# ACT ASPIRE STATE RESU 

Hope Allen
July 2016

## ACT Aspire Year One

- 1,428,337 total online tests submitted
- 2,500 total paper tests submitted
- 292,532 total students tested
- 100\% online testing
- Minimal technology issues
- Where issues occurred they were resolved quickly
- Concerns from districts about time
- Aspire has increased time in all areas except writing
- ADE continuing to request increased time in writing

## Arkansas Pre- Appeals Data

## ACT $_{\text {Aspore }}$

ACT Aspire Summative, Assessed Apr 11, 2016 Jun 09, 2016

Subject=English

## Subject=Writing

## State ELA

Subject=ELA

## State STEM

Subject=STEM

## Preliminary Findings

- In grades 3-8, Arkansas scored at or above the national average in all grades and subjects except grades 4,5 , and 8 in writing and grades 4 and 8 in English.
- In grades 9-10, Arkansas students scored below the national average in all subjects except in writing and in reading at grade 10.
- On average math scores were the second highest subject behind English.
- Demographic information shows that females in grades 3 - 9 outperformed males in all subjects, and scored higher, or tied the Arkansas average score in all subjects.

## Preliminary Findings - Writing

- Lowest average score in Arkansas
- There are three types of writing on the Aspire assessments: Reflective Narrative, Analytical Expository, and Persuasive Argumentative.
- Reflective Narrative writing is tested at grades 3 and 6; Analytical Expository at grades 4, 7, 9 and 10; and Persuasive Argumentative at grades 5 and 8 .
- Scored student writing responses at all grade levels and various performance levels will be released this fall for districts to gain insight into scoring of writing and how to better support students.

## Preliminary Findings - Reading

- On average 61\% of students scored below the readiness benchmark.
- The design of the ACT Aspire reading test does require students to respond to nonfiction texts and paired passages.
- Students reading and responding to nonfiction texts, as well as reading paired texts, within various content areas could help improve reading scores.

## Preliminary Findings - English

- On average Arkansas students scored the highest in English.
- The design of this assessment required students to respond to multiple choice and technology enhanced items.
$\stackrel{\rightharpoonup}{\underline{G}}$ • Questions assess students' developed abilities to revise and edit text regarding production of writing, knowledge of language, and conventions of standard English.

## Preliminary Findings - Science

- Science was given at every grade 3-10.
- Scores through grade 8 were above the national average.
- The design of the ACT Aspire science assessment requires students to read scientific texts and extract information from these texts including charts, graphs and data.
- Continued reading in the content area, integrating math and science concepts and teaching to the new standards could help improve science scores.

## Preliminary Findings - Math

- Arkansas average score for math was second highest of all subjects.
- Arkansas math scores were above the national average at grades 3-8.
- The design of the math assessment requires students to respond to three types of questions: selected response, technology enhanced and constructed response.
- Students must be able to show and explain their work.

# End of Year Summary Report 

## FOURTH QUARTER

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)
Description of full implementation of the Effective Practice and/or Recommendation:
District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

Current reality of effective practice from the beginning of the year:
A leadership team has been established comprised of the Principal, Federal Coordinator, Curriculum Coordinator, Math and Literacy coach, and the Counselor. Meetings are held weekly for 1.5 hours to discuss and plan for PLC's, progress made on IMO's, disaggregation of data, and next steps. A student council has been formed to address student voice. The student council will host dances, have food drives during the holidays, assist the elderly in the community, and represent the voice of the student body. An 8 sector task force, which is an ALA model, was created two years ago. However, the task force is in the process of being revamped and utilized to close the gap between the school and the community.

Current reality of effective practice:
-Due to end of year activities and state testing, leadership meetings were held bi-weekly instead of weekly. The focus of each meeting, which is reflected in indistar, was preparing for faculty meetings that pertained to the use of pre/post test data to drive instruction.
-The student council continued their work throughout the school year by preparing backpacks for underprivileged students (backpack program) and placed and monitored donation jars at local businesses.

- Plans are being made to conduct a follow up meeting regarding the 8 sector community meeting held back in the early spring in order to address next steps on community involvement with the school district.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

## Current reality of effective practice from the beginning of the

 year:After school P.D. meetings were used to put teachers into in order to design and plan core units based on pre and post tests for the purpose of ensuring that students master the instructional standards being taught in each unit. Results will be used to make adjustments to subsequent instructional plans and guide instruction.

## Current reality of effective practice:

- During the final quarter, the practice of using pre/post test unit data to drive instruction was heavily implemented.
- The practice was introduced to the faculty and expectations were given during faculty meetings, as noted in the agendas and minutes in indistar.
- Although we are (deep) in to the two indicators, we do not feel that full implementation has been established.

|  |  |  |  |  |

| $\stackrel{\rightharpoonup}{\mathrm{O}}$ | IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT |  |
| :---: | :---: | :---: |
|  | Effective Practice within Category: Post-Secondary School Options (VA01) |  |
|  | The school has a guidance plan that includes options for students routinely tracks their recent graduates' success at the next level as <br> ADE will monitor the following: <br> - The guidance plan <br> - The process of tracking recent graduates | they plan their college and career opportunities. The school ey pursue their college and career goals. |
|  | Current reality of effective practice from the beginning of the year: <br> Currently, the school has a guidance plan that helps students plan their college and career opportunities. Timelines are set up and a letter will be sent out to students to inquire their current status. Students that have graduated high school and are not attending college are encouraged to come to the school and receive assistance. A career fair will be offered at | Current reality of effective practice: <br> - The district has renewed its contract with the career coach from East Arkansas Community College. <br> - We are also researching a better way to track students after graduation. We sent letters to 2015 graduates to inquire about their current status, but did not receive any response. |

If anything，what do you intend to change or modify for the year？
－The one thing we plan to have fully implemented in the 16－17 school year is the use of pre／post test data to drive instruction．
－We will also rollout student lpads on September 1 for students which will provide an endless amount of resources and may lead to a one to one initiative in the high school．

|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

Comments/ Clarifications: We think the decrease in absenteeism for the fourth quarter was due in part to the requirements for semester test exemption.

| 12 |  |  |  |  |  | 8 |  |  |  | 12 |  |

Comments/ Clarifications: With the shifting of teachers, final exams, and the amount of state testing that lasted well into the month of May, we were unable to find the time to administer the STAR math test and San Diego Quick assessment for $7^{\text {th }}$ and $8^{\text {th }}$ graders. According to the $7^{\text {th }}$ and $8^{\text {th }}$ grade English teacher, over half of his students were gone, due to semester test exemptions. Seniors were gone, as well. We feel that teacher absenteeism decreased because of the importance of their presence for state testing.

MATH DATA by Quarter for Grades 3-10

Comments/ Clarifications: Assessment 1: There was a large percentage of my students who had a misconception on 2 problems involving find the rate of change inside a table. They assumed when the numbers in the table didn't appear to be a constant rate it didn't represent linear data and that wasn't true. Although the numbers inside the table appeared not to be linear they actually was linear.

- So I had to reteach that skill and reinforce it.
- I used bell ringers to cycle that skill through and to explain their error.
- We continued that skill for the remainder of the week and I reassessed it using bell work on that Friday. All but (DB) 1 student who had been suspended appeared to master that skill.

Assessment 2 student errors was different areas. I planned to incorporate them in unit 3 with a hands on apart to the skills. Unit 3 we looked at tactic skills and hight level activities to reinforce linear equations and slope for the first week.

The low percentages in the last quarter were in part from three students who did not finish out the school year. One had been suspended, and another had transferred in the last 9 -weeks.

ELA DATA by Quarter for Grades 3-10

Comments/ Clarifications: 7-8 grade/ The class that has the highest average is due to some of the students being absent too often. Those classes that have under 10, also have the best attendance record.
$9^{\text {th }}$ grade- One unit was vocabulary, another was specific content, and the last was writing. Vocabulary was the most difficult to improve.
10-12 grade: The two classes with a significantly lower percentage of students with a D or $F$ on a unit test are classes that are small; 7 students and 6 students. I think the percentage is due, in part, to these students having more one-on-one instruction time.

## (Optional)

Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example: Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.

- We did not feel the need to conduct TLI testing this quarter due to the amount of testing the students had already endured. The students were showing signs of "burnout" and we feel the results would have been skewed. We are in the process of transitioning to ACT aspire interim assesments.

# End of Year Summary Report 

## FOURTH QUARTER

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

| Current reality of effective practice from the beginning of the |
| :--- |
| year: |
| The Blytheville High School Leadership Team, in collaboration with |
| the District Leadership Team, spent the summer revamping the |
| leadership structure. We have now established the following |
| sub-teams that report back to the leadership team in service of |
| student learning: Instructional Team, Operational Team, |
| Stakeholders Committee, and Cultural Team. Sub-team leaders |
| were selected with input from instructional leaders, assistant |
| principals and key building personnel and have been appointed |

## Current reality of effective practice:

Over the course of the 2015-2016 school year, the Leadership Team has made the progress necessary in order to be able to say with confidence that the following indicators are fully implemented: ID01, ID04, ID07, ID08, and ID10. Therefore, all indicators for this area have been met. Currently, our district policy specifies the team structure for all schools and includes a description of the purpose for each team and how they are constituted. The district has a plan in place to sustain the policy by both apprising new
and tasked with type-specific areas. The instructional sub-team is responsible for content collaboration, assessment data, planning, interventions for students falling behind and teacher support around instruction. The operations sub-team is responsible for the day-to-day operations of the building including the physical plant, bell schedule, procedures and student and teacher attendance. The cultural team works with teacher and student voice, fall and spring culture surveys of the school, teacher retention, positive behavior and intervention supports, discipline data and grade level PLCs for teachers. The stakeholder sub-team is responsible for garnering ongoing parent input and involvement in decision-making for students and for the movement of the school as well as breaking barriers between the school, home and community. In addition to the stated structure, the director of the Blytheville High School Alternative Education program reports to the core leadership team on the progress of her program and students.

A major component of the leadership process is the involvement of teacher leaders. Teacher leaders were selected through their willingness to take on tasks and in their demonstration of ability to lead their peers. Teacher leaders lead the two humanities teams ( $9-10$ grade and $11-12$ grade), the science team and the math team. Those teams comprise the instructional sub-team. Additionally, teacher leaders lead the grade level PLC teams that are a portion of the cultural team. Beginning in May of 2015, the seven teacher leaders were gathered for learning, training, development and support. That work continued through the summer (July 13, 2015) just ahead of their first time to work with their teams during the New Tech Annual Conference. As
school leaders of their expectations and monitoring the
effectiveness of the structure of each team. The school structure consists of a Core Leadership Team, teacher Instructional Teams, a student voice committee, an operations team, and a stakeholder team. Each team has a specific purpose and scheduled time to meet and works from agendas and minutes.

The Leadership team meets at least twice a month (typically weekly) in regularly scheduled meetings of at least an hour. They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff. The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement.

While the leadership team has determined that there is sufficient evidence to indicate that our current reality does meet the description of full implementation, we have identified areas to monitor in order to sustain and grow in the area of establishing a team structure. These areas include the following goals for the 2016-2017 school year:

- To engage in the next step of the process of data analysis, which is to bring back data from the strategies that emerged from the first cycle and run a second cycle of inquiry to see if improvement has occurred and what adjustments, to strategy, need to be made.
- To provide continued school and district support to leaders of each sub-team and professional learning community
evidenced by the tasks below this group meets regularly to work around student learning needs, teacher learning needs.

On 9/16/2015, the BHS Leadership Team determined that ID04, "All teams will prepare agendas for their meetings," and ID07, "A Leadership Team consisting of the principal, teachers who lead the Instructional Teams, and other key professional staff will meet regularly (twice a month or more for an hour each meeting)" have both been fully implemented as a result of our work. At that time, ID01, "A team structure will be officially incorporated into the school governance policy" was assessed as being only partially implemented because we had to research to determine if our new leadership policy had been officially incorporated into school governance policy. After researching the indicator, on October 12, 2015, the Blytheville High School Leadership Team was able to revisit the indicator and assess it as fully implemented.
(PLC): In evaluating our current practices, the Leadership Team determined that there is still room for growth in the cultural sub-team, and there is a plan in place to provide support for that team for the 2016-2017 school year. The operations and stakeholder teams are both deemed as functional. However, we recognize that we will need to provide continued support, especially for the stakeholder team due to a shift to new leadership. The instructional team is the strongest of the sub-teams. Due to new leadership in one of the instructional PLCs, plans are in place to provide the new teacher leader with support, while providing continued support for those teacher leaders who are continuing as teacher leaders for a second or third year.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

## Current reality of effective practice from the beginning of the year:

Math and English Language Arts teachers have been working this quarter to revise units of instruction based on analysis of the curriculum Total Instructional Alignment (TIA) documents.
Teachers have worked collaboratively to develop a total of two preand two post-assessments during the first quarter, and to analyze data from those assessments to inform curriculum decisions (including vertical alignment) and instructional decisions (including individual student intervention and extension needs).

The Blytheville High School Leadership Team assessed IIB02, "Unit pre-tests and post-tests will be administered to all students in the grade level and subject covered by the unit of instruction" and determined that our current level of implementation is "Limited Development." While the goal is to have all students in math and English Language Arts classes take pre- and post- tests, only 85\% of students have been assessed in English and Math courses this quarter. Upon full implementation, a minimum of $95 \%$ of students will take common assessments, documentation of scores and score analysis will be presented to the Leadership Team, and the team will use this data to make decisions for improvement.

## Current reality of effective practice:

At the end of the 4th quarter, the BHS Leadership Team still classifies IIB02 and IIB04 as limited development. Teachers are still working together to create pre- and post- assessments, and we have improved over the course of the year in the percentage of students assessed on those assessments. We done well this year in laying the foundation for pre- and post- assessments. Teachers have brought post-assessment data back to their PLC groups to discuss the data. They also have started the process of using the Looking at Student Work (LASW) Protocol and/or the Data Driven Dialogue Protocol to analyze the data and develop strategies for reaching the needs of their students. However, more work needs to be done in this area ensure that data analysis is happening in a more timely manner.

In reviewing data from these assessments, the leadership team determined that compliance-driven behavior from teachers was evident. The data indicates that approximately thirty-three percent of teachers were not completing pre-test data until right at post-test time. This data suggests the lack of true use of data to drive instruction.

|  | Supervise the reflection and revision process to keep <br> curriculum maps up to date. |
| :--- | :--- |

behavioral intervention. The PBIS team has identified Level II students to whom the faculty provides additional behavioral support. Students who need a more structured learning environment are evaluated for possible placement in our Alternative Learning Environment (ALE) program.

- The PBIS team will provide support for Level II students through a check and connect program with specific teachers.
- The PBIS team will work with Joy Wicker and senior tech students to create positive behavior lessons to be used with students during Connections Advisory Period.
- The PBIS team will provide incentives for positive student behavior throughout the year and through a No Referral Celebration at the end of the year.

A major goal for PBIS for the 2016-2017 school year is to provide training and support to teachers on Positive Behavior Intervention.

Each teacher is a member of a grade-level "Cultural PLC." These cultural teams seem to be operating independently of the Culture Team sub-committee. A major goal for the Culture Team for next year is to work closely with PBIS and the Cultural PLCs to provide these groups support. Another major goal for the Culture Team for the 2016-2017 school year is to gather, analyze, and develop strategies for improvement around discipline data.

The BHS Leadership Team has a plan to include Professional Development in the fall of the 2016-2017 school year in order to revisit and revise the teacher created PBIS Discipline T-Chart that outlines our policies for teacher-managed versus office-managed student behavior. In addition, professional development time will be devoted to strategies for improving positive reinforcement of classroom rules and procedures. The Leadership Team will continue to track classroom observation data in order to provide

|  | supports for individual teachers who need assistance in the area of <br> student safety and discipline. |
| :--- | :--- |
| The goal of the BHS Leadership Team is that by the end of the |  |
| $2017-2018$ school year, all teachers will consistently teach and |  |
| positively reinforce the agreed upon rules and regulations of BHS. |  |$|$| IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT |  |
| :--- | :--- |
| Effective Practice within Category: <br> Defining the purpose, policies, and practices of a school community (IVA01) |  |
| Description of full implementation of the Effective Practice and/or Recommendation: <br> No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, <br> school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents <br> can work together to help students achieve the state's standards. |  |
| Current reality of effective practice from the beginning of the <br> year: | Current reality of effective practice: |
| The Blytheville Leadership Team assessed IVA01, "The school's <br> Title I Compact will include responsibilities (expectations) that will <br> communicate what parents (families) can do to support their <br> students' learning at home (curriculum of the home, with learning <br> opportunities for families to develop their curriculum of the home)" <br> and determined that our level of development is "Limited <br> Development." A new compact has been developed and will be <br> signed during parent teacher conferences during the week of | The stakeholder committee created and recommended a new <br> parent-teacher-student compact that addresses the current reality <br> of teaching and learning for BHS on October 7, 2015. This <br> compact outlines how parents, school staff, and students will share <br> responsibility for improving academic achievement. Compacts <br> describe how the school and parents can work together to help <br> students achieve the state's standards. |

| October $19^{\text {th }}-23^{\text {rd }}$. In April, parents and community stakeholders <br> will take part in the annual evaluation and revision of the Compact <br> as well as the parental involvement plan. | The Leadership Team adopted the new parent-teacher-student <br> compact on October 14, 2015, and the compact was distributed to <br> parents and parent signature that indicated their support of the <br> plan was gained on or before October 22, 2015. The stakeholder <br> team plans to review and revise the compacts, present to <br> leadership team, and have them available for parent review and <br> signature by the fall Parent-Teacher Conferences, annually. <br> As of May 20, 2016, IVA01 is fully implemented. |
| :--- | :--- |

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice from the beginning of the year:

Blytheville High School New Tech has limited implementation of VA01 - The school provides all students with guidance and supports (academic, financial, etc.) to prepare them for college and career. The guidance and counseling office is staffed with three counselors, one of whom is a specialist with college and career advisement and most recently worked as a career coach. The counseling department is in the process of creating a comprehensive guidance plan that includes services offered through the counseling office as well as through local partnerships such as with Arkansas Northeastern College. BHS New Tech has an effective working relationship with Arkansas Northeastern College and provides office space and time with students for career coach Jeff Echols. The career coach provides assistance

## Current reality of effective practice:

The BHS guidance counselors have completed the following tasks towards full implementation this school year:

- Evaluate the current guidance plan and graduate tracking system
- Gather the K-12 guidance counselors together for a comprehensive planning and support meeting in service of student support beyond high school.
- Create a Comprehensive Guidance Plan
- Select a resource for individualized guidance plans and graduate tracking.
- Offer a Financial Aid Night
- Have input on the master schedule to ensure that it is being created to ensure that basic student needs and preferences are factored into the final schedule.
with ACT registration, college applications and career pathway advisement.

The counselors are working to identify the best process by which to provide individualized plans for each student and have taken on, as tasks this quarter, investigating various resources by which students help create and manage those plans. No final decisions have been made as there is one more resource to test. BHS New Tech does not have a sustainable process by which recent graduates are tracked. Recent graduates have been tracked through connections with local colleges and through connections with students. Identifying a tracking process is a task the guidance teams has also taken on this quarter.

As a component of the overall guidance plan for the school, the counselors have established an advisory period, Connections, for the purpose of connecting students with their future. Through this advisory time, counselors are able to work with students, teachers are able to mentor students and make them aware of options as well as remind them of transcript position and graduation requirements and students gain real-world skills and understanding in service of their life beyond high school through EverFi (provided through a partnership with a local bank).

Through the work this quarter, the counselors have identified areas of weakness in students transitioning from middle school to high school and have also identified areas that a comprehensive district counseling plan would address. As part of the movement towards full implementation, the counselors have identified new tasks to

The school provides all students with guidance and supports (academic, financial, etc.) to prepare them for college and career. The guidance and counseling office is staffed with three counselors, one of whom is a specialist with college and career advisement and most recently worked as a career coach.

The counseling department has created a comprehensive guidance plan that includes services offered through the counseling office as well as with Arkansas Northeastern College (ANC). BHS New Tech has an effective working relationship with ANC and provides office space and time with students for career coach Jeff Echols. The career coach provides assistance with ACT registration, college applications, and career pathway advisement. In addition, the Comprehensive Guidance Plan includes the following:

- Philosophy of School Counseling at BPS
- Framework- includes Ethical standards
- Budget
- Time/Task Analysis
- K-12 Calendar of Lesson Plans
- Phone Numbers
- Policies and Procedures
- Evaluation Tools - for program and for counselors
- Books and Other Resources
- Software Information
- Crisis Plan and Associated Forms
- Special Topics

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year，what have been the most meaningful decisions and actions made by the School Leadership Team this quarter？And what attributed to those changes？
［Included are important decisions made this year as well as this semester，and how the leadership team supported and／or monitored this work．］
（1）School Wide Focus－Improving Writing Across Disciplines－This School Wide Focus is a result of data collected during the first semester of the 2015－2016 school year．The leadership team has continued to monitor progress on the focus．We feel that， while the data has shown some growth，writing，on average，is not where it should be．Therefore，Improving Writing Across Disciplines will continue to be a focus for the next school year．
（2）Vocabulary Initiative－Data from Renaissance STAR Reading Instructional Planning Reports and from data conferences with teachers indicate that one of the reasons that our school wide reading average has flatlined is due to the large vocabulary deficit．While we were not surprised by this data（We knew，from our studies of Eric Jensen＇s Teaching With Poverty in Mind， that students from low SES families have dramatically lower vocabularies as compared to students from middle to upper class due to language exposure at early ages，the leadership team invited teachers to brainstorm ways in which we can address this deficit for our students in order to improve their reading skills and better prepare them for college．Because vocabulary is one of the five major components of reading instruction，we feel that if we stress the importance of vocabulary instruction， frequently expose students to academic vocabulary，and teach students how to approach unfamiliar words，then reading comprehension will improve．

The leadership team approved a vocabulary initiative，which will be chaired by our reading interventionist．Similar to our DEAR （drop everything and read）and DEAD（drop everything and divide）initiatives，the vocabulary initiative will occur next year in
each core class on a rotating basis (Monday in math, Tuesday in English, etc.). Each content-area department will submit 100 key academic vocabulary terms ( 400 words total) which students will be exposed to multiple times throughout the year via various forms of vocabulary questions (context clues, synonyms, antonyms, graphic organizers, visual vocabulary, analogies, word parts, word families, etc.). In addition, the vocabulary initiative will expose students to word relationships.
(3) Meetings centered around data, protocols, and structures - This year, meetings at BHS have taken on a new look due to some structures we put in place. We use a variety of protocols, such as the Data Driven Dialogue protocol, the Critical Friends protocol, and the Looking at Student Work protocol in order to ensure that our meetings, regardless of whether these meetings are the leadership meetings, the instructional team meetings, the culture team meetings, or the operations team meetings, are more focused and that the decisions we make are data driven. The leadership team, as well as the teachers of BHS, use data analysis to create theories of action (If we ---, then ---) in order to address the needs the data reveals.
(4) Optional PDs and were designed based upon data - Classroom observation data was gathered and reviewed by the leadership team. Following the analysis of the data, we planned professional development opportunities to meet the needs of our teachers and their students. In addition, curriculum was analyzed, and the leadership team decided to offer teachers paid collaboration time in order to revise curriculum maps and to align curriculum vertically as well as horizontally. Data from Teacher Needs Surveys has also been gathered and the greatest needs have been identified so that the leadership team can begin planning professional development for next year.
(5) Two Day New Teacher Boot Camp - As a direct result of feedback from new teachers, the leadership team has decided to require new teachers to the district to attend a two day orientation, in lieu of finding Flex-Day PD. During this orientation, teachers will be introduced to our routines, expectations, procedures, learning management system, and have time to meet their mentors.

If anything, what do you intend to change or modify for next year?
(1) Connections - We are revamping the way we do our Connections (advisory) program. The changes have been informed based on feedback from both teachers and students on a recent survey.
(2) Change in culture team - The leadership team is looking to move away from the large-group grade level committees to smaller committees that can include smaller grade-level committees, a "celebrations" committee, a "new hire" support group, Positive Behavior Intervention and Support (PBIS) group, among others.

## SCHOOL LEADERSHIP TEAM'S REPORT FOURTH QUARTER

## Comments/ Clarifications:

According to eSchool, enrollment at BHS has declined by 26 students. During the first quarter, $4 \%$ of the total student body received 5 or more referrals. This percentage increased to $6 \%$ in the second quarter and $8 \%$ in the third quarter. However, during the fourth quarter, only $3 \%$ of students received 5 or more referrals.

During the first and third quarters, $3 \%$ of students had an absence rate of $20 \%$ or above. During the second and fourth quarters, only $2 \%$ of students had missed 10 or more days.

## Comments/Clarifications:

Math: At the beginning of the 2015-2016 school year, the baseline assessment indicated that our students' were performing on an average grade equivalency (GE) of 7.4 in math. On our final assessment in April, the average math GE was 8.0. In September, 42.7\% of students were performing at or above a 9th grade level in math. Currently, $53.8 \%$ are performing at or above a 9th grade level. At the
beginning of the year， $62.1 \%$ of students were performing at or above a 7 th grade level in math；currently， $69.5 \%$ of students are performing at or above a 7th grade level．

Reading：At the beginning of this school year，the baseline assessment indicated that our students＇average reading level was a 6．7． On our final assessment in April，the average reading level for BHS students was a 7．0．In September，only $19.6 \%$ of our students were reading at or above a 9th grade level．Currently， $23.9 \%$ of our students are performing at or above the 9 th grade level．At the beginning of the year，only $42.5 \%$ of our students were reading at or above the 7 th grade level；currently， $47.8 \%$ of students are reading at or above the 7th grade level．

MATH DATA by Quarter for Grades 3-10

## Comments/ Clarifications:

Due to ACT Aspire Testing and end of year STAR testing, we opted to only require two sets of pre- and post- assessments. On average, the $96 \%$ of the ninth graders scored Ds or Fs on the pre-assessments this quarter. On the first post-assessment, 44\% scored below 70, prompting teachers to use collaboration time to brainstorm scaffolding strategies and reteach the unit. On the second post-assessment $25 \%$ scored below 70 , for an average of $23 \%$, which is an improvement over the previous three quarters. Their improved scores on the post-assessments, along with teachers' collaboration around scaffolding strategies, translated into an improvement on the number of students passing the course this quarter, as compared with last quarter.

ELA DATA by Quarter for Grades 3-10

## Comments/ Clarifications:

Due to ACT Aspire Testing and end of year STAR testing, we opted to only require two sets of pre- and post- assessments. For the last three quarters, the humanities department has been giving IAKTs for their common assessments. IAKT is a New Tech term, which stands for Individual Assessment of Knowledge and Thinking. The two instructional team leaders and the Instructional Facilitator attended an additional training over IAKT prompt development. The IAKT Task Quick Check Resource was used by instructional team members to design literacy tasks that assess the standards/skills taught within a given period within a PBL unit. The Quick Check

Resource uses Literacy Task prompt templates designed by the Literacy Design Collaborative in 2011 and modified for use in the NT model in 2012.

During the fourth quarter, the humanities instructional teams have continued to work towards aligning/calibrating scoring and grading practices by using in the Looking at Student Work (LASW) protocol. Each English teacher brings a high, medium, and low sample student essay following each IAKT. We score the work based upon the New Tech Written Communication Rubric, which is aligned with the Common Core State Standards. Following our calibration, teachers analyze the essays for common mistakes in order to plan scaffolding for future writing assignments. During this quarter, the humanities teams also made plans for the 2016-2017 school year to collect specific data across the writing domains rather than focus on the holistic score to monitor student growth in the area of writing.

## (Optional)

Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example: Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.

## BHS Class of 2016 Statistics

1. 111 students ( $66 \%$ of the class) received Achievement Awards (Academic Excellence, Most Improved, Citizenship, etc.)
2. 42 were recognized as Honor Graduates
3. 48 Students ( $25 \%$ of the class) received the "Excellence in Student Behavior Award" for having been enrolled in Blytheville High School for four years without ever receiving an office referral.
4. 115 students (according to the program*) ( $68 \%$ of the class) were recognized as Career \& Technical Education Completers
5. 61 students (according to the program*) (36\% of the class) received Industry Certifications. Certifications received included Adult CPR/AED, OSHA 10 Hr. General Industry Course, Career Readiness Certifications, Microsoft Office Specialist certifications (PowerPoint 2013, Word 2013, Excel 2013, Access 2013), and Arkansas Food Handler certifications.
6. 11 students were recognized for their participation in the Career and Technical Education Internship program
7. 50 students $(30 \%)$ were recognized as members in good standing of the National Honor Society
8. 4 students were recognized as members in good standing of the National French Honor Society
9. 22 were recognized as members in good standing of the National Spanish Honor Society
10.55 students (33\%) were recognized as members in good standing of the National Beta Club
11.50 students ( $30 \%$ ) were offered scholarships totaling over $\$ 2,150,580.00$, including 29 recipients* of the Arkansas Academic Challenge Scholarship, totaling \$14,000 each.

## Success of Drop Everything and Read (DEAR)

The following statistics represent reading data, as pulled from Renaissance Accelerated Reader (AR) reports. The data from 2013-2014 represents students' performance prior to the implementation of the DEAR program. At BHS, we encourage reading by giving students time in class, without distractions, to read. We opted to have each teacher give up one bell ringer in every class once per week in order to give students 15 minutes of sustained silent reading. Students have eight classes per day, and they get 15 minutes in each class once per week. If all teachers participate, this gives students 2 extra hours of reading practice per week. We decided not to make this on the same day for each class because we didn't want students to get bored with it, and we want them to get in the habit of reading daily. Therefore, the Leadership Team developed a rotating schedule for DEAR: students read on Monday in their English classes, Tuesday in their Science classes, etc.

Our English teachers set AR point goals following each STAR Reading assessment, so that their reading goals and points are differentiated based upon each student's reading ability. Teachers also have conversations with their students concerning their Zone
of Proximal Development (ZPD) as determined by their performance on the STAR Reading assessment. Following these conferences, we set average Book Level (BL) goals with students and challenge students to occasionally choose books at the upper end of their ZPD. Teachers are also encouraged to make an effort to help students choose books based upon their interests and to teach students how to select books for themselves. While the success of DEAR is monitored through Accelerated Reader points, the ultimate goal of the program is to create lifelong readers.

The data from 2014-2015 represents student performance for the first year of DEAR implementation. We did not expect a tremendous increase this year, due to decreased enrollment (fewer students reading); however, students did show tremendous improvement, not only in the number of books read and the number of points awarded, but also in their average reading comprehension scores on their Accelerated Reader assessments.

## Total Number of Books Read

2013-2014 School Year- 1,208 books
2014-2015 School Year- 3,011 books
2015-2016 School Year- 3,238 books

## Average Comprehension

2013-2014 School Year- 62\%
2014-2015 School Year- 67.1\%
2015-2016 School Year- 73.2\%

## Points

2013-2014 School Year - 7,361.6 points
2014-2015 School Year - 20,784.3 points
2015-2016 School Year - 32,286.7 points!

## Points by Grade Level

9th grade - 13636.9.1 points! (79.0\%)
10th grade - 10,121.4 points ( $74.8 \%$ )
11th grade - 5214.5 points ( $74.3 \%$ )
12th grade - 3312.4 points ( $60.1 \%$ )
This year, BHS students have read over 169,335,812 words.

Students only read 227 books more than last year, but that they earned $11,502.4$ points more than they did last year. The explanation for this is due to drastic improvement in comprehension. Points are awarded based on percent scored. For example, if a student scores a $70 \%$ on a book that is worth 10 points, they are only awarded 7 of those points. Since students are scoring higher in comprehension, they are earning more points for each book they read!

