONES: And so would you be willing to pull
17	that?
18	DR. WITONSKI: So let me ask maybe a different
19	question. So in terms of the why do we do it and why
20	do we have it in place and what does the process look
21	like, I feel like I completely understand it. My
22	concern is or one thing that I feel like has been
23	a barrier to our progression is as we are able to put
24	things that just make good sense together, like oral
25	comm. and English 9, for example, and we're going to

1 blend those together, we regulate ourselves so much more strictly than the Department of Ed. does. 2 that's not just Dr. Rollins' expectation; that is our 3 own moral imperative. And so we don't take it 4 lightly what we're asking in terms of course code. I 5 also understand that setting precedents from your 6 7 point of view, as a former panel member, is very scary. And so you have to have a huge amount of 8 9 trust to be able to do that. And I don't mean that I don't think that you guys don't trust us; I totally 10 understand why the process is there. 11 It serves as a 12 consistent barrier to us. We have a great 13 relationship with Mr. Coy; he is always so helpful and extremely patient, which we certainly appreciate. 14 15 But we were just hopeful, like could this be an option for us to maybe work with Mr. Coy in maybe a 16 different approval process way that we could show how 17 18 these integrate and are part of a cluster, a humanities cluster or something that is richer or 19 20 And course code approval -- obviously, we 21 want our course codes to be correct so that 22 transcripts are recorded correctly -- but in terms of 23 the curriculum alignment, sometimes it is not so 24 clear-cut; sometimes it is not so innate. But if 25 students are out and are doing things through these

1	internship experiences, we want to insure that they
2	are receiving credit and they are really getting the
3	bang for their buck in terms of the time investment.
4	So it was an in effort to say could we have a
5	conversation, could it be a possibility and if
6	it's not, we do understand. But that's where the
7	initial onset of desire came from.
8	DR. JONES: Well, I think there are
9	possibilities without the waiver.
10	DR. WITONSKI: Right.
11	DR. JONES: We're having lots of conversations
12	with CTE.
13	DR. WITONSKI: Okay.
14	DR. JONES: If you're concerned about being out
15	in the market
16	DR. WITONSKI: Yes.
17	DR. JONES: or industry
18	DR. WITONSKI: Yes.
19	DR. JONES: and working with
20	DR. WITONSKI: Yes.
21	DR. JONES: imbedded credit
22	DR. WITONSKI: Yes.
23	DR. JONES: we're working on that.
24	DR. WITONSKI: Okay.
25	DR. JONES: And so we would be willing to work

	139
1	with you on that.
2	DR. WITONSKI: Okay. Okay. That's what
3	DR. JONES: I'm not comfortable waiving that
4	DR. WITONSKI: I understand. I understand.
5	That's fair.
6	DR. JONES: Thank you.
7	DR. WITONSKI: That's fair.
8	CHAIRPERSON COFFMAN: Dr. Gotcher.
9	DR. GOTCHER: Yes. Dr. Jones, you reminded me
10	of something that occurred yesterday.
11	DR. WITONSKI: Yes.
12	DR. GOTCHER: And, Dr. Witonski, while I
13	completely trust to use that word earlier and
14	recognize your commitment on a personal level with
15	students, I have to bring up one thing that came up
16	yesterday regarding attendance.
17	DR. WITONSKI: Yes.
18	DR. GOTCHER: In the event that a student
19	becomes inactive on their online learning, and you
20	make these attempts to re-engage them, with the
21	waiver that potentially, you know, could bypass the
22	compulsory attendance law, at what point do you feel
23	that you guys would need to drop a student? I know
24	you're going to hold that student accountable; but at
25	the same time, the Department wants to hold districts

	140
1	accountable
2	DR. WITONSKI: For sure.
3	DR. GOTCHER: not to abuse
4	DR. WITONSKI: For sure.
5	DR. GOTCHER: the receiving of ADM funds
6	DR. WITONSKI: For sure.
7	DR. GOTCHER: when a kid has been inactive
8	for three months, for example.
9	DR. WITONSKI: So I'm sure Clay-ification will
10	let us know. But we will need to add that waiver,
11	which isolates that attendance would be the visual
12	issue. If we have a student who is an online
13	student, we don't want to have to meet the
14	requirement of physically seeing them every day,
15	which is how it reads. The request is really in an
16	effort to bypass the physical attendance. Our rigor
17	and expectation of students being able to be engaged,
18	it will be no different for students who are
19	attending in any of the other modes. It will be a
20	requirement. But the physical checkpoint that they
21	have walked through the door, if they are a 100%
22	virtual student, would be extremely difficult for us
23	to meet.
24	DR. GOTCHER: So am I sort of hearing that your
25	practice would be 10 days of inactivity would be a

	141
1	reason to drop a student as you would for a face-to-
2	face student?
3	DR. WITONSKI: Correct.
4	DR. GOTCHER: Right.
5	DR. WITONSKI: Correct.
6	DR. GOTCHER: And that would just be a trust
7	DR. WITONSKI: It would be a trust part. The
8	other would be that if we have students who are in
9	unique situations typically they are accompanied with
10	a 504 or something else that tells us more about
11	their situation that could say why have you been
12	inactive for 10 days. And so we would also lean on
13	those measures
14	DR. GOTCHER: Sure.
15	DR. WITONSKI: that we use as a good
16	reference point.
17	DR. GOTCHER: All right. Thank you.
18	DR. WITONSKI: Yes, sir.
19	DR. GOTCHER: Did Ms. Clay have something to add
20	or was it
21	DR. WITONSKI: Sorry, Clay-ification.
22	MS. CLAY: A couple of things I just want to
23	make sure we're clear on. They have not asked for a
24	waiver of compulsory attendance.
25	DR. GOTCHER: The mandatory piece.

1	MS. CLAY: Yes. They asked for a waiver of
2	mandatory attendance for 9th through 12th graders.
3	Also, they have not asked for a waiver of the
4	requirement that the students not present for 10 days
5	that they be dropped from APSCN. So they would be
6	required to abide by both of those.
7	DR. GOTCHER: All right. So that's still in
8	place for this current request. All right. Thank
9	you. Sorry for the confusion.
10	DR. WITONSKI: No. It's perfect. We love it.
11	CHAIRPERSON COFFMAN: Ms. Pfeffer.
12	MS. PFEFFER: Yes. Just a couple of questions.
13	I think that this was something that Dr. Rollins
14	mentioned in his video. He talked because we have
15	heard charter applications that talk about
16	personalized learning for students. But I think this
17	was the first time I heard someone say
18	personalization of teaching
19	DR. WITONSKI: Yes.
20	MS. PFEFFER: and learning.
21	DR. WITONSKI: Yes.
22	MS. PFEFFER: And then there was another
23	something else in there that struck me; you talked
24	about master teachers. So can you talk just a little
25	bit about what is the personalization of teaching and

then how do you plan to develop those master teachers?

25

DR. WITONSKI: So I'm sure you noticed that we asked for some leniency in professional development. That is not in an effort to not provide professional I know that you also received a letter development. that stated some of those things in the letter, and I want to clarify those also, if I can, with permission. We will obviously offer professional development. Our courses and how we interact with our teachers through this innovation process, it has been at some points grueling because it is -- you have so many realizations that are happening at once. It's like sitting on the Panel; sometimes it's a fire hose moment where you're trying to get a drink, to quote Dr. Cleveland. You have to have that time though to be able to assess what do we need to do differently. And so what we know is teachers need specific professional development and sometimes it has nothing to do with content; sometimes it's how do you interact with this and still have a relationship with the student. We want to bring in those industry experts, and to be able to bring them in they're going to need a different type of professional development. They may have their content down cold

23

24

25

and they know it perfect, but they may need some relationship building with how do I deal with this student and what does that look like. And so we have a professional development center in Springdale, in our school district, to house and to insure that we have consistent professional development. And so that is not in an effort to walk away from the importance of professional development. If anything, it's to say let's crack the top of that off and then how do we do this in a better way to really meet the needs of -- what does the teacher need and that goes and ties directly into what your work is with TESS and with BloomBoard. As we are evaluating and as we are in the classroom and as we are seeing these different things, and then conversely with curriculum development and instruction development as we are looking at how was this implemented and how was this taught in the classroom, it goes back to inform not just our curriculum and instruction but it tells us, oh, like we need professional development in this area on this particular piece, and that might not be prescribed by law. It might not be specifically isolated, but it doesn't make it less important. So I don't know if that helps.

I mean, no, it does, and I'm glad

MS. PFEFFER:

	145
1	you mentioned going back, because part of the
2	professional development then, yes, it's a natural
3	tie-in with what the educator's professional
4	growth plan.
5	DR. WITONSKI: Yes.
6	MS. PFEFFER: So I appreciate you bringing that
7	back. And in I lost my question. I'm sorry.
8	DR. WITONSKI: That's okay. We can do it again.
9	MS. PFEFFER: Let me go ahead and
10	DR. WITONSKI: Yeah.
11	MS. PFEFFER: I think Eric's got a question.
12	DR. WITONSKI: For sure.
13	DR. SAUNDERS: I wanted to follow-up on that
14	professional development. And I can understand
15	looking at the waivers I can understand how that
16	would apply in requesting the waiver. And you may
17	need a law book for this question, but on the 6-17-
18	704 and 705. However, I'm having a tough time
19	understanding how 6-17-709 stands in the way as
20	you've described, and so
21	DR. WITONSKI: Wow. Clay-ification's book is
22	really a lot.
23	MS. CLAY: They've seen it.
24	DR. SAUNDERS: She uses it.
25	DR. WITONSKI: Like a paperclip

MS. CLAY: Yeah.

20

21

22

23

24

25

DR. WITONSKI: Okay. And you said 6-17-709?

DR. SAUNDERS: Yeah. I was trying to find out what specific parts of that particular law stand in the way of what you just described.

DR. WITONSKI: Okay. So in this particular one, if you look, it talks about the rotation or the dial that teachers access, suicide prevention awareness or whatever it is. Right? And so the thought is if we have -- a Tyson executive is not going to leave their plus-hundred-and-fifty-thousand-dollar job to come They might be willing to partner and teach for us. with us on a course or on a class. And so the waiver for professional development and the things that encompass that are, one, to personalize whatever their professional development needs are for them, but also to say some of these may not be pertinent in the particular role that you're serving for us as a contracted employee. And by "contracted," that would be a different type of contract.

DR. SAUNDERS: So that would be for -- so if I'm understanding, this would be for classroom teachers that you're speaking of. Correct?

DR. WITONSKI: It could be a classroom teacher.
Yes.

DR. SAUNDERS: Okay.

CHAIRPERSON COFFMAN: Ms. Pfeffer.

MS. PFEFFER: Okay. I think I'm back to what my question was. So you talk about kind of three different ways students will participate in the School of Innovation, either completely online, blended, or all face-to-face.

DR. WITONSKI: Yes, ma'am.

MS. PFEFFER: So, but you don't yet know what that breakdown is going to look like of your students. Correct?

DR. WITONSKI: We don't. And when we started a year-and-a-half ago and opened the school, we opened it with a very -- we had an open mindset. I don't mean that we were closed-minded, but we did the known things that we know to do. We did a schedule and we were like where are the -- you know, all of the things that you're supposed to do in a school. And those quickly unraveled and we had to re-assimilate. And so on one hand I've told you we have done a ton of planning; we have done a ton of research and we've invested a ton of time and effort into this model. We're building a building. At the same time, you have to be -- in this world you have to have this fixed-fluid, so you have to have the opportunities to

be there and you have to be prepared that if you have 600 students that all 600 might opt to do this and then how do you staff that. And so that's had implications for Dr. Cleveland in the world of personnel; that's had implications for Mr. Rollins in the world of who do I need to be here and how do I access them. But we have learned not to completely pin ourselves to specifics because we are trying to make it personalized. So it could be all of them; it could be some of them; it may be none of them. We want to say, "Here are your options; this is what the buffet looks like; these are the competencies you have to meet; these are the Arkansas standards that are absolutely required; and then, how would you like to get there."

MS. PFEFFER: And I -- and that was, I guess, where this is a --

DR. WITONSKI: Huge.

MS. PFEFFER: Wow.

DR. WITONSKI: I know.

MS. PFEFFER: You know, I'm just thinking through -- and I was thinking through in my mind, yes, you really don't know what this is going to look like, so you're going to have to be positioned to be able to adjust to those students.

DR. WITONSKI: Isn't that fun?

1

17

18

19

20

21

22

23

24

25

It is. I think the only thing MS. PFEFFER: that's still in the back of my mind that's a little concerning is, and Dr. Jones talked about, the completely online, that if there is no face-to-face support. I think my -- I guess the biggest concern, if you did get the majority of them coming in online and not only are they just online students but they're speaking 10 different languages literally and then you add the virtual component in, just thinking through what is that going to look like. But I think the other thing that I see is that -- and I guess the one thing that really hit me was the talk about creating a school of their dreams. I don't think there's probably a lot of students today that would say school is the school of their dreams.

DR. WITONSKI: Right.

MS. PFEFFER: So I think to approve this we're all going to be taking kind of a big leap of faith and it's going to -- you know -- and I think for teachers that the fact that you are recognizing that there is that need to personalize teaching and support for them is maybe going to be as important -- not as important, but it's going to be very important along with personalization for students. So --

DR. WITONSKI: It's critical. It's been one of our biggest takeaways. And not that we didn't know professional development wasn't important, but learning how do we do it in a different way and then how do we apply it, and then not being so regimented in our routine. Because we've all been in education in a traditional brick-and-mortar experience for so long that you don't just make so many assumptions. And so being -- having that fixed-fluid to know, yes, we're prepared for it, you know, kind of like disaster preparedness -- you know, we all know we could have a tornado but we could not -- and then being able to respond to whatever those things are.

CHAIRPERSON COFFMAN: Dr. Witonski, I'd like to take you back to the letter.

DR. WITONSKI: Yes.

CHAIRPERSON COFFMAN: I always appreciate when the patrons write in, and it's really great feedback, and this person in particular was very articulate in explaining the concerns that they had. So you've laid out three pathways and one of those pathways is really that more traditional come-to-school-everyday, on time, and have that qualified teacher, that licensed teacher in a normal class size limit, and that teacher is going to be providing that quality

1	professional development that he or she needs to meet
2	the needs of those kids.
3	DR. WITONSKI: Right.
4	CHAIRPERSON COFFMAN: So I want to make sure
5	we've addressed every issue that was mentioned.
6	DR. WITONSKI: The only issue that I don't think
7	we've addressed, and that we will have to do this
8	locally, is you can never communicate enough; you can
9	never build enough relationships. I'm sure you saw
10	in the packet we had more than 30 letters of support
11	from local partners, from regional partners, and
12	national partners. You cannot communicate enough.
13	Our goal through this whole process is to try to
14	address all of our students and we see that our data
15	tells us we are not doing that, and this is in an
16	effort to meet whatever that need is.
17	CHAIRPERSON COFFMAN: But don't you appreciate
18	those people that will write in and tell you
19	DR. WITONSKI: No, it's the only way you know.
20	CHAIRPERSON COFFMAN: It's the best.
21	DR. WITONSKI: It's the only way you know.
22	That's huge.
23	CHAIRPERSON COFFMAN: As opposed to the ones
24	that are just mad and tell everybody else.
25	DR. WITONSKI: And both are good. Right? So we

22

23

24

25

have social media, which helps to inform that, which then we know what those knowns are. But then these are also helpful.

CHAIRPERSON COFFMAN: Yes, it is very -- talk to me a little bit about the online courses. You said you're creating your own courses. Am I to assume then that Springdale teachers will be facilitating those courses?

DR. WITONSKI: In some cases, yes. So we are building courses. We are partners with Virtual Arkansas, and we are looking for -- we have looked at a ton of models. And so many that we have seen always have the correct sticker on it and say the right thing, but as you dig down deeper beneath the surface it doesn't meet what our expectations are in terms of high expectations. And so the reason we've gone the route of trying to build our own is, one, to provide that and spread it out among our state for those who want to access it, because I have an appreciation for understanding the lack of sharedness from a state perspective. The other is that we have the ability to truly change education and what that experience is for kids. And so the online component, we will have teachers who will be under a traditional contract, who will be covered under Teacher Fair

Dismissal; we will have teachers who are not. 1 it goes back to that conversation that we had earlier 2 about, you know, we started this process and we were 3 so fixed and we knew exactly what we were going to do 4 and this is going to be so great. And then it was 5 like -- it didn't go that way. And so when you have 6 7 that moment of unravel and you have that moment of kind of rising back from that, it helps you to --8 9 those lessons learned had to be learned that way. 10 And the only way you could've learned them is through going through the process. So our job is to now 11 12 share what those lessons are so that other people who 13 might be considering that won't have to walk that same path. And so that's through finding the right 14 15 LMS; it's through finding the right curriculum; it's 16 making sure that the standards are imbedded; it's all of those things to ultimately provide us on the other 17 18 end someone who meets the needs, not only of our local industry and our national industry but also 19 meets the needs of being a good citizen, having those 20 21 -- I believe that Dr. Gotcher said earlier "soft skills." You know, it's "momma skills." It's things 22 23 your momma should've taught you. It's how do you 24 engage with somebody and what does that look like. 25 It's that personal relationship and whether that's

virtually or face-to-face how you interact with people.