## Year End Summary Report Instructions

## Step 1:

Paste the school's Current Reality description from the First Quarter report. Reflect as a leadership team whether your First Quarter Current Reality was an accurate description of your school at that time.

## Step 2:

Describe the school's Current Reality for Fourth Quarter. As a team please compare the school's reality from First Quarter to Fourth Quarter and develop conclusions regarding the school's progress.

## Step 3:

Describe the school's progress for the school year and answer the questions listed. What were the most impactful and/or meaningful decisions made by the leadership team. Describe how this decision impacted the school and/or increased student achievement. Describe what plans will be put in place to achieve full implementation in Change in Teacher and Leader Practice (ID01, ID04, ID07, IIB02, IIB04), Student Safety and Discipline (IIIC10), Family and Community Engagement (IVA01, VA01).

## Step 4:

Complete the remaining leadership team data pages.

Thank you for your hard work. We look forward to seeing your team at the School Improvement Conference June 20-23, 2016 in Hot Springs.

# BMS End of Year Summary Report 

## FOURTH QUARTER

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

## Current reality of effective practice from the beginning of the year:

The Blytheville Middle School Leadership Team, along with the District Leadership Team, spent the summer and fall revamping our leadership structure. We have now established the following teams who report back to the core leadership team: Instructional Team, Operational Team, Stakeholders Committee, and Cultural Team. On September 17, 2015 the BMS Leadership Team determined that ID04, "All teams will prepare agendas for their meetings," and ID07, "A Leadership Team consisting of the principal, teachers who lead the Instructional Teams, and other key

## Current reality of effective practice:

The BMS Core Leadership Team, upon review of all relevant indicators for the year, believes that IMO Area 1 (ID01, ID04, and ID07) has been fully implemented on the middle school campus.

Core leadership team meetings were held each week on Wednesday afternoon from 3:30-4:30. An agenda was prepared prior to the meeting and sent to all team members through google docs for editing purposes. During the leadership meetings, the team process manager would add notes to the agenda document which would then be sent to all middle school staff members
professional staff will meet regularly (twice a month or more for an hour each meeting)" have both been fully implemented as a result of our work. At that time, ID01, "A team structure will be officially incorporated into the school governance policy" was assessed as being only partially implemented because this structure was not officially incorporated into school governance policy. After researching the indicator, on September 29, 2015, the Blytheville Middle School Leadership Team was able to revisit the indicator and assess it as fully implemented.
following the conclusion of the meeting for their perusal and consideration.

The leadership team itself was made up of the principal, assistant principal, two instructional facilitators, guidance counselor, sped due process coordinator, and several classroom teachers. Each of these members represent the sub-teams that meet separately and their role is to help with communication and efficiency through reports given at the weekly leadership meeting. The sub-teams include instruction, operations, culture, and stakeholder.

Having the team structure working as it is has allowed the principal and instructional team leaders to be more focused on instruction while the other teams take care of responsibilities that in the past often pulled the principal away from classroom observations and/or data meetings.

While the team does feel like the three indicators in this area have been fully met, they are continuing to work towards a fluent exchange of information, the use and follow up of the data that has been reported, and attention to student, teacher, and stakeholder voices as decisions are made. This is the mindset with which they are planning for next year.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

## Current reality of effective practice from the beginning of the year:

Blytheville Middle School had limited implementation on IIB02 and IIB04 for the $1^{\text {st }}$ nine weeks. Three common assessments were developed and assigned 1st quarter in math and literacy, but teachers need more support in understanding the use of the pre/post assessments to provide differentiated instruction and re-teaching as necessary. The Instructional Team has begun reviewing the results of the assessments, but the appropriate intervention is not being provided in a consistent manner, therefore the cycle of inquiry has not been fully implemented. Professional development is being provided in this area, but is not always as a specific response to the data that is gathered. Our New Tech Coach has provided support to the leadership team around the cycle of inquiry, making sense of data to inform strategies, and

## Current reality of effective practice:

During the school year, all logistical problems regarding formative assessments were solved. As a result, each unit of study now encompasses three weeks of work and includes both pre- and post-tests given at approximately three week intervals. Some, but not all teachers are using pre- and post-test results to inform plans for differentiated instruction. While data is regularly discussed by the leadership team, it is still not being used in a consistent manner to shape instruction. Some professional development is based on the results of formative assessment data but, at this time, this is not being done in a consistent manner.

The leadership team acknowledges that there is much work to be done in this area for it to make a difference in teaching and learning at BMS and would label this as limited in development.
implementation. As a support to the cycle structures, culture, and leadership were evaluated, adjusted, and are now set. The next step will be for all teachers to take ownership of this cycle in assessing and monitoring for student mastery, and for professional development to be differentiated to support the teachers based on the areas identified as weak in the assessments.

In our three year priority improvement plan this was designated as a major emphasis for the 2016-17 school year and planning sessions with the core leadership have already taken place regarding how to make this happen. It is the intention of the instructional team to develop a more effective systematic approach to how formative assessment data is gathered and used for improvement. Following are the areas we will focus on:

- The leadership will monitor instruction, provide timely feedback to teachers, and use the observation data to help plan for professional learning that is relevant and responsive to teacher need. This professional learning will be provided as needed during collaborative meetings, in after school sessions that are scheduled and also on an as-needed basis with teachers who need specific strategic assistance in an area.
- The leadership team will encourage and support teachers as they move from compliance to ownership with respect to data understanding and use (i.e. common assessments, community engagement, teacher voice). As the leadership team monitors teaching and learning in the classrooms through observation, feedback will be given to each teacher with additional support provided as needed for them to improve their practice.
- Evidence of the response to data will be found in lesson plans, instruction, professional learning opportunities,

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

## Current reality of effective practice from the beginning of the $\quad$ Current reality of effective practice: year:

A review of IIIC10 by the BMS Leadership Team shows that we have limited development in this area because all staff does not consistently enforce the agreed upon rules and regulations. The staff worked collaboratively to create a T-chart of classroom-managed behavior versus office managed behavior before the $1^{\text {st }}$ day of school. Teachers were given training in Harry Wong strategies for establishing rituals and routines effectively before school began. Those who are struggling with classroom management are given support including going on colleague visits to watch an experienced teacher, instructional facilitators modeling in their classroom, and feedback from the principal and IF's after observations. More professional development is also provided for those with the most need in this area. Our Positive Behavior Intervention and Support (PBIS) team provides weekly goals for students through Cool Tools taught by teachers, but this process is not consistent across all classrooms yet.

While all staff do not consistently enforce campus rules and regulations, there has been an increase in the number that do. More of the middle school staff are stressing the importance of effective classroom management and the leadership team has a better idea of how to use the results of the data collected to help target those areas that continue to need improvement.

Several teachers and administrators attended student behavior training sessions at the Ron Clark Academy in Atlanta and then returned to present and encourage implementation of what they had learned regarding rituals and routines that produce an atmosphere more conducive to learning.

An Advisory class was implemented at the beginning of the day to provide a forum for PBIS lessons. More incentive trips using student behavior as a criteria for attendance are being taken which we will measure to see if that is decreasing discipline issues. All teachers are not presenting the PBIS goals as effectively as we

An RTI Behavioral Team has identified Level II students to whom the faculty provides additional behavioral support. Students are sent to a temporary alternative learning environment called the Turnaround Center when they are not able to remain in class so they can continue instruction while getting intervention for their behavioral issues instead of being suspended in order to keep more students in school. Students who need a more structured learning environment on a longer basis are evaluated for possible placement in our Alternative Learning Environment (ALE) program.
hoped therefore we plan to review the way the lessons are created and explained and provide more training on using the PBIS system.

The RTI Behavioral Team continues to meet to identify students needing additional behavioral help. We understand that we need to analyze our data more closely to identify specific times of day, areas of campus, and classrooms in which behavioral issues occur and provide targeted professional development for those teachers who struggle with enforcing procedures or other classroom management issues.

Students needing a more structured learning environment continue to be placed in the Alternative Education (AE) Program, and we must monitor the number of days of suspension both in-school and out of school in order to see if students are able to spend more time on instruction as a result of this placement.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

## Current reality of effective practice from the beginning of the

 year:The Blytheville Middle School Leadership Team assessed IVA01, "The school's Title I Compact will include responsibilities (expectations) that will communicate what parents (families) can do to support their students' learning at home (curriculum of the home, with learning opportunities for families to develop their curriculum of the home)" and determined that our level of development is fully implemented. Parent, student, teacher compacts were discussed with parents and students and signed at the beginning of the school year. This compact will be evaluated again in the spring with input from parents. Academic Improvement Plans and Individual Planning Reports from STAR tests are also discussed with parents and students with suggestions on how to improve student achievement.

## Current reality of effective practice:

The parent student teacher compact was revised during the spring semester to address the current reality of teaching and learning for BMS. This compact outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

In addition to Academic Improvement Plans and STAR Planning Reports, 6th grade Degrees of Reading Progress (DRP) scores were discussed with both students and parents.

A district team of parental involvement leaders has decided to move parent conferences from the end of the nine weeks to mid-term the 1st, 2nd, and 3rd nine weeks in order for parents and students to be made aware of any changes that need to be made to help improve student learning and grades before the end of the term. The Compact will be used as a guide for interaction between the parents, students, and teachers.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice from the beginning of the year:

Blytheville middle school has two career coaches who are on campus at least once a week to inform students of college and career opportunities through the Career Development classes that are offered to each $8^{\text {th }}$ grader as a semester course. Mrs. Nash, the guidance counselor, provides students with opportunities to learn more about career choices in presentations throughout the year. The Kuder is given to all $8^{\text {th }}$ grade students to assess their work values, interest, and skills and predicts jobs that students might excel in. These results are sent to BHS as part of their career plan developed in the $8^{\text {th }}$ grade, which will be continually updated until they graduate. The career coaches from BMS also work with students at the high school and can follow up with the career plans. BMS will have to investigate how the high school tracks recent graduates in order for this to be fully implemented.

## Current reality of effective practice:

All of the supports that we began the year with have been provided during the school year. The two career coaches were on campus at least once a week, and if the budget allows we would like to increase the number of days that they are here.

The guidance counselor has provided many opportunities for students to learn about career choices and is leading a student voice team on campus.

Eighth grade students and their parents receive the results of the Kuder assessment as a way to understand their skills and predict jobs they might excel in.

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

1. Developed and implemented logistics for formative assessments (pre- and post-assessments) to create a foundation for deeper work that will be done next year. The leadership team discovered during data meetings that some teachers were uncertain regarding assessment criteria and as a result were not using pre and post assessments . (4th quarter)
2. Assessment Data Dialogue Protocol during leadership meetings in order to discover specific areas of strengths and weaknesses. The leadership team felt it essential to learn as much about campus assessment as possible. (3rd quarter)
3. The planning and implementation of Advisory Period to begin on October 26, 2015. After much thought and discussion, it was decided to implement an Advisory Period as a platform for PBIS lessons that encourage a positive school culture. (2nd quarter)
4. Implementation of professional development based on teacher need. This decision was made as the result of teacher surveys showing the need for more educator voice in the selection of professional development topics based on the perceived needs of both teachers and administrators. (3rd quarter)
5. Planning and implementation of Drop Everything and Read (DEAR) Days. Based on data showing favorable results at the high school, the leadership team decided to implement the DEAR Program to increase the amount of time our students spend reading each day. (2nd quarter)
6. Improvement of campus culture through ideas taken from the Ron Clark Academy in Atlanta (i.e.Shark Tank Program to improve esthetics of bathrooms). The leadership team felt this was an effective way to build a positive culture at the middle school (3rd quarter)
7. New Tech's formal acceptance of BMS and the planning for Teacher Residency. The campus administration coupled with the leadership team felt strongly that New Tech will prove beneficial to our students as they are taught how to take ownership and responsibility for their learning. (3rd quarter)
8. Planning and implementation of quarterly academic awards assemblies. This move to stress the importance of academic success will have a positive effect on school culture. (1st quarter)
9. Monthly Staff Hero selections. (Similar to teacher of the month selections.) Again, we believe this staff recognition for a job well done will have a positive effect on school culture. (2nd quarter)
10. Decision to start using electronic discipline referrals during the upcoming school year. Upon investigation, the leadership team discovered that other campuses were using electronic referrals to be more organized, efficient, and as a time saving device. (4th quarter)

If anything, what do you intend to change or modify for the year?

- So much of the 2015-16 year has been focused on setting up the structures necessary to implement change in teacher and leader practice so we are ready during the 2016-17 year to deepen that foundation with specific steps that can be tracked to see how many teachers are implementing the strategies that the team recommends.
- Realigning the team structure to support student learning and improved achievement has been instrumental in helping the team to focus on the effective use of data to to inform school improvement decisions, but we know that in 2016-17 we must deepen the extent to which we truly respond to the data that is collected and make sure that we are collecting things that can be used to help us make decisions toward improvement.
- The use of pre-/post-tests has been introduced and data is being tracked as a foundation for the work that will occur next year.
- The goals in 2016-17 will be primarily focused on making sure that the curriculum has been analyzed, is aligned, and is available as a guide for all teachers. This will include having instructional teams develop units of instruction that include the use of pre and post tests to help guide the instructional process to ensure that learning is differentiated to meet the needs of all students.
- We plan to review our intervention process to maximize learning time for students with a better system to identify student needs and track where and how those needs are being met. PLC's and Instructional Teams will work with interventionists to analyze student learning data in order to provide additional support to students who are struggling. The schedule for "push-ins" in literacy classrooms may be modified based on the data in order to better meet student needs. The leadership
team will monitor the progress of the interventions quarterly and make appropriate changes to the process when necessary to ensure that students are making progress. Data sheets will be turned in quarterly to show growth of students in interventions/strategic reading classes.
- After our first year using the Middle School Literacy Initiative (MSLI) in the 6th grade, we intend to implement this program into both the 7th and 8th grade in order to increase reading time in all classes, enhance the study of academic vocabulary and to provide a model for students to interact around text in a way that helps them to think critically and increase comprehension. A review of the fidelity of the implementation of the program will be done for the 6th grade and training will be provided to all teachers.

## SCHOOL LEADERSHIP TEAM'S REPORT FOURTH QUARTER

STUDENT/ TEACHER DATA by Quarter IMO AREA 2: STUDENT PROGRESS AND ACHIEVEMENT

The number of students with five or more referrals is much greater in the 6th grade than in the 8th grade. In all three grades the numbers of referrals increased during the fourth quarter. The Behavior RTI team will review this information as we plan for support for students and teachers. As the 6th grade transitions from elementary school where they are walked to and from every class and stay together in the same pod all day to the middle school where they move freely from room to room with different schedules more support and modeling of procedures is necessary especially at the beginning of the school year in order to reinforce expectations.

Overall the absentee rate has been very good for students and it appears that our system of contacting parents, using a truant officer, and providing in-school suspension in place of sending students home is having a positive impact.

| Grade Level | Percent of core teachers (Math, Science, Social Studies, ELA, Special Education) absent 5 or more days (10\%) |  |  |  | Number of ELEMENTARY students that are 2 or more years below grade placement in Math as determined by Renaissance STAR Math |  |  |  | Number of SECONDARY students that are 3 or more years below grade placement in Math as determined by Renaissance STAR Math |  |  |  |

## Comments:

The number of core teachers absent five or more days spiked to a high of 61\% during the 4th quarter. Ten teachers combined for a total of 43.5 professional development days out of the classroom. Fourteen teachers combined for a total of 50 school business days out of the classroom which includes at least 5 days for each of our special education teachers who were out of class for annual review. Fifteen teachers combined for a total of 31 sick leave days out of the classroom. The school and district must review the number of professional development and school business days that teachers are required and/or allowed to use during any quarter in order to assure that we have teachers with students in the classrooms.

In math there has been a dramatic decrease in the number of students who are 2 or 3 years below grade level. In 6th grade the number was reduced by 28 students with $35 \%$ two or more years below grade level. In 7th grade the number was reduced by 23 students with $25 \%$ three or more years below grade level. In 8th grade the number was reduced by 48 students with 33\% three or more years below grade level.

In reading the number of students who are 2 or 3 years below grade level has not changed much during the year. In 6th grade the numbers actually increased by 10 students to $56 \%$ two or more years below grade level. In 7th grade there was fluctuation during the year, but the 4th quarter results were the same as 1st quarter with 76 students or $56 \%$ of the students 3 or more years below grade level. In 8th grade there was some improvement $\overrightarrow{-} \quad$ during the year but in 4th quarter the total was reduced by 10 students to 59\% 3 or more years below grade level. This shows that no significant impact is being made in catching students up in reading at BMS with over half the students showing significant deficits. The team must address this issue through the analysis of the curriculum, the intervention strategies, and time on task in reading throughout the school.

(Optional)

Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example: Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.

## Year End Summary Report Instructions

## Step 1:

Paste the school's Current Reality description from the First Quarter report. Reflect as a leadership team whether your First Quarter Current Reality was an accurate description of your school at that time.

## Step 2:

$\rightarrow$ Describe the school's Current Reality for Fourth Quarter. As a team please compare the school's reality from First Quarter to Fourth Quarter and develop © conclusions regarding the school's progress.

## Step 3:

Describe the school's progress for the school year and answer the questions listed. What were the most impactful and/or meaningful decisions made by the leadership team. Describe how this decision impacted the school and/or increased student achievement. Describe what plans will be put in place to achieve full implementation in Change in Teacher and Leader Practice (ID01, ID04, ID07, IIB02, IIB04), Student Safety and Discipline (IIIC10), Family and Community Engagement (IVA01, VA01).

## Step 4:

Complete the remaining leadership team data pages.

Thank you for your hard work. We look forwarded to seeing your team at the School Improvement Conference June 20-23, 2016 in Hot Springs.

## End of Year Summary Report

## FOURTH QUARTER

2015-2016 School Year

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)
Description of full implementation of the Effective Practice and/or Recommendation:
District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).
Current reality of effective practice from the beginning of the $\quad$ Current reality of effective practice: year:

Already in action:
Our school has already established a leadership team for the school that meets at least twice a month for at least an hour. We develop agendas and take notes for each meeting which are shared with our external provider for review and input. Each person in the leadership team has a role with assigned responsibilities and expected work products for the year.

Dr. Valerie Tatum- School Director/Superintendent
Responsibilities: Community Partnerships and Relations
Lori Clancy- Assistant Director
-Leadership team added Rosalind Washington to establish community relationships and bring resources to the school for parents and students.
-Student leadership council (CHAMPS) was formed 4th quarter to allow student leaders to make suggestions to the leadership team regarding student learning and behavioral issues. This team will stay in place into the next school year
-Restructured leadership team at the end of the school year:
Dr. Valerie Tatum- School Director/Superintendent

Responsibilities: Data, Standards, Teacher Observation and Feedback/Support, Professional Development

Champ Watson- Dean of Students
Responsibilities- Student Discipline, Transportation
Laurette Whipps- Lead Teacher/Literacy Coach
Responsibilities- Teacher Support, Literacy Integration
Jenna Jones- Test Coordinator/ACSIP Process Manager/ELL Coordinator
Responsibilities- NWEA formative assessment data, Indistar, ELL Support for teachers

Lenard Blocker-Dean of Student Affairs
Responsibilities- Student success, mentoring, parent contact
Marquita Hill- Finance/Registrar
Responsibilities- eSchool, Budget and Payroll, Federal Programs

We also have already established a team structure for our school, with the leadership team, instructional team, support staff team, student success team, and parent team (PALS: Parent Association- Leading and Serving). Each team has a specific purpose and works from agendas and minutes.

In progress:
The leadership team has established a teacher support cycle to serve as a conduit of communication to faculty and staff. With each leadership team member seeing each teacher/staff member on a 2-week cycle, This allows the leadership team to provide feedback to teachers on different areas of need, and

## Responsibilities: Community Partnerships and Relations,

 Teacher Evaluations, Academic LeaderMarquita Hill- Finance/Registrar
Responsibilities- eSchool, Budget and Payroll, Federal Programs

## Lenard Blocker- Principal

Responsibilities- Student success, mentoring, parent contact, Student discipline

Laurette Whipps- Literacy Coach
Responsibilities- Teacher Support, Literacy Integration, Instructional Coaching, Curriculum Coordinator

Jenna Jones- Test CoordinatorIACSIP Process Manager/ELL Coordinator/Internal SIS
Responsibilities- classroom and schoolwide formative assessment data, Indistar, ELL Support for teachers, instructional coaching

Rosalind Washington- School Resource Coordinator Responsibilities- community partnerships, grant writer, Positive Behavior Interventions and Support Coordinator (PBIS), mental health liaison

Cassie Flkes- Lead Teacher
Responsibilities- Teacher mentoring, PLC coordinator
-Refined practices for Teacher Support Cycle: determined that all observation templates will reflect TESS, including informal walkthroughs.
also allows the leadership team to receive input from the facultylstaff. The leadership team has met with our external providers to review the yearly plan of service delivery and approved their plan for support. These plans will be reviewed by the leadership team twice monthly.
-Established a 3-year plan for the next 3 school years with focus goals (attached at the bottom of this document).

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

Current reality of effective practice from the beginning of the year:

APSRC's instructional coach developed ZOOM documents (a curriculum alignment document) templates for our staff in May 2015. Teachers were given time to break down their curriculum by modules and make cross-curricular connections.
Teachers received instruction on how to implement the GANAG lesson planning schema developed by Jane Pollock,

## Current reality of effective practice:

Curriculum team made edits to the curriculum at the end of the year after reviewing the progress made and the areas that students struggled with. Math and ELA teachers continued daily "Show What You Know" assessments, but as we observed them, we realized teachers will require additional training into the next school year on making their assessments more standards-based and rigorous.

## which allows students to use the Marzano's high yield

 strategies frequently in the classroom.Teachers received direct training from APSRC on how to better conduct pre- and post-tests on October 5 and will move forward with these strategies in the 2nd quarter. Teachers also received resources of where to pull questions for their pre- and post-tests.
PLC meeting schedule- Teachers meet every other Monday to have data meetings based on formative assessments they have conducted with the students. They are also required to bring analysis sheets based on data.

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)
Description of full implementation of the Effective Practice and/or Recommendation:
The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

## Current reality of effective practice from the beginning of the

 year:Last year, the leadership team developed a schoolwide rituals and routines policy that the leadership team developed from the work of Harry Wong and Fred Jones. It was edited at the beginning of this school year.
Teachers have to be monitored/trained to make sure they are

## Current reality of effective practice:

At the end of the school year, the discipline team introduced Positive Behavioral Intervention and Supports (PBIS) to the full leadership team through a training session presented by Anne Merten and her team from ASU. PBIS will be implemented over a 3-year period.

After developing and using our own data input system for this
consistently holding to the rituals and routines CK has set in place.
If there is a discipline issue with a specific student, the discipline team, specifically the Dean of Student Affairs, works to repair the relationship between teacher and student.

We realized at the end of the last school year that we needed to have a consistent data tracking system for disciplinary issues so problems can be addressed promptly.
school year, we have also decided to purchase software to allow us to better analyze our discipline data in real time.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)
Description of full implementation of the Effective Practice and/or Recommendation:
No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

Current reality of effective practice from the beginning of the year:
Covenant Keepers has a parent/student compact that is distributed to each incoming student and family. During each quarter, the school hosts a "5th Block" event that gives parents a glimpse into their child's school day, and receive resources and tools for helping their child continue their learning at home.

## Current reality of effective practice:

By the end of the school year, Covenant Keepers has established partnerships with several community leaders/businesses, including:
-Urban League
-Philander Smith College
-Dr. Jesse Hargrove
-100 Black Men Initiative
-Arkansas DHS
-New Beginnings Behavioral Health

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

When we realized that we wanted to have a better approach to pinpointing which students were struggling with which standards, we decided we would have all Math and ELA teachers assess students with "Show What You Know" mini-assessments at the beginning of class. This went really well and gave teachers useful data to determine interventions. However, we have determined for the next school year that this would work better as an exit ticket at the end of class, and so this will be built into the lesson-planning schema.

We also believe that restructuring the leadership team was an important decision, bringing Rosalind Washington onto the team as the school resource coordinator, and determining that Jenna Jones and Laurette Whipps will be moved into full-time leadership roles for the 2016-2017 school year.

Other important changes have included the adoption of PBIS and providing cultural sensitivity training for our teachers. Because this helped our teachers better connect with our students and address their needs, we will continue to provide our new and returning teachers with cultural sensitivity training at the beginning of the school year.

If anything, what do you intend to change or modify for the year?
We plan to use the ACT Aspire periodic assessments (classroom and interim) and will use this data to determine how students are progressing on standards throughout the school year. We have already built these into our school calendar for the 2016-2017 school year.

We will be implementing PBIS into our school and using an updated data tracker for discipline.
We will partner with New Beginnings to provide behavioral health services to our students on campus on a daily basis.
We will edit our lesson planning schema to allow teachers to develop more student-centered lessons.
We are keeping the same curriculums for Math and ELA, but will be modifying them according to student needs we recognized this school year.

## Comments/ Clarifications:

Students who are taking online 8th grade and 7th grade math scores are not included in this total.

Comments/ Clarifications:

Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example: Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.

Year 1: 2016-2017
Year 2: 2017-2018
Year 3: 2018-2019

## Change in Teacher Practice:

## Data Team Meetings

Year 1: All teachers will demonstrate knowledge of student-level assessment data at weekly PLC data team meetings conducted by a leadership team facilitator for the purpose of reviewing student formative assessment data, red-flagging students in need of additional assistance.
Year 2: All teachers will demonstrate knowledge of student-level assessment data at weekly PLC data team meetings conducted by a teacher leader for the purpose of reviewing student formative assessment data, red-flagging students in need of additional assistance.
Year 3: All teachers will have the ability to effectively lead a weekly PLC data team meeting.

Applicable Indicators:
ID11- Teachers are organized into grade-level, grade-level cluster, or subject-area Instructional Teams.
ID13- Instructional Teams meet for blocks of time ( 4 to 6 hour blocks, once a month; whole days before and after the school year) sufficient to develop and refine units of instruction and review student learning data.
IIB02: Unit pre-tests and post-tests are administered to all students in the grade level and subject covered by the unit of instruction.
IIB04- Teachers individualize instruction based on pre-test results to provide support for some students and enhanced learning opportunities for others.

IID11- Instructional Teams review the results of unit pre-/post-tests to make decisions about the curriculum and instructional plans and to "red flag" students in need of intervention (both students in need of tutoring or extra help and students needing enhanced learning opportunities because of their early mastery of objectives).
IG01- The school monitors progress of the extended learning time programs and other strategies related to school improvement.

## Interventions and Feedback

Year 1: All teachers will provide specific feedback to students regarding their mastery of standards.

Year 2: All teachers will plan evidence-based interventions that reflect student learning deficits in their classrooms, tracking student improvement data.
Year 3: All teachers will determine which interventions work best based on evidence through assessment data and student-led conferences and continue to use those intervention methods yielding the best results.

Applicable Indicators:
IIA13- All teachers explain directly and thoroughly.
IIIA17- All teachers re-teach when necessary.
IIB05- All teachers re-teach based on post-test results.

## Change in Leader Practice:

## School Improvement

Year 1: The leadership team will develop tracking systems to monitor and address data in the areas of academics, teacher observations, and discipline.
Year 2: The leadership team will review school-level data (academic, teacher observation, and disciplinary) on a bi-weekly basis to make decisions for the school, including individualized professional development.

Year 3：Leadership team will determine which interventions work best based on evidence through academic，teacher observation，and disciplinary data and will continue to use those intervention methods yielding the best results．

## Applicable Indicators：

ID10－The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development needs．
IID07－The Leadership Team monitors school－level student learning data．
ID08－The Leadership Team serves as a conduit of communication to the faculty and staff．
IF02－The Leadership Team reviews the principal＇s summary reports of classroom observations and takes them into account in planning professional development．
IIID03－The school＇s tiered instructional system includes documentation that describes what interventions are provided and how interventions are selected and assigned to students and how fidelity will be monitored．

## Student Achievement：

## State Assessment：ACT Aspire

Assessment data from the 2015－2016 ACT Aspire will give us a baseline to grow from．
Year 1：Establish ACT Aspire formative assessments； $10 \%$ growth from the previous year
Year 2：Continue use of ACT Aspire formative assessments； $10 \%$ growth from the previous year
Year 3：Continue use of ACT Aspire formative assessments； $10 \%$ growth from the previous year

## NWEA MAP Assessments

Year 1： $55 \%$ of students will meet their fall to spring growth goal，with $55 \%$ of the lowest third of students growing 1.5 years．
Year 2： $60 \%$ of students will meet their fall to spring growth goal，with $60 \%$ of the lowest third of students growing 1.5 years．
Year 3：65\％of students will meet their fall to spring growth goal，with $65 \%$ of the lowest third of students growing 1.5 years．

## Student Safety/Discipline:

## PBIS/Urban Tech/S.O.A.R.: OSS

Year 1: Establish the program(s), provide training, a decrease of OSS by $10 \%$ from previous year
Year 2: Continued training and implementation, with a decrease of OSS by $10 \%$ from previous year
Year 3: Continued training and implementation, with a decrease of OSS by $10 \%$ from previous year
Applicable Indicators:
CL12- All school personnel work effectively and equitably with racially, culturally, linguistically, and economically diverse students.

## School Culture

## PBIS: Faculty Buy-In

Year 1: Covenant Keepers will adopt PBIS with 70\% buy in from staff according to survey results.
Covenant Keepers will establish school-wide expectations, train faculty and staff, and initiate consistent incentives and consequences, and establish a PBIS team.
Year 2: Year 2 of PBIS with 80\% buy in from staff according to survey results.
-We will focus on cultural sensitivity training and regularly using data for ongoing problem-solving and decision making.
Year 3: Year 3 of PBIS with $90 \%$ of buy in from staff according to survey results.
-A PBIS Team and school are committed to using PBIS Evaluation Tools to do regular assessments of the implementation process.

## Applicable Indicators:

CL12- All school personnel work effectively and equitably with racially, culturally, linguistically, and economically diverse students.
IIIC09- All teachers correct students who do not follow classroom rules and procedures.

IIIC08－All teachers display classroom rules and procedures in the classroom．
IIIA33－All teachers interact socially with students（noticing and attending to an ill student，asking about the weekend，inquiring about the family）．
IIIA27－All teachers verbally praise students．

## Student Leadership Council

Year 1：Covenant Keepers will establish a strong student leadership council from the returning students and establish expectations，including a peer advisory period for students who need direction．
Year 2：The student leadership council will bring an awareness of the culture of the school to the leadership／instructional team and data will be collected and decisions will be made during PLC meetings based on this data．
Year 3：Share our model with other schools

## Applicable Indicators：

VA01－The school provides all students with guidance and supports（academic，financial，etc．）to prepare them for college and career．
CL12－All school personnel work effectively and equitably with racially，culturally，linguistically，and economically diverse students．

## Community／Parental Engagement

## Parental Engagement

Year 1：Covenant Keepers＇parents and teachers will establish a PTA with monthly meetings．
Year 2：Covenant Keepers＇PTA works to initiate academic and cultural changes for school improvement．
Year 3：Covenant Keepers＇PTA works as a resource for the community．

Applicable Indicators：
IVA01－The school＇s Title I Compact includes responsibilities（expectations）that communicate what parents（families）can do to support
their students' learning at home (curriculum of the home, with learning opportunities for families to develop their curriculum of the home).
CL12- All school personnel work effectively and equitably with racially, culturally, linguistically, and economically diverse students.