CHAIRPERSON COFFMAN: Having had the experience of writing lessons and units and then creating online courses, it's certainly a daunting challenge but some of the best professional development an educator will ever have.

DR. WITONSKI: Amen. Yes, ma'am.

CHAIRPERSON COFFMAN: Dr. Saunders, I see you have a question.

DR. SAUNDERS: Yes. I want to go back to the letter for just a second and I want to address something within there. I think some things really were powerful in the sense that I think there was an idea that was communicated that, you know, the parent sends the child to the school with the expectations of a licensed teacher of this, of that, of other certain criteria being available for that child. And I do want to ask you, I guess, and clarify that in your set-up, in your proposal any student that would attend this is -- it's purely optional?

DR. WITONSKI: Yes. So student attendance is optional. The other is our hiring practice due to charter designation won't change. We have strict standards. We have a really strong protocol. Dr.

25

Cleveland is very proficient in what he does in terms of vetting potential applicants and who could be a potential applicant, and that doesn't matter to us whether they have licensure or they don't have licensure. That won't change. What we have to be able to access is when we have a university professor who has maybe taught math and is an amazing teacher and they've done it for 20 years, it's very hard to have that face-to-face conversation to say, "We would love to partner with you and, yes, you would be great to teach a math course, but you can't." And so we want to be able to remove those barriers and whatever the situation is to be able to access that. That doesn't mean though that you get to forego background checks or an interview or go through and be vetted in the process that any other person that would be allowed to have contact with our kids would be -it's not an option. You have to still go through the process because at the end of the day our resources that we have to protect are our students.

DR. SAUNDERS: Yes. Yeah. And that's a -- I think you're exactly right and, you know, I know that you do a thorough job on getting the best applicants that you can get. And I just want to emphasize that it would not be mandated upon these students; in

other words, it's not covering an entire grade range district-wide that students are forced, if you would, to participate in this environment.

DR. WITONSKI: Right.

DR. SAUNDERS: It is -- it's a different method, thinking a different way, and students have the option to take advantage of this if they so choose.

DR. WITONSKI: And it isn't for every student. You know, it is a very different model; it is a very different approach. But it is our effort to say if we are achieving at this level and we are not yet at 100% there's still a portion that we're not meeting; so how do we meet their needs, which could have other implications later on. But for right now, from the research we've done and the direction we think we need to go, this is our next step.

DR. SAUNDERS: Okay.

CHAIRPERSON COFFMAN: Ms. Pfeffer.

MS. PFEFFER: Can I follow-up? Because I think

-- from your comments I think that's what is -- one

of the benefits of a district conversion charter in a

sense like this where students can choose. So that's

part of the conversation with parents that you are

choosing a different environment where teachers'

qualifications and all that will look different and

1	but just that realization that that's not going to
2	be universally understood.
3	DR. WITONSKI: Yes.
4	MS. PFEFFER: And that, you know, not all
5	this is not going to be whatever the student wants.
6	So it's not going to be every student's dream.
7	DR. WITONSKI: That's right.
8	MS. PFEFFER: And so
9	MS. LIWO: Ms. Coffman, may I
10	CHAIRPERSON COFFMAN: Yes, Ms. Liwo.
11	MS. LIWO: So every student can choose to
12	participate. What if they're interested in your
13	concept but don't like the idea of not having an
14	unlicensed teacher? Aren't you kind of limiting your
15	student pool that way?
16	DR. WITONSKI: We're limiting our student pool
17	if they don't have access to a licensed teacher? I
18	think our goal is to insure that students have access
19	to excellence, regardless of how that person achieved
20	those skills or that content knowledge, whatever
21	method they went about. We don't want to limit
22	students' ability to that access. And so having the
23	option for students to if they want a traditional
24	face-to-face, everyone has been through the
25	traditional teaching education coursework. We have

schools that offer that. This would be a school that offered that and then some.

MS. LIWO: Okay. I'm also considering the legislative intent, which is to create new professional opportunities for teachers. With your -- I mean, it's a pretty broad waiver for me, non-licensed teachers in your core and non-core content areas. How does that support even legislative intent?

DR. WITONSKI: So I think the legislative intent was to establish some type of process or procedure for people to be vetted before they reach or have access to children. And so how we would do that to keep that legislative intent is to insure that we apply the same hiring practices to this population, as we would with any other population. If a potential employee is going to have contact with a student, we take that very seriously. And not only from the stance of academically, but in terms of what is their interaction like, how do they interact with students, and making sure that we have appropriate hiring practices in place to be able to insure that that is not a problem for us.

MS. LIWO: And, I mean, I understand that the safety of our students is paramount. I understand

2

14

15

16

17

18

19

20

21

22

23

24

25

that. But I also think about going through a process to become licensed is not easy and I worry about limiting job opportunities for people that have gone through that process. And that's why I brought up that specific portion of the legislative intent. I'm a little uncomfortable. This is just a little too broad for me.

In terms of how do we harness and DR. WITONSKI: how do we insure that teachers are still there, we have 29 schools who are still in practice that are still moving forward, that are still happening. This is a slight alternate to say if you are a university professor and have some experience, if you work at Tyson and you are an executive, if you work at J.B. Hunt and you are an executive and you can't afford to walk away from your job but you have the expertise, you have the knowledge, you have the social skills, you have appropriate interactions with students, and you've gone through the application process to become part of our team, if you're going to be part of Springdale School District we take it very seriously. We have a ton of applicants that come in and it is a very rigorous process to be encompassed into that And so hopefully to assure your fears are two world. things: one is not to walk away from the process of

teacher licensure or how to become a teacher. What we hope could be happening, that could be the fallout from that is we initially bring you in and initially you're interested in just teaching a course. But over time you feel and determine that this might be a passion for you and that might encourage you to go back and seek additional licensure. We want people that want to be part of the fabric of the school and of this effort, and so how we hire and who we hire would be treated whether the person has Arkansas teacher licensure or does not have Arkansas teacher licensure.

MS. LIWO: I guess -- how often -- the case scenario that you brought up of this university professor, how often do you envision a scenario like that playing out?

DR. WITONSKI: I'll give you one example. We are working with the engineering department at the University of Arkansas, and one of the professors who is involved with that particular department asked if he could come and work with students and kind of establish this robotics program for our students to be able to have an interaction with. And that's kind of grown and done some other components. His interaction is great with kids; his content knowledge

And so he has certification for ADHE; he 1 is amazing. does not have the required components and pieces of 2 paper in place for ADE. He also is not eligible to 3 have that unless he opted to go back to school to 4 receive additional coursework. And so he has a Ph.D. 5 in engineering. It would be great to access his 6 7 skills and to do that on a daily basis, but we can't. 8 And so allowing that waiver to come forward allows us 9 to then go through the process to see would he be 10 interested in a bigger partnership beyond what we have in place right now, which is a club that happens 11 after school or before school. How do we bring that 12 13 in? If we have kids who are interested in that, would he be willing to do an hour five days a week? 14 15 Would he be willing -- you know -- I'm not sure what that looks like, but it's building those partnerships 16 with these local experts that we have in our backyard 17 18 that have quality content and quality capability; they just don't have that additional coursework. 19 20 it's not that they're not educated, it's not that 21 they don't have an advanced degree, it's not that they don't have content knowledge, and it's not that 22 23 they're not great with kids. They have all the 24 things that you would desire in an applicant, but if 25 they don't have that piece of paper then that's where

the difficulty comes.

MS. LIWO: Okay. Thank you.

DR. WITONSKI: Yes, ma'am.

CHAIRPERSON COFFMAN: So I think for point of clarification, you're saying you're not displacing teachers; you're trying to enhance your teaching pool.

DR. WITONSKI: Yes, absolutely. Yes, we're trying to build it. We're trying to build our capacity and also build -- because of what Ms. Pfeffer asked about how many kids do you think that would want to access this or that, because we know and have lived, you don't know. It might be that they are all interested in this and you've got to build that out to be able to harness that number or there may be one that's interested in this. But if one is interested and if we could build a course to be able to access that one child and meet that one child's interest and do that in a different way and harness some of that expertise, that's what we feel like we have a duty to do.

CHAIRPERSON COFFMAN: Any other questions?

DR. SAUNDERS: If everyone is done, I would like to go through each waiver just for my clarification of where we're at on that. And I think there's some

	163
1	we haven't hit on that we may have some
2	CHAIRPERSON COFFMAN: You're between us and
3	lunch, Dr. Saunders.
4	DR. SAUNDERS: Well, I've been told that a lot.
5	All right. Waiver number one for the imbedding of
6	oral communications and you were asking to waive
7	that or pull that off. Correct?
8	DR. WITONSKI: We are asking for a different
9	partnership with Mr. Coy and the course code
10	department. Yes.
11	CHAIRPERSON COFFMAN: Is that a yes or a no?
12	DR. WITONSKI: Yes.
13	CHAIRPERSON COFFMAN: Okay.
14	DR. SAUNDERS: Yes, you're withdrawing it?
15	DR. WITONSKI: We are withdrawing it
16	DR. SAUNDERS: Okay.
17	DR. WITONSKI: with the opportunity to work a
18	different way.
19	DR. SAUNDERS: And the planned instructional day
20	requirements, trying to do a waiver from the planned
21	instructional day, the 360 minutes, because of the
22	virtual in particular. Correct?
23	DR. WITONSKI: Correct.
24	DR. SAUNDERS: Okay. Class size and teaching
25	load

1 DR. WITONSKI: Yes, sir. Can you talk just a minute about 2 DR. SAUNDERS: that, please? 3 So, again, back to taking off 4 DR. WITONSKI: limitations, we all understand that the smaller the 5 class size, the better. In some cases, it might be 6 7 maybe three internships, it might be apprenticeships, 8 it might be that we have a particular interest in 9 this one particular area. It depends on what students self-select in that learning continuum. 10 So we want to be able to have the ability or the 11 flexibility -- as kids self-select into whatever that 12 next course is or whatever that looks like and 13 they've outlined their 10-year learning plan and we 14 15 are following them through and then following them on 16 beyond high school that we have the capability to be flexible in our scheduling and in the numbers. 17 18 also, again, understand that low numbers are always preferred and that would be our first effort. But we 19 20 also don't want to limit students to be able to 21 access courses. 22 DR. SAUNDERS: Okay. 23 DR. WITONSKI: So we would definitely have a 24 balance. 25 DR. SAUNDERS: So with the new law that allows

	165
1	for this, you're asking for a waiver on the new law,
2	the requirements to fund the teachers beyond the 150?
3	DR. WITONSKI: Yes.
4	DR. SAUNDERS: And so face-to-face looking at a
5	cap of 180, and for blended and online learning a cap
6	of 350?
7	DR. WITONSKI: Yes.
8	DR. SAUNDERS: And the clock hours for credit,
9	the Carnegie unit, would that be for blended or would
10	that be for 100% online? Which environment would
11	that be for?
12	DR. WITONSKI: All three. And that is something
13	we participate in currently as a School of
14	Innovation, so that is something we would want to
15	sustain. Our model is built upon that flexibility.
16	DR. SAUNDERS: Core and non-core classes?
17	DR. WITONSKI: Correct.
18	DR. SAUNDERS: Okay. And the waiver from
19	principal licensure?
20	DR. WITONSKI: Yes.
21	DR. SAUNDERS: Why would that be needed?
22	DR. WITONSKI: It isn't needed now. Unlike Dr.
23	Hernandez, I do like Mr. Rollins. But the
24	flexibility it's flexibility in the future. I
25	don't know what this model is going to look like in

1	the next five years in terms of transition. I also
2	don't know that at some point we would not need
3	assistance virtually garnering students and I don't
4	want that to be a blockade for us later down the
5	road.
6	DR. SAUNDERS: Do you think if you needed that
7	waiver in the future you could come back and ask for
8	that as an amendment?
9	DR. WITONSKI: I could. Uh-huh.
10	DR. SAUNDERS: So would you be willing to
11	withdraw that at this time?
12	DR. WITONSKI: I would. Mr. Rollins said thank
13	you.
14	DR. SAUNDERS: Career and technical education
15	DR. WITONSKI: Yes.
16	DR. SAUNDERS: can you describe that just a
17	little bit?
18	DR. WITONSKI: For career and technical
19	education, we understand that it's a separate
20	division and we will have to work with them. It's
21	also just an awareness that we want you to know as a
22	department that we are working with their department
23	to try to find the best options for what that could
24	look like, and don't want to do that without one side
25	knowing what the other side is doing, trying to keep

Yes.

DR. WITONSKI:

25

That combines with our dual

1 language and our desire to move to providing our region with bilingual students. 2 3 DR. SAUNDERS: Okay. Beginning and end of school year? 4 So that constant time is 5 DR. WITONSKI: Yes. not our constant; it's fluid. And so in some cases 6 7 students may need longer than is required; in some 8 cases students may need shorter than is required. 9 And we don't want the beginning and ending of the 10 school year to be the stop-gap for them. DR. SAUNDERS: Okay. Professional development 11 12 that we've discussed already. 13 DR. WITONSKI: Yes. DR. SAUNDERS: However, I would just still like 14 15 some clarification on the question earlier. 16 clear -- I guess when I'm looking at 6-17-709 that we discussed earlier --17 18 DR. WITONSKI: Yes. 19 DR. SAUNDERS: -- looking at the categories, I understood you to say that if I look at four main 20 21 categories -- mandated reporter, parent involvement, teen suicide awareness, and Arkansas history -- I 22 23 guess I have a tough time with saying that anyone 24 serving as a classroom teacher does not at one point 25 need those trainings. So can you help me with that?

1	DR. WITONSKI: Yes, I can help you. So the
2	thought behind it is we want to personalize what that
3	teacher needs. And so obviously if it has something
4	to do with safety or it's something that is an
5	unknown quantity that is absolutely necessary for the
6	role that they're fulfilling we want to do that. On
7	the other hand, it might not be as pertinent for the
8	particular content area that they are helping us
9	with, whether that's online or whether that's face-
10	to-face.
11	DR. SAUNDERS: Can you give me a specific
12	example? Let me just put one out here. Where would
13	it not apply for a classroom teacher to have teen
14	suicide awareness training?
15	DR. WITONSKI: Okay. Let's talk about Arkansas
16	history.
17	DR. SAUNDERS: Okay.
18	DR. WITONSKI: So is it pertinent for you to
19	have the hours in Arkansas history for you to be able
20	to work with students in engineering or in a skilled
21	trade or to go through an internship?
22	DR. SAUNDERS: They're not required to have it
23	currently, I don't believe.
24	DR. WITONSKI: So my question is, in the and
25	you're concerned about the safety part?

	170
1	DR. SAUNDERS: Yes. Basically, I'm concerned
2	about the first three, in particular the mandated
3	reporter, parent involvement, and teen suicide
4	awareness.
5	DR. WITONSKI: Okay. So, Ms. Clay, are there
6	any other components to that? Can I ask Ms. Clay a
7	question?
8	DR. SAUNDERS: That's up to her.
9	MS. CLAY: I'm trying to bring my falling-apart
10	book up here.
11	DR. WITONSKI: Yeah, I know; you have two. So
12	are there any other components besides those? I
13	think it's also the online component.
14	MS. CLAY: I'm not sure I'm following the
15	question. I understand
16	MS. BARNES: Those are the only
17	MS. CLAY: Right. I understand what I don't
18	
19	DR. WITONSKI: I'm asking is there anything else
20	beyond those three?
21	MS. CLAY: That are required?
22	DR. WITONSKI: Uh-huh.
23	MS. CLAY: In this particular law, no.
24	DR. WITONSKI: Okay. We can withdraw that, Dr.
25	Saunders.