## Community Engagement

Year 1: Covenant Keepers will build community partnerships, inviting them to visit the school and participate in events.
Year 2: Covenant Keepers will develop an information bank with the assistance of our community partnerships.
Year 3: 70\% of our students will participate in summer programs or afterschool programs because of the support from our community partnerships.

## Applicable Indicators:

IVA01- The school's Title I Compact includes responsibilities (expectations) that communicate what parents (families) can do to support their students' learning at home (curriculum of the home, with learning opportunities for families to develop their curriculum of the home). VA01- The school provides all students with guidance and supports (academic, financial, etc.) to prepare them for college and career.

# End of Year Summary Report 

## FOURTH QUARTER

2015－2016 School Year

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

## Current reality of effective practice from the beginning of the

 year:Currently, the district governance document does not specify the team structure for all schools. The leadership team for the district and buildings are specified and include a description of the teams' purpose and how they are constituted. New school leaders are usually not apprised of this expectation and there is no evaluation to determine the effectiveness of the team(s).

All building and district level teams prepare agenda for their meetings and keep minutes of the proceedings. At the building level, these documents are maintained in a binder in the PLC room. In addition to being placed in a binder in the PLC room, the Leadership Team's agenda and minutes are also housed in Indistar. All district level teams' agendas and minutes are housed in Indistar. At the district level, the agenda and minutes are shared

## Current reality of effective practice:

Currently, the district has a Governance Policy that specifies the team structure for all schools. The Governance Policy has been approved by the School Board. The Leadership Team for the district and buildings are specified and include a description of the teams' purpose and how they are constituted. New school leaders will be made aware of this team structure due to the Governance Policy being a part of the Teacher Handbook. An evaluation system has been developed and implemented for Leadership Teams at both campuses within the district.

All building and district level teams prepare agendas for their meetings and keep minutes of the proceedings. At the building level, the Leadership Team agendas and minutes are housed in the Indistar system. All other team meeting agendas and minutes
with all those who have a Leadership Team Indistar login. At the building level, the Leadership Teams' agenda and minutes are accessible to all those who have a Leadership Team Indistar login as well as those having access to the PLC room. All other teams' agenda and minutes are accessible to those having access to the PLC room.

Both buildings in the district operate with a Leadership Team that includes the principal, teacher leaders, and other staff as appropriate to the size and composition of the building. The Leadership Teams meet at least twice a month in regularly scheduled meetings of at least an hour. During the 2014-2015 school year, the high school Leadership Team had a sub team, the Core Leadership Team, that met weekly for at least an hour to review the School Improvement Plan. Currently, both buildings in the district have a Core Leadership Team as well as a building Leadership Team.
are maintained by the facilitator of the team. All district level teams' agendas and minutes are housed in Indistar. At the district level, the agenda and minutes are shared with all those who have a Leadership Team Indistar login. At the building level, the Leadership Teams' agenda and minutes are accessible to all those who have a Leadership Team Indistar login. All other teams' agenda and minutes are accessible to those who make requests.

Both buildings in the district operate with a Leadership Team that includes the principal, teacher leaders, and other staff as appropriate to the size and composition of the building. The Leadership Teams meet at least twice a month in regularly scheduled meetings of at least an hour. During the 2014-2015 and 2015-2016 school years, the high school Leadership Team had a sub team, the Core Leadership Team, which met weekly for at least an hour to review the School Improvement Plan. Currently, both buildings in the district have a Core Leadership Team as well as a Building Leadership Team.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

## Current reality of effective practice from the beginning of the year:

Math instructional teams are currently systematically developing and administering formative assessments at the beginning and end of lessons or units with the assistance of the Math Instructional Facilitator. Literacy and Science instructional teams are encouraged and expected to systematically develop and administer formative assessments at the beginning and end of lessons or units but not all the literacy and science teachers are complying. Math teachers are using the data to differentiate instruction. Not all of Science and Literacy teachers are differentiating instruction based on data. Math instructional teams use the data from assessments to modify units of instruction and during team meetings share successful teaching strategies. Not all the teachers in the Science and Literacy instructional teams are using assessment data to modify units of instruction. However, successful teaching strategies are shared during all team meetings.

Math teachers currently use pre-test data to adjust lessons and to different assignments. Not all science teachers use pre-test data to adjust lessons and to differentiate assignments. Not all literacy teachers have administered pre-tests. The literacy teacher who has administered pre-tests uses the data to differentiate assignments. Math teachers are differentiating for both the students in need of extra help in reaching the objectives and students demonstrating early mastery who benefit from enhanced assignments. Not all science and math teachers are differentiating for both the students in need of extra help in reaching the objectives and students demonstrating early mastery who benefit from enhanced assignments.

## Current reality of effective practice:

Due to the size of the district, each department has at most 2 teachers. Each of the teachers teach a different set of classes that includes different grade levels. The Instructional Teams do not develop formative assessments as a team since no two teachers have the same class in common. However, Leadership has extended the expectation that the Instructional Teams review pre-/ post-test data as a team to share effective instructional strategies. Not all Instructional Teams meet this expectation.

Not all members of Instructional Teams develop and administer formative assessments at the beginning and end of lessons or units with fidelity. Some Instructional Team members use data to differentiate instruction with sufficient evidence. Some Instructional Teams members use the information to modify units but at this time it is not implemented across all Instructional Teams.

Very few Instructional Team members use pre-test data to adjust lessons and to differentiate assignments for students in need of extra help and those demonstrating early mastery.

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

## Current reality of effective practice from the beginning of the

 year:Currently, a management plan has been distributed to teachers listing the consequences for actions. Also, a discipline team meets once per week to discuss students who fail to meet disciplinary requirements outlined in the plan. A set of classroom rules and procedures have been shared with teachers for implementation. However, all teachers have not been successful with implementing them with fidelity.

## Current reality of effective practice:

Select teachers attended a Professional Development on "Proactive Discipline to Reactive Students." These teachers presented what they learned from the training during a faculty meeting.

The Student Handbook lists the disciplinary procedure. Currently not all teachers follow the procedure which has led to confusion among the students. Conferences are held with teachers who not follow the disciplinary procedure.

IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

## Current reality of effective practice from the beginning of the

 year:Currently, the district has adopted a School Compact that meets all the Title I requirements. The compact is shared with parents/ guardians at the beginning of each school year in the registration packet.

## Current reality of effective practice:

The district has adopted a School Compact that meets all the Title 1 requirements. The compact is shared with parents/ guardians and students at the beginning of each school year through the information provided in the registration packet. The district will hold annual meetings to solicit stakeholder feedback for updating the School Compact.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice from the beginning of the year:

A CAPS system is in place for teacher advisers to track students and their graduation requirements. During the 2015-2016 inservice, time was assigned for teachers to ensure their assigned students were on track for graduation. A parent contract is presented for signature prior to students receiving their

## Current reality of effective practice:

A CAPS system is in place for teachers to track students and their graduation requirements. However, it has been ineffective during the 2015-2016 school year. Some teachers did note that students were lacking credits to graduate and brought this to the attention of the counselor. However, a couple of students were lacking credits
schedules．The TRIO group annually provides a list of graduates from the past three years and the universities they have or had attended．Community stakeholders were questioned to determine the current status of those students who have not or are not currently attending college．
at the end of the school year．The counselor took extended leave during the fourth quarter which exacerbated the problem．

TRIO has announced that they will not be servicing the school during the upcoming school year due to budget cuts．

Currently，the new counselor is reviewing all student transcripts to ensure all students are on track for graduation．

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

When the English teacher of grades 7-9 took extended medical leave in late October and later resigned in January, the Building Leadership Team discussed a variety of routes that would provide a constant learning atmosphere for those students. Many of these same students had the same experience the previous year when the English teacher of grades 7-9 took extended leave in October and later resigned. With the support of the District Leadership Team, the Building Leadership Team decided to reassign the District Curriculum Coordinator and Building Literacy Instructional Facilitator to provide instruction to those classes for the remainder of the year. This would ensure the students would have a "constant" teacher and receive quality instruction. This decision proved to extremely effective. As the team reviewed the data throughout the $3^{\text {rd }}$ and $4^{\text {th }}$ quarter, reports proved the students made excessive gains and were meeting benchmarks.

Another meaningful decision made by the Building Leadership Team included the use of the Math Instructional Facilitator to provide instruction to math classes as one of the math teachers took extended leave. The Building Leadership Team discussed the loss of instruction that would occur if a substitute were put in place during that time. The Math Instructional Facilitator was able to assist with diagnosing students' deficiencies during that time and provide more effective support to the teacher and students upon the teacher's return and in preparing the students for the ACT Aspire.

During the $4^{\text {th }}$ quarter, another math teacher was absent on several instances with many of those instances lasting more than two consecutive days. During that time, the Math Instructional Facilitator and School Improvement Specialist who both have experience teaching secondary math, provided instruction to those classes while the teacher was on leave. The Building Leadership Team was confident that the continued instruction the students received would better prepare them for the ACT Aspire test.

After the district administered the ACT Aspire Interim 1 assessment, the data was reviewed and teachers were encouraged to remediate the students on deficiencies that were identified. After weeks of continuing instruction and remediating students, the District Leadership Team asked the Building Leadership Teams to discuss administering the ACT Aspire Interim 2 assessment two weeks before the ACT Aspire Summative Assessment was scheduled to be given. The Building Leadership Team decided to
administer the Interim 2 and use the results to identify areas that still need growth and remediate the students the final two weeks before ACT Aspire Summative Assessment.

During the $4^{\text {th }}$ quarter, the district used the Curriculum Coordinator and School Improvement Specialist to conduct a curriculum audit. All curriculum developed by teachers in the district was examined for completion and quality. Conferences were held with each teacher and feedback was provided on the written curriculum that had been developed. The Building Leadership Team supported the district in providing the teachers the support they needed. The School Improvement Specialist and Curriculum Coordinator shared updates with the Building Leadership Team on Curriculum Audit updates. Classes that were lacking curriculum components or quality were discussed. The Principal used this information to conference with teachers and make suggestions and recommendations for the Professional Growth Plan.

If anything, what do you intend to change or modify for the year?
Districtwide, the focus for the 2015-2016 school year was building the curriculum. Establishing a written curriculum was very challenging the previous year. The curriculum was incomplete and had many gaps. Challenges were presented this year as well when the curriculum expectations and requirements were shared with teachers. However, when the curriculum audit identified specific gaps, missing components, and incomplete curriculum, teachers were mandated to make the necessary revisions and additions. While updates and improvements will be expected during the 2016-2017 school year, a written curriculum with a scope and sequence has been established. Districtwide, the focus for the 2016-2017 school year, will be improving instruction. This will include closely monitoring the alignment of the written, taught, and assessed curriculum.

While considering the resources available within the district and the lack of applicants for the secondary math position, the Leadership Team discussed reassigning the Math Instructional Facilitator as half time math teacher and half time Math Instructional Facilitator for the 2016-2017 school year. The Math Instructional Facilitator was previously a very effective math teacher within the district before taking upon the role of Math Instructional Facilitator. The Leadership Team feels that this change will positively affect student performance and the academic status of the school.

Also during the 2016-2017 school year, the Literacy Instructional Facilitator will be reassigned to half time teacher, half time Literacy Instructional Facilitator. Due to the fact that teacher recruitment and retention is low, the High School will offer the Teacher Cadet Program to students in an effort to "grow your own." The Literacy Instructional Facilitator will teach these classes as well as serve as an interventionist for Literacy.

Finally, during the 2016-2017 school year, a more conscious effort will be placed on ensuring that teacher evaluations reflect their overall professional performance in areas such as planning and preparing, attendance, professionalism, and professional growth. More accountability will be emphasized on adhering to district and building expectations.

ARKANSAS

## Comments/ Clarifications:

The District Leadership Team as well as the Building Leadership Team has identified excessive teacher absenteeism as a problem within the district. At the District and Building Leadership Team meetings, incentives for improving the high absenteeism rate have been discussed. Recently, the School Board approved an Incentive Plan to be implemented during the 2016-2017 school year, presented by the Superintendent involving monetary awards. The majority of the absences reflected in the $63 \%$ presented in the chart are mostly related to bereavement, sick, and personal leave. Early on, the Building Leadership Team noticed a trend in an abundance of absences in core areas. To ensure quality instruction continued, every effort was made to place certified staff in those positions during long and short term absences.

|  | Grade Level | Number of students that failed Math the previous year | Number of students enrolled this quarter | Number of students with D or $F$ in Math class per quarter 2015-2016 |  |  |  | Number of students assessed on each post-unit assessment for the current quarter |  |  |  | Total number of students assessed on the post-unit test for each grade level <br> (A) | Total number of students with D or F on unit tests in Math this quarter <br> (B) | Percent of students with D or F on any unit tests in Math <br> (C) $(B / A) \times 100=c$ |  |  |  |

## Comments/ Clarifications:

7th Grade: Of the 28 students enrolled in 7th grade math, 24 students are in the regular classroom and 4 are SPED. The 4 SPED students do not take the regular classroom assessments.
$7^{\text {th }}$ Grade: Of the 17 students that received a D or an F for the quarter, 9 were D's and 8 were F's. The teacher assigned to regular $7^{\text {th }}$ grade math was a first year teacher with 7 different classes to prepare for. Early during the $4^{\text {th }}$ quarter, the teacher announced he/she would not be returning for the 2016-2017 school year. After this, the Leadership Team began to notice a decline in the quality of preparation, instruction, and assessments related to the class. Support and guidance was offered by the Math Instructional Facilitator but was not recognized by the teacher. Teacher made assessments and results were not shared during Instructional Team meetings so that deficient students and concepts could be identified. Therefore, it is uncertain as to why all students were not tested on the Unit 1, 3, and 4 assessments. The Leadership Team is aware of the high percentage of Ds and Fs for the quarter and on teacher made assessments. The team has discussed possible reasons for the high percentages of Ds and Fs. These possible reasons include teacher absences, overwhelming class load, lack of investment in professional duties after resignation was announced.

8th Grade: Of the 20 students enrolled in 8th grade math, 18 students are in the regular classroom and 2 are SPED. The 2 SPED students do not take the regular classroom assessments.
$8^{\text {th }}$ Grade: The 1 grade reported for the quarter identified as a D or an F, represents a D. The Leadership Team is aware of the discrepancy between the percentage of Ds and Fs on teacher made assessments and $4^{\text {th }}$ quarter grades. The Leadership Team often discusses the level of rigor the regular $8^{\text {th }}$ grade teacher provides in instruction and assessments. The team is aware that the teacher provides students with remediation opportunities after each assessment and believes that the discrepancy in the percentages is due to the reflection of student performance on teacher made assessments before remediation occurs.

9th Grade: Of the 26 students enrolled, 16 are enrolled in Algebra I, 6 are enrolled in Geometry, 3 are self-contained SPED students, and 2 are assigned to ALE. The 3 self-contained SPED students and 2 ALE students do not take the classroom unit assessments. One student is enrolled in both Geometry and Algebra I.
$9^{\text {th }}$ Grade: Of the 5 students that received a D or an F for the quarter, 4 were D's and 1 was an F. The Leadership Team notes that the percentages of Ds and Fs reported on teacher-made assessments has declined from $3^{\text {rd }}$ quarter to $4^{\text {th }}$ quarter. The team believes that possible reasons for this decline is due to teachers spending less class time introducing new material and more time remediating and re-teaching concepts to prepare for state assessments.

10th Grade: Of the 21 students enrolled, 8 are enrolled in Geometry, 10 are enrolled in Algebra II, and 4 are self-contained SPED students. The 4 selfcontained SPED students do not take the classroom unit assessments. One student is enrolled in Geometry and Algebra II.
$\stackrel{\rightharpoonup}{\text { - }} 10^{\text {th }}$ Grade: The 1 grade reported for the quarter identified as a D or an F, represents a D. Similar to the $9^{\text {th }}$ grade, the Leadership Team notes that the percentages of Ds and Fs reported on teacher-made assessments and quarterly has declined from $3^{r d}$ quarter to $4^{\text {th }}$ quarter. The team believes that possible reasons for this decline is due to teachers spending less class time introducing new material and more time remediating and re-teaching concepts to prepare for state assessments.

ELA DATA by Quarter for Grades 3-10

## Comments/ Clarifications:

7th Grade: Of the 28 students enrolled, 17 are enrolled in Pre-AP, 7 are enrolled in Regular, and 4 are self-contained SPED. The 4 self-contained SPED students do not take the classroom unit assessments.

The 2 grades reported for the quarter identified as a D or an F, both represent a D. For unit test 1, 2, and 4, the teacher reported that the one student who was absent was tested over the material through a different activity. The teacher of regular and Pre-AP English for grades 7-9 resigned at the beginning of $2^{\text {nd }}$ quarter. The Literacy Instructional Facilitator was reassigned as the teacher for regular and Pre-AP $7^{\text {th }}$ grade English. Often during team meetings, the Leadership Team heard updates and was presented data on student performance from the Literacy Instructional Facilitator. The team attributes the decline in percentages of Ds and Fs to effective instructional delivery.

8th Grade: Of the 20 students enrolled, 10 are enrolled in Pre-AP, 8 are enrolled in Regular, and 2 are self-contained SPED. The 2 self-contained SPED students do not take the classroom unit assessments.

The 1 grade reported for the quarter identified as a $D$ or an $F$, represents a $D$. All students were tested on unit tests within each class. For the unit 4 test, only the Pre-AP English class was administered a $4^{\text {th }}$ unit assessment during the quarter. The teacher of regular and Pre-AP English for grades 7-9 resigned at the beginning of $2^{\text {nd }}$ quarter. The Curriculum Coordinator, a former middle school English teacher, was reassigned as the teacher for regular and Pre-AP $8^{\text {th }}$ grade English. Similar to the $7^{\text {th }}$ Grade English, the team attributes the decline in percentages of Ds and Fs to effective instructional delivery.

9th Grade: Of the 26 students enrolled, 9 are enrolled in Pre-AP, 12 are enrolled in Regular, 3 are self-contained SPED student, and 2 students are assigned to ALE. The 3 self-contained SPED students and 2 ALE students do not take the classroom unit assessments.

Of the 8 grades reported for the quarter identified as a D or an F, 6 were D's (3 from Regular English and 3 from Pre-AP English) and 2 were F's (both were ALE students). The students who were not administered the Unit 1 or Unit 2 assessments were enrolled in a Behavioral Health Facility during the assessment. They later re-enrolled in the district. When the teacher of regular and Pre-AP gth Grade English resigned, the 12 students enrolled in Pre-AP gth grade English joined the regular $10^{\text {th }}$ grade English class. The grades presented in the chart reflected a mixture of abilities across two classrooms. The Literacy Instructional Facilitator and Curriculum Coordinator co-taught this class.

10th Grade: Of the 21 students enrolled, 15 are enrolled in Pre-AP, 5 are enrolled in Regular, 2 are self-contained SPED students, 1 student is assigned $\stackrel{\rightharpoonup}{~ t o ~ A L E, ~ a n d ~} 1$ student is homeschooled for 10th grade English. The 3 self-contained SPED students. 1 ALE student, and 1 homeschooled student do $\stackrel{O}{\sim}$ not take the classroom unit assessments.

Of the 7 grades reported for the quarter identified as a D or an F, 5 were D's (2 from Regular English and 3 from Pre-AP English) and 2 were F's (1 from Regular English and 1 from Pre-AP English). The Leadership Team recognizes that the instruction the $10^{\text {th }}$ grades students receive is consistently rigorous. The Leadership Team notes that student performances on assessments accurately reflect student mastery quarterly.

## (Optional)

## Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example:

 Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.The chart below compares student performance on the ACT Aspire Interim I assessment, administered on February 22-23, 2016, to performance on the ACT Aspire Interim 2 Assessment, administered on April 7-8. 2016. The data was calculated based on the information presented in the following document shared by ACT Aspire: Linking ACT Aspire Interim I -III Assessment and Summative Assessments Using 2014-2015 Data. The document states that it uses, "data from students who took Interim I-III in the window of March 15 through June 30, 2015, and a corresponding summative assessment, equipercentile concordances were conducted to find the score on the different interim assessments that corresponded to the ACT Readiness Benchmark on the summative assessment."

All grades in all areas showed an increase in performance. The largest gains were made in $8^{\text {th }}$ Grade English and Reading, $7^{\text {th }}$ Grade Reading, and $8^{\text {th }}$ Grade Math.

| English |  |  |  |
| :---: | :---: | :---: | :---: |

| 10th Grade | 5\％ | 7\％ | ＋2\％ | 10th Grade | 11\％ | 20\％ | ＋9\％ |

The Academic Skill Attainment Report for Career and Technical Education (CTE) shows the district has made notable gains over the past two years. The score report states, "The academic attainment measure is based on the number of CTE concentrators who score proficient or advanced on the end-of-course Literacy and Geometry assessments. CTE Concentrators are those students who have completed at least three units from a program of study in grades 9-12 and are leaving the secondary education system during the reporting year."

The largest gains were made in Literacy proficiency and CTE Skill attainment.

|  | $2013-2014$ |  | $2014-2015$ |  | \% Gain |
| :---: | :---: | :---: | :---: | :---: | :---: |

# End of Year Summary Report 

## FOURTH QUARTER

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the team's' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

## Current reality of effective practice from the beginning of the year:

The school leadership team is composed of the principal, counselor, teacher leaders, parent facilitator, student and parent. The school leadership team meets weekly for one hour. Modified team daily planning periods for content area instructional teams were developed. Content instructional teams meet daily to focus on five themes. Unit/lesson planning, data driven instruction, high yield learning strategies, student engagement/differentiation and literacy through content are discussed in team planning meetings.

## Current reality of effective practice:

The school leadership team operates using a team charter. The school leadership team is composed of the principal, counselor, teacher leaders, and Title I parent facilitator. A school PTO organization, composed of the principal, parent facilitator, college/career coach and parents meets monthly. A school-community team was developed and meets monthly. A student council composed of the student leaders meets monthly

Weekly PLC's focus on instructional themes with non content area teams. A campus administration consists of the principal and two assistant principals; the campus administration meets daily for at least 10 minutes. A school PTO organization, composed of the principal, parent facilitator, college and career coach and parents meets monthly. All teams operate using agendas and minutes. Agendas are prepared in advance and emailed out to members in advance. All teams look at performance data, classroom observation data, and make decisions about school improvement and professional development. The teams use wise ways indicators to assist with their practices. The teams stay on task and provide minutes following the meetings. Incentive, ACSIP, department and handbook teams are established as needed.
and are reported to the school leadership team through their sponsor. Student voices are sampled and reported to the staff and leadership team. The school leadership team meets weekly for one hour. Content area teams meet multiple times per week during common planning times. Content instructional teams meet daily to focus on five themes. The instructional teams meet to plan units and lessons. The instructional teams analyze data to drive driven instruction. The instructional team discusses instruction and implementing high yield learning strategies. Instruction is modified based on pre-post test data discussed during instructional meetings. Student engagement strategies are presented as training during instructional team meetings. Weekly PLC's focus on instructional themes with elective class teams. A campus administration consists of the principal and two assistant principals; the campus administration meets daily for at least 30 minutes. All teams operate using agendas and minutes. Agendas are prepared in advance and emailed out to members in advance. Leadership and administrative teams look at performance data, classroom observation data, and make decisions about school improvement and professional development. The teams use wise ways indicators to assist with their practices. The teams stay on task and provide minutes following the meetings. Incentive, Arkansas Comprehensive School Improvement Plan (ACSIP), department and handbook teams are established as needed.

Staff members attended Summer professional development on unit planning. Content teams and PLC'S have developed instructional units based on the curriculum. An LDC team has developed instructional units. All teachers are administering pre and post tests every two to three weeks. The instructional teams review the pre and post test data. Results from the pre and post tests are used to guide instruction and plan for professional development.

Professional learning communities meet based on a common-planning period once per week. All certified staff members are members of a PLC. Each grade SLT was elected in the 1st quarter. The SLT meets monthly. Additional meetings are held as needed.

The Instructional Teams meet to review the curriculum standards, however the level of discussion regarding curriculum implementation is subpar. This unit typically encompasses ten to fifteen days of work and includes pre/post tests. All teachers give a pre-test and post-test. The pre-test and post-test assess the same learning objectives and inform the teachers' plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit.

The expectations of the Instructional Team pertaining to reviewing the documentation and data from pre/posts tests to create a plan of action for each instructional unit have been inconsistent. In addition, a professional development plan has not been created to address the needs of students based on data from pre and post test results. Teachers are in the process of developing pre-post data walls in conjunction to the current TLI data walls, which are updated quarterly. Going forward, professional development will be provided based on student pre/post test results.

IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

## Current reality of effective practice from the beginning of the $\quad$ Current reality of effective practice: year:

A committee met to develop a discipline management plan. The teachers taught the classroom rules to students during the first week of school. Teachers were trained during PLC's on classroom procedures and classroom management. Additional trainings were offered for teachers to attend for classroom management. Teachers have developed rituals and routines in their classrooms. Focus walks were conducted to ensure that rules were posted and rules were in place.

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. New teachers attended training on classroom management. Training was conducted on Domain 2 of TESS for all teachers. Additional training was provided for teachers that were identified as needing additional classroom assistance. Each teacher is progressing towards universal classroom procedures and routines. The Workshop model of instruction is being used in all classrooms.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)
Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

## Current reality of effective practice from the beginning of the year:

A committee met and developed a parent-student-school compact agreement. The compact was given to all students and has been presented to parents. The compact outlines how everyone (student, parent and school) will share responsibility for improving academic achievement.

## Current reality of effective practice:

The school had an agreed upon compact that outlines shared responsibility for improving academic improvement. The compact describes how the school and parents can work together to help students achieve the state's standards. The PTO held elections and holds meetings at least monthly. A school and community council was formed. The school and community council meets monthly. The leadership team has enforces using parents to deter the bad decisions of their students, resulting in more accountability of students of their behavior.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice from the beginning of the

 year:The guidance plan includes the following activities:
Resolve conflicts and complete all student schedules
Open House / Report to Public
Graduation Credit Checklist for seniors

ACT Registration, Information and Dates
College Applications and Scholarship Information

## Current reality of effective practice:

The guidance plan includes the following activities:
Academic Advisement and Final Graduation Checklist of Required Credits for Seniors

Post-Secondary Campus Visits, Admission Process, Scholarship Applications, Letters of Recommendation, Concurrent Credit

Post-Secondary Program Participation (Upward Bound, TRIO)

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

The high school leadership team facilitated the creation of our school's new mission, vision, and beliefs statements into those which are based on multiple forms of data concerning student and teacher performance. The culture at the high school changed because of the expectations brought about by new leadership. The leadership team has led the school improvement plan committee in guarantying its' validity and compliance with ADE mandates. While ensuring those mandates, the leadership team guided our school culture into one of distributive leadership through the effective use of strong teacher, student, and community leaders. The leadership team set aside common meeting times so that the work of students, teachers, administrators, and shareholders could become more streamlined in our efforts to align school policies and procedures to the mission, vision, and expected results. Although the school leadership team had buy-in from the staff, there was little autonomy in the school decisions. Many of the school decisions were prescribed at the district level. The high school lacked the support and resources to support effective learning and student engagement.

## Comments/ Clarifications:

ELA DATA by Quarter for Grades 3-10

Page 15 of 18

## Comments/ Clarifications:

Some students who were classified as upperclassmen were assigned to lower classes.

Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example: Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.

## 45-DAY PLAN

## Fourth Quarter

2015-2016 School Year

## IMO Area 1: Change in Teacher and Leader Practice

## ADE Recommendation: Not Applicable

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)
Description of full implementation of the Effective Practice and/or Recommendation:
District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).
Current reality of effective practice (Assess where we are): Teachers continue to meet on a regular basis to discuss student achievement. STEP 1 and 2: Our building has a well-established PLC meeting schedule and agenda template. The PLCs are habitual in submitting copies of agendas, minutes, and sign-in sheets to the Principal's Office.

Quarterly Objective: To maintain an accurate and current record all meetings.

| Tasks | Target <br> Date | Completion <br> Date | Person <br> assigned | Met | Not <br> Met | Evidence of Completion |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| 1. The leadership team will meet bi- <br> monthly for a minimum of two <br> hours per hours. | $01 / 04 / 2016$ | $05 / 25 / 2016$ | Deloris Hawkins | x |  | Agendas, meeting minutes and <br> data reports |
| 2. Leadership team members will <br> report information and data from <br> the grade level and content team <br> meeting to the leadership team. | $01 / 04 / 2016$ | $05 / 25 / 2016$ | R. Henard | x | Agendas, meeting minutes and <br> data reports |  |
| 3. Team meeting agendas <br> template will include norms for <br> cooperation and Dufour's questions to <br> guide the work. | $01 / 04 / 2016$ | $05 / 25 / 2016$ | Vernice Meadows |  |  |  |

## Include additional task lines as needed.

STEP 3: Impactful decisions for 2015-2016:
*school wide LDC and MDC
*continuation and enforcement of building wide Standard Rules
*increased awareness of the purpose of pre and post-tests; the results from the pre and post tests were used to guide data driven instruction
*creation and implementation of building wide TEACHING MODULES

IMPACT ON STUDENT ACHIEVEMENT AND THE SCHOOL: In reality student achievement did not increase; however, as a Leadership Team we saw substantial growth in teacher understanding of the effect of data driven instruction. The PLC conversations were centered on concrete data.

The review of the STANDARD RULES each nine weeks impacted student discipline and classroom management in a positive way.
Full implementation in Change in Teacher and Leader Practice ( ID01, ID04, ID07, IIB02, IIB04)

- ID01- The leadership team will continue to meet bi-monthly. Agendas, minutes, and sign-in sheets will be kept for evidence of progress and uploaded to Indistar. Agendas will also be made available to team members prior to meeting times via e-mail. Leadership team members will work to incorporate team structure into District policy. Present written document to district leadership team for approval and placement in district policy manual.
- ID04- There is a building wide agenda template used by all PLCs to ensure required information is discussed during each PLC.
- ID07- The Leadership team and other academic team meetings will have agendas, minutes, and sign-in sheets maintained in a notebook and/or uploaded to Indistar. The building leadership team will consist of the principal, counselors, academic coaches, and a representative from each grade level and discipline area. A team roster will be kept and meeting agendas, sign-in sheets, and minutes will be maintained.
- IIB02- All teachers are administering pre and post tests for units that are taught. This enables teachers to better equip students with what they need to know to meet and/or exceed expectations and academic growth. Evidence: Examples of pre and post tests, data from those tests, discussion of those items in team and PLCs meetings per agendas and minutes, lesson plans, CWT forms. Teachers will use teacher created test and district interim assessments.
- IIB04- Mastery of skills will be evident by student application of different strategies based on individual abilities of the learner. Differentiated instruction will be noted in lesson plans.

Student Safety and Discipline ( IIIC10)

- When fully implemented, all classrooms will be effectively managed to maximize student achievements. School standard rules and classroom procedures will be posted in each classroom, there will be a decrease in office referrals as shown by discipline report, student signed acknowledgement of school standard rules and classroom procedures, and there will be classroom procedures review each nine weeks.

Family and Community Engagement (IVA01, VA01)

- IVA01- Majority of parents accessing HAC, increased visits to parent center, increased parent participation in parent/teacher conferences, Parental Advisory Committee increased membership and participation. Parents will have access to school computers to use to assist their child/children with the internet links for textbooks and the ACT aspire online practice information.
- VA01-Career Development classes use the Kuder program for students to self-assess their interests and match to career and college options. The high school career coach visits with these classes regularly to discuss college and careers and financial aid. RMMS has college awareness days throughout the school year that involve the students and the staff. Evidence: Kuder reports, Career Coach visit sign-in sheets and surveys, photos of E.A.S.T. lab projects, CTE posters

## IMO Area 1: Change in Teacher and Leader Practice

## ADE Recommendation: Not Applicable

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).
Current reality of effective practice (Assess where we are):
Teachers continue to administer pre and post tests for units of study to accurately assess the student's prior knowledge and academic growth. By doing so teachers are setting student expectations and academic growth plans.