171 1 DR. SAUNDERS: Okay. CHAIRPERSON COFFMAN: The additional requirement 2 of the professional development is that there is 3 professional development aligned with their 4 professional growth plan. And that would, I would 5 assume, be adjusted to whatever they're teaching, 6 7 whatever they're working on, and if they're a fulltime licensed employee. 8 9 DR. WITONSKI: Right. CHAIRPERSON COFFMAN: Would it not, Ms. Pfeffer? 10 11 DR. WITONSKI: That's what I understand. 12 MS. PFEFFER: The professional development 13 requirements are for licensed personnel. Correct? DR. JONES: Right. 14 15 MS. PFEFFER: Right. Now the professional 16 growth plan with TESS is not tied to -- TESS -- the evaluation system is also for non-licensed employees; 17 18 the Teacher Excellence Support System is also for non-licensed employees. But the requirement for 19 professional development would be for licensed, so 20 21 there would be some variation there. But I think for what -- for that part of the statute that was dealing 22 23 with licensed employees. And the scenario you were 24 concerned about I think would be --25 DR. WITONSKI: Yes.

	172
1	MS. PFEFFER: the non-licensed persons.
2	DR. WITONSKI: Yes.
3	MS. PFEFFER: It's hard to untangle some of
4	these things.
5	DR. WITONSKI: I know. Isn't it fun?
6	CHAIRPERSON COFFMAN: That's why there's a team.
7	DR. WITONSKI: That's right.
8	DR. SAUNDERS: Now moving on to the next one,
9	non-instructional duties.
10	DR. WITONSKI: Yes.
11	DR. SAUNDERS: Just hit on that for a second.
12	Is that dealing specifically with the online?
13	DR. WITONSKI: It could be online. It could be
14	that we have, again, an industry expert or a local
15	expert coming in to work with us in a different way
16	and we need the flexibility to be able to bring them
17	in.
18	DR. SAUNDERS: Okay. And teacher contracts.
19	DR. WITONSKI: Yes. So contracts would look
20	different if you're not a licensed person. You would
21	not be covered by some of the components that are
22	included in the licensed contract.
23	DR. SAUNDERS: Okay. Now maybe Dr. Cleveland
24	and Ms. Clay on this, but I want to combine the
25	teacher contracts with I know later on you get

down into -- let me skip down just a second here.

You get into the waiver from Teacher Fair Dismissal and Public School Employee Fair Hearing Act. So am I -- would it be required then for those employees to essentially have like a separate policy book that would apply to them? I'm trying to understand.

DR. CLEVELAND: Yeah. I'd like to speak to that. Thanks for bringing that up. We had a lot of conversation with the employees at the School of Innovation even last week about the voice that they'll have since they're there. They were hired as a teacher at Springdale under Teacher Fair Dismissal, the whole bit. They come to school, they're physically there; they'll have a contract just like every other Springdale employee. Assuming they go through the following process and TESS and are recommended for renewal, they'll have Teacher Fair Dismissal. As far as policy development goes, we have to have that -- if this is accepted today, the work just begins, Dr. Saunders, for me -- okay? -- in regard to working with PPC and those teachers at the School of Innovation to make sure that processes are in place for them to have some protection. We don't want to lose that. Now, where I see the world, if we have a teacher in China teaching Chinese to our

	1/4
1	teachers it's more like a purchased service, much
2	like Scott said outside. So Teacher Fair Dismissal
3	wouldn't apply in that area, to me; that's my
4	interpretation. Okay.
5	CHAIRPERSON COFFMAN: Dr. Cleveland, would you
6	give your full name and title for the record?
7	DR. CLEVELAND: Oh, I'm sorry. I'm Jared
8	Cleveland; I'm the deputy superintendent of
9	Springdale schools. I apologize.
10	CHAIRPERSON COFFMAN: Thank you.
11	DR. CLEVELAND: I should've known that after
12	being down at the podium.
13	DR. SAUNDERS: And I think that occurs many
14	times on online courses when the teacher of record
15	may not be an employee of the individual district.
16	DR. WITONSKI: Uh-huh.
17	DR. SAUNDERS: Mandatory attendance and I
18	think we've already discussed that one, along with
19	the attendance records and reports, as Dr. Jones here
20	pointed out earlier.
21	DR. WITONSKI: Uh-huh.
22	DR. SAUNDERS: And immunization requirements
23	the immunization requirements would only apply to
24	those students that are online fulltime, I assume?
25	DR. WITONSKI: 100%. Yes. Because if they are

1	blended or they are going to interact with other
2	students then they would then be required.
3	DR. SAUNDERS: And on the eye and vision
4	screening, the question I had with that one: is it
5	possible for you to have some way for those students
6	that are online only to make sure they are notified
7	that eye and vision screening is occurring, like if
8	they wanted to attend one of those they could?
9	DR. WITONSKI: Yes. Yes. Our LMS would do
10	that. Uh-huh.
11	DR. SAUNDERS: And physical education
12	DR. WITONSKI: Yes.
13	DR. SAUNDERS: can you talk about that one
14	just for a moment, please?
15	DR. WITONSKI: We are wanting to transition what
16	physical education looks like. It's not that we
17	don't think that health and wellness is important,
18	but we need to do it in a different way, particularly
19	if a student is a virtual student. We have an online
20	health course that we did through Act 1280 and it has
21	physical and moving components; however, the student
22	does it and can do it in their home or they can do it
23	at school. So it will look very different.
24	DR. SAUNDERS: Okay. And fine arts.
25	DR. WITONSKI: Yes.

1 DR. SAUNDERS: Can you just talk about that waiver? 2 3 DR. WITONSKI: So we will have -- our plan is to offer fine arts for students. However, if they are 4 5 not physically able to come to school, if they are a virtual student, we are seeking a waiver from that. 6 7 DR. SAUNDERS: Would there not be a -- I guess I'm not understanding why it would not be possible to 8 9 provide a fine arts course for those online students. They might have interaction with 10 DR. WITONSKI: fine arts through an online component, but they might 11 do -- obviously, they would do it in a different way 12 versus the face-to-face instruction. 13 DR. SAUNDERS: Okay. But they would be 14 15 completing a fine arts course online? 16 DR. WITONSKI: They still have to complete the courses that are required for graduation. We require 17 18 24 units for students to graduate, which is above the state standard. If we have students who are in the 19 20 lower grades though, they may not have access to some 21 of those courses. So that's why it would be 22 particularly important for us to have it -- and, 23 again, in the online setting that could definitely be 24 However, none of what we've discussed as the case. 25 waivers changes the school board requirement of the

24 units to graduate.

DR. SAUNDERS: Okay. I think just going through all those I just want to come back to one that I just have some concern about and it's concerning the teaching load --

DR. WITONSKI: Yes.

DR. SAUNDERS: -- of 350 students per teacher for the online learning. And in trying to go with a personalized approach I find it --

DR. WITONSKI: Counter-intuitive?

DR. SAUNDERS: Yeah.

DR. WITONSKI: So here is the thought behind it. We obviously are going to use our best judgment. We hire quality people, certified administrators, people who are keeping a constant eye on that. However, if there is an opportunity that we would be able to -- our students wanted to access a particular course, we are looking for that flexibility. Again, going back to class load and teaching methods and all of those things, we will use our -- we will use the same level of requirements that we would for any other school in terms of being sure that we are being good stewards for students, being sure that we're being good stewards for parents, and then being sure that we're good stewards for teachers, insuring that we are

	170
1	approaching that in the right way.
2	DR. SAUNDERS: How did you get to the number
3	350?
4	DR. WITONSKI: Through discussion. Through
5	discussion. Yeah. We felt like we needed to isolate
6	a number and we felt like that we needed some type of
7	threshold. And through our digital experiences we
8	think that that number is higher; through the face-
9	to-face experience obviously the number is going to
10	be lower.
11	DR. SAUNDERS: That's all I have.
12	CHAIRPERSON COFFMAN: Any additional questions
13	or comments?
14	Ms. Clay, do you have any remaining issues?
15	MS. CLAY: A couple of things with the waivers.
16	Dr. Saunders almost hit them all and I think we can
17	do this by I'll go over and if they just want to
18	confirm what I recommend. On the class size and
19	teaching load, I believe that they only need a waiver
20	of 10.02.5 of the Standards for Accreditation. The
21	entire 10.02 section deals with all grade levels and
22	that's not what it sounds like they're looking for.
23	So if they would confirm that.
24	Also, I believe they need to add a waiver of 6-
25	17-812. That has to do with teaching over the

required teaching load that came about as a result of Act 993.

They have a lot of pages in their waiver sheets.

On attendance records and reports, we've discussed that. But the way it was written in their application it was written as 6-18-213(2); it should actually be 6-18-213(a)(2). So if they'll just confirm that.

And on the fine arts and the standards for accreditation, the standard that they asked for a waiver of was Section 9.03.3.6. That deals with grades 5-8. If they intend on that waiver spanning grades K-12, then they also need a waiver of 9.03.2.6 for K-4 and 9.03.4.6 for 9-12.

So if they will just confirm those or if they have any additional discussion to add.

DR. WITONSKI: (Nodding head up and down.)
CHAIRPERSON COFFMAN: Ms. Barnes.

MS. BARNES: No. Yeah. That was one of the questions I had. And, you know, I heard Dr. Witonski state that they are in conversation -- they would be working in conversation, they just wanted everybody on the same page. So I was under the impression that you were pulling that piece so that you could do that. But if you're not, you would need -- I didn't

	180
1	know that we could waive career and technical. That
2	was my issue.
3	DR. WITONSKI: For career and tech?
4	MS. BARNES: Yeah.
5	DR. WITONSKI: We're working with career and
6	tech. Our effort was just from experience, I
7	understand that we have two different things
8	happening. It was just in an effort to say we know
9	that we need the partnership and we've got to work
10	through what that looks like.
11	CHAIRPERSON COFFMAN: Dr. Witonski, are you
12	DR. WITONSKI: Yes.
13	CHAIRPERSON COFFMAN: agreeing to
14	DR. WITONSKI: I agree to add and delete the
15	things that Ms. Clay has referenced.
16	CHAIRPERSON COFFMAN: Does that answer all your
17	questions, everyone?
18	MS. BARNES: So I'm assuming that means you're
19	going to add the K-4 concept
20	DR. WITONSKI: Yes, ma'am.
21	MS. BARNES: and the 9-12?
22	DR. WITONSKI: Yes, ma'am.
23	MS. BARNES: And, Ms. Clay, we have the
24	authority to address career and technical?
25	MS. CLAY: So, well, I'm you're not waiving

	181
1	career and technical.
2	DR. WITONSKI: No.
3	MS. BARNES: Okay. That's I mean, that was
4	my we're waiving the requirement under the
5	standards for accreditation.
6	MS. CLAY: For fine arts.
7	MS. BARNES: Okay. I was discussing career and
8	technical and the 7-8 piece and all of that. I
9	thought they had pulled that, and that's what I
10	thought we said. I thought we were talking about
11	career and technical.
12	MS. CLAY: Okay. We're not talking about the
13	same thing. Let's make sure
14	MS. BARNES: Okay.
15	MS. CLAY: we're all on the same page.
16	MS. BARNES: That just means that I am hungry
17	now.
18	MS. CLAY: I know. Me, too.
19	MS. BARNES: And since we're not talking about
20	career and technical, then I don't have a concern
21	about the K-4 and 9-12 fine arts.
22	MS. CLAY: Okay. We're on the same page. The
23	career and tech waiver was withdrawn
24	MS. BARNES: That's what I thought.
25	MS. CLAY: and I was just suggesting adding

	102
1	the fine arts portion for those other grade levels.
2	MS. BARNES: Not a problem.
3	MS. CLAY: Okay.
4	MS. PFEFFER: Can I ask a question? On the 9-12
5	fine arts, it's still a required graduation credit?
6	MS. CLAY: Yes.
7	MS. PFEFFER: So what are we waiving? Are we
8	waiving it to be taught but still requiring it for
9	graduation, or am I misunderstanding?
10	CHAIRPERSON COFFMAN: Ms. Clay.
11	DR. WITONSKI: She's asked for just a moment.
12	MS. CLAY: Okay. On the 9-12, okay, the
13	9.03.4.6 is the part of the 38 units required to
14	offer. You can waive the 38 units; you cannot waive
15	graduation requirements. So how that would play out,
16	if it's still a part of the graduation requirement I
17	don't know. But technically you could waive a
18	requirement of the 38 being offered, but they would
19	still have to meet the graduation requirement.
20	DR. WITONSKI: Local.
21	MS. BARNES: And the way I saw that if I
22	might add, I saw that as the district is required to
23	teach the 38, grades 9-12. The district continues to
24	teach the required 38. The students are required to
25	have a minimum of 22 fine arts, having the fine arts

	163
1	as part of that. So the opportunity then would have
2	to be present for students to meet the minimum
3	graduation requirements. But I saw that this school
4	
5	MS. CLAY: This particular school.
6	MS. BARNES: is not being required to teach
7	it. That's what I was understanding that you were
8	asking for.
9	DR. WITONSKI: Yes.
10	MS. BARNES: The district is still going to be
11	teaching it.
12	MS. CLAY: And that scenario
13	CHAIRPERSON COFFMAN: So where are we at on that
14	one?
15	MS. CLAY: That scenario would work, yes, as Ms.
16	Barnes said.
17	MS. BARNES: I'm okay with what I was just
18	describing.
19	CHAIRPERSON COFFMAN: I want to be sure I'm
20	clear. Are we is the waiver being requested or
21	withdrawn for 9-12?
22	DR. WITONSKI: We'd like to leave the waiver in
23	as required, with the understanding that policy,
24	local school board policy is what would drive that
25	decision in terms of how many they would be required

1	to receive. And that was the difference I was
2	talking about between the 22 and the 24. They would
3	still be required to be a Springdale graduate,
4	they would still be required to have the 24.
5	MS. BARNES: And to be an Arkansas graduate they
6	would still be required to have the half-unit of fine
7	arts. It just would not be required to be taught at
8	this school.
9	CHAIRPERSON COFFMAN: Okay. I'm with you now.
10	DR. WITONSKI: Yes.
11	DR. SAUNDERS: Can I get back to that? So if
12	we're requiring it for graduation
13	MS. BARNES: We can't waive it.
14	DR. SAUNDERS: don't we have to teach it?
15	MS. BARNES: The district is teaching it.
16	MS. CLAY: We do have to teach it but
17	DR. SAUNDERS: In other words, how would those
18	kids attending this school get that graduation
19	credit?
20	DR. WITONSKI: So we will have for
21	traditional students who are face-to-face, we have
22	we will offer opportunities for them to be able to
23	have that credit. If they're an online student, they
24	might access it in a different way. Or, they might
25	have a capstone project or be able to show

	100
1	I'll take the liberty of giving you mine.
2	Yesterday, I think I used the word game-changer for a
3	local for one of your neighboring school
4	districts. I think this is also another game-changer
5	that's similar, but different. And some of the words
6	that came to my mind today is this is what real
7	school improvement looks like
8	DR. WITONSKI: Yes.
9	CHAIRPERSON COFFMAN: when you are already
10	really good but you know you're not 100%. And even
11	when you're 100% you're always working to continue to
12	meet the needs of kids. And I just really applaud
13	you for continuing to serve, to meet the needs of all
14	kids all really does mean all and your
15	willingness to share with the state. That just
16	when one lifts up, you're lifting the others up when
17	you share. So we all appreciate that.
18	DR. WITONSKI: Absolutely.
19	CHAIRPERSON COFFMAN: All means all over here,
20	too.
21	DR. WITONSKI: Amen. Thank you.
22	CHAIRPERSON COFFMAN: Thank you.
23	Mr. Lester.
24	MR. LESTER: I voted for. The applicant has
25	designed a high level flexible plan to offer

alternative options for digital or blended learning opportunities.

CHAIRPERSON COFFMAN: Ms. Barnes.

MS. BARNES: I voted in favor of the motion because I believe that this concept embodies innovation in motion; it's responsive, exciting; and it feels like this is a glimpse of education meeting the needs of today's students.

CHAIRPERSON COFFMAN: Dr. Jones.

DR. JONES: Springdale has proposed a strong charter program that takes into consideration the needs of that community. It truly offers options for students to be successful.

CHAIRPERSON COFFMAN: Ms. Liwo.

MS. LIWO: I saw a lot of good with this application and, in general, I was -- by the way, I voted for. Sorry. I am, as you know, a little uncomfortable with the teacher licensure waiver but what convinced me here is just that the students have the choice. There is the possibility that they may attract exceptional talent to the profession --

DR. WITONSKI: Yes.