Quarterly Objective:
Teachers will utilize pre- and post-test for all units of study to drive their instruction and lesson planning.

| Tasks | Target Date | Completion Date | Person assigned | Met | Not <br> Met | Evidence of Completion |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1. Instructional leader, instructional coaches, team chairs and PLC's will reinforce the necessity, purpose, ad usefulness of pre and post-test in all units of study for each subject area | $\begin{gathered} 01 / 04 / 201 \\ 6 \end{gathered}$ | 05/28/2016 | Yolanda Prim Robyn Porter Vernice Meadows |  |  | Grades and minutes from your meetings |
| 2. Data from Pre and Post tests are used for discussion of the items not mastered in team weekly meetings. | $\begin{gathered} 01 / 10 / 201 \\ 6 \end{gathered}$ | 05/28/2016 | Vernice Meadows |  |  | Agendas, minutes |

Include additional task lines as needed

## IMO Area 3: Student Safety and Discipline

## ADE Recommendation: Not Applicable

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10)
Current reality of effective practice (Assess where we are): Teachers continue to display and enforce the five standard building rules, along with their classroom rules.

Quarterly Objective: All classrooms will be effectively managed to maximize student achievements.

| Tasks | Target <br> Date | Completion <br> Date | Person <br> assigned | Met | Not <br> Met | Evidence of Completion |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| 1. Principal conduct CWT's with <br> emphasis on TESS domain 2d: <br> 2. Managing student behavior. | $10 / 17 / 2015$ | $05 / 28 / 2016$ | Yolanda Prim |  | School standard rules and classroom <br> procedures posted in each <br> classroom, decrease in office <br> referrals. Documentation of CWT's |  |
| 3.Create a form for teachers to <br> distribute and have students <br> sign each time the standard <br> rules are reviewed. <br> 4. Leadership team will review <br> quarterly discipline reports. | $10 / 17 / 2015$ | $05 / 25 / 2016$ | Raymond <br> Henard |  | The signed forms will be kept on file <br> by the teacher. |  |

Include additional task lines as needed

## IMO Area 4: Family and Community Engagement

## ADE Recommendation: Not Applicable

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

## Current reality of effective practice (Assess where we are):

Currently Ms. Armstrong is working with a group of advisory parents to help enhance the academic experience here.
Quarterly Objective: To increase parent involvement by $10 \%$ by the end of the quarter.

| Tasks | $\begin{array}{c}\text { Target } \\ \text { Date }\end{array}$ | $\begin{array}{c}\text { Completion } \\ \text { Date }\end{array}$ | $\begin{array}{c}\text { Person } \\ \text { assigned }\end{array}$ | Met | $\begin{array}{l}\text { Not } \\ \text { Met }\end{array}$ | $\begin{array}{c}\text { Evidence of Completion }\end{array}$ |

Include additional task lines as needed.

## IMO Area 4: Family and Community Engagement

## ADE Recommendation: Not Applicable

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

Current reality of effective practice (Assess where we are):
Currently, we provide college awareness days throughout the school year that involve the students and school staff.

Quarterly Objective: To assess student interest and match with career and college options.

| Tasks | Target <br> Date | Completion <br> Date | Person <br> assigned | Met | Not <br> Met | Evidence of Completion |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| 1. Choices which help with <br> careers, setting goals and <br> making decisions. | $1 / 5 / 2016$ | $03 / 15 / 2016$ | Joyce Wilkes | x |  | .sign sheets |
| 2.Career Development teacher <br> will schedule regular visits from <br> the High School College and <br> Career Coach so students on <br> be exposed to as much college <br> and career information. | $3 / 09 / 2016$ | $03 / 09 / 2016$ | Joyce Wilkes | x |  | Lesson plans and sign-in sheets |

Include additional task lines as needed.

## PRINCIPAL'S REPORT SECOND QUARTER

Has there been a meeting with the District Leadership Team to review the school's needs and progress? YES or NO (Please circle) Yes
If yes, what support have you received from the district? Yes, The district Leadership provides on going monitoring, supplies materials needed to meet the teacher and student needs, embedded professional development as needed. The district address school needs at each district meeting. The district is aware of the technology needs of the building and they along with the technology department is working to solve the problems.

Please describe the interventions your school is utilizing specific to closing the achievement gap (Focus) or for improving the outcomes for students basic and below basic (Priority). (Do not include general school wide efforts.)
Read and math 180, System 44. The scholastic programs are researched based programs that provide intensive remediation for students who are performing below grade level. The programs are designed to meet students' needs in several different ways, whole group which includes all students, small group which is teacher lead; instructional technology which starts students where they are and move them at their pace; modeled and independent reading which exposes student to a wide range of paperback and ebooks.

SMI and SRI to identify students working below grade level, The RTI process is designed for use when making decisions in both general education and special education, creating a well-integrated system of instruction and intervention guided by child outcome data. For RTI implementation to work well, the following essential components must be implemented with fidelity.

After school tutoring is scheduled three days week working with students on their homework, working skills that students have not mastered on assessments in math and literacy. Students are monitored through class activities and assessment.

Parent conferences are held more often to keep parents abreast on where students are.
Teachers are working more in small groups with students to ensure student needs are being met.

Monthly parent activities are held to help parents to understand skills that are being taught so that parents can help students at home.

What support(s) have you or your team received from the external provider, District SIS, and the ADE SIS Team? The SIS reviews assessments, have conversations about what is being done and how we can better improve student achievement. The ADE is working us to review and provide directions or recommend

What are the barriers, if any, in improving student outcomes? None at this time.
How is your leadership team monitoring student progress in the skill area of science? Weekly assessments, pre and post results, Classroom Walk Through's, weekly team meetings, observations, meeting with teachers individually to address strengths and weakness of teachers and students.

How is your leadership team monitoring student progress in the skill areas of math, reading, writing? How are you responding to the results? We are reviewing test data, meeting weekly with Professional Learning Community's, overserving classroom instruction and meeting with teachers individually to address strengths and weakness of the students and teachers.

What have been the most meaningful decisions and actions made by the School Leadership Team this quarter as documented in the minutes?

If anything, what do you intend to change or modify for the next quarter?
We will increase remediation through the after school tutoring.

ARKANSAS
DEPARTMENT
OF EDUCATION

## SCHOOL LEADERSHIP TEAM'S REPORT Fourth QUARTER

STUDENT/ TEACHER DATA by Quarter (IMO AREA 2: Student Progress and Achievement)

## Comments/ Clarifications:

Ongoing conversations are held to discuss the placement or the growth of the students from pre and posttest.

|  |  |  |  |  |  |  | - |  |  |  |  |  |

This report shows changes in student performance and growth on the Scholastic Math Inventory (SMI) over time. There were 263 students tested during the testing window, December 9-18, 2015. One hundred forty one students showed an average growth of $51 \% .18$ students transitioned from below basic to basic, 9 from basic to proficient and 1 from basic to advance.

The Scholastic Reading Inventory (SRI) identifies how much growth students have made between the first SRI test and the last SRI test in your chosen date range. Of the 247 students tested 126 showed an average growth of 47 Lexile points. The testing Window was November 18-20 and December 9-18, 2015. There were 17 students who went from below basic to basic, 6 from basic to proficient, and 1 from basic to advance.

The data is shared with the teachers and determination is made if a student should continue with the Math 180, Read 180, or System 44. This information is also used to monitor students enrolled in the RTI process.

## LEADERSHIP TEAM REPORT CONTINUED

## Comments/ Clarifications:

There are three teachers for each grade and 1 teacher per grade has missed the 5 days.

Comments/ Clarifications: The number of students assessed on each post-unit assessment for the current quarter fluctuated due to students transferring in and out of the district.

Math 180, math lab, after school tutoring, small grouping, and Math Collaborative Design activities with formative assessments are interventions we are currently using to assist struggling learners. We will also utilize the TLI online review tool for individualized remediation.

Teachers create individualized lessons based on analyzed data from formative assessments.
Absenteeism during the winter quarter along with students transferring in and out of the district attributed to the fluctuating number of students assessed on each post-unit assessment for the current quarter;

Math 180, System 44, after school tutoring, Math Design Collaborative (MDC) formative assessments, and small grouping interventions are in place to support struggling students. These tools allow students to work at a slower pace to develop lower-level key skills that are necessary for success in math.

Math teachers are utilizing the TLI online review tool for individualized and group remediation. This remediation tool provides short video clips with instructions and is also available for home access. Students are also encouraged to use websites such as Khan Academy and Learn zillion for more instruction and practice

Teachers model with appropriate vocabulary and higher-level questioning and prompts to help students share their thoughts and to encourage critical thinking.
Key strategies will include targeted professional development developed by teachers, driven by data, and aligned with instructional focus.
Schoolwide Instructional Focus:
Classroom setups that support instructional focus
Resources used strategically to support instructional focus
PLC and team meetings focused on teaching and learning
It appears that the numbers may have been miscalculated in the second quarter report. We will take another look at the data and submit an updated report.

Comments/ Clarification: The number of students assessed on each post-unit assessment for the current quarter fluctuated due
Absenteeism during the winter quarter along with students transferring into and out of the district attributed to the fluctuating number of students assessed on each posy-unit assessment for the current quarter.

Read 180, System 44, after school tutoring, Literacy Design Collaborative formative assessments, and small grouping are on-going interventions used to assist with struggling readers. TLI online review tool for individualized remediation is also being used as well as the ACT Aspire exemplars.

Readtheory.org, a tool that is being utilized by ELA teachers, assesses students' reading levels, provides Lexile scores, and provides individualized lessons that adapt to the students' responses. ELA teachers are able to narrow the scope of which CCSS require greater focus. This tool also allows ELA teachers to monitor their students' progress as they assess. Score reports and other resources are provided.

Mrs. Newton, a consultant with Education Consulting Services, and Mrs. Porter, RFMMS literacy coach, provide strategies and assistance to ELA teachers to reinforce what is currently being taught.

Teachers are continuing the use of higher order level questioning and prompts to hone the students' critical thinking skills. Both Instructional Facilitators collaborate with teachers on how to formulate questions that will address Bloom's Taxonomy. Feedback is given to teachers after the facilitators have conducted Classroom Walthroughs. Teachers share their modules with the Instructional Facilitators. The facilitators are able to monitor the types of questions that teachers are developing.

Future professional development will be targeted, data driven, and aligned with instructional focus.
There was a significant increase in the unit posttest scores between the $2^{\text {nd }}$ and $3^{\text {rd }}$ quarters. The Leadership Team has concluded that a factor may have been that no TLI scores were used as a posttest due to the fact that the TLI Module 4 was scheduled after grades were to be submitted.

There were high numbers of D's or F's on report cards compared to the unit test scores. Contributing factors may have been due to the lack of students submitting homework assignments, students failing to complete and/or do class assignments, or students failing to submit projects.

The Leadership Team will communicate the homework policy more efficiently, clarify the purpose of homework, ask students to use homework assignment sheets, and will ensure that teachers are providing timely and specific feedback on homework. Apathetic behavior is a major factor for the lack of student achievement. The Leadership Team has discussed using Root Cause Analysis to trace the origin of this problem and devise a behavior plan to correct the issue.

Schoolwide Instructional Focus:
Classroom setups that support instructional focus

Resources used strategically to support instructional focus
PLCs and team meetings focused on teaching and learning

## LEADERSHIP TEAM REPORT CONTINUED

## (Optional)

Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example: Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.
Key strategies include targeted professional development plans that are developed by teachers, driven by data, and aligned with instructional focus.
Schoolwide Instructional Focus:
Classroom setups that support instructional focus
Resources used strategically to support instructional focus
PLC and team meetings focused on teaching and learning
Analyze and chart the data to help focus instruction
Teachers use higher order level questioning and prompts to encourage students to share their thoughts and critical thinking.

EXTERNAL PROVIDER: N/A
ade school improvement specialist team: Janie Hickman, Judy Foot, Dr. Robert Brewer

# End of Year Summary Report 

## FOURTH QUARTER

2015-2016 School Year

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

| Current reality of effective practice from the beginning of the | Current reality of effective practice: |
| :--- | :--- |
| year: |  |
| Earle High School has established a building leadership team that | Earle High School Leadership Team (LT) consisted of the principal, |
| meets at least twice a month on Mondays from 3:35 p.m. - 4:35 p.m. | instructional facilitator, district curriculum coordinator, dean of |
| Members of this team include the building administrator, facilitators, | students, parental involvement coordinator, the locally hired school |
| support staff, and teachers from each of the content areas. Each | improvement specialist (SIS), and department chairs. The school |
| Professional Learning Community (PLC) has representation on the | leadership held at least three (3) meetings a month. The team set |
| team as well. The chairperson will disseminate information to their | and monitored goals to support school improvement efforts. |
| PLC. | Evidence of these meetings will include, but are not limited to, the |
|  | master schedule calendars, agendas, and minutes taken will reveal |
|  | that the Leadership Team, as well as grade level/content |

Page 1 of 19

The leadership team examines data to determine areas of improvement. For example, through conversations during PLC meetings, during job embedded professional development, and after viewing assessment results, the team determined a need in math; 2 of the 3 math teachers need additional support to increase their effectiveness in the delivery of instruction. A calendar will be created to reflect meetings that will take place with the facilitators to reflect face-to-face meetings, dates designated for co-teaching, and reflection. Additional professional development is needed in constructing assessments and content; principal, facilitator, and curriculum director are working to ensure that this happens.

Professional Learning Communities (PLCs) were meeting to support these efforts. Although the PLC meetings were not as consistent in their focus, efforts by the Leadership Team were made to refocus on procedures and expectations as previously addressed. The Principal also presented the Leadership Team with the recommendation made by the SIS to restructure PLCs and refocus team meeting expectations. The leadership team is working to restructure team meetings so that data for the building is reviewed every meeting and that actions/next steps (including assigned duties) are more effectively communicated to the teams/PLCs and supported. It was also recommended that the master schedule be restructured, allowing PLC to consist of grade bands 7-8, 9-10, and 11-12 teachers so that these teams could meet weekly to discuss various forms of data (academic, behavioral, \& attendance) and offer each other support in addressing student needs and ensuring that parental contact increases. The Leadership Team accepted the recommendations and steps are currently being taken to change the master schedule. Monitoring of the PLCs to ensure that remained focused on addressing issues based on the data collected declined some during the second quarter; however, after it was recognized that some PLCs were not operating as effective as others, the administrator and instructional support team immediately addressed the issue by attending some of those meetings and providing guidance. By promoting increased accountability, improvements in fostering a cooperative learning environment and school culture/climate at Earle High School are being realized.

In addition to the previously stated efforts to continue this work, a professional development calendar for the upcoming school year with standard scheduled PD days and embedded work-day sessions is in the process of being developed. Calendars outlining specific

|  | areas of support are in the process of being created for content area <br> teachers as well; in addition, areas will be added as identified by <br> data |
| :--- | :--- |
|  |  |

This is partially implemented; whereas some areas have developed instructional units for 36 -weeks of instruction, based on the content standards, others have only created 2-3 units. We are presently evaluating our current unit plans against a unit plan rubric and checklist and are utilizing our job- embedded and other professional development time to continue to address curriculum needs. We also experienced a $50 \%$ turnover in teaching staff for this year, which greatly affected our ability to adhere to the calendar of professional development sessions that was created last year.

Pre- and post -tests were administered for unit one in most classes. Building principal has communicated the expectation of pre-and post- testing for each educational unit in all classes. A data template has been created in Google Drive for school wide use. Teachers are expected to upload their unit pre-and post-test data here, thus creating a virtual data wall and central location to maintain assessment results for viewing. From viewing assessment data (pre/post - tests, quizzes, formal assessments, TLI) teams will determine next steps.

Consistent progress has been made this year in regards to curriculum. However, this will continue to be an ongoing process; with revisions to pacing guides and unit plans occurring at designated intervals of time and increased monitoring. Based on data/evidence collected, teachers were consistently administering Post Assessments, but were not as diligent with Pre Assessments. At least four (4) units of instruction have been completed for our core areas and the system for evaluation has been restructured. Teachers have become more comfortable and proficient in utilizing Google to store their curriculum work and display student data as evident in the work collected from teachers and stored in Google Drive Folders. We are revising our assessment procedures and have implemented the data model which provides a systematic and comprehensive way to analyze the assessments. Through reviewing teacher assessments and assessment data, it was revealed that teachers still need support with creating authentic assessments that are both rigorous and completely aligned with the standards, as well as state testing formats. After reviewing the data for pre/post assessments for the units, the results were often inconclusive, indicating that the instructional team must increase their efforts in monitoring and supporting instruction more closely. As an added measure of accountability, the school improvement specialist worked with the curriculum coordinator, instructional facilitator, and principal to create a system ensuring documented evidence of monitoring curriculum materials for rigor and relevance. This system includes comparing pacing guides to state standards, review of Unit Assessments and Unit Plans, and providing feedback and assistance when needed. We will implement a building-wide schedule for assessments so that we may reduce the frequency of assessments while creating opportunities to thoroughly review results. The data from the assessments will be presented to the

|  | Leadership and Instructional Teams using the data and reflection <br> model within 72-hour of testing. The data and reflection model <br> includes next steps to ensure that standards/skills significantly below <br> the proficiency target will be re-taught. This decision was made in an <br> effort to help us to refocus our instructional efforts and support our <br> culture of data analysis, using the results to drive improvement. |
| :--- | :--- |

All teachers are currently reinforcing the classroom rules and procedures in each classroom daily. We have also elected to continue the practice of teachers maintaining their own data regarding for student tardiness and the 15/15 rule where no students are to be excused from class for the first and last 15 minutes of each class period.

We continued to stress previously established, concrete expectations for classroom rules, procedures, and continued the 15/15 rule. The Principal and Leadership Team stressed reviewing the class rules and procedures, as a primary focus, with students the first two weeks of school and as needed thereafter. The Principal and Leadership Team also observed class rules posted in each class, as well as classroom management strategies used during observations. However, not all teachers remained consistent with these expectations. Data for student discipline was analyzed, targeted areas for support were identified, teachers were identified for support with classroom management strategies, and students were identified for behavioral support. This practice will continue for the upcoming school year.
Truancy and absenteeism became an issue; therefore, actions are being taken to create a solution that would address both teacher and student behaviors. One step in addressing the issue of truancy and absenteeism is requiring that this data is discussed and documented in the minutes taken during weekly team meetings.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

## Current reality of effective practice from the beginning of the year:

Parents were provided the school compact during student registration this summer. They were completed and returned to the parent coordinator and she provided a copy to the teachers. All students, parents, and teachers read and sign the school ParentTeacher compact. Located on this compact is the school's mission statement and agreements between the school, students, and parents. Each member commits to upholding the expectation to communicate thoroughly and frequently throughout the school year about the progress towards academic and social goals.

## Current reality of effective practice:

The school continues to strengthen its relationships with the community and build collaborative relationships with outside agencies. Student registration/orientation dates have been set for the upcoming school year. Collaborative work was completed to revise the building's vision and mission statement. Efforts are being made to increase participation in the volunteer program as well. The Parent Coordinator has provided a copy of the revised the Volunteer Plan to faculty and staff, soliciting feedback. Our end of year awards ceremony was a definite success with the turnout exceeded expectations. In addition, efforts are being made to provide a comprehensive calendar of events to the entire learning community each semester for the upcoming school year. A newsletter will be
provided to parents and guardians during registration this summer to highlight this year's successes and share future plans.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice from the beginning of the

 year:We currently provide several opportunities and services to prepare our students for college and career readiness. These include but are not limited to Financial Aid night, parent nights covering various topics each quarter, the College Initiative program, LiveBinder for scholarships, Counseling Facebook Page and Newsletter, one-toone sessions with school counselor, On-site transition counselor for students in need of special services, recruitment days for colleges and the various branches of the military, ACT prep online, PSAT testing, NCAA Clearinghouse for athletes, ACT registration orientation, ASVAB testing, and concurrent courses with Arkansas State University-Mid-South. School counselor also maintains a career development portfolio on all students.

## Current reality of effective practice:

We consistently provided opportunities and services to support our students in their quest for college and career readiness. Students continued to work with the school counselor, College Initiative staff, MSCC support staff, college recruiters and staff, and military staff. As a result of these combined efforts, over \$500,000 in scholarships was awarded to this year's graduating class of 54 students. The awards ceremony and banquet for the seniors was a huge success. Efforts are being made to provide a comprehensive calendar of events to the entire learning community each semester for the upcoming school year.

There are multiple methods used to track recent graduates. One method being the seniors completed a form titled My Final Plan which asks questions about their post-secondary pathway plan. The choices are university, community college, vocational/technical school, military and/or workforce. If a school is selected, the school's information is provided. Recent graduates are also tracked
by information provided during an exit interview conducted by the guidance counselor with additional questions related to their experience during high school and their future plans. This form also provides updated contact information (if necessary), so the guidance counselor can connect with them during the summer and fall to see how they are doing and determine if changes were made in what they decided to pursue. During the school year, the guidance counselor also collects information from the CTE director regarding completers and their post-secondary status. Another method used to track students' post-secondary status is word of mouth. This information is obtained while working with the students- emailing and calling the students, their parents, friends, the schools they indicated they would be attending, as well as reaching out to my military recruiters and browsing Facebook and other social media sites.

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

Some of the most meaningful decisions and actions made by the building Leadership Team this quarter include those regarding data and teacher/leader practice. Identifying areas of need based on our observations, teacher reflection, and student data was very helpful in aligning the building expectations with classroom expectations and practices. In these efforts, we did realize that we must decrease the turnaround time for support and are working diligently to solidify this plan. Our decision to implement a school-wide data analysis model was instrumental in increasing teacher accountability, increasing conversations about our data, and targeting specific areas for improvement. Although this is an ongoing process, a foundation was formed this year so that we are able to build collectively, support teachers, target students for interventions, and provide other instructional support. This will also support our efforts to align data analysis and our instructional program. Increased monitoring and support of areas identified as having challenges with classroom management improved classroom climate; thus, decreasing the number of student infractions overall. We will continue to implement these practices that were successful, while restructuring to improve those that were not. We will continue to make necessary changes as our data reveals areas for improvement.

If anything, what do you intend to change or modify for the year?
For the upcoming school year, plans include but are not limited to:

- Restructuring the master schedule to include and promote team meeting times
- Establish team meeting calendars by semester to reflect school year (all areas)
- Broaden the team structure to fully support the student leadership team and school community council, where each team operates in its purpose as evidenced by a calendar, agenda, and minutes.
- Utilize the data analysis model in non-content areas
- Create and establish a building- wide assessment calendar
- Create and implement the use of an aligned lesson plan rubric with lesson plan template, providing feedback to teachers as needed
- Incorporation of ACT Aspire formatted assessments into the curriculum,
- Fully implement a classroom management support system for teachers identified as having issues with classroom management as identified by classroom observations and/or discipline data; create and establish a calendar to reflect meetings for follow-up, revision, etc.
- Fully implement behavior plans for students identified as frequent offenders; create and establish a calendar to reflect meetings for follow-up, revision, etc.
- Revisit organizational flow chart (building)
- Restructure new teacher orientation session(s) and follow-up sessions
- Restructure the advisory/mentoring period
- Utilize Edmentum suite for interventions
- Create and utilize timelines for monitoring systems

## SCHOOL LEADERSHIP TEAM'S REPORT FOURTH QUARTER

STUDENT/ TEACHER DATA by Quarter IMO AREA 2: STUDENT PROGRESS AND ACHIEVEMENT

| Grade Level | Number of students enrolled |  |  |  | Number of SWD enrolled as of October $1^{\text {st }}$ per grade level | Number of EL students enrolled as of October $1^{\text {st }}$ per grade level | Number of students with 5 or more referrals |  |  |  | Number of students who have been absent 10 or more days (20\% absence rate) |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1st | 2nd | 3rd | 4th |  |  | 1st | 2nd | 3rd | 4th | 1st | 2nd | 3rd | 4th |

| total |  |  |  | 302 |  |  |  |  |  |  |  |  |  |  |

Comments/ Clarifications:
The Leadership Team recognizes the substantially higher number of absences of 10 or more days in grades 9 and 12. We have received information based on student interviews as to reasons for the higher number of absences of 10 or more days in grades 9 and 12, however the results of those student interviews are too random to be considered significant evidence. Therefore, the Leadership Team has discussed possible ways to minimize this in the future, such as providing incentives for attendance.

| Percent of core teachers (Math, Science, Social Studies, ELA) absent 5 or more days (10\%) |  |  |  | Number of ELEMENTARY students that are 2 or more years below grade placement in Math as determined by Test on I (Date) |  | Number of SECONDARY students that are 3 or more years below grade placement in Math as determined by$\qquad$ Test on$\qquad$ I (Date ) |  | Number of ELEMENTARY students that are 2 or more years below grade placement in ELA as determined by Test on$\square$ I (Date) |  | Number of SECONDARY students that are 3 or more years below grade placement in ELA as determined by <br> Test on <br> I <br> (Date) |  |

|  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |

## Comments/ Clarifications:

After reviewing TLI data, it was determined that this source would not accurately identify students in the population that were three or more years behind in ELA and Mathematics. Research was conducted to identify a universal system that would assist in targeting this population. The building leadership team wanted a system that would closely resemble and support the efforts in remediation and interventions. The school decided to utilize Edmentum, which also supports the Credit Recovery program currently utilized. The Edmentum software provides a diagnostic for a grade equivalent and an individualized remediation plan to move towards proficiency.

MATH DATA by Quarter for Grades 3-10

Comments/ Clarifications: Recognizing the high number of students with D's and F's in Math and ELA, the Leadership Team is increasing monitoring of instruction and implementing a system that requires assessment to be reviewed by the instructional team prior to instruction.

ELA DATA by Quarter for Grades 3-10

Recognizing the high number of students with D's and F's in Math and ELA, the Leadership Team is increasing monitoring of instruction and implementing a system that requires assessment to be reviewed by the instructional team prior to instruction.

## (Optional)

Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example: Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.

# End of Year Summary Report 

## FOURTH QUARTER

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the team's' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08).
The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).
Current reality of effective practice from the beginning of the $\quad$ Current reality of effective practice: year:

The district has in place a leadership team consisting of principals and other key administrative personnel. This team meets regularly to analyze data, assess growth and develop next steps to improve student achievement across the district. Principals disseminate relevant information to their individual schools. In addition, a district level instructional facilitators team meets periodically to analyze data, evaluate new programs, peer edit school level ACSIP plans, and address other student achievement areas. Instructional Facilitators act as a conduit between the administrative level and their individual school in areas of student achievement.

The district has in place a leadership team consisting of principals and other key administrative personnel. This team meets regularly to analyze data, assess growth and develop next steps to improve student achievement across the district. The Leadership Team is headed by the principal and includes teachers and other staff. In order to facilitate communication and coordination among the grade levels and the departments of the school, a typical composition of the Leadership Team is the principal and team leaders from the Instructional teams.

The School Leadership Team meets twice each month for an hour each meeting. In addition, department heads along with teachers meet in teams periodically to analyze data, evaluate

|  | new programs, peer edit school level ACSIP plans, and <br> address other student achievement. The locally hired SIS <br> serves as a conduit between the administrative level and their <br> individual school in areas of student achievement. <br> Effective teams operate with agendas, keep minutes, stay <br> focused, and follow through with the plans they make. |
| :--- | :--- |
| IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE |  |
| Effective Practice within Category: <br> Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04) |  |
| Description of full implementation of the Effective Practice and/or Recommendation: <br> The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit <br> typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The <br> pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for <br> differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04). |  |
| The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every <br> student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the <br> pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the <br> curriculum (IIB02, IIB05). |  |
| Current reality of effective practice from the beginning of the <br> year: | Current reality of effective practice: |
| Tested areas currently have pre and post testing in place. <br> However, teachers of other classes need to document pre and <br> post testing and have their tests on file. Further <br> documentation will be included in lesson plans placed in the <br> drop box. Pre and Post testing has become the norm in all <br> Classes at FCHS along with the school's interim assessment <br> regime for the Core subjects. | Currently pre and post unit assessments are not being <br> implemented with fidelity. We are in the early stages of this <br> process. We have restructured PLCs and provided support <br> for teachers in every discipline except Science. We will be <br> going through a process that will lead teachers into creating <br> unit assessments. |

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

## Current reality of effective practice from the beginning of the

 year:Teachers positively teach rules at the beginning of the year however as the year goes on some teachers become lax.

## Current reality of effective practice:

Teachers have established and posted classroom rules and procedures. Students have been given instruction and reinforcement for understanding and following the rules and procedures. The administration has been intentional about conducting building sweeps to support teachers instructionally and behaviorally. The behavioral specialist has been designated to visit with behavioral issues. The high school has also added the program In-School Suspension to help students remain on site to receive instruction.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)
Description of full implementation of the Effective Practice and/or Recommendation:
No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

Current reality of effective practice from the beginning of the year:

## Current reality of effective practice:

Students and parents have signed a parent/principal/and student compact in which they have agreed to accept responsibility for being academically successful. Through flyers, meetings, and personal phone calls from both staff and the automated announcement system, FCHS invites parents to meetings on topics with relevance to academic success. The high school staff will participate with parents in an educational summit. After the presentation, parents will break into groups according to their children's grade level. Teachers will share with each group tips they could use to help their children succeed in school. Therefore, the connection between the school and the home is essential to school improvement and school success.

The compact has been created, distributed, completed and returned signed by students and parents. The Parent Summit was a success. Parents received information on how to better support their children academically at home. They also have received a brochure to help give tips for the summer break on how to reinforce skills to prevent students from falling behind in comprehension skills.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

Effective Practice within Category:
Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

Current reality of effective practice from the beginning of the year:

Current reality of effective practice:

The FC high school guided, supported and engaged students
in career exploration activities that provided hands-on

Administration and staff are working to instill that all scholars believe they are capable of being successful both academically and socially. College Initiatives have been provided; AVID is also being utilized on campus to assist in guiding and supporting students for college.
experiences with a career or occupation. We also engaged parents in financial workshops to support a smooth transition to college and to assist with the applications that become stressful. We also held an HBCU Spring Tour for all schools in the surrounding area to participate to gather information for college and to receive scholarships on site.

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

The data sharing by the team leaders after TLI assessments has added depth to the expectations for each department, for it made it visual to all. It also made everyone aware of what exactly was happening and that adds to each person's accountability. You can not deny what the data indicates, because you have been exposed to the process. The courageous conversations that were had among the team leaders that trickled down to the departments were very meaningful this school year. There was a single communication both up and down through administration to the performance coaches. This provided one voice for what is expected and needed to be accomplished.
The re-establishment of In-School Suspension was very impactful. It helped students remain in school to receive the instruction needed. It also made them accessible for support and for assessments. The high occurrences of disciplinary issues were the attribute to those changes being made, because so many students were being sent home due to not having another alternative.

The importance placed on rigor and attention being given to problems that are more real- world type problems that show more application than just giving students "naked problems" and having them memorize the process for procedural fluency was very meaningful. Students struggling on assessments and with programs that were put in place caused the change to occur. Teachers began to shift their focus from procedural fluency to having students use deeper levels of thinking to complete standards.

The information provided through the use of consultant and CCSS experts within the district was very meaningful. The TLI training was also very enjoyable. It was engaging professional development that provided teachers with strategies and tools that could be utilized in the classroom.