MS. LIWO: -- as licensed individuals. And there was one more thing. You didn't say that you would not be displacing our licensed teachers. So

	100
1	for those reasons I voted for.
2	DR. WITONSKI: Thank you.
3	CHAIRPERSON COFFMAN: Mr. Rogers.
4	MR. ROGERS: I voted for. The Springdale School
5	of Innovation will enable students to have a
6	personalized education experience and allow those
7	students to focus on college and career at their own
8	pace.
9	CHAIRPERSON COFFMAN: Dr. Saunders.
10	DR. SAUNDERS: Yes. I voted for this. I
11	thought it was a well thought-out plan, designed to
12	meet the needs of the diverse community, and optional
13	pathways provided to meet the students' unique needs.
14	CHAIRPERSON COFFMAN: Ms. Pfeffer.
15	MS. PFEFFER: I think that this is an
16	opportunity for the Springdale School District to
17	work with the students, parents, teachers, and
18	citizens of Springdale to and I'm quoting, I think
19	one of the students that said to create a school of
20	their dreams.
21	CHAIRPERSON COFFMAN: Dr. Gotcher.
22	DR. GOTCHER: I voted for the motion to approve.
23	The applicant has demonstrated a quality concept for
24	students. We expect you to maintain this high
25	quality education for these kids and encourage you to

	189
1	maintain the relationships with your community
2	partners, as I know you will.
3	DR. WITONSKI: Absolutely. Thank you.
4	CHAIRPERSON COFFMAN: Congratulations, Dr.
5	Witonski.
6	DR. WITONSKI: Thank you.
7	CHAIRPERSON COFFMAN: I would ask that you
8	remember that we love videos.
9	DR. WITONSKI: Yes.
10	CHAIRPERSON COFFMAN: We love to share your good
11	news.
12	DR. WITONSKI: Yes, we have a YouTube channel.
13	CHAIRPERSON COFFMAN: But yes, we appreciate
14	letting us know when a new one goes up. We also
15	in addition to how we're educating the kids, we're
16	very interested in how we're communicating to parents
17	and to the general public. So we would appreciate
18	any ideas, anything you learn along the way. And we
19	certainly recognize this parent who took the time to
20	write in and how much we appreciate that kind of
21	feedback; it's really helpful in making decisions.
22	And so I know other school districts are always
23	challenged with how to keep that communication going
24	because you're busy educating kids all day.
25	DR. WITONSKI: Right.

	190
1	CHAIRPERSON COFFMAN: So how do we do both of
2	those roles at the same time.
3	DR. WITONSKI: Absolutely.
4	CHAIRPERSON COFFMAN: Thank you so much.
5	DR. WITONSKI: Thank you. Thank you, Panel.
6	DR. GOTCHER: Congratulations.
7	CHAIRPERSON COFFMAN: Congratulations.
8	DR. WITONSKI: Thank you.
9	A-4: REQUEST TO POSTPONE OPEN-ENROLLMENT PRIORITY SCHOOL
10	HEARINGS
11	CHAIRPERSON COFFMAN: Ms. Boyd, you're
12	recognized for Action Item 4.
13	MS. BOYD: Thank you, Madam Chair. Action Item
14	4, Request to Postpone Open-Enrollment Priority
15	School Hearings. At its October 15, 2015 meeting,
16	the Charter Authorizing Panel directed staff to
17	arrange hearings in front of the Panel on December 17
18	through 18, 2015, for charters that received the
19	classification of priority in September 2015. On
20	October 16, 2015, Charter I notified charters of
21	hearing dates, materials requested by the Panel, and
22	authorizer actions allowed pursuant to Arkansas Code
23	Annotated 6-23-105. On November 6, 2015, I received
24	a letter from Executive Director Scott Smith of the
25	Arkansas Public School Resource Center, on behalf of

the four open-enrollment charters with scheduled hearings, asking that the Panel postpone the December hearings until February 2016. This item provides the opportunity for the Panel to consider this request.

Also, I'd like to remind you that we recently discussed called Quest-Pine Bluff before us and I think it would be appropriate for us to discuss when you would like to see them, as well.

## CHAIRPERSON COFFMAN: Panel?

DR. JONES: I can speak to this. If you recall -- and I think it was last year our board members mentioned -- I think it was in a meeting that they wished we would move the process up so that where there were concerns and should a charter need to be closed they wanted to give parents the time to seek options, which was the purpose in calling some of those focus and priority, in addition to Quest-Pine Bluff, back to the table, in order to evaluate that and not wait until possibly their charter comes up for renewal. So it was a time factor with a very specific purpose.

DR. SAUNDERS: And I think the idea of having it sooner is a good idea, where if there are interventions that need to be done and resources, we need to address those early so we can make any kind

of adjustments that need to be made.

CHAIRPERSON COFFMAN: Ms. Barnes.

MS. BARNES: Okay. I understand and agree with what both of my coworkers have stated. However, I also am looking at some of the other parts with respect to us being in the process of looking at data and that data also determining various state classifications. So I'm kind of in agreement that we may be possibly looking at it in a timely manner, but without all of the pieces, if you will. So I don't I mean, I agree and understand that we do need to address intensive issues in time to prepare students and parents and schools, should there be a reason to end a charter. But at the same time, I'm also wondering if February is not also in time to do I do know that that's possibly around the time that we're going to be looking at any kind of public information regarding accountability. That's just one of my concerns.

CHAIRPERSON COFFMAN: Mr. Smith, you have three minutes.

MR. SMITH: Madam Chair, Members of the Panel, thank you for your indulgence of this request. As referenced, we made this request in response to the Panel's action. I apologize for not being here that

I don't think this matter was on the agenda and was picked up at the end of the meeting that day. There are some pieces of information that I think the Panel should take into consideration, some of which have already been relayed to you with regards to the logistics and timing issues, pointing out that two of the charters have already been before the authorizer and the Panel. The State Board requested that one of the charters not be brought back until renewal time so that they could focus on education. Also, I think it's very relevant that this Panel consider Act 1272. The State Board specifically deferred taking action on ALE programs and SIA Tech in February of 2015, until further action was taken on 1272. As you know, that is the differentiated accountability law that was passed. And we do not know how many of these charters would be applicable with regards to what comes out of that law, if any. We certainly think SIA Tech and some of the others meet the qualifications that were announced. I know that because I helped Jeremy Lasiter draft that act and put it in place during the legislative session. we certainly think this hearing in December may be premature on that point.

Also, with regards to some of the information

that the schools have been asked to address, one point was they've been asked to give an analysis of the PARCC scores. As I understand it, they will -- we didn't have the PARCC scores when we submitted the request for deferral. That is out there now -- or at least I wasn't aware of it. But as I understand it, the schools have until November 30th to submit an appeal with regards to that information and then the state will have to react to that. I don't think that will be through that process if there is an appeal or a challenge on any of those issues by the December 17th hearing dates. So I'm not even sure from a due process perspective that they could address some of the issues that they've been asked to address.

Also, I would point out that it is somewhat unusual to have back-to-back accountability hearings of the same typeset. These hearings are set pursuant to 6-23-105. The state historically and by way of the rules has the obligation of going first in presenting their case as to what they want to do with a proposed charter. It could be construed that this is an attempt to reverse that order and have the schools come in and have to answer a bunch of questions and then the state respond to that. I don't think that's the intent at all; I think the

intent is to be helpful here. But it was teed up, if you will, as a legal action, not a review. And the question was specifically asked of staff, of this Panel, did they want a review hearing or did they want an action hearing and the answer was an action hearing.

So we just think that for those reasons that due process and logistical issues that it makes sense that this matter be dealt with at the same time the other accountability matter is being heard. And hopefully there will be action on Act 1272 by then, as to its applicability. And certainly if there are going to be any teasing out of the PARCC issues or PARCC data that should be complete hopefully by the February meeting as well.

I will just report, you know, historically and institutionally the state does try to take a somewhat systemic approach to these accountability hearings because they are a major issue. These schools not only have the lives of children and parents, as you know as educators, certainly, but also they have a property interest and a contract right with the state. And so due process considerations from their perspective and a fiduciary obligation on their part to make sure that when these get teed up as a legal

hearing that they've addressed those issues as best they can for their boards and their members out there. So these are all considerations on why we think it would be appropriate. And really, quite honestly, February, given the holiday schedule that we're in, is not that far and it's certainly a burden to try and get all this done during the Thanksgiving and Christmas breaks that are coming around the corner, as well as have school during this same time.