To provide more support for parents to become invested in their child's education at home has led to many meaningful decisions. The most important was the Parent Summit as well as the brochures that are being sent home for parents to gain knowledge about continuing to reinforce learning over the summer. This was attributed by a recommendation by the state site team in regards to providing additional academic engagement for parents.

If anything, what do you intend to change or modify for the year?
We will be more intentional with the depth of minutes being put into Indistar. We all also continue diligence in conducting the bimonthly meetings. We will incorporate more Engage NY lessons into the curriculum with a focus on more real - world contextual problems for the standards being taught.

# End of Year Summary Report 

## FOURTH QUARTER

2015-2016 School Year

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

## Current reality of effective practice from the beginning of the year:

ID01) The leadership team will meet regularly to analyze school performance data, classroom walk through observations and other significant data. The team will use that data to drive instruction, determine professional development needs, and make decisions to enhance student achievement consistently. (ID04) Core Content Teams meet in weekly PLCs. 3rd Tuesdays of each month instructional teams will meet. Some teams are keeping minutes, agendas, and sign-in sheets. (ID07) We are revising our leadership team. We have a new principal and some new staff that are being added to the leadership team. The team is starting to meet weekly. A portion of the leadership team has discussed data.

## Current reality of effective practice:

(IDO1) The FCJHS Leadership Team creates agendas. The agendas are emailed ahead of time so that each member is prepared for the meetings. The secretary types the minutes in Indistar in real time during the meetings. The team follows through with the implementation of next steps. The meetings are consistency held twice a month for at least an hour. There is a time keeper to keep the meetings on target. The team discusses indicators, data, and related concerns. The team implements professional development from analyzing the data from the principal's walk-through observations and Interim Assessments. The team operates with agendas, keeps minutes, and follows through with the plans it makes to enhance effectiveness and drive

The Leadership Team reviews the principal's summary reports of classroom observations and takes them into account in planning professional development. The Administrative Team conducts observations together and debrief before meeting with teachers. It ensures that all administrators are on the same page with feedback. Teachers are given positive feedback as well as next steps after the team observations. The teachers are aware of what the administrative team is looking for each week. The principal provides that information in the Week at a Glance Newsletter. The objective should align with the standard and students should have conversations surrounding the objective. The Leadership Team reviews the principal's Observation Tracker to determine professional development needs. The district provides differentiated professional development to meet the specific needs of individual teachers. Professional development was conducted on January 4 and 5, 2016. (IF02) This objective is fully met when the administrators are trained in the implementation and observation feedback of teachers. The administrators have a common understanding of what good teaching looks like. The administrative team observes consistently and provides timely feedback. The teachers are becoming more self-reflective with teaching strategies and professional development needs. The implementation is more productive when working in groups with other teachers and principal and instructional coaches. Teachers in collaboration with the principal have completed professional development plans based on classroom observations and self-reflections. In addition, teachers are using the data and feedback from classroom walkthroughs to complete their Professional Growth Plans. (IF06). Teachers meet weekly by department/grades in PLC's to receive professional development in their content areas. (IF11). The FCJH school has the resources, such as textbooks, Engaged New York Curriculum, Achievement Network resources, Above and Beyond the Core materials that can be used to develop the units of instruction in Mathematics and Literacy. During the Professional
school improvement efforts.
(ID04) Teams meet weekly in Professional Learning Communities. Agendas, minutes, and sign-in sheets are created.
(ID07) The team is consistently meeting with buy-in from teachers, administrators, and key staff members. The team meets twice a month consistently.
(IFO2) The team reviews classroom observations from the instructional facilitator, school improvement specialist, and principal to determine effective practices are demonstrated to plan for professional development.
(IF06) The core leadership team made of administrators, curriculum specialist, and instructional facilitators conducted coobservations to norm good teaching. The school has a consistent shared definition of what good teaching looks like. In addition to that the core administrative team had a book study entitled: Leverage Leadership written by Paul Bambrick-Santoyo. We continue to have professional conversations to improve leadership and enhance leader and teacher practices. The teachers develop Professional Growth Plans to improve effective teaching and learning.
(IF11) The school provides high quality professional development that is on-going and job-embedded during PLC's and Faculty Meetings. The district offers differentiated professional development that is geared to the specific needs of the teacher and related to instructional practices to enhance craft knowledge and execution of lessons.

Learning Communities the teachers determine the principles and skills that will be covered within the unit. Pre-test and post-test are developed and administered to determine student mastery or the need for a reteach. The FCJH has implemented After-school tutoring for assisting students in Mathematics and Literacy struggling in instructional concepts. Students are given a pre-test and post-test assessment through Moby Max. The skill that the students are working on is updated according to their specific needs. The FCJH has implemented ZAP Saturdays (Zeros Aren't Permitted) are held for students that are referred by the teachers. These students have averages of $70 \%$ or below in any class. The teachers provide feedback to students for the work completed. The FCJH has implemented Saturday School which is held for students who need remediation in class work: especially Mathematics and Literacy. Teachers reinforce the standards for that were taught during the week.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the
pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

## Current reality of effective practice from the beginning of the

 year:(IIB02) The school is starting to develop unit pre and posttests. A schedule of unit pre and posttests has been created, published, and distributed to the Leadership Team and the Faculty. (IIB04) The school is creating pre and posttest in collaborative content teams during PLC's.
(IID02) (IID06) Achievement Network (ANET) interim assessments are administered to all students at least three times a year. The Administrative Leadership reviews the results. Instructional teams and individual teachers review the results to provide support for individual students and group of students. Teachers make adjustments as needed to instructional plans. (IID02) (IID06)

## Current reality of effective practice:

(IIB02) Mathematics and Literacy Core Content Teachers develop unit pretest and posttest aligned with Arkansas Common Core State Standards to determine student mastery of objectives. Pretest are used to adjust instruction and differentiate assignments. Post-tests are used to assess the knowledge gained from the unit, to complete re-teaching and intervention plans for student achievement. Also the teacher reflects on the lesson to enhance professional practices and better differentiate instruction.
(IIB04) Mathematics and Literacy Core Content Teachers analyze pretest data. The data is used to determine students needing additional support and/or enrichment as the unit is taught.
(IIB05) Mathematics and Literacy Core Content Teachers analyze posttest data. The data is used to determine what needs to be retaught and provide additional support and/or enrichment during the re-teach.
(IID02) The school utilizes Achievement Network Interim Assessments to assess student mastery of Arkansas Common Core State Standards in Literacy and Mathematics. These assessments are administered four times a year. ANET provides additional support with planning and curriculum needs. In addition, the school administered the ACT Aspire Interim Assessments in Mathematics, Literacy, and Science.
(IID06) The school utilizes Achievement Network schedule of assessed standards to pace instruction in Literacy and

|  | Mathematics. The school sets proficiency goals for Literacy and Mathematics using Interim Assessments to monitor student progress toward meeting those goals. |
| :---: | :---: |
| IMO AREA 3: STUDENT SAFETY AND DISCIPLINE |  |
| Effective Practice within Category: <br> Expecting and monitoring sound classroom management (IIIC10) |  |
| Description of full implementation of the Effective Practice and/or Recommendation: <br> The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10). |  |
| Current reality of effective practice from the beginning of the year: <br> (IIIC10) Teachers establish clear expectations for behavior and provide consequences for student behavior. The Forrest City Junior High Faculty and Staff implemented a discipline | Current reality of effective practice: <br> (IIIC10) Teachers are consistently teaching and reinforcing the rules in the classroom. Classroom rules are posted in each classroom. Students are held accountable for their behavior. |

management plan that guides student behavior. Every staff member establishes rituals and routines within the classroom. The teachers and principal review the rules with the students on a regular basis to continue an orderly school. Each teacher consistently teaches the classroom rules and procedures to all students. Each teacher consistently reviews the rules and procedures in their classroom. Most teachers consistently enforces the agreed upon rules and regulations (IIIC10).

Students may earn incentives for appropriate behavior and academic performance. Culture building assemblies are held at the beginning of each semester to encourage and remind students of the expected standards of behavior. The school established a plan to manage student transition throughout the building.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

## Current reality of effective practice from the beginning of the year:

(IVA01)The Forrest City Junior High conducts several parent meetings to discuss academic progress. The school involves parents to accelerate and enhance student performance in Mathematics and Literacy. Parents are distributed information to assist their child at home with content specific assignments. The school frequently communicates with parents about their achievement. Programs are planned and implemented to educate parents on the importance of being involved in their child's education. The District Parent Facilitator issued a compact that is given to students for students, parents, teachers and principal signatures.

## Current reality of effective practice:

(IVA01) The Forrest City Junior High continues to conduct parent meetings to discuss academic support and progress. The school hosted a Parent Summit. The summit allowed parents to select classes from several topics related to academics. Some topics included: How to better prepare your child for the ACT Aspire Summative Assessment, ACT Aspire English Standards, and Math March Madness. The parents are and involvement with their child's/children's educational progress. Parent Compacts are implemented at the beginning of the school year which outlines how parents, staff, and students are responsible for academic achievement. Parents and the school work together all year to benefit student achievement and academic progress. The school held several informational parent meetings to involve parents in the ACT Prep classes, SEA Camp, Biz Town, Zoo Dissecting Field Learning Experiences, rubrics, and other parent involvement activities that involve academics. Agendas and sign-in sheets are created to document parent involvement activities.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice from the beginning of the year:

(VA01)The Kuder test is administered to 8th grade students through the career development class and the counseling department. The FCJHS has a written guidance plan. The SIG Parent Coordinator is developing a plan for introducing parents and students to college and career goals. The school is providing all students with guidance and support to prepare them for college and careers. The Forrest City Junior High School is engaging students in career exploration activities that provide hands-on experience with career and college occupations. The counselor and parent facilitator help students learn about the skills, knowledge, and education needed for their area of interest and provide examples and tours of colleges that offer a degree in their

## Current reality of effective practice:

(VA01) The Forrest City Junior High School engages students in career exploration activities that provide hands- on experience with college and career opportunities. The Kuder test is administered to $8^{\text {th }}$ grade students through the Career Development Classes and the Counseling Department. The Kuder helps students to identify what fields they are best interested in. $7^{\text {th }}$ and $8^{\text {th }}$ grade students were taken on college tours which included the University of Central Arkansas and the University of Memphis. They also visited the Clinton Presidential Library, Biz Town, and The Krock Center. The school has a state of the art Science Lab that students use for hands-on experience and identity with Biologist, Chemist, and other health science related careers. Several local professionals have been invited as guest speakers to educate students about their

ARKANSAS
DEPARTMENT
OF EDUCATION

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes? Implementing unit pretest and posttest have been instrumental in this quarter. Teachers are seeing the value of unit test data and are able to analyze the results as well as make adjustments in instructional practices. The decision to administer the ACT Aspire Interim Assessment was meaningful. The team discussed whether it would help the students and teachers to prepare for the ACT Aspire Summative Assessment. The $7^{\text {th }}$ grade reading scores increased to $55 \%$ proficiency and therefore the school met its goal to STRIVE FOR 55 in Reading. Consistent and intentional meetings attributed to the school changes in structure and effectiveness. Additionally, meaningful constructive discussions during meetings were valuable to the collaborative school improvement effort.

If anything, what do you intend to change or modify for the year? The school plans to have a retreat to outline our academic year. During the retreat we want to organize and select our leadership team, create schedule and pacing for unit pretest and posttest, and The leadership team plans to analyze more student performance data from interim assessments and unit tests. The leadership team plans to implement more next steps and follow up on the implementation more consistently.

## SCHOOL LEADERSHIP TEAM'S REPORT FOURTH QUARTER

## End of Year Summary Report

## FOURTH QUARTER

2015-2016 School Year

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08).
The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

## Current reality of effective practice from the beginning of the year:

We have a Leadership Team in place and Teacher Instructional Teams. We are in the early stages of implementing the School Management Team that will consist of the principal, cafeteria manager, office administrator, custodial representative, and a staff representative. We are in the process of establishing our Student Team with input from an outside consultant.

## Current reality of effective practice:

The SLT met a minimum of twice per month to plan and discuss data, indicators, tasks, and goals that would lead to increased student achievement. The School Management Team met at 6:45 a.m. seven times during the school year to discuss school events, issues and/or concerns about the building. The SMT was a positive atmosphere for effective communication between cafeteria staff,

Instructional Facilitator develops agenda for Teacher Instructional Team Meetings with purpose being for discussion of data, lesson planning using data, addressing CCSS shifts in plans, and collaborating with other content teachers.
PLC agendas are developed by administrator/facilitator. Purpose is to address needs of teachers as determined by observations and walk throughs.
School Leadership Team agendas are developed for the next meeting at the conclusion of each Leadership Team meeting. The purpose of SLT is to discuss data and determine next steps, determine how we will address priority school indicators in order to move forward, and to be the communication bridge to the staff.
office personnel, janitorial staff, teachers and administrators. PLC meetings were held a minimum of twice per month on Tuesday after school. They were utilized for professional development, data analysis, TESS training, external consultants, staff celebrations, and teacher led sessions sharing best practices. The daily schedule was revised in order to accommodate Content Planning Sessions for Math/Science and Literacy/Social Studies during the school day. These sessions were led by the Instructional Facilitator and most times the principal and the on-site School Improvement Specialist were in attendance. These sessions gave teachers an opportunity to collaborate on plans and discuss data. Outside consultants, such as Delta STEM, GREC specialists, ANet, and Keith Sanders Group were also instrumental in providing instructional support.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the

## pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the

 curriculum (IIB02, IIB05).
## Current reality of effective practice from the beginning of the year:

Teachers are in the beginning stage of designing a backwards design lesson plan which consists of pre and post assessments. ANet and ACT resources are being utilized as models for wording of test questions. Mr. Keith Sanders is assisting with instructional coaching in lesson planning to ensure that rigorous test questions that address the entire common core standard are in place.

## Current reality of effective practice:

Teachers in all subject areas conducted pre-/post-tests in order to plan instruction. Data from Math and Literacy post-tests was discussed in team meetings and also recorded in the Quarterly 45 Day Plans. Social Studies teachers used Dimension 3 of the C3 Standard in Social Studies to develop compelling questions to engage students in more rigorous lessons. The Instructional Team used the results from the pre-/post-test analysis to plan for professional development such as Vaughn Thompson assisting with Mastery learning instruction, Keith Sanders assisting Social Studies teachers in developing standards based instruction, and Vanna O'Conner supporting Math teachers in analyzing data to adapt instruction to meet the needs of the students.

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom.

Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

## Current reality of effective practice from the beginning of the year:

The faculty and staff are working together to develop a discipline management plan that guides student behavior throughout the building. Expectations of Behavior posters have been placed throughout the building. These include Cafeteria Expectations, Hallway Expectations, and Restroom Expectations.
Teachers discussed classroom rituals and routines at the beginning of the year and these are posted in the classroom and evident throughout the building. Teachers are reinforcing these daily.
Work is being done to improve the way classroom misbehavior is addressed and steps for addressing this will be implemented.

## Current reality of effective practice:

We maintained a year long focus to reinforce rituals and routines throughout the school including the cafeteria, hallway, restroom, and classrooms. In addition, students were reminded daily of the high expectations of Lincoln scholars during student led town hall and morning meetings. Students received social and emotional learning lessons twice weekly during Advisory classes utilizing the Overcoming Obstacles curriculum. All teachers were expected to reach out to parents/guardians with positive communications about the students. Students were able to earn recognition on the Shout Out Board or the Read All About It bulletin board. Keith Sanders mentored a group of male students known as the Men of Lincoln and Catrice Davis mentored a group of female students known as First Class Ladies of Lincoln. These two groups of students were identified as frequent behavior referrals. We have tracked the students and found that referrals decreased somewhat as a result of the positive role models, lessons, and incentives provided. Flex Fridays were a huge hit with the students as this provided an opportunity for those students with zero office referrals for the week to participate in various activities offered during sixth period.

|   <br> IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT  <br> Effective Practice within Category: <br> Defining the purpose, policies, and practices of a school community (IVA01)  <br> Description of full implementation of the Effective Practice and/or Recommendation: <br> No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, <br> school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents <br> can work together to help students achieve the state's standards.  <br> Current reality of effective practice from the beginning of the <br> year: Current reality of effective practice: <br> A school compact was developed to outline how all stakeholders <br> will share responsibility for improving student achievement. This <br> compact was available at Parent/Teacher Conferences and as <br> teachers met with parents the parent, the child, and each child's <br> teacher signed the compact. We are currently working to get 100\% <br> of compacts signed. <br> Parent involvement increased throughout the year due to multiple <br> opportunities for parents/guardians to be involved through Math <br> Night, Literacy Night, Parent Summit, Back to School Fair, <br> transition programs, Gifted Talented orientation program, and <br> student involvement in such programs. We also had <br> parents/guardians volunteer to assist in planning and <br> implementation as well. Winter Break homework packets were <br> provided during the Christmas break in order to partner with <br> parents and share responsibility for improving student  <br> achievement. In addition, a schoolwide nightly homework schedule  <br> was developed in order to provide parents with a consistent  <br> homework routine.  |
| :--- |

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice from the beginning of the year:

The staff at Lincoln Middle feels that the best way to support our students for college and careers is by embodying the growth mindset in our conversations with students. We are working to ensure that our students believe they are capable of success. We have had a motivational speaker come to address our male students. Teachers have attended a series of Efficacy trainings designed to explore the interconnectedness of mindsets and practices as it relates to student achievement. An outside consultant has been contracted to work with teachers and students on mindsets, student self-motivation and goal setting.

## Current reality of effective practice:

We have continued the work on the growth mindset through our Efficacy professional development and carried this over with the students through Advisory curriculum and lessons. Vaughn Thompson supported teachers and staff throughout the year in engaging lessons to promote a positive culture and climate for our students and parents. Students were provided several instances to explore post-secondary opportunities through the Career Day held at Lincoln and numerous visits to East Arkansas Community College for a walking tour, participation in the County Spelling Bee, and to hear the University of Arkansas at Pine Bluff choir along
with a speech given by the Admissions director promoting the opportunities at UAPB.

ARKANSAS
DEPARTMENT
OF EDUCATION

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

We decided as a team that we needed to recognize student achievement during Town Hall and morning meetings in order to motivate students to excel in all areas of academics. The Leadership Team also decided to offer incentives that students could earn during the ACT Aspire Summative testing week. These incentives were awarded based on daily attendance, effective effort, and stamina. Students knew about these incentives before the testing period began and teachers attested to the fact that students seemed to be more focused and attentive during the testing periods. Overall attendance for the ACT Aspire was well above the required amount and therefore few students had to do makeups. The SLT decided that we should include more community based activities with the students. Community stakeholders were brought in to assist with Flex Friday activities and Career Day.

If anything, what do you intend to change or modify for the year?
As a Leadership Team, we plan to be more intentional with our Mastery learning time and be more selective in providing prescriptive interventions for both Literacy and Math. The Leadership Team will look closely at the data to determine grouping of the students for intervention. We want to ensure that we address the gaps that may exist by examining effectiveness of instruction and monitoring
student progress. We will also be receiving ANet interim data from Stewart Elementary and will look at this data to inform instruction for the beginning of the year in both Literacy and Math. Our Science and Social Studies teachers have been supporting literacy in their classes, however we will be much more intentional next year. They will begin using Studies Weekly supplemental materials to incorporate the reading standards for literacy, such as citing textual evidence and analyzing relationships between primary and secondary sources.World History Studies Weekly consists of newspapers containing articles, discussion questions and other activities from ancient world history. Through Science Studies Weekly, students will be exposed to articles about noteworthy technology, current events, biographical spotlights, and labs which contain experiments that reinforce the scientific principles taught in the science curriculum.

As another support to the literacy and math curriculums, Lincoln Academy plans to have Chromebooks available for students to use in their classrooms. Literacy teachers have been trained and have used Google Classroom with students and we plan to offer this professional development to other content teachers as well. Teachers can create assignments for students in Google Classrooms, then have students complete those assignments and receive instant feedback from teachers. Student computer time is not only an engaging activity for students, but also provides an opportunity for students to practice much needed keyboarding skills as they complete writing assignments on the computers. Students are also able to revise, edit, and publish their writing. Assignments in any subject area can be individualized or given to small groups of students according to their own results on formative assessments. This allows teachers an opportunity to differentiate instruction for all learners based on data.

Literacy classes will be equipped with up to ten iPad mini readers. These readers will have novels downloaded and be available for student access as another way to engage students and encourage them to read. Data analysis indicates that vocabulary development is an area in which our students struggle. Research shows that vocabulary develops as students read. An increase in vocabulary development, coupled with conversation about the reading, should also lead to greater comprehension.

# PRIORITY SCHOOL 45-DAY PLAN/QUARTERLY REPORT 

 4th QUARTER2015-2016 School Year

```
IMO AREA 1-CHANGE IN TEACHER AND LEADER PRACTICE
ADE Recommendation:
Effective Practice within Category:
Aligning classroom observation with evaluation criteria and professional development (IF02, IF06, IF11)
```

## Description of full implementation of the Effective Practice and/or Recommendation:

```
The LEA/School provides all staff high quality, ongoing, job-embedded, and differentiated professional development (IF11). Professional Development (PD) activities include whole faculty, small group and individual PD based on identified needs from observations (IF08). Teachers develop individual professional development plans based on classroom observations which inform the teachers' plans (IF06).
The Leadership Team reviews the principal's summary reports of classroom observations and takes them into account in planning professional development (IF02).
Putting all these pieces together depends upon first instituting standard practices and procedures that:
1. Link the improvement plan to subsequent activities, such as professional development
2. Maintain records of participation in trainings
3. Gather participant evaluations of trainings
4. Cite minutes from Instructional Team meetings show that teams carried the training into their discussions and plans
5. Gather information from individual teachers on changed practices
6. Determine the effectiveness of the changed practices
7. Determine improvements in student learning that might result from particular changes in practice.
```

| Current reality of effective practice (Assess where we are): Belle Point administrators and LHSIS are observing classroom instruction, along with other school improvement data, to connect professional development that is data driven. PGP goals for 2015-16 were completed during $3^{\text {rd }}$ Quarter, and planning and setting goals for the 2016-17 school year are complete. Records of trainings, minutes of meetings, and monitoring of effectiveness of changed practices are in place. Student learning data is being used to amend and improve instruction. |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Quarterly Objective: The leadership team will complete a comprehensive needs assessment that includes review of instructional strategies, assessment benchmarks, parent-community engagement, student safety and discipline (school culture), from the point of view of increasing teacher efficacy and increasing student learning outcomes. Embedded and professional development venues will be used to improve in all areas of the school improvement process. |  |  |  |  |  |  |
| Tasks | Target Date | Completion Date | Person assigned | Met | Not <br> Met | Evidence of Completion |
| Implementing the New Tech initiative: Reflective Practice: Each teacher will complete a personal reflection on the building "New Tech" initiative as a method to progress monitor implementation. Due the last day of the $4^{\text {th }}$ quarter. | 05/25/2016 | 05/19/2016 | Instructional Team | X |  | $>$ Personal Reflection Narratives <br> $>$ Notes in PLC notebook. <br> > Surveys on New Tech techniques during $4^{\text {th }}$ Quarter. |
| All teachers will have completed the 2015-16 PGP goals and consultations will be completed and goals set for the 2016-17 school year. | 05/25/2016 | 05/10/2016 | Maria Arnold | x |  | Classroom observations, consultations, and Larry Lock (consultant) notes. |
| All-Staff will attend New Tech teacher residency in South Carolina to participate in learning | 05/019/2016 | 05/03/2016 | $\begin{aligned} & \text { 2016-17 School } \\ & \text { staff and } \\ & \text { administrators } \end{aligned}$ | x |  | $>$ Agenda, materials, project |

$\left.\left.\begin{array}{|l|l|l|l|l|l|l|}\hline \begin{array}{l}\text { key aspects of the New Tech } \\ \text { instructional model and will } \\ \text { implement the success strategies. }\end{array} & & & & & \begin{array}{l}\text { work, and travel } \\ \text { documentation. }\end{array} \\ \text { Professional } \\ \text { Development } \\ \text { Calendar }\end{array}\right] \begin{array}{l}\text { Professional } \\ \text { Development } \\ \text { Surveys }\end{array}\right]$

IID02- The schools administers interim assessments at least three times a year to all students (results are reviewed and drive instructional support and differentiate assignments and student levels of proficiency.
IID06- The Leadership Team sets annual goals for student learning outcomes (based on learning data). The goal needs to be reasonably rigorous. Whole school, grade levels, subject areas, and student subgroups.
These interim assessments are designed to measure students' progress toward year-end standards-based assessments. The assessments help teachers make adaptions in instruction and to identify students in need of additional assistance. Instructional Teams and individual teachers review the results to make the necessary adjustments. They also enable the school to see areas of strength and weakness in the curriculum and instructional plans. Leadership Teams review the results for the entire school and across grade levels and subject areas.
The Leadership Team sets annual goals for student learning outcomes. These goals are based on student learning data and are both reasonable and sufficiently challenging. The goals include goals for the whole school, grade levels, subject areas, and student subgroups (IIDO6).
Current reality of effective practice (Assess where we are): We are still in the beginning stages of implementation, however, New Tech instruction will incorporate Mini-Benchmarks which guide teacher instruction using CCSS standards in each unit for the 2016-2017 school year. Belle Point is using the TABE, San Diego Reading Test, Star Assessments as interim assessments to track student academic performance growth. Yearly leaning goals have been set and results are being tracked for final year documentation.
Quarterly Objective: The instructional team will provide extensive training on developing the New Tech assessment process for the 2016-17 school year. The facilitators are monitoring all grade groups and providing additional one-on-one support on recognized areas of academic need. The Credit Recovery Program (GED) will provide students the support within the GED curriculum to pass the equivalency assessment for the GED certificate. Administer the TABE (Standards based), San Diego Quick Assessment and Word Recognition, and the Star Reading and Math assessments to finalize grade level growth goals for the 2015-16 school year.

| Tasks | Target Date | Completion Date | Person assigned | Met | Not Met | Evidence of Completion |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## IMO AREA 3-STUDENT SAFETY AND DISCIPLINE

## ADE Recommendation:

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

Current reality of effective practice (Assess where we are): The Boys Town Behavioral Model is being implemented by all staff. Professional development for the model is needed to support new staff implementation. Data tracking of the success of the model to curtail referrals and decrease out-of-class occurrences are being kept by the Dean of Students. This information and data is presented at each leadership team meeting and is maintained as a standing agenda item. Periodic amendments to the model occur from team decisions. Parents are a vital part of the behavioral model and are part of the documentation of effort to insure the model meets the research-based practices it is designed to accomplish. All staff developed PGP goals directly tied to monitoring sound classroom management through the Boys Town Behavior Modification System in order to monitor progress.

Quarterly Objective: The leadership team (along with attending lead teachers at the Boys Town Institute) will lead team meetings (recalibrate and retrain) to deliver high quality professional development tailored to meet the needs of students (using the training they received in Omaha). $100 \%$ of staff will meet PGP goal tied directly to Boys Town (To respond to misbehavior with consistent established standards of conduct).

## IMO AREA 4-FAMILY AND COMMUNITY ENGAGEMENT

## ADE Recommendation:

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.
Current reality of effective practice (Assess where we are): Belle Point has effectively promoted the school among all the student parent population this year. At least three parent/school events have been scheduled for each of the quarters this year. Plans are in place to continue this in the 4th Quarter. These events are designed to provide support and information to parents concerning school activities and academic practices that will encourage their support of Belle Point's efforts to create a learning environment for the school.

Quarterly Objective: Provide parental engagement events to bring parents to Belle Point to highlight school successes with students this year. Activities are designed to provide parents with information about the school, interact with staff, and connect students, parents, and teachers into a communicative, collaborative relationship to aid in building the climate and culture of learning and shared responsibility at Belle Point.

## IMO AREA 4-FAMILY AND COMMUNITY ENGAGEMENT

ADE Recommendation:

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

Current reality of effective practice (Assess where we are): The school provides all students with guidance and supports (academic, financial, etc.) to prepare them for college and career.
Staff will offer FLEX courses on interviewing skills, oral and written communication for professional work once a semester Students will be provided the opportunity to participate in a mentorship program, and will work with a mentor at least once a month on social skills that will develop their professional resume, as well as their personal interactions with peers.

| Quarterly Objective: Prepare seniors for graduation and post-graduation events by providing introduction to career opportunities and knowledge base of requirements for work-related skills in real world environments. Include celebrations of academic achievements and events throughout the year. |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Tasks | Target Date | Completion Date | Person assigned | Met | Not Met | Evidence of Completion |
| FLEX courses during the 4th Quarter will schedule mentoring participation for students, fill out job applications and job shadowing visits will be made available to aid in the development of improved social skills and an introduction into the workplace environment. | 05/25/2016 | 05/19/2016 | FLEX Teachers | X |  | FLEX Schedule reflecting college \& career ready options, Student work and project completion. |

## PRINCIPAL'S REPORT FOURTH QUARTER

Has there been a meeting with the District Leadership Team to review the school's needs and progress? YESor NO (Please circle) If yes, what support have you received from the district? Before each district principal's meeting, a meeting is held for the focus and priority schools. During this meeting, members of the district such as the Superintendent, Deputy Superintendent, Human Resources, Finance, Supervisors of Instruction, and District ACSIP are present. I give these participants an update on the progress being made at Belle Point, and offer them a glimpse into what the needs might be. During the 4th quarter meeting, I debriefed the committee about the current IMO progress.

Please describe the interventions your school is utilizing specific to closing the achievement gap (Focus) or for improving the outcomes for students basic and below basic (Priority). (Do not include general school wide efforts.)
Priority: Our school is utilizing specific interventions to improve outcomes for students basic and below basic. Specifically, our school hired a new Math Interventionist/Instructional Facilitator to complement the already existing Literacy Interventionist/Instructional Facilitator in offering small group or one-on-one remediation for students who are basic or below basic. Math and Literacy Interventionists work to develop an Academic Improvement Plan (AIP) for students who meet criteria for remediation. Criteria is based off of multiple modes of data collection and streams (TABE, STAR, AR, Math iXL, DRA, San Diego, BASI, \& Math Saxton Placement). Once a student has been identified, the math and literacy facilitators develop a schedule for student remediation. Based on need, students may receive weekly, or even (at best) daily remediation. Students are remediated during FLEX block, allowing them to receive an elective credit, and also ensuring that students do not miss their core credited courses.

## During remediation, students:

Math and Literacy Interventions are planned according to the individual student needs. Interventions consist of working on classwork that students need help on and working on specific skills that the students need to master. Students also work in small groups to learn to collaborate together. Individual plans are created to scaffold learning and move students forward at individual paces. Improvement is measured by formative and quarterly assessments.

During 4th quarter, the staff visited a New Tech school site in South Carolina. During this training, we worked on the adult culture, norms, and rituals. It was determined during this training that our current system of AIP's (academic improvement plans), SAP's (student action plans), and informal conversations about Boys Town could be improved upon. The teacher leaders developed an electronic document called BARC (Behavior \& Academic Revamping through Collaboration) to incorporate all these areas for progress monitoring into one live document for teachers and staff members to edit.

What support(s) have you or your team received from the external provider, internal SIS, and the ADE SIS Team? We do not have an external provider.
Internal SIS: John Harris has provided supports with our IMOs, AMOs, Quarterly Reports, Indistar training, \& updates from ADE ADE SIS Team: Dr. Kellie Cohen has attended each Priority/Focus meeting before all principal's meetings. Agenda items that were discussed include our 45 day report, IMO progress, and pre/post testing. Dr. Cohen supports Belle Point in understanding our barriers and concern about specific indicators.
Internal SIS providers Kim Brown and Lucia Turner have attended leadership meetings this quarter.

What are the barriers, if any, in improving student outcomes?

1. HIGHLY MOBILE: The purpose of the program IS to be highly mobile.
a. August 17, 2015- enrollment 95
b. March 1, 2016- only 42 are still enrolled from the original 95
c. August 2015 -present- 24 added
d. To date: 77 have left, and will not count toward our graduation rate and/or AMO target for school report card
e. $88 \%$ reported relocating homes once, $44 \%$ of those have moved homes $3 x$ or more since kindergarten
2. TRUANCY, INCARCERATION, \& RUNAWAY STATUS:
a. 41 students were dropped due to this
b. Of the juveniles in the detention center this month, $61 \%$ are Belle Point students
c. 74 out of 88 students enrolled are currently on probation in Sebastian County. Each one has a probation officer they report to, and some have, additionally, a parole officer (called an after-care worker)
3. LIFE OUTSIDE THE SCHOOL DAY:
a. 7 shootings since Spring of last year
b. Drug use
i. 15 drug related suspensions to date (2015-2016 school year)
ii. $20 \%$ reported being chronically drunk or high at school
iii. $20 \%$ reported selling illegal drugs
iv. Every drug was reported as being used (meth, heroin, ecstasy, crack) but majority of drug use was of marijuana, with 35\% reporting they chronically use marijuana (past 30 days 4 x or more)
c. $67 \%$ reported little to no parental supervision/involvement in the home (would not know if where they were if they did not come home) (no rules) (neither approve or disapprove of certain behaviors)
d. $43 \%$ reported volatile home life (arguing, insults from adults, yelling)
e. GANGS: $60 \%$ reported involvement
4. MENTAL ILLNESS:
a. 117 referred for school based therapy
b. $35 \%$ reported suffering from depression MOST days of the week (more often than not)
c. Over $40 \%$ reported feeling like a failure or someone without worth

How is your leadership team monitoring student progress in the skill area of science?
Science teacher, Ms. Trangmar, has pushed the science department this year in STEM and has taken students to STEM Wars at the University of Arkansas Fort Smith. In addition, students took their STEM projects to Student Leadership Day to present to the participants. The students presented boats, hydroponics, and organic bath bombs.

How is your leadership team monitoring student progress in the skill areas of math, reading, writing? How are you responding to the results?
The leadership team is monitoring student progress in math by: Pre and Post TABE and BASI testing and will be using STAR Math for quarterly testing beginning in January.

We are still in the beginning stages of implementation, however, New Tech instruction will incorporate Mini-Benchmarks which guide teacher instruction using CCSS standards in each unit for the 2016-2017 school year. Belle Point is using the TABE, San Diego Reading Test, Star Assessments as interim assessments to track student academic performance growth. Yearly leaning goals have been set and results are being tracked for final year documentation. See assessment data in the end of this report to see our growth success on yearly learning goals.

What have been the most meaningful decisions and actions made by the School Leadership Team this quarter as documented in the minutes?

1. BARC: This is the most meaningful decision that came out of this quarter.

If anything, what do you intend to change or modify for the next quarter?
I will conduct more walkthroughs using the new data collection tool and disseminate the information to staff more frequently. I will also begin placing Leadership meeting agenda and minutes on the new Belle Point staff help desk website, made available to all staff. New Tech implementation will begin next quarter, with each course being taught in PBL and PRBL format through the Echo platform.

| 11 |  |  |  | 6 |  |  |  |  |  |  |  |  |  |  |  |  |
| 12 |  |  |  | 5 |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Example |  |  |  |  |  |  | 100 | 90 | 95 | N/A | 285 | 57 | 20\% |  |  |  |

## Comments/ Clarifications:

The percentage of students that scored a D or F on any unit tests in ELA is shown above but this does not reflect the number of students that raised their scores from the pre to the post test.
$80 \%$ of the 9 th graders improved their scores, $90 \%$ of the 10th graders improved their scores.

Literacy data is collected from Pre and Post Assessments using the TABE, San Diego Word Assessment, and quarterly STAR Reading Assessment. The average of these scores is used to determine yearly growth. The following scores show yearly growth by subgroups and All students.

Literacy Average shown by grade equivalent:

|  | AIP Students | Pre | Post |
| :--- | :--- | :--- | :--- | Yearly Growth

## LEADERSHIP TEAM REPORT CONTINUED

## (Optional)

Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example: Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.

Literacy: Of the students enrolled at Belle Point from August 2014-August 2015, 69\% showed an improvement in literacy scores from the TABE exam.
We do not have ACT Aspire testing scores back yet.
Students who demonstrate a lack of interest in receiving one-on-one interventions when being pulled from the classroom is a concern.
Student discipline and behavior is always a concern (office referrals, in-school \& out-of-school suspensions).
Truancy decreases the effectiveness of intervention efforts on a daily basis.
Differentiating interventions to address deficiencies in student grade level competencies are difficult because frequent administrative tasks detract from student intervention time.
Students are reading way below grade level ( $74 \%$ of all students grades $7-12$ are reading three or more grade levels below)
High mobility \& disruptions in enrollment producing learning gaps: students are continually enrolling, unenrolling, coming and going from JDC, residential facilities, homelessness, runaways, etc.
Students who are referred to Belle Point are very often so far behind:

- Grades (students enroll toward the end of a nine weeks or semester and have failing grades, too low to recover produces an "It doesn't matter anyways" mentality)
- Credits (students may enroll who are 17 and only have 3 or 4 credits when it takes 23 to graduate)
- Knowledge of Content (students enroll with large gaps in learning or lack of basic foundational skills)

Add/Drop Report

## Third Quarter:

6 add/drops total
2 were added and dropped due to GED (they tested out)
4 were dropped for the following reasons:

- LG- dropped to WAYS (Western Arkansas Youth Shelter)
- EP- dropped to Denair High School, Denair, CA (student was sent to live with biological parent)
- JS- Picked up for a single day (We transitioned this student back to NHS in January. Then NHS decided to transfer this student back to BP after the break. It was decided that placement would stay NHS unless one more incident occurred.)
- JSA- moved back to Oklahoma, received request for records from Tulsa Public Schools
\# of students added third quarter= 27
\# of students dropped third quarter= 6
D/F Report (\# of students by subject)
9-12 Literacy: 26
7-8 Literacy : 20
7-8 Math: 16
Music: 16
Special Ed: 6 (same kid failing all 6 courses)
9-12 Math: 12
7-8 Science: 40
9-12 Math \& Oral Comm: 21
9-12 History: 20
9-12 Science: 25
9-12 PE/Health: 20

Total population: 95

```
Total population 7-8:22
Total population 9-12:73
```

Focus Areas
Discipline- Office Referrals, OSS, ISS, Saturday School
OR:43
OSS:9
ISS:4
SS:6
JDC:13
Progress toward PBL/PRBL Implementation- each teacher is already working on their first unit for the start of next year. By May 26, all returning
teachers will have done phase one and phase two of critical friends. Phase one is where teachers brainstorm out their idea for the project,
standards, etc. phase two occurs once the project has been developed. Teachers present their unit to the staff, getting "I likes" and "I wonders"
from their peers.

Seniors at Risk \& Interventions taking place

1. KJ- SPED, on the run
a. Social Worker has been looking, dealing with court, phone calls to mom every day from the school
2. FW- 2.5 credits short
a. We have enrolled him in gradpoint during 2 classes, pushing TBS
3. JW- 2 credits short
a. We have enrolled him in gradpoint during FLEX block, pushing TBS
4. TS- only has $9.5 / 23$ credits currently
a. GED tested, cannot make TABE cut-score

The leadership team is monitoring student progress in reading and writing by: Pre and Post testing on TABE, BASI and San Diego assessments and quarterly assessment using STAR Reading. Writing progress is monitored throughout the school year by completing Constructed Responses using multiple sources.

1. Test scores are not an accurate representation of the pool of students being taught at any given time. Our add/drop report consistently shows that we average approximately 250 students per year. $88 \%$ mobility rate
2. Instead, we use the following to measure academic growth/success:
a. TABE (Test of Adult Basic Education)
i. TABE has a direct correlation to Common Core SS (we use this crosswalk to review student deficits)
ii. 27/39 current students in intervention have shown adequate student growth
iii. Students must show improvement on TABE scores in order to EXIT Belle Point
iv.

| Grade | Literacy | Math |
| :--- | :--- | :--- |
| 7th | $83 \%$ showed growth | $100 \%$ showed growth |
| 8th | $89 \%$ | $75 \%$ |
| 9th | $64 \%$ | $67 \%$ |
| 10th | $50 \%$ | $58 \%$ |

b. BASI (Basic Achievement Skills Inventory)
c. Pre/Post Testing in all core classes for every unit
d. GED (Pass rate $96 \%$ ) (only for students age 17 or higher who lack too many credits)
e. STAR Reading and Math assessment
3. Full-time MATH INTERVENTIONIST, Full time LITERACY INTERVENTIONIST: We offer (daily, bi-weekly, or weekly) Individualized

Intervention services based on the above data collection deficiencies that students show
a. Compass Learning
b. ELL reading interventions
c. Math and Language Arts IXL
d. STAR Reading and Math individualized lessons

## PRIORITY SCHOOL 45-DAY PLAN/QUARTERLY REPORT

 4th QUARTER2015-2016 School Year

## IMO AREA 1-CHANGE IN TEACHER AND LEADER PRACTICE

## ADE Recommendation:

## Effective Practice within Category:

Aligning classroom observations with evaluation criteria and professional development (IF02, IF06, IF11)

## Description of full implementation of the Effective Practice and/or Recommendation:

Aligning classroom observations with evaluation criteria and professional development (IF02, IF06, IF11)
The LEA/School provides all staff high quality, ongoing, job-embedded, and differentiated professional development (IF11). Professional Development (PD) activities include whole faculty, small group and individual PD based on identified needs from observations (IF08).
Teachers develop individual professional development plans based on classroom observations which inform the teachers' plans (IF06).
The Leadership Team reviews the principal's summary reports of classroom observations and takes them into account in planning professional development (IF02).
Putting all these pieces together depends upon first instituting standard practices and procedures that:

1. Link the improvement plan to subsequent activities, such as professional development
2. Maintain records of participation in trainings
3. Gather participant evaluations of trainings
4. Cite minutes from Instructional Team meetings show that teams carried the training into their discussions and plans
5. Gather information from individual teachers on changed practices
6. Determine the effectiveness of the changed practices
7. Determine improvements in student learning that might result from particular changes in practice.

Current reality of effective practice (Assess where we are): Trusty administrators and LHSIS are observing classroom teachers, and other school improvement practices, in developing professional development that targets individuals, vertical team meetings and whole faculty meetings. Monitoring and evaluation of effort is documented.

Quarterly Objective: Provide professional development based on needs determined from teacher input, evaluations, and student assessments. PGP goals will be developed for the upcoming 2016-17 school year for both individual goals and school-wide goal. A comprehensive needs evaluation was conducted in all school improvement areas, including federal and state expenditures, instructional practices, professional development needs, student assessment data, student discipline data, and parent involvement. Based on the results of this needs assessment, administrators are planning for 2016-2017 professional development for the staff and other changes.

## ADE Recommendation:

## Effective Practice within Category:

Expanded time for student learning and teacher collaboration. (IG01)

## Description of full implementation of the Effective Practice and/or Recommendation:

The campus will have procedures and practices in place that provides for extended time for student learning and teacher collaboration. An extended learning time plan is written and included in the campus teachers' handbook. The plan outlines the procedures used to identify the need for extended learning/collaboration time and how the school day schedule will be restructured to accommodate the needs of the plan. The procedures and practices utilized to identify the students who need the additional support provided by the extended time are written within the campus extended time plan. Teachers and other staff members who provide services within the extended day program are provided specific and targeted professional development training concerning the implementation of the extended time instruction. The plan includes the procedures and practices that will be used to monitor and evaluate the effectiveness of the extended time program on student achievement growth.
Current reality of effective practice (Assess where we are): Students attend after school tutoring after parents sign a form to give permission for attendance. Students attend two days of reading tutoring, two days of math tutoring, or all four days if needed. In addition, intervention times are offered to students on a daily basis during the school day, during our STRIPES Intervention time.
Quarterly Objective: Complete a needs assessment of the after-school tutoring programing. Complete a needs assessment of the "Stripes" intervention period. Teachers will complete a survey on the success of the program of the after-school tutoring program. Teachers will also offer input on suggestions to strengthen the STRIPES Intervention time.

## IMO AREA 1-CHANGE IN TEACHER AND LEADER PRACTICE

## ADE Recommendation:

## Engaging Practice within Category:

## Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals. The pretest and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit.

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit. The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum.

## Current reality of effective practice (Assess where we are):

Data revealed a lack of alignment in the rigor of the pre-test assessments and post-test assessments. Plans are being made to re-align assessments at the school-level, so that growth or lack thereof can be shown. This will occur more in-depth next school year. District facilitators and LHSIS are checking future pre-tests and post-tests and revising past pre-tests and post-tests to assure that rigor is consistent for the remainder of the year.
Quarterly Objective: The leadership team will evaluate the common assessments and pre-post unit assessments in Mathematics to determine interventions to improve student achievement and decrease the number of "D's" and "F's" in all grade levels. The team also will evaluate instructional practices to improve the targeting of specific skills that students miss after pre-post assessments. Pretesting for Literacy in the format of standardized assessment has been completed in $3^{\text {rd }}$ quarter. Post-testing will occur this quarter.

Instructional teams will continue to use Google Docs to communicate with each other more in-depth analysis of the students' performance. Vertical meetings will continue to occur to focus on alignment of curriculum and assessments, as well as looking at student performance, this quarter. An overall needs assessment will be conducted to inform the necessary resources and changes for next year.

| Indicator / Tasks | Target <br> Date | Completion <br> Date | Person <br> assigned | Met | Not <br> Met | Evidence of Completion |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| The teachers will pretest <br> students on reading passages in <br> January and posttest in March <br> to begin implementation of the <br> format of standardized testing. | $05 / 25 / 2016$ | $03 / 18 / 2016$ | Instructional <br> Teams | x |  | Student Data, pre/post <br> assessments, common <br> assessments. |

## IMO AREA 1-CHANGE IN TEACHER AND LEADER PRACTICE

## ADE Recommendation:

## Effective Practice within Category:

Assessing student learning with standards-based assessments (IID02, IID06)

## Description of full implementation of the Effective Practice and/or Recommendation:

Curriculum, Assessment, and Instructional Planning - Assessing student learning frequently with standards-based assessments (IID02, IID06)
The school administers interim assessments at least three times a year to all students. The Leadership Team reviews the results and provides supports to the Instructional Teams based on the analysis of results. The instructional teams and individual teachers systematically review the results to make adjustments in instructional plans and differentiate assignments and supports for individual students (IID02).

These interim assessments are designed to measure students' progress toward year-end standards-based assessments. The assessments help teachers make adaptations in instruction and to identify students in need of additional assistance. Instructional Teams and individual teachers review the results to make the necessary adjustments. They also enable the school to see areas of strength and weakness in the curriculum and instructional plans. Leadership Teams review the results for the entire school and across grade levels and subject areas.

The Leadership Team sets annual goals for student learning outcomes. These goals are based on student learning data and are both reasonable and sufficiently challenging. The goals include goals for the whole school, grade levels, subject areas, and student subgroups (IID06).

## Current reality of effective practice (Assess where we are):

Teachers are assessing students by pre-testing and post-testing students to measure growth or lack thereof. Between these assessments, teachers are giving common assessments. Based on common assessment data, the students are being placed in flexible groups during Stripes time for intervention, sustaining proficiency, or advancing skills. All students are in various groups depending on data. The students are moved between groups after common assessments are given.
Quarterly Objective: Analyze data to determine student performance needs from the pre-post assessments. Evaluate intervention strategies to amend/adjust strategies. Determine if data shows that overall student growth is occurring so that yearly performance goals can be established. A comprehensive needs assessment will be conducted on the yearly data to determine strengths and weaknesses in school improvement areas.

| Indicator / Tasks | Target Date | Completion Date | Person assigned | Met | Not Met | Evidence of Completion |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| During instructional team meetings, teachers will continue to analyze common assessment data to determine student deficiencies to differentiate instruction and revise intervention strategies. | 5/25/2016 | 05/20/2016 | Instructional Team | x |  | Common assessments, meeting minutes |
| Administrative team gathered data for comprehensive needs assessment to present to staff identifying strengths and weaknesses in school improvement areas, gather input from staff, and begin forward planning for 2016-2017. | 5/25/2016 | 05/05/2016 | Dr. Edwards Instructional Teams | x |  | Data from comprehensive needs assessment |
| Baseline data was set at the beginning of the school year using DRA and StarMath. ## IMO AREA 3-STUDENT SAFETY AND DISCIPLINE

## ADE Recommendation:

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

## Current reality of effective practice (Assess where we are):

The faculty and staff develop a discipline management plan with monitoring/feedback through Clip Up/Clip Down and DoJo, which is a computer reward system that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently enforces the agreed upon rules and regulations.

Quarterly Objective: The school will continue the Wellness Team, as a means to support student discipline and safety. The team will continue to use the community organization ARCBest to provide mentoring services for students within the school. Discipline and safety is a standing agenda item at all leadership team meetings in order to review data on a consistent basis. A comprehensive needs assessment will be conducted, including a survey will be conducted with parents to determine needs in the area of campus safety and discipline. (IIIC10).

## IMO AREA 4-FAMILY AND COMMUNITY ENGAGEMENT

## ADE Recommendation:

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

## Current reality of effective practice (Assess where we are):

In all previous quarters, efforts have been made to involve parents in their students' education, such as $100 \%$ signage of report cards and mid-terms and $100 \%$ at parent conferences. Communication logs are sent daily and newsletters are being sent weekly by most teachers.
Quarterly Objective: The leadership team has made parent signatures of 4.5 week progress reports a benchmark for each grading period for the 2015-16 school year. PTA events will be monitored and used to support the school activities for parents and students during the 4th Quarter. Due to a variety of needs revealed, as well as success of "Bring Your Family to School Day" implemented this year, planning will occur to include more events of this nature next year. A parent survey will be conducted to reveal strengths and weaknesses and make any necessary changes due to parental input.

| Tasks | Target <br> Date | Completion <br> Date | Person <br> assigned | Met | Not <br> Met | Evidence of Completion |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| Parent Involvement will be a <br> standing agenda item for the <br> Leadership Team meetings. | $05 / 25 / 2016$ | $05 / 12 / 2016$ | Leadership <br> Team | x |  | Leadership Team Agendas. |
| A comprehensive needs <br> assessment revealed the need for <br> changes in activity time and data, <br> due to parent preference, for next <br> year. | $05 / 25 / 2016$ | $05 / 20 / 2016$ | Dr. Edwards | x |  | Data from comprehensive needs <br> assessment and parent survey |
| Continued 4.5 week progress <br> reports will be returned at 100\%. | $05 / 25 / 2016$ | $05 / 09 / 2016$ | Dr. Edwards | x |  | Signed progress reports. |
| A parent survey was conducted to <br> highlight any strengths and <br> weaknesses and make any <br> changes due to parental input. | $05 / 25 / 2016$ | $05 / 20 / 2016$ | Dr. Edwards | x |  | Data from comprehensive needs <br> assessment and parent survey |
| Due to needs revealed in the <br> comprehensive needs <br> assessment, including results of <br> the parent survey, and success of <br> the "Bring Your Family to School | $05 / 25 / 2016$ | $05 / 20 / 2016$ | Dr. Edwards | x |  | Trusty yearly events calendar |

Day", plans are being made to include 4 of these types of events in 2016-2017 where parents observe in classrooms and then participate in Cafecitos (either English or Spanish) afterwards to discuss issues that need on-going communication.

## IMO AREA 4-FAMILY AND COMMUNITY ENGAGEMENT

## ADE Recommendation:

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## Current reality of effective practice (Assess where we are):

Trusty's counselor has been teaching career exposure lessons to students in all grade levels and will continue into next quarter. A Career Day for grades 5 and 6 will occur in the $4^{\text {th }}$ Quarter and planning has been conducted for that.
Quarterly Objective: The school has a guidance plan that includes options for students as they plan their college and career opportunities. Smart Core papers will be signed by parents choosing the path for their student. Students will participate in transitions from elementary to junior high.

| Tasks | Target <br> Date | Completion <br> Date | Person <br> assigned | Met | Not <br> Met | Evidence of Completion |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |

ARKANSAS
DEPARTMENT
OF EDUCATION

## PRINCIPAL'S REPORT 4th QUARTER

Has there been a meeting with the District Leadership Team to review the school's needs and progress? YES or NO (Please circle) If yes, what support have you received from the district?
Yes. The District Leadership team meets monthly with the Local SIS and building principal to visit the school needs and progress. Monthly meetings have been held in March \& May. Building principal supplies a report to the District Team of progress snapshots for the month. Although a meeting was not held in April, the principal supplied a report for that month as well through Google Docs for District Team review.
Please describe the interventions your school is utilizing specific to closing the achievement gap (Focus) or for improving the outcomes for students basic and below basic (Priority). (Do not include general school wide efforts.) Interventionists are assigned to below basic students in Math and Literacy. Students are grouped for daily interventions based on performance. Below Basic and lower Basic students in grades 4-6 are offered after school tutoring.
What support(s) have you or your team received from the external provider, internal SIS, and the ADE SIS Team?
Internal SIS is working with individual teachers to improve practice, as well as providing professional development.
ADEISIS providing guidance and assistance reviewing data and ACSIP planning.
What are the barriers, if any, in improving student outcomes?
Generational poverty continues to be a barrier. Several new students have moved in this year with many behind grade level and mental health needs. Mobile students have been an issue this year, with 56 students moving into the school and 49 moving out. This is a total of 105 students, since September 1, 2015, a third of our overall population ( 326 students).
How is your leadership team monitoring student progress in the skill area of science?
An Instructional Facilitator assisted in STEM implementation. Teachers incorporated STEM projects and prepared students for STEM Wars (district competition). We had our STEM Wars at the school level. Several teams competed in the districtwide competition, with 2 teams placing. Plans are being made for deeper incorporation next year.
How is your leadership team monitoring student progress in the skill areas of math, reading, writing? How are you responding to the results?

We are giving pre/tests, common assessments, and post/tests. We are reconfiguring our intervention groups on this data. When students have a weak area, based on the data, or teachers share a weakness in knowledge, professional development is provided to address that weakness, whether it be through modeling, coaching, providing resources and knowledge, etc. We have provided grade band teachers (K-1, 2-3, 4-6) time to work with instructional facilitators in vertical meetings. Professional development has been used to target teacher and student needs.

What have been the most meaningful decisions and actions made by the School Leadership Team this quarter as documented in the minutes?
This quarter, the most meaningful actions have been to provide professional development and "expert" resources to assist during meetings for teachers to utilize to inform their instruction. Teachers informed principal through vertical discussions of their needs. Principal found resources and training for teachers; and provided this training. (Ex: 100 Charts PD, Dyslexia interventions and assessment discussions, Stride data analysis training, and Math Fluency training) In addition, we have conducted a comprehensive needs assessment, analyzed the data, and made plans, as a staff, for next year. This includes our building-wide goal, continue implementation of Kagan, and hosting a behavioral consultant to add more "tools" to the teachers' toolbelts.
If anything, what do you intend to change or modify for the next quarter?
A quicker response to data on incoming students-this is still a struggle due to getting information transferred from school to school. We began implementing common assessments in Literacy in the format of the standardized assessments, as well as a variety of other assessments, such as ECAR, DRA, and STAR. We plan to implement this next year, as well.

ARKANSAS DEPARTMENT OF EDUCATION

been here < half a year.
4th grade- Reading 4 student have been here < half a year.
3rd grade- Reading 2 student have been here < half a year; Math 2 students have
been here < half a year.

## LEADERSHIP TEAM REPORT CONTINUED

MATH DATA by Quarter for Grades 3-10

Comments/ Clarifications:
All pre-tests and post-tests are standardized assessment rigor. This prevents some students from getting a proficient score, due to rigor. Students show better scores and growth on the STAR Math assessments. Please see these scores later in the report for growth purposes. In addition, the post-tests breakdown shows significant growth for even students whose post-tests fell in the D or F range. Many students began with little to no knowledge or ability to solve the problems at significant rigor, as on standardized assessments.

## Scores Breakdown for Students with Ds or Fs on COMMON ASSESSMENTS

## Posttests

$\stackrel{\rightharpoonup}{\sigma}$ To determine students in the D or F range for the 4th quarter, the DRA, ending assessment was used. For all other quarters, the STAR Reading assessments were used. STAR Reading assessments are not considered as valid for our students, as many of our 52\% of ELL students test lower on this assessment than their true ability. The DRA is a more valid assessment for students in Reading. These assessments are included on the following page.

## Developmental Reading Assessment "DRA" POST-TEST RESULTS

Extended Day Learning Program (EDLP)

## STAR MATH RESULTS FOR EDLP STUDENTS:

Most students show average or above average growth in Mathematics. Only 5 out of 26 students * did not show expected yearly growth. Of these 5 students, 1 student has attendance issues at school, 1 student had attendance issues in EDLP, 1 student is a student receiving SPED services, and 1 student has unmedicated ADHD.

STAR READING RESULTS FOR EDLP STUDENTS:

Most students * (22 out of 26) did not meet their growth marks for Reading, according to STAR Reading. However, it seems to be an invalid representation. This may be due to it being a timed tests or vocabulary issues, as many students are ELL students and normally receive extended time on tests. It has been our experience that our students do not perform as expected on this tests.
Developmental Reading Assessment (DRA) scores seem to be a better indicator of true performance.

## DEVELOPMENTAL READING ASSESSMENT RESULTS FOR EDLP STUDENTS:

Most students show average or above average growth in Reading, as assessed by the DRA. Only 3 out of 26 students * did not meet a year's worth of growth or more. 2 of these 3 students receive special education services.

## SUMMARY:

For students who attend EDLP and have good attendance at school, the program appears to be successful. However, for students that have extra barriers (attendance, special needs, etc.) it seems to have little effect. In addition, the students listed above are students that attended the EDLP program. Other students needed to attend and did not. These students had a variety of issues.

STUDENTS THAT DID NOT ATTEND EDLP AND THE REASONS

| STUDENT | GRADE | BENCHMARK <br> MATH | BENCHMARK <br> LITERACY | REASON FOR NON-ATTENDANCE |
| :--- | :--- | :--- | :--- | :--- |

| LDT | 6 | BELOW | NA | Transportation-inconsistent parent/attendance |
| :---: | :---: | :---: | :---: | :---: |
| RW | 6 | BELOW | BASIC | Transportation-bus rider |
| CN | 6 | BELOW | BASIC | Parent refused |
| NS | 6 | BELOW | NA | Student refused, Parent allowed it |
| JR | 6 | BASIC | BELOW | Transportation-parent had no one to pick up |
| LS | 6 | BASIC | NA | Parent refused |
| LM | 6 | BASIC | NA | Transportation-bus rider |
| PA | 6 | NA | BASIC | Transportation-bus rider |
| RM | 6 | NA | BASIC | Student refused, Parent allowed it |
| RJ | 6 | BELOW | BASIC | Transportation-inconsistent parent/attendance |
| KV | 5 | BASIC | NA | Parent refused |
| KL | 5 | BASIC* | BASIC | *Student could only attend on the Literacy days. |
| HM | 5 | BELOW | NA | *Student could only attend on the Math days. |
| IR | 4 | NA | BASIC | Parent refused |
| TR | 4 | BELOW | BELOW | Transportation-inconsistent parent/attendance |

Examining the reasons for non-attendance: 3 are due to inconsistencies in parent transportation, 3 are due to bus riders, 3 are due to parent refusals, 2 are due to student refusals (parents allowing), 1 student attendance issue, and 1 transportation issue with parent having no one to pick student up. Thus, several
students with severe academic issues (7 Below in Math and 2 Below in Literacy) did not receive the necessary extended learning time.

Parent Survey Results LOWEST TOTAL Percentages: (All other percentages were positively above 89\%.)
1.) Only $89 \%$ would like ways to help their child at home.;
2.) $89 \%$ of parents feel bullying is being taken seriously.;
3.) $\mathbf{9 1 \%}$ of parents feel discipline is fair and consistent.
**The most parents indicate they would like events on Mondays and the timing to be around 5:00 p.m.

# End of Year Summary Report 

## FOURTH QUARTER

2015-2016 School Year

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08).
The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

## Current reality of effective practice from the beginning of the

 year:We have established a leadership team that includes the principal, assistant principal, counselors, department heads, graduation coach, special education designees, parent facilitator, school improvement specialist, a teacher-at-large, and external providers when available. The team meets during the school day. Core subject departments meet once every other week to discuss data, which are also considered PLCs.

Current reality of effective practice:

The Leadership Team meets on a weekly basis for at least an hour. Departments/Teacher Instructional Teams meet weekly with it switching between PLCs and Department Meetings. The PTO/School Community Council meets on a monthly basis. Student Ambassadors and Student Council/Student Teams meet on a monthly basis, and more often when needed. We need to work on regularly looking at school performance data and classroom observation data, and in turn use that to drive decisions about school improvement and professional development. We do look and talk about data and try to figure out what professional development is needed, but not on a regular basis.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

Current reality of effective practice from the beginning of the year:

Teachers currently create teacher made diagnostic assessments to determine the strengths and weaknesses of the students during the first two weeks of school. Teachers give assessments at their own discretion throughout the nine weeks. The Learning Institute (TLI) assessments in English, Math, and Science, which are broken into 4 module assessments in English and Math; Science has 6 module assessment are given at the end of each nine weeks.

## Current reality of effective practice:

We finished out the year using TLI for interim assessments, but will be moving to the ACT Aspire Interim Assessments for the 2016-2017 School Year. We give Pre, Mid, and Post tests on a 9 week basis, however not on a formal level per unit of instruction. Instructional teams look at their data and collaborate to figure out how to teach weak SLEs.

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

## Current reality of effective practice from the beginning of the $\quad$ Current reality of effective practice:

year:
Teachers will utilize the school wide rules and procedures to reinforce classroom rules and procedures by positively teaching them.

The handbook is the discipline management plan and it is covered during the first weeks of school and then reviewed in individual classrooms when we return for second semester. Faculty and staff do not consistently teach the rules and procedures, but refer to them often as necessary. Faculty and staff do not consistently enforce rules and regulations, it varies from person to person.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

## Current reality of effective practice from the beginning of the <br> Current reality of effective practice:

 year:The parent facilitator has a skeleton of a parental involvement calendar for the 2015-2016 school year. Parent/Teacher/Student compacts have been created and approved for distributing. eSchool Home Access Center logins are available for all parents and students. Each teacher is required to keep a log of any parent contact they make throughout the school year. We have the iPads for a one-to-one for grades 7th, 8th and 9th, but are working to get the procedures in place to get the iPads into student hands.

Compacts were created and distributed throughout parental involvement activities during the year, however they were not returned in great numbers.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice from the beginning of the

 year:We have a Graduation Coach and 2 College Advisors who meet with Juniors and Seniors regularly to discuss future plans and the college application process. We also have the Jobs for Arkansas Graduates (JAG) program which teaches students the ins and outs of the job market. The Central Career Action Plan (C-CAP) is in place to help in the process of registering for classes.

Current reality of effective practice:

C-CAP class choice sheets were used again to help in the student planning and class registration process. Student transcript audit sheets were also updated to reflect the new grades as a semester ended to ensure that students were in necessary classes. Students review their audit sheet and sign off that they have seen and understand what is necessary for graduation.