CHAIRPERSON COFFMAN: Thank you, Mr. Smith.

Lanisha Broadway, do you have something to add to that? If you will keep your comments in addition to what Mr. Smith said, you have three minutes.

MS. BROADWAY: Good afternoon.

CHAIRPERSON COFFMAN: Thank you.

MS. BROADWAY: Thank you all for hearing us today and even taking this into consideration. As Mr. Smith stated -- and just on top of that -- we just received our priority status recently, so we're in the process of doing many turnaround items right now, as well as being a charter and not having the manpower. And we have to pull the leaders from the school in order to compile all this information. We really would appreciate more time to compile this information and to make sure that we have a strong

	197
1	presentation to present to the Charter Authorizing
2	Panel. Thank you.
3	CHAIRPERSON COFFMAN: Thank you, Ms. Broadway.
4	Brent Mitchell.
5	(NO RESPONSE)
6	CHAIRPERSON COFFMAN: Valerie Tatum.
7	MS. TATUM: Good afternoon, everyone. How are
8	you?
9	CHAIRPERSON COFFMAN: Hungry.
10	MS. TATUM: I know. I know. I agree. I
11	certainly agree with Scott Smith in delaying the
12	meeting. We were one of the ones that, when we were
13	at the State Board hearing in June, they specifically
14	asked that we are the ones left alone to really go
15	back and do what we have to do before coming here for
16	renewal. So we would appreciate if you'd just take
17	that into consideration. Thank you. Happy lunch.
18	CHAIRPERSON COFFMAN: Panel, what is your
19	what's your will?
20	DR. JONES: Can I ask Alexandra to tell us the
21	timelines again, if it were moved to February or
22	Mary, either one.
23	MS. PERRY: Mary Perry, Coordinator of the
24	Division of Learning Services. If the timeline was
25	moved to February and you took any action on the

charter, significant action, then it would go to the State Board in March as an item where they would again determine whether or not they wanted to review your decision. And should they decide to review your decision, then another full hearing would occur at the April meeting of the State Board of Education. So should you determine that action were to be taken, it could actually not be officially done until April. That was the question, was it not, Dr. Jones?

DR. JONES: That was exactly the question.
Thank you.

DR. GOTCHER: And, Madam Chair, just to be clear -- maybe, Mr. Smith, you could explain. I understood December to be only a review. I don't -- maybe help me understand what you meant by review and action.

MR. SMITH: Yeah. And I certainly appreciate that and the Panel may wish to go back and clarify that point. But the legal notice that was sent out was for legal action, possible legal action on the charter. And the question was specifically presented to the Panel whether they wanted a review hearing or legal action notice, and as I understand it staff was informed of legal action notice.

With regards to the question about timing, certainly timing is always a consideration. I would

just offer this: the state has been somewhat through the history of closing a charter school down during the school year. I would expect that hopefully if we get to that point of action -- and hopefully we certainly wouldn't -- that there's nothing egregious -- so egregious that we would have to take action by April. In order words, that we wouldn't be able to finish out the school year, so as not to disrupt the lives of the children or anything of that nature. So I don't know that timing is that big of an issue from that perspective.

I would also offer to the extent that it's necessary, you know, maybe it's not always an issue of closing a school. There may be other charter schools that could work to work with that school or something. So I think time -- my point is that I don't know that timing is crucial at this point as such.

DR. GOTCHER: And if moving to February gives time for a district to receive technical assistance and prepare, I personally don't have an issue with December or February, February being -- so I'm not -- I guess I'm not clear on -- would it be advantageous to wait till February from your folks' perspective?

MR. SMITH: Certainly. That's what they're

has been made by Ms. Barnes and seconded by Dr.

25

	201
1	Gotcher. Oh
2	MS. CLAY: Can I ask for a point of
3	clarification? So we're using the term "review?"
4	The term "review" and the term "for potential action"
5	we need to be clear on. Do you want them in for
6	potential action or do you want them in for a review
7	report that would not lead to action?
8	MS. BARNES: Okay. I would like to delay the
9	current request that we had for the board for the
10	charters to come before this panel for review and
11	possible action to February.
12	DR. GOTCHER: Second.
13	CHAIRPERSON COFFMAN: Does that include the
14	district conversion as well?
15	MS. BARNES: That's all charters that
16	everyone that
17	CHAIRPERSON COFFMAN: The request was only for
18	the four open-enrollment charters.
19	MS. BARNES: I think we do need to make that for
20	all charters that were coming for review because of
21	the timeline, because of accountability that I was
22	referring to earlier. Because even at that once we
23	make any criteria notifications they still would have
24	30 more days, so
25	CHAIRPERSON COFFMAN: Does that include Quest-

	202
1	Pine Bluff?
2	DR. GOTCHER: You said all.
3	MS. BARNES: Yeah. I'm saying for everyone that
4	we were going to be looking at. I'm saying for all.
5	I just I don't know for me, I don't know that I
6	would be able to give it a full and diligent look
7	without all of my information.
8	CHAIRPERSON COFFMAN: Ms. Clay.
9	MS. CLAY: Okay. I think that y'all probably
10	understand this, but just to clarify. Three of those
11	that would have been coming in December will already
12	be coming in February for renewals. So is it okay to
13	group those?
14	MS. BARNES: Yes.
15	MS. CLAY: We don't need two separate hearings
16	for those.
17	MS. BARNES: No, I do not want two separate
18	hearings. I simply want us to follow-up on
19	correct. Well, let me see. Okay. So I'm asking to
20	approve the request that was brought before us today
21	
22	MS. CLAY: Okay.
23	MS. BARNES: first of all. And with that,
24	I'm not asking to switch any other hearings that were
25	already outlined in February. I just want us to move

	203
1	what we would have been reviewing in December, or
2	possibly acting on in December, to February. I
3	wanted to delay it.
4	MS. CLAY: And to add Quest of Pine Bluff
5	MS. BARNES: And to add
6	MS. CLAY: for possible action?
7	MS. BARNES: Yes.
8	MS. CLAY: Okay.
9	MS. BARNES: Because we are moving them from
10	December to February. Correct?
11	CHAIRPERSON COFFMAN: You're seconding that, Dr.
12	Gotcher?
13	MS. BARNES: He thinks so.
14	DR. GOTCHER: Yes. I'm still hungry.
15	MR. SMITH: Just to clarify, there were two
16	parts to the request: one was the deferral and the
17	second part was just the technical assistance. But
18	we want to make sure that we're being diligent during
19	this time period and we're not being light. So we
20	will continue that request from staff to assist on
21	these questions and things that you want addressed.
22	MS. BARNES: Always.
23	CHAIRPERSON COFFMAN: Thank you. All those in
24	favor of Ms. Barnes' motion and Dr. Gotcher's second?
25	(UNANIMOUS CHORUS OF AYES)

## - November 19, 2015

	204
1	CHAIRPERSON COFFMAN: Any opposed?
2	Are there any items left before this panel
3	today? Speak now.
4	DR. JONES: I make a motion we adjourn.
5	DR. SAUNDERS: Second.
6	CHAIRPERSON COFFMAN: All those in favor?
7	(UNANIMOUS CHORUS OF AYES)
8	CHAIRPERSON COFFMAN: This meeting is adjourned.

## CERTIFICATE

STATE OF ARKANSAS	)	
	)	ss.
COUNTY OF SALTNE	)	

I, SHARON K. HILL, CCR, a Certified Stenomask Reporter and Notary Public before whom the foregoing proceedings was taken, do hereby certify that the same is a true and correct transcription before the Arkansas State Department of Education, Charter Authorizing Panel, in Little Rock, Arkansas, on November 18, 2015, that the said proceedings was reduced to typewritten form by me or under my direction and supervision; and that the foregoing pages constitute a true and correct transcription of all proceedings had in said matter.

I FURTHER CERTIFY that I am neither counsel for, related to, nor employed by any of the parties to this action.

I FURTHER CERTIFY that I have no contract with any parties within this action that affects or has a substantial tendency to affect impartiality, that requires me to relinquish control of an original transcript or copies of the transcript before it is certified and delivered to the custodial agency, or that requires me to provide any service not made available to all parties to the action.

WITNESS, MY HAND AND SEAL, THIS DATE: December 4, 2015.

SHARON K. HILL, CCR Certified Court Reporter

Certificate No. 670