It continues to prove difficult to track recent graduates due to changing of contact information. We are able to keep track of those students who reach out to us and ask for assistance and can get unconfirmed updates on graduates from their classmates. Do to FERPA regulations it is not possible to contact the individual schools students attend to check on status/enrollment, we have to rely on what the graduates tell us.

ARKANSAS
DEPARTMENT
OF EDUCATION

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

- Summer School was planned to allow students in grades 7-12 to recover credit in classes they failed.
- The Achieve 3000 Reading program will be piloted on our campus during the summer. This program will be evaluated during the summer to gauge reading level growth of students. If the program provides significant gains in reading, the school will seek to continue the program during the 2016-2017 school year.
- The leadership team decided on ways to utilize funds from the 1003 a grant. The grant funds will be used to provide field trips, student incentives and supplies, professional development, teacher web pages, and Chromebook.
- The leadership team encouraged faculty members to enroll in student engagement professional development during the summer. This professional development will be presented by members of our leadership team and other HWHSD employees. Several teachers have enrolled in the PD. Student engagement will be the primary instructional focus during the 2016-2017 school year in the HWHSD.
- The leadership team developed a RTI team.
- Enrichment summer packets were created by the English Department to distribute to students. Purpose is to keep students engaged and lessen the depletion of learned skills from previous year.

If anything, what do you intend to change or modify for the year?

- Central High School will operate on a seven period day instead of eight periods next school year. This will allow more class time in each period and fewer transitions throughout the day.
- No classes will be double blocked. Seventh and eighth grade students will be remediated in the Success Maker labs.
- An ACT prep class is being added to the course offerings for students in grades 10-12.
- We intend to hire at least one instructional facilitator to assist teachers with instructional practices, provide ongoing professional development (PLC's), conduct walk throughs, and model instruction.

# End of Year Summary Report 

## FOURTH QUARTER

2015-2016 School Year

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

Current reality of effective practice from the beginning of the $\quad$ Current reality of effective practice: year:

ID01 - LIMITED IMPLEMENTATION - Teachers and
Administrators have been assigned to Leadership Teams. We have also created an overall Leadership Team of 10 members to guide the progress of the 4 Teams which are: Data, School Culture, Scheduling, and Instruction.
ID04 - LIMITED IMPLEMENTATION - All teams currently create agendas for meetings and require sign-in sheets.
ID07 - LIMITED IMPLEMENTATION - Meetings are held twice a month for no less than an hour. Representatives from elementary from mid-level and high school attend the meetings. [This indicator's task was completed, moving this to FULLY IMPLEMENTED status.]

ID01-Teams were established at the start of school and meetings were held throughout the school year with agendas and sign in sheets utilized.

## ID04-See ID01 response.

ID07-This has been marked fully implemented as the tasks were all completed.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).
Current reality of effective practice from the beginning of the year:

IIB02 - LIMITED IMPLEMENTATION - Teachers at Summit School currently offer a variety of pre-tests to assess prior knowledge for units of instruction. These assessments are available in classrooms and teacher will be asked to provide specific examples of tests/questions for oral exams and projects required of students. The process of formative assessments takes many forms and changes as needed. The process is in place, but is a living process.
IIB04 - LIMITED IMPLEMENTATION - Teachers currently give pre/post assessments to indicate progress and needs.

## Current reality of effective practice:

IIB02-These tasks were completed throughout the school year.
IIB04-These tasks were followed and completed until the last assessment was given.

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).
Current reality of effective practice from the beginning of the $\quad$ Current reality of effective practice: year:

IIIC10 - LIMITED IMPLEMENTATION - Procedures and routines were agreed upon in pre-school in-service after reviewing the Needs Assessment.

IIIC10-This task was followed throughout the school year with review coming back from breaks and new student placement conferences.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)
Description of full implementation of the Effective Practice and/or Recommendation:
No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

Current reality of effective practice from the beginning of the year:

IVA01 - LIMITED IMPLEMENTATION - Placement meetings include discussion of academic and curriculum. Literacy Family Night is being planned. One District One Book district and community initiative provided a book and letter for parents to read to their children and discuss.

## Current reality of effective practice:

IVA01-Placement meetings were held each time a new student was referred to Summit School. Literacy Night was held at the local library. Students in grades K-6 read two books and held discussions with staff and family members; one each semester.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice from the beginning of the

 year:VA01 - LIMITED IMPLEMENTATION - The counselor oversees development of career and college support and guidance through multiple meetings with student and parents. Transition plans includes discussion of the students current interests and strengths. Students are given interest inventories that help guide them to discover their appropriate career and college paths.

## Current reality of effective practice:

VA01-Career exploration was conducted through classroom guidance with grades K-12.

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

The decisions to continue the activities, strategies, interventions, school based mental health services, and all things associated with and required of ALEs. The buy in of all staff members including SBMH workers.

If anything, what do you intend to change or modify for the year?

With the closing of the Summit School, we will continue what has been utilized in the past and will monitor and adjust to the new ALE environments located in campus buildings.

# End of Year Summary Report 

## FOURTH QUARTER

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)
Description of full implementation of the Effective Practice and/or Recommendation:
District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).
Current reality of effective practice from the beginning of the $\quad$ Current reality of effective practice:
year:

School Leadership Team and Executive Leadership Teams were established. The Executive Leadership Team serves as the Management Team. Grade Level Professional Learning Community meets as an instructional team 4-times a week. The Leadership Team met twice per month, of which one meeting per month was dedicated to data review. The Schoolwide PLC for all grade levels met once per month to discuss instructional planning, curriculum alignment, and data assessment.

A site Parent Facilitator been has been since the beginning of the school year.

The District now has a board adopted leadership team policy. The ASLA School-wide Leadership Team meets weekly. The Executive Leadership Team (Management Team) meets also on a weekly basis with daily debriefings. Grade level PLC (Instructional Team) also meets on a weekly basis to review data and design instructional plans.

A new parent facilitator was appointed per workload demands.
A Student Council will be organized for the forthcoming school year.

|  |  |
| :--- | :--- |

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

Current reality of effective practice from the beginning of the year:

At the onset of the school year, teachers administered one summative test per TLI module. Module tests were considered as unit tests. K-6 teachers administered individual teachermade quizzes and tests. K-2 instructional staff administered pre/post-tests for math.

Current reality of effective practice:
Teachers administer one summative test per TLI module. Instructional module assessments include 3-4 unit tests, and a summative test. Other tests administered include weekly teacher made tests, focus skills tests, and pre/post-tests.

Students also take an initial placement test in MyLexia. Thereafter the students are engaged in individualized progressive instruction and assessment. Pre/post-tests are given in Classworks with differentiated student achievement supports.

Focus skills and unit tests are now created collaboratively. K-6 teachers administer pre/post-tests in math and literacy.

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)
Description of full implementation of the Effective Practice and/or Recommendation:
The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).
Current reality of effective practice from the beginning of the $\quad$ Current reality of effective practice: year:

Teachers revised the behavior expectations from the previous year. The students were taught $t$ the routines and procedures. Some teachers posted classroom rules and consequences.

Classdojo.com was used to track points instead of giving Strong Bucks (the previous year's behavior incentive) to monitor student behavior.

Some teachers used Classdojo points on a more consistent basis than others.

All teachers now have classroom routines and procedures posted. The majority of teachers have consequences posted, as well. In addition, hallway, gym/assembly, and cafeteria procedures have also been posted. Rituals \& routines, along with classroom expectations are enforced on a regular basis.

Classdojo.com is used to record Dojo Dollars (formerly points). Present teacher use of Classdojo dollars are now recorded more consistently than from the beginning of the school year.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)
Description of full implementation of the Effective Practice and/or Recommendation:
No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.
Current reality of effective practice from the beginning of the year:

A 1003(a) Grant funded a 300 Conference: Battling the Barriers to Education Head On ( a Strategy for Equal Access to Higher Education). Conference convened for five (5) days during the 2015-16 school year to heighten the involvement of parents and community in cultural diversity concerns. Conference convened for (3 days) during the summer with two (2) followup days during the fall.

An annual LCSD staff "Get on the Bus" tour to invite parents to increase more participation in their child's school.

Parent orientation is held at the beginning of each school year. Orientation includes school-parent-community relations, student registration, and the issuance. At this time, a parent compact is issued with the student handbook. The compact is then signed by the parent and returned to the school counselor. Smart Core Policy information is also included in the parent orientation packet.

Parent-teacher conferences are held during nine-week report card issuance. Teachers are encouraged to maintain parent contact logs. Math \& Literacy nights are held each semester.

Current reality of effective practice:

A 1003(a) Grant funded a 300 Conference: Battling the Barriers to Education Head On ( a Strategy for Equal Access to Higher Education). Conference convened for five (5) days during the 2015-16 school year to heighten the involvement of parents and community in cultural diversity concerns. Conference convened for (3 days) during the summer with two (2) followup days during the fall.

LCSD staff "Get on the Bus" tour to prompt parents to better recognize our desire to involve them in the operation of ASLA.

Parent orientation has been expanded to include information on Smart Core Policy held first semester, whereas, it is more extensively at the Title I parent meeting held during the first semester. A Parent Compact is issued with Student Handbook. The compact is then signed, returned, and kept on file by the school counselor.

Parent-teacher conferences are held on both a scheduled, as well as, unscheduled basis. Teachers are required to submit their logs to the principal for monitoring, periodically.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

Current reality of effective practice from the beginning of the year:

As a means to heighten student exposure and interest in pursuing post-secondary college and careers, various College banners posted in hallway, as well as, staff members have posted their credentials in office areas and classrooms.

Career Fair planning is spearheaded by the school counselor.
Smart Core curriculum is presented to parents and community members at the beginning of the school year

## Current reality of effective practice:

As a means to heighten student exposure and interest in pursuing post-secondary college and careers, various College banners posted in hallway, as well as, staff members have posted their credentials in office areas and classrooms.

Smart Core curriculum is presented to parents and community members at the beginning of the school year. ASLA students have the opportunity to master the same skills as other students throughout the country, to become prepared for success in high school, and to be placed on a path to college and/or career readiness. The counselor's office coordinates and hosts a school Career Fair for each year. The Career Fair is held for students to explore and consider college and career opportunities.

The ACT Aspire Assessment, in alignment with the Common Core Curriculum and as a pre-cursor to the ACT Assessment for high school students, is administered in preparation for grades 3-10 students to become familiar with the ACT test
format which is normally taken by high school students for college entrance. The ACT Aspire was administered to ASLA 3-6 grade students during the 2015-2016 school year.

A Transition Day is held for Pre-K, $1^{\text {st }}$ and $6^{\text {th }}$ grade students to tour the building of the next grade level.

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

## Most meaningful decisions:

The most meaningful decisions throughout the year entailed a changed focus of classroom walk-throughs. The team and staff gave close scrutiny in the review and development of designated Priority School Indistar Indicators. Based on ID01, the Leadership Team structure was officially incorporated into the school governance policy. Thus, the pathway was given to clearly defining the variously related components and forward movement with regard to implementing procedures for testing and using data more appropriately.

Planning and development of the master schedule focused on the maximizing of staffing, teacher/student ratios, and instruction as to gain higher levels of student achievement.

## Most meaningful actions:

The ASLA Leadership Team focused on what was actually needed in 45 Day Plan. The collection and sharing of data created nextsteps based on data results. The following of agendas, collaborative decision-making and consistency with scheduled meetings led to higher levels of attendance, participation, and productivity.

Master schedule includes time for interventions during the school day. Site school Indicators were also completed.

## Attributions to changes:

Leadership decisions and actions were based on current data, team findings and recommendations. Leadership team policy was approved by the board of directors. Unit tests were built-in as to monitor student mastery in literacy and math. Heightened support and accountability for staff and student related practices and assessments.

## If anything, what do you intend to change or modify for the year?

We will revisit leadership team norms to ensure timely meetings. Celebrations should be limited to one concise statement. There is also a need to be more conscience of time in progressing through meetings more effectively. Our comments need to be focused, concise and brief as to allow time for further discussion. Roles must also be specified for each team member. And each team member must be held accountable for their respective positions and/ roles. Professional development, team building, and collaboration will be the focal points of ALSA leadership as to provided further ensure growth.

# End of Year Summary Report 

## FOURTH QUARTER

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)
Description of full implementation of the Effective Practice and/or Recommendation:
District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).
Current reality of effective practice from the beginning of the $\quad$ Current reality of effective practice: year:

ID01 and AdvancEd Standards 1.3 and 2.5
Lee High School has the following teams in place for the 20152016 school year:

1. School Leadership Team

- Comprised of principal, instructional facilitators, cross the content teachers, nurse, counselor, media specialist, parents, scholars, parent facilitators, and community partners
- Meets twice a month for at least one hour
- Assesses, plans and monitors indicators
- Discusses other school business, as needed

2. Instructional Leadership Team

Lee High School has maintained the following teams
throughout the year of 2015-2016.
2. School Leadership Team

- Comprised of principal, instructional facilitators, cross the content teachers, nurse, counselor, media specialist, parents, scholars, parent facilitators, and community partners
- Meets twice a month for at least one hour
- Assesses, plans and monitors indicators
- Discusses other school business, as needed

2. Instructional Leadership Team

Comprised of principal, instructional facilitators,

- Comprised of principal, instructional facilitators, counselor, and support by external providers (Dr. Paul and Dr. Goodwin)
- Meets every Monday during 1st period
- Reviews lesson plans based on The Workshop Model
*Essential Questions
*Research Based Strategies
*Inclusion of technology

3. Professional Learning Communities

- Comprised of instructional facilitators and teachers
- ELA/Cross Content
- Math
- Career \& Technical Education
- Meet weekly to discuss educational issues *Week 1 - Data Analysis *Week 2 - Student Work *Week 3 - Professional Literature *Week 4 - Instructional Strategies

4. Academic Jeopardy Committee

- Comprised of teachers and counselor
- Meets regularly
- Reviews students with grades below 70\%
- Parent Notification thru written communication

5. Handbook Committee

- Comprised of teachers
- Scholars Volunteers had been recruited (to no avail)
- Meets as needed to review handbooks
- counselor, and support by external providers (Dr. Paul and Mrs. Bobbie Fingers served the school for the fourth quarter. )
- Meets every Monday during 1st period
- Reviews lesson plans based on The Workshop Model
*Essential Questions
*Research Based Strategies
*Inclusion of technology

3. Professional Learning Communities

- Comprised of instructional facilitators and teachers
- ELA/Cross Content
- Math
- Career \& Technical Education
- Meet weekly to discuss educational issues *The PLC meetings addresses each of these weekly topics during meetings, but not on specific weeks.

4. Academic Retention Committee

- Comprised of a teacher leader, teachers, and counselor
- Meet at least twice a month
- Reviews students with grades below 70\%
- Parent Notification thru written communication

5. Handbook Committee

- Comprised of teachers
- Scholars Volunteers had been recruited
- Meets as needed to review the handbook

## 6. Parent Advisory Committee

- Comprised of parent coordinator, parent facilitator and parents
- Meets quarterly

## 6. Parent Advisory Committee

- Comprised of parent coordinator, parent facilitator and parents
- Meets quarterly

The local SIS has been added to the school leadership, instructional leadership, and professional learning community teams.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

Current reality of effective practice from the beginning of the year:

Data from assessments is analyzed in PLCs, in one-on-one professional development sessions, and faculty meetings. Areas of improvements are identified to guide instruction for the following unit. Post-assessments are created by teachers and TLI to show growth in the identified skills.

IIB04 and AdvancEd Standard 3.2

## Current reality of effective practice:

Some teachers are using pre-test data to adjust units of instruction. After post tests are administered to students, results are shared during PLC meetings. Standards not mastered are identified. Professional development is provided for the teachers in that subject area. Some teachers make adjustments to the curriculum after the results are analyzed. They are asked to bring that information to the next PLC meeting. The instructional teams have developed units based

| Some teachers are using pre-test data to adjust units of instruction <br> to meet the needs of the majority of scholars. | on the curriculum standards and the local curriculum <br> document. |
| :--- | :--- |
|  |  |

$\left.\begin{array}{|l|l|}\hline \text { classroom rules and procedures based on these "Trojan Traits." } \\ \text { These traits are stated each day during morning announcements. } \\ \text { They are posted throughout the building. } & \begin{array}{l}\text { enforced the agreed upon rules and regulations. We need to } \\ \text { move from most and all. Most of LHS discipline referrals } \\ \text { come from the 7 }\end{array} \\ \text { We have developed behavior intervention plans for addressing } \\ \text { students who have frequent referrals. }\end{array}\right]$

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

Current reality of effective practice from the beginning of the year:
Lee High School faculty and staff expect all parents to sign this compact during registration at the beginning of the school year. Copies are on file with the Parent Coordinator.

## Current reality of effective practice:

Parent compacts have been distributed and collected. Parents have been informed of school events through phone, written, and verbal messages. Events have been created to allow parents an opportunity to share the school successes. Periodic academic reporting has taken place utilizing progress reports and report cards. Parent teacher conferences were held twice this year. The parent facilitator and parent coordinator host quarterly meetings to discuss concerns of our parents. Educational events such as ACT Aspire Hype Night, a chili supper, and a School Letter Grade celebration have been held to involve parents in school activities. An honor's banquet and graduation ceremony were held and parents were great in attending.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

Current reality of effective practice from the beginning of the year:

Lee County High School Guidance Counselor:

1. meets with scholars during Advisory to discuss graduation requirements, class choices, and etc
2. provides one-on-one one guidance to refine class schedules
3. conduct individualized transcripts audit
4. participates on the Academic Jeopardy Committee
5. notifies parents/guardians of students at risk of failing
6. works collaboratively with College and Career Advisor

Lee High School has a College and Career Advisor who works with 11th and 12th grade scholars and performs the following tasks:

1. meets with scholars on a regular basis
2. assists in registering for ACT, SAT, and etc.
3. assists in completing FAFSA
4. schedules opportunities to meet with college recruiters

## Current reality of effective practice:

The school has a guidance plan that allows for students taking concurrent courses and credit recovery to assist with graduation needs. Students are encouraged and required to take the ACT. Students are encouraged to visit college campuses and speakers are utilized to allow students to hear of actual experiences from former graduates. The career coach has been responsible for making sure that students attend these college visits. We currently do not have a formal plan that tracks them two or more years after graduating.
5. provides support with college applications and essays

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

After reviewing interim TLI assessments, quarterly "D" and "F" report, and ACT Aspire interim data, our focus coming into the 20162017 school year will be to make sure that all teachers are utilizing pre test data to plan for differentiation in the classroom. A data day has been provided for the first quarter for teachers to analyze data to guide instruction. Using the data, gave the leadership team a clear picture of how our school is looking academically.

Professional learning community protocols have been revised to include specific goals toward issuing pre-test for all core subject areas. Then we will utilize that data in planning lessons for mastery. Post tests will be given and the data reviewed to measure growth. Data notebooks will be maintained by each teacher. When having talks with the teachers at the end of year in professional learning community meetings, it was evident that some were not utilizing pre and post test data in differentiating instruction in their classrooms. This attributed to the changes LHS will make for the next school year.

If anything, what do you intend to change or modify for the year?
Next year, we will work on using the data to improve instruction. We have added a professional development day earlier so that the school will be able to disaggregate data and use the findings to individualize/guide instruction. Weekly teacher assessments will be given to students to monitor progress on mastering weekly standards. After test results are reviewed, individual teacher data meetings will be held by the instructional team.

Individual data talks will be held with the students quarterly. The students will develop goals for themselves and reflect on achieving those goals. These will be academic and behavioral goals.

All PLCs will focus on instructional objectives and data. We want to have a total focus of looking at several pieces of data. ACT Aspire interim assessments, Classworks, TLI, and teacher weekly assessments. The teachers will have data notebooks that will be monitored by the instructional team.

Professional development during ELA PLCs will also focus on the Social Studies C3 Frameworks. The C3 Frameworks will be utilized by band, P.E., art, music, math, and ELA teachers to show the correlation of using the C3 Frameworks in other disciplines.

Cross curricular staff will be given professional development on how to incorporate remedial standards into their weekly lessons.
Students will be taught the school rules weekly in grades 7-12. In grade 7 and 8 , weekly team meetings will be held to provide extra guidance on academics and behaviors.

Monthly celebrations will be held school wide for students and staff to celebrate successes.
Student celebrations will be planned periodically throughout the school year to celebrate academics and behavior.
Staff celebrations will be planned periodically throughout the school year to celebrate academics and/or following building procedures (i.e. perfect attendance, etc.)

Written procedures and protocols will be distributed to all staff at the beginning of the year.
We will continue the use of the behavior intervention plans with $7^{\text {th }}$ and $8^{\text {th }}$ graders.
We will implement a plan for decreasing tardies.

We will schedule more educational parental involvement events.
We will hold weekly check point meetings to make sure we are on target for daily and weekly activity goals
ARKANSAS
DEPARTMENT
OF EDUCATION

Comments/ Clarifications: At the beginning of the year, a different instrument was used to provide $1^{\text {st }}$ quarter data. During mid-year, Lee High began using Classworks. The other instrument was discontinued. Classworks was utilized in literacy and math for the $7^{\text {th }}$ and $8^{\text {th }}$ graders to provide extra support in reading/language arts and math. The results shown above for the $4^{\text {th }}$ quarter reflect data from end of the year testing using Classworks.

Lee High will use this data as a baseline to focus on in the 2016-2017 school year. Beginning of the year testing will be completed for all students in literacy and math. We plan to monitor the use of Classworks to make sure it carried out with fidelity. Professional development is already planned for the beginning of the year and will be provided by the Classworks consultant.

|  | Grade Level | Number of students that failed Math the previous year | Number of students enrolled this quarter | Number of students with D or F in Math class per quarter 2015-2016 |  |  |  | Number of students assessed on each post-unit assessment for the current quarter |  |  |  | Total number of students assessed on the post-unit test for each grade level <br> (A) | Total number of students with D or $F$ on unit tests in Math this quarter <br> (B) | Percent of students with D or F on any unit tests in Math <br> (C) $(B / A) \times 100=c$ |  |  |  |

## Comments/ Clarifications:

ELA DATA by Quarter for Grades 3-10

[^9]
## (Optional)

Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example: Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.

ACT Aspire summative assessments will be released in July. Our beginning of the year Priority Improvement Plan will focus on this data as our baseline.

# End of Year Summary Report 

## FOURTH QUARTER

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

## Current reality of effective practice from the beginning of the <br> Current reality of effective practice:

 year:Leadership Team: The Leadership team reviews student achievement, school performance, and classroom observation data. This data is used to make informed decisions about school improvement and teacher professional development. These decisions are communicated to the faculty during weekly professional development. The team meets every Tuesday morning between 8:15 and 9:30 am. Members of this team include:

- Aaron Mickens, English Teacher, English Department Chair, and Director of Curriculum \& Instruction
- Raven Washington, Teacher and Math Department Chair

There has been a change in the Leadership team for the fourth quarter. The leadership team members include:

- Raven Washington, Teacher and Math DepartmentChair
- Bruce Battles, Special Education Teacher
- Tia Townsend, Learning Pass Coordinator
- Canny Beasley, Office Manager
- Anitra Rogers, Interim Principal
- Tina Long, Superintendent
- P. Christian Yarberry, Director of Performance Evaluation

The Leadership team has continued to meet weekly to review student achievement, school performance, classroom observation data, recruitment tools, student retention, enrollment, tardies, and

- Bruce Battles, Special Education Teacher
- Anitra Rogers, Interim Principal
special education accommodations and modifications for Special Education students. This data is used to make informed decisions about school improvement and teacher professional development. These decisions are communicated to the faculty during weekly professional development every Wednesday. The leadership team has been able to address academic deficiencies in a timely manner.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

## Current reality of effective practice from the beginning of the year: <br> Instructional team:

An Instructional Team has been established and meets on Wednesdays at 3:00 pm. This Team reviews and analyzes student achievement data, including formative and summative assessments and grades. Student data is used to monitor student mastery of the state college and career readiness standards. The Instructional Team's recommendations are used to identify instructional priorities, guide weekly professional development, and prioritize necessary curriculum changes. Members of this team include:

- Aaron Mickens, English Teacher, English Department

Current reality of effective practice:
The instructional team convenes every Wednesday at 3:00 pm to review and analyze student achievement data which is compiled of formative and summative assessments and grades. The instructional team consists of the following:

- Raven Washington, Teacher and Math DepartmentChair
- Bruce Battles, Teacher and Special EducationCoordinator
- Anitra Rogers, Interim Principal

The Instructional team analyzed results collected from the student data are used to monitor student mastery of the state college and

Chair and Director of Curriculum \& Instruction

- Raven Washington, Teacher and Math DepartmentChair
- Bruce Battles, Teacher and Special EducationCoordinator
career readiness standards, thereby guiding instruction in the classroom. In addition, the instructional team's recommendations are used to prioritize instructional approaches, guide weekly professional development, and identify the necessary curriculum changes needed to demonstrate student growth.

Students have also been grouped according to his/her RIT group to help master standards so teachers can focus more on the individualized instruction. This is done through three 20 minute rotations. One group will have small group instruction with the teacher, the next group will be independent practice, and the last group of the 20 minute rotation is computer based instruction based on the student's RIT score as well. This method has been beneficial to teachers and students, but it also assures teachers that students have mastered of college and career standards are being met.

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

## Current reality of effective practice from the beginning of the $\quad$ Current reality of effective practice: year:

The LRPA MS behavior management plan is system-based and focused on the idea that appropriate behavior is a major aspect of academic success. The behavior plan focuses on creating and sustaining school-wide, classroom, and individual systems

The Character Development curriculum is not based on a formal survey, but the instruction is based on informal feedback provided by the parents, teachers, and students. The Character Development program continues to be an area of growth. It is an extensive plan to further develop our behavior model to help
of support, which improve lifestyle results for all LRPA students. The Core Values, Essential 55 Rules and 6 Steps to Positive Behavior are the frameworks that LRPA Middle School has implemented to govern student behavior. These frameworks were carefully selected based upon contemporary scientificallyproven theories of educational psychology, and implemented to reinforce, reward, and exemplify positive student behaviors while, as mandated by our mission, placing a minimal emphasis on the practice of "punishment'.

Behavior practices are reviewed daily during advisory class. A character development curriculum, which focuses on a revolving topic within the Essential 55 Rules, is presented twice weekly during a scheduled allotment of instructional minutes. In addition to school-wide policies and procedures promulgated and utilized by the LRPA Middle School faculty, teachers - with the direction and approval of the administration - have developed their own unique classroom policies and procedures, with which students are expected to comply.
enhance our enrichment program that we have tied to our behavior program. The material is adjusted accordingly in consideration of such feedback. LRPA strives to teach students self-discipline and awareness, and respect for others through redirection with the use of the positive behavior system. We also teach the importance of making wise choices in order to be productive citizens throughout the community.

LRPA also has a Learning Pass Program where students who are excelling academically will have the opportunity to go off campus for experiential learning within the community. The goal is to open more seats in this program to give more students the opportunity to participate in the program.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

| Current reality of effective practice from the beginning of the <br> year: | Current reality of effective practice: <br> During the parent orientation night at the start of the year, |
| :--- | :--- |
| LRPA will be changing the name from school covenant to a school <br> compact. We will be updating the covenant to meet all state |  |

Page 4 of 16
each parent and student signs a school covenant, which sets the expectations for the school-parent-student-teacher relationship. The covenant can only be successful in achieving the mission if students learn the key behaviors that are required to succeed in high school, college, career and society.

LRPA Middle School's academic improvement plan (AIP) details supplemental and remedial interventions for each student in Math, English Language Arts and Science to ensure that students are proficient in all academic areas. The AIP is a live document that teachers update periodically to ensure that all goals are met and action steps are taken. The AIP includes student formative, summative and state test results, as well as information on the types of instructional support services that will be utilized in the classroom and action steps for the student, parent and teacher.

This document is completed, reviewed and signed by the parent, teacher, and principal during student-led conferences, which take place at the end of each academic quarter. During each conference, teachers will review the student achievement data and the progress that was made between the conferences.
recommendations. We will be holding two mandatory meetings with parents to go over the changes. LRPA has maintained the parent -student-teacher relationships by ensuring that AIP's are updated and correspondence is provided to parents in a timely manner. Student Led Conferences are held three times a year to ensure that parents are made aware of academic progress, and school updates.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice from the beginning of the year:

The Capstone Course is an intensive, yearlong course required of all $8^{\text {th }}$ grade students at Little Rock Preparatory Academy. Through the Capstone experience, students will follow a concentrated course of study that is specifically designed to deepen the Liberal Arts education that they received in earlier grades and prepare them for the rigorous requirements of high school, college, and competitive job markets. All students will participate in both experiential and service learning activities that educate them on what is expected of scholars, professionals and business-people in real-world settings.

## Current reality of effective practice:

The current $8^{\text {th }}$ grade class will report which high schools they have been accepted to for the 2016-17 school year. The next tracking report will be completed around the second week in September 2016.

Some students have greatly benefitted from our experiential learning program, The Learning Pass, throughout the community. One student was feature in Life in Chenal magazine, and other students have been featured in newsletters for other businesses. Striving to make our students productive citizens throughout the community has been one of our main focuses of LRPA. All of our $8^{\text {th }}$ grade students completed 30 hours of community service as one of the requirements for $8^{\text {th }}$ grade promotion. LRPA will be holding the following end of the year events:
$8^{\text {th }}$ week
Talent show
Field day
Awards Day Program

ARKANSAS
DEPARTMENT

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

The most meaning decisions that the Leadership team made this year was ensuring that teachers understood how to utilize data to assess which standards are/are not being met, adding acceleration to the end of the day and instituting tutoring for students. Some students needed some additional hands-on tutoring to ensure mastery of the state college and career readiness standards. Students kept a data tracking notebook which they updated periodically after testing. This notebook allowed students to track his/her standards progress.

Another meaning decision that the Leadership team made was to cross curriculum collaboration with Global Studies and Science teachers to help reinforce standards identified by the data for additional review in English and Math. Global Studies teachers partnered with the English teachers to help reiterate standards being taught in the English classrooms through various activities such as Kahoot, Jeopardy, and Language Art games. Science teachers partnered with Math teachers to help reiterate Math standards being taught in the classroom through various activities such as Kahoot and Jeopardy.

If anything, what do you intend to change or modify for the year?
LRPA plans to have an Enrichment Program at the end of the day to help enforce the expectations of our positive behavior model. If students are not complainant with the expectations, then he/she will not be able to participate for the day in the enrichment programinstead, that student will have a study hall period. Implementing this change, will help LRPA shape the school culture and help maintain the retention throughout the year and forthcoming years.

## SCHOOL LEADERSHIP TEAM'S REPORT FOURTH QUARTER

## Comments/ Clarifications:

LRPA Middle School uses the Northwest Evaluation Association (NWEA) Measures of Academic Progress (MAP) three times a year to measure student growth over time based on the college and career readiness standards. LRPA MS also uses this tool to assess students that are lower than their grade-level peers nationally. The NWEA MAP scoring scale includes low, low average, average, high average, and high.

The NWEA MAP mathematics assessment assesses the following areas: operations and algebraic thinking, the real and complex number systems, geometry, and statistics \& probability. The reading assessment assesses the following areas: literature, informational text, and vocabulary acquisition \& usage. In developing the figures above, we counted the students that overall performed low and low average depicting that they are behind their peers nationally.

## Comments/ Clarification:

The data seen here is derived from the Illuminate formative assessments (details on pages 14-15) that are given every $5-6$ weeks. We have observed that there is an inconsistency in the data. The data shows that over $70 \%$ of the students are earning either a D or F on the assessments, but the number of students with D's or F's in math classes is fewer than 10 per grade. The next steps are to hold mathematics instructional team meetings to help identify the issue and develop a plan to prevent this from occurring again. During the math instructional team meetings, the teachers will review a report of the number of students with D's or F's, review the grading policy, analyze unit assessment data, and discuss strategies for improvement.

## Comments/ Clarifications:

The data seen here is derived from the Illuminate formative assessments (details on pages 14-15) that are given every $5-6$ weeks. We have observed that there is an inconsistency in the data. The data shows that $45 \%$ of the students are earning either a D or an F on the Assessments, but the numbers of students with D's or F's in ELA classes are fewer than 10 per grade. The next steps are to hold ELA Instructional team meetings to help identify the issue and develop a plan to prevent this from occurring again. During the English Language Arts instructional team meetings, the teachers will review a report of the number of students with D's or F's, review the grading policy, analyze unit assessment data, and discuss strategies for improvement

## (Optional)

Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example: Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.

## LRPA Middle School

## 2015-16 Illuminate Benchmark Testing

The six administrations of the Illuminate formative tests for the 2015-16 year are below. The tests are administered every 5-6 weeks to assess the percent of students scoring at different levels of proficiency in Mathematics and Reading relative to the Arkansas college and career readiness standards.

Each test evaluates student proficiency relative to a different interval of standards. All grade-level standards are tested over the course of the year. A linear progression from test to test is not expected because each test examines a unique set of concepts and skills (which vary in difficulty level). However, over the course of the year, it is expected that students will migrate from low bands of proficiency towards high bands of proficiency as the school's instructional team becomes increasingly effective and students benefit from the academic programs.

The purpose of Illuminate benchmark testing is to closely monitor student mastery of the standards across the year in the effort to:
(1) Focus on growth in student achievement versus taking a "static" or "absolute" view of student proficiency;
(2) Elevate administrator and teacher awareness of and responsiveness to student performance;
(3) Equip administrators and teachers with the data to understand what students are mastering and what they are not so that immediate improvements can be made; and
(4) Evaluate whether or not - and to what extent - the Middle School is getting better at improving the learning of all students overtime.

Typically, the first 3 test administrations of the academic year reflect a "norming period" - when school staff is getting grounded in where students are and devising initial strategies to improve their mastery of the standards. Over the remaining 4-6 administrations of the year, more consistent, widespread gains become evident as school staff become increasingly effective at implementing sound teaching-and-learning strategies.

In the Reading charts for grades 6-8, it is evident that students made progress in 3 of 3 grade levels. In the Mathematics charts for grades 6-8, it is evident that students made moderate progress in 2 of 3 grade levels. In Mathematics, the $6^{\text {th }}, 7^{\text {th }}, \& 8^{\text {th }}$ grade students made progress, the improvement trend appears to be strong. In Reading, the $6^{\text {th }}, 7^{\text {th }}, \& 8^{\text {th }}$ grade students made progress, the improvement trend appears to be moderate. For Mathematics \& Reading, modifications will be made in all grades in response to the finding that proficiency gains are unsatisfactory.

The Illuminate benchmark testing system was first implemented at the LRPA Middle School in the 2013-14 year. Our team is finding it to be a powerful "early warning system" in that it allows us to identify when there are deficiencies or gaps in student achievement growth as early in the academic year as possible so that improvements can be made. The Middle School has become increasingly adept at using the Illuminate testing system to drive growth in student achievement.

# End of Year Summary Report 

## FOURTH QUARTER

2015-2016 School Year

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

## Current reality of effective practice from the beginning of the year: <br> Quarter 1

- Members have been chosen for the Leadership Team: Jonathan Crossley (principal), Pamela Freeman (assistant principal), Lisa Mack (local school improvement specialist), Pamela Criss (literacy facilitator), Michael Henderson (math facilitator), Paula Vasquez (language acquisition facilitator), Paula Ramsey (counselor), Tamika Jordan (third grade teacher), and Ruth Harnish (first year, kindergarten teacher).
- Meetings have been scheduled to meet in the conference room at Baseline Academy from 1:00-2:30 twice monthly for the 2014-2015 school year.

## Current reality of effective practice:

## Quarter 4

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01).

- The team is currently working on team structure, organization, and bylaws.
- Team is learning how to assess indictors and how to make an action plan.
- Baseline has an established a Leadership Team, Instructional Team, Professional Learning Communities, and Parent Teacher Organization with regular meeting dates and times.
- We have a document that identifies other teams' purposes, members, and meeting dates
- A plan for a Student Advisory Council has been formed and the inaugural meeting has occurred.
Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).
- The three major teams have an identified purpose and work from agendas and keep minutes. ( Leadership Team, Instructional Teams/PLCs, and PTA)
The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07).
- The Leadership Team meets twice monthly and has a calendar displaying meeting dates for 2015-2016.

The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).
The Leadership Team supports our teachers by analyzing data and determining professional development opportunities based on the student data and teacher and student survey data.

- After analyzing the data from the most current teacher survey at Reflection Night, it has been determined that the Leadership Team needs to improve incoming and outgoing communication. A plan will be devised during the Summer Leadership Retreat for improving communication. This plan will be implemented at the beginning of the 2016-2017 school year.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

## Current reality of effective practice from the beginning of the year: <br> Quarter 1

- A team of facilitators and teachers have completed the district CFA training.
- Grade level Instructional Teams have started creating/selecting questions for posttests.
- Grade level Instructional Teams have started creating/selecting questions for pretests.
- Grade level Instructional Teams have started analyzing work to guide instruction.
- Forms are being developed to archive data and to analyze data

## Current reality of effective practice:

## Quarter 4

- ELL and SPED students participation and assessment with Common Formative Assessments have been developed for review and implementation in the 2016-2017 school year.
- Test creation is a combination of facilitator and teacher developed tests.
- Based on data from our most current teacher survey and discussion with the Instructional Team and Leadership Team, professional development sessions are being developed for teachers based on their needs for understanding the rigor of the state standards (Unpacking the Standards) and creation of CFAs in order to create

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

## Current reality of effective practice from the beginning of the $\quad$ Current reality of effective practice:

## year:

## Quarter 1

- Teachers have established classroom rules and norms with the class.
Rituals and Routines have been established the first 2 weeks of school.
- Teachers are not consistent and always positive about expectations.
- Individual behavior plans are starting to be made and implemented by the team consisting of the teacher, counselor, behavior specialist, resource teacher, and mental health worker.
- Gentlemen and Ladies clubs are being established for a targeted group of students.
- The faculty has begun to assess our current practice of behavior management and are starting create a schoolwide plan
- A schoolwide incentive system is being established.

> stronger pre/post tests and to promote rigor in the classrooms.

- Clear pretest analysis expectations have been set.
- Data Nights have continued.

## Quarter 4

- Based on analysis of our behavior data and teacher survey results, the Leadership Team has created a plan to revise our current school behavior management system.
o Set a Schoolwide behavior goal
o Align the behavior goal with classroom management professional development sessions for teachers and staff
o 5:1 positive/negative response focus
o Conflict Resolution training and implementation for staff
o Revise morning meetings to include Conflict Resolution and Character Development
o Consider positive discipline referrals and the idea of reverse suspension
o Research PBIS (Positive Behavioral Interventions and Supports) and consider if this classroom
- A schoolwide discipline plan is being established.
management plan would be beneficial to Baseline Academy or create a similar system
o Align the school compact to our behavior system and goals

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

## Current reality of effective practice from the beginning of the

 year:
## Quarter 1

For the 2015-16 school year, Baseline Academy chose to use the LRSD Title I compact that outlines how parents, school staff, and students can work together. Compacts will be signed by principal, student, teachers, and parent and will be placed in the student's permanent record file at Baseline.

## Current reality of effective practice:

## Quarter 4

- A school based team of has been established to look at exemplars of elementary school compacts.
- The Compact Team will use the exemplars and Wise Ways to create a compact for Baseline Academy that will be aligned with the core values.
- A draft of the new compact will be shared with the staff and the staff will give input in order to develop a compact that will be effective for outlining how parents, school staff, and students will share responsibility for improving academic achievement and state standards.
- The Compact Team will also discuss ways to effectively involve parents in the compact process.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice from the beginning of the

 year:
## Quarter 2

In the spring, Baseline Academy will reach out to the district preschools in Southwest Little Rock (Chicot, Mabelvale, Dodd, Wakefield, Geyer Springs, and Meadowcliff). The counselor and homeschool advisors will coordinate a day for the preschool students and parents to visit Baseline Academy. We will also conduct a Kindergarten Round Up in the spring to register and assess incoming Kindergarten students. Flyers will be sent home to current students in English and Spanish communicating the process of registering younger siblings for the upcoming school year.

In the spring, the counselor will collaborate with Cloverdale Middle School and Horace Mann Arts and Science Magnet Middle School to register students and assist with schedules. They will schedule a day for our students to visit the middle schools. The counselor and

## Current reality of effective practice:

## Quarter 4

- A school based team has met to organize Kindergarten Round Up. To accommodate parents, the Round Up was scheduled for 4:00-5:00 on June 2. Parents received a tour of the school and staff shared expectations for kindergarten students. Parents were also informed about Kindergarten Assessments Days.
- Two half days (June 6 and June 8, 2016) were scheduled for Kindergarten Assessments. The Instructional Team assessed the children for math and literacy skills. This was done to expedite BOY assessments and to allow teachers to do some relative pre-planning for the 2016-2017 school year.

GT teacher will ensure that student placement data is provided to the middle schools. All pertinent records, to include RTI data, will be shared with the appropriate school. Baseline Academy will coordinate with the middle schools and share the middle school expectations for parents and students.

## LEADERSHIP TEAM REFLECTION

## Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

As a year 1 Turn Around Elementary School, Baseline Academy made collective decisions from day one in order to contribute to each IMO area. Wise Ways and ADE recommendations were considered in every indicator plan which guided the changes in an organized and structured way. The Leadership Team created and used the Diagnostic Analysis to determine the most meaningful actions made this school year:

- The Baseline faculty and staff collectively created the Baseline Core Values: Family, Leadership, Empowerment, Progress, and Student Centered. Keeping these core values in mind, a School Vision Statement was also created collaboratively. Each morning the entire school assembled in the cafeteria for our school meeting, Wake-Up Baseline, where the core values were discussed daily by administration, teachers, and students.
- The Leadership Team and other major teams were created and a common structure was established to promote organization, and purpose for the meetings. All major teams are expected to work from an agenda and to keep minutes. We believe that we are fully implemented in this area.
- Baseline Academy bases most major decisions on data. We have created a Data Wall and developed goals and expectations on how to use the Data Wall. Once a month PLCs meet after school to analyze unit data for literacy and math. Teachers, with the support of Instructional Facilitators, make lesson plans and interventions based on this data. Behavior Data is collected in order for us to monitor how behavior is impacting the classroom and to try to be proactive in handling sound classroom management. Teacher Survey Data was analyzed during the end of the year Reflection Academy in order to make improvements/set goals for next year and to plan professional development for teachers and staff.
- Two ESL Transition classrooms (K-2 and 3-5) were implemented to provide intervention for students who were brand new to the country and students with very little English language.
- PLCs meet at least once per week to plan and monitor instruction. Facilitators provide support as needed.

If anything, what do you intend to change or modify for the year?
The Leadership Team used the Diagnostic Analysis to make a Priority Improvement Plan that will guide the team over the next few years. This plan will be the focus of the Leadership Team Retreat, which is planned for the summer of 2016.

## School Culture (All IMO Area Specifically 3 and 4)

- Baseline Academy set up a positive incentive system for the 20152016 school year (Blue Jay Bucks). This system will be improved for the 2016-2017 school year by providing teachers and staff with professional development to ensure consistency.
- Baseline Academy used the LRSD Title I compact for the 20152016 school year. For the 2016-2017 school year, a Title I compact will be created based on

Organizational Structure (All IMO Areas Specifically IMO Area1)

- Along with the positive incentive system that was created and implemented for the 2015-2016 school year, Baseline Academy collected behavior data. This behavior data collection system will be improved by researching data collection systems and choosing or creating one that will be easy to use and meet the needs of Baseline.
- By the beginning of the 2016-2017 school year, a plan will be created to streamline information to

## Accountability Systems

 (IMO Areas 1 and 2)- For the 2015-2016 school year, Baseline Academy created three units of instruction for each quarter with a pretest and posttest. Data Night was a time outside of the school day for teachers and facilitators to analyze data and collaborate about instructional needs of students based on the data. The post test data was used to identify students who needed intervention (tier 2 and tier 3) and to set unit goals for tier 1

Instructional Program and Teacher Effectiveness (IMO Areas 1 and 2)

- The Leadership Team will be trained on how to implement Classroom Walkthroughs. Data will be collected and analyzed by the Leadership Team. This information will be shared with the faculty and staff in order to improve classroom instruction.
- Classroom Walkthrough data, Behavior data, and Needs surveys will be analyzed regularly by the Leadership Team. Professional development sessions
the Baseline Core Values; Family, Leadership, Empowerment, Progress, Student Centered. This plan will also include a way to support teachers and monitor progress.
all stake holders. This plan will include a yearly calendar with all activities, team meeting times, and special events that will be shared with faculty, staff, parents, students, and community.
instruction. For the 2016-17 school year, Baseline wants to be more focused on letting the pretest data drive the instruction.
- For the 2015-2016 school year, a plan was created to share and communicate data in order to measure progress toward schoolwide goals. Data folders were set up in Google Drive for sharing data among grades 3-5. For the 2016-2017 school year, Google Drive folders will be set up for grade K-2 and teachers will be trained on how to upload their information.
will be planned and implemented based on this data.

ARKANSAS
DEPARTMENT OF EDUCATION

## SCHOOL LEADERSHIP TEAM'S REPORT FOURTH QUARTER

STUDENT/ TEACHER DATA by Quarter IMO AREA 2: STUDENT PROGRESS AND ACHIEVEMENT

|  | Grade Level | Number of students enrolled |  |  |  | Number of SWD enrolled as of October $1^{\text {st }}$ per grade level | Number of EL students enrolled as of October $1^{\text {st }}$ per grade level | Number of students with 5 or more referrals |  |  |  | Number of students who have been absent 10 or more days (20\% absence rate) |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

|  | 5 | 45 | 46 | 45 | 47 | 9 | 20 | 0 | 0 | 0 | 0 | 1 | 0 | 2 | 2 |

## Comments/ Clarifications:

We have students that have been referred to the office but the district data base tracks only suspensions via AS400. Four students were suspended this quarter. This includes the one student with 5 or more referrals. Individual Behavior Plans are being created for students who need alternative plans in order to be successful in the classrooms. Baseline has created a Behavior Tracker that provides behavior data that can be analyzed to determine who, what, when, and where behavior is problematic so that staff can be preventive as opposed to punitive (See the optional data section at the end of this report.)

Of the total number of students who have been absent 10 or more days, $26.66 \%$ are due to suspensions. Most of the other students' absences are being reported as Personal Illness. Two students had a death in the immediate family.

| $\stackrel{\rightharpoonup}{\text { ® }}$ | Grade Level | Percent of core teachers (Math, Science, Social Studies, ELA) absent 5 or more days (10\%) |  |  |  |  |  | Num SEC <br> students <br> more y <br> grade $p$ <br> Math as $\qquad$ $\qquad$ | of ARY are 3 or below ement in ermined $\qquad$ Tes <br> I $\qquad$ ) | Number of ELEMENTARY students that are 2 or more years below grade placement in ELA as determined by BOY Reading Assessment (WRAP) August/2015 May, 2016 |  | Number of SECONDARY students that are 3 or more years below grade placement in ELA as determined by |  |

|  |  |  |  |  |  |  |  |  |  |  |  |  |  |

## Comments/ Clarifications:

Teacher absentee rate improved this last quarter with the exception of Kindergarten. Two of the three Kindergarten teachers had extenuating circumstances this quarter (death in the family and first trimester of pregnancy).

There was a substantial reduction in the number of students who were two or more years below grade level at the beginning of the year compared to the number of students who were two or more years below grade level at the end of the year. Literacy saw an overall
reduction in grades 2-5 of $8.00 \%$, with the most reduction in second grade (19\%). Math saw an overall reduction of $22.0 \%$ in grades 2 5 , with the most significant reduction in second grade ( $46 \%$ ).

MATH DATA by Quarter for Grades 3-10

Page 12 of 20

## Comments/ Clarifications:

Although students who are 2 or more years behind in math has declined significantly since the beginning of the year, Baseline still has a large number of students 1 year below grade level in grades $3-5(30 \%)$. Since unit pre and post tests are aligned to the rigor of the standards, there are still a substantial number of students with Ds and Fs on the unit post tests. However, the overall growth per grade level from pretest to post test in Quarter 4 has been noteworthy; Third Grade-33.49\%, Fourth Grade-20.76\%, and Fifth Grade 18.72\%.

ELA DATA by Quarter for Grades 3-10

| Grade <br> Level |  | Number of students that failed ELA the previous year | Number of students enrolled this quarter | Number of students with D or Fin an ELA class per quarter 2015-2016 |  |  |  | Number of students assessed on each post-unit assessment for the current quarter |  |  |  | Total number of students assesse d on the postunit test for each grade level <br> (A) | Total number of students with D or F on unit tests in ELA this quarter | Percent of students with D or F on any unit tests in ELA <br> (C) $(B / A) \times 100=C$ |  |  |  |

| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

## Comments/ Clarifications:

Although students who are 2 or more years behind in literacy has declined significantly since the beginning of the year, Baseline still has a large number of students in grades $3-5$ who are 1 year below grade level ( $\mathbf{1 4} \%$ ). Since unit pre and post tests are aligned to the rigor of the standards, there are still a substantial number of students with Ds and Fs on the unit post tests. However, the overall growth per grade level from pretest to post test in Quarter 4 has been noteworthy; Third Grade-19.89\%, Fourth Grade-14.95\%, and Fifth Grade 21.67\%.

## (Optional)

## Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example:

 Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.$>$ Iowa Test of Basic Skills (ITBS)

## Math

There were substantial gains in both first and second grade in math based on the ITBS scores. Math test scores show a schoolwide average percentage gain of $28.5 \%$ from 2015 to 2016.

TBS Scores by Grade by Proficiency Category (Math 2016)

| Grade | Advanced | Proficient | Basic | Below Basic | Total Percent <br> Passing |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $\mathbf{1}^{\text {st }}$ | $7 \%$ | $41 \%$ | $28 \%$ | $24 \%$ | $48 \%$ |

| $2^{\text {nd }}$ | $29 \%$ | $23 \%$ | $48 \%$ | $6 \%$ |  |

ITBS Passing Percentage by Year (Math)

| Grade | Percent Passing 2015-2016 <br> EOY | Percent Passing 2014-2015 <br> EOY | Percent Change |
| :---: | :---: | :---: | :---: |
| $\mathbf{1}^{\text {st }}$ | $48 \%$ | $13 \%$ | $+35 \%$ |
| $\mathbf{2}^{\text {nd }}$ | $52 \%$ | $30 \%$ | $+22 \%$ |

## Literacy

$>$ The majority of the students who are reading on or above grade level expectation scored advanced or proficient on the ITBS assessment. $21 \%$ of the students in first grade and $20 \%$ in second grade who scored basic were 1-5 points away from scoring proficient.
A significant number of first grade students (33/61) and second grade students (25/48) participated in a targeted reading group with Reading Specialists. 66\% of first grade reading intervention students and $40 \%$ of second grade reading intervention students made 1.25 years or more of growth. Administration expects reading level deficits to be significantly closed in the 2016-2017 school year. A reasonable expectation is $75 \%$ grade level reading for rising second and third grade students by the end of the 2016-2017 school year.

ITBS Scores by Grade by Proficiency Category (Literacy 2016)

| Grade | Advanced | Proficient | Basic | Below Basic | Total Percent <br> Passing |

$>E L L$

- SCHOOLWIDE LEP READING PROGRESS DATA: Based on BOY reading level data, 92 of our 131 current $1^{\text {st }}-5^{\text {th }}$ graders or $\mathbf{7 0 \%}$ began the year BELOW grade level in reading. Currently $\mathbf{6 3 / 1 3 1}$ are below grade level or 48\%. That is a 22\% increase in Limited English Proficient students reading on grade level. Another 10 students are just on the cusp of achieving grade level reading.

| Grade | BOY <br> TOTAL 1st -5th grade <br> LEP reading <br> on grade level | \# of LEP reading <br> on grade level at BOY <br> who regressed to <br> reading below level at <br> EOY | \# of LEP reading <br> below level at BOY <br> who advanced to <br> reading on grade level <br> or above at EOY | EOTAL 1st -5 th grade <br> LEP reading <br> on grade level | GROWTH |
| :---: | :---: | :---: | :---: | :---: | :---: |

- ESL TARGETED MATH INTERVENTION DATA: In Q3 \& Q4, $102^{\text {nd }}$ grade English Learners participated in two groups of Targeted Math intervention in Q3 \& Q4.
o 1 scored Advanced and 3 scored Proficient in this year's ITBS Math assessment.
o All but 1 advanced at least one achievement level on the ITBS compared to their last year's score.
o 3 of these students progressed 2 achievement levels.
$>$ Mathematics
Trends (BOY/EOY)
- There was a large increase in percent passing compared to 2014-2015 school year as measured by ITBS and SMI data.
- ITBS and SMI data also shows first and second grades with the strongest growth in the percent of students who are passing, which aligns with the Common Formative Assessments Data.
- All grades showed strong growth, with the majority of students making more than 1.5 years growth as measured by SMI.
- Incoming classes are more prepared for their new grade level than the previous year.

## SMI End of the Year Summary

| Grades | Advanced | Proficient | Basic | Below Basic | Yearly Quantile <br> Point Growth |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 2nd | $8 \%(4 / 48)$ | $29 \%(14 / 48)$ | $44 \%(21 / 48)$ | $19 \%(9 / 48)$ | 346 |
| 3rd | $4 \%(2 / 47)$ | $34 \%(16 / 47)$ | $28 \%(13 / 47)$ | $34 \%(16 / 47)$ | 477 |
| 4th | $3 \%(1 / 39)$ | $10 \%(4 / 39)$ | $28 \%(11 / 39)$ | $59 \%(23 / 39)$ | 475 |
| 5th | $0 \%(0 / 47)$ | $19 \%(9 / 47)$ | $17 \%(8 / 47)$ | $63 \%(30 / 47)$ | 549 |

SMI Percent Passing - Comparison to 2014-2015 Results

| Grade | 2016 EOY Passing | 2015 EOY Passing | Change |
| :---: | :---: | :---: | :---: |
| $\mathbf{2}^{\text {nd }}$ | $37 \%$ | $15 \%$ | $+22 \%$ |
| $3^{\text {rd }}$ | $38 \%$ | $14 \%$ | $+14 \%$ |
| $\mathbf{4}^{\text {th }}$ | $13 \%$ | $8 \%$ | $+5 \%$ |
| 5 th | $19 \%$ |  |  |

SMI Comparison to 2015 BOY (Quantile Point Growth)

| Grade | 2016-2017 Class | 2015-2016 BOY <br> (Current Grade) | Change |
| :---: | :---: | :---: | :---: |
| $\mathbf{3}^{\text {rd }}$ | 346 | 202 | +142 |
| $\mathbf{4}^{\text {th }}$ | 477 | 293 | +184 |
| $\mathbf{5}^{\text {th }}$ | 475 | 386 | +89 |

> Literacy
Trends (BOY/EOY)

- All grades showed growth with the majority of students making 1.5 years or more growth.
- Second and third grade had the highest percentage increase in reading.
- The majority of the students who are reading on or above grade level expectation scored advanced or proficient on the ITBS assessment. The students, who did not, missed the proficiency score by 1 to 5 points.

BOY Reading Assessment (WRAP) (September/2015)
2nd Grade: 12/47 (26\%)
3rd Grade: 13/46 (27\%)
4th Grade: 10/36 (28\%)
5th Grade: 20/45 (44\%)

## EOY Reading Assessment Running Records/Unfamiliar Reads (Mayl2016)

Number of students 2 years or more below grade level at EOY:
2nd Grade: 3/46 (7\%)

```
3rd Grade: 10/48 (21%)
4th Grade: 11/39 (28%)
5th Grade: 15/44 (34%)
```

Number of students 1 year below grade level at EOY:
$2^{\text {nd }}$ Grade: $4 / 46$ (9\%)
$3^{\text {rd }}$ Grade: $5 / 48$ (10\%)
$4^{\text {th }}$ Grade: $7 / 39$ (18\%)
$5^{\text {th }}$ Grade: 6/44 (14\%)

Notes: All grade levels, except $4^{\text {th }}$ grade, saw a reduction in the percentage of students who are reading 2 years or more below grade level. The percentage of $4^{\text {th }}$ grade students reading two or more years behind stayed the same. This factor could be attributed to the fact the reading gap is harder to close as a student progresses through grades. Next year to close this gap, small group instruction and reading intervention will start promptly at the BOY. Phonics will be the primary focus for these students.

## Reading Summaries:

$\mathbf{2}^{\text {nd }}$ Grade: At the beginning of the year, thirty-seven percent (37\%) of our second grade students entered reading on or above grade level expectations. Sixty-seven percent of our second grade students are met or exceeded the end of the year grade level expectations.
$3^{\text {rd }}$ Grade: At the beginning of the year, twenty percent (20\%) of our third grade students entered reading on or above grade level expectations. Seventy-one percent ( $71 \%$ ) of our third grade students are met or exceeded the end of the year grade level expectations.
$4^{\text {th }}$ Grade: At the beginning of the year, forty-five percent (45\%) of our fourth grade students entered reading on or above grade level expectations. Fifty-eight percent (58\%) of our fourth grade students are met or exceeded the end of the year grade level expectations.
$5^{\text {th }}$ Grade: At the beginning of the year forty-one percent (41\%) of our fifth grade students entered reading on or above grade level expectations. Fifty-two percent (52\%) of our fifth grade students are met or exceeded the end of the year grade level expectations.

## Targeted Reading Program

- Overall Growth
$41 / 68$ or $60 \%$ of the targeted students showed accelerated growth of 1.25 or more years
- First Grade
$22 / 33$ or $66 \%$ of the targeted students showed accelerated growth of 1.25 or more years
- Second Grade
$10 / 25$ or $40 \%$ of the targeted students showed accelerated growth of 1.25 or more years
- Third Grade
$8 / 9$ or $88 \%$ of the targeted students showed accelerated growth of 1.25 or more years

## > Quarter 4 Behavior Tracker Data Summary

- There were 53 major infractions that resulted in an administrative consequence.
- There were 26 minor infractions that resulted in an administrative consequence.
- Only $3.8 \%$ of administrative consequences resulted in out- of- school suspension and $9.3 \%$ resulted in in-school suspension.
- $50 \%$ of all behavior infractions are from second grade. The Counselor, Behavior Specialist, and Day Springs, our mental health provider, work with many of the second grade students regularly. Individual Behavior Plans have been created and implemented for use with these students.
- The primary behavior infractions that result in a referral are insubordination/defiance (27.6\%) and physical aggression (22.8\%).
- Parents are contacted for all major infractions and repeat minor infractions.

# 45-DAY PLAN 

## FOURTH QUARTER

2015-2016 School Year

## IMO Area 1: Change in Teacher and Leader Practice

## ADE Recommendation:

The Leadership Team should focus directly on student achievement by reviewing grade level formative assessments to determine needed classroom instructional support.

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

## Current reality of effective practice (Assess where we are):

The leadership team continues to utilize the instructional analysis tool to make decisions regarding student performance on multiple assessments. The data analysis determines which students need enrichment outside the classroom to address academic deficits in literacy and math. Communication between the core instructional teams and the leadership team has increased.

The ESL Coordinator position has been posted and interviews will be conducted during the summer. We are working with the district in an attempt to hire a Spanish interpreter/paraprofessional to work with our ESL parents and students.

## Quarterly Objective:

Increase the resources available to parents and students with an emphasis on the ESL population.

| Tasks | Target Date | Completion Date | Person assigned | Met | Not Met | Evidence of Completion |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1. In an effort to increase our focus on science, representatives from the science department will be invited to a leadership team meeting to discuss ways the team can help improve science scores (i.e. reasoning skills PD...). (ID10) | 4/4/16 | 4/4/16 | Anthony |  |  | Leadership Sign In and Minutes |
| 2. Host a parent center open house (Pastries for Parents) that will survey parents on ways we can help then to help their kids and encourage active engagement in academics. (ID10) | 4/21/16 | 4/21/16 | Smothers |  |  | Agenda <br> Sign In Sheets <br> Completed Surveys |
| 3. Make a request with justifications to hire a full-time certified, bilingual compliance person to assist with teacher support and training.(ID10) | 6/2/16 | 5/12/16 | Ruffins |  |  | Request Forms Email Correspondence |
| 4. Make a request with justifications to hire a noncertified interpreter/paraprofessional in an effort to increase resources | 6/2/16 | The principal has been in contact with the district director of the English for Speakers of Other Languages | Ruffins |  |  | Request Forms Email Correspondence |

| for our growing ESL population. <br> (ID10) | (ESOL) <br> department <br> regarding funding <br> for this position. |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |

Include additional task lines as needed.

## IMO Area 1: Change in Teacher and Leader Practice

## ADE Recommendation 1:

The ADE Review Team recommends the development of a systemic data collection and analysis process to include formative assessments and instructional units to individualize instruction based on pre/posttests.

## ADE Recommendation 2:

The School Leadership Team should give specific attention to progress of both, Special Education and ELL Students in specific classrooms.

## ADE Recommendation 3:

Progress of these students should also be monitored and assessed.

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit
typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

## Current reality of effective practice (Assess where we are):

Instructional units and pre/posttests are now used throughout all content areas. Consistency is still needed in some non-core areas. Core teachers are analyzing data and using the data to develop remediation, differentiation and enrichment plans. Teachers also use the data to address gaps in curriculum. Some non-core teachers are still struggling to figure how to use data to inform instruction; however, they are looking at their data and working to resolve this issue. Teachers in a variety of content areas are using Criterion Writing in an effort to increase the use of writing in content areas other than English Language Arts.

## Quarterly Objective:

| Increase opportunities to use data to guide instruction. |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Tasks | Target Date | Completion Date | Person assigned | Met | Not Met | Evidence of Completion |
| 1. $4^{\text {th }}$ quarter pre-/post assessments will be developed in all content areas. (IIB02) | 6/2/16 | 6/2/16 | Anthony |  |  | Pre-/Post Assessments Collaboration and Team Minutes Observation Notes |
| 2. Using Criterion Writing, teachers will assess student writing for grammar, style, mechanics, and usage while providing immediate feedback to students. (IIB04) | 6/2/16 | 6/2/16 | Braswell |  |  | Reports from Criterion Writing |

## IMO Area 3: Student Safety and Discipline

## ADE Recommendation: Not Applicable

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

## Current reality of effective practice (Assess where we are):

The targeted attendance group began meeting on a regular basis. Students appeared to make a significant effort to improve their attendance. The data is still incomplete at this time. We are still working to decrease the number of tardies, particularly during transition times between classes.

Quarterly Objective:
Get clarity and revise the way we address behavior and attendance issues.

| Tasks | Target <br> Date | Completion <br> Date | Person <br> assigned | Met | Not <br> Met | Evidence of Completion |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| 1. The targeted attendance group <br> and their attendance coaches <br> will meet together once a month <br> with a counselor providing <br> workshops on the importance of <br> good attendance. (IIIC10) | $5 / 31 / 16$ | $5 / 20 / 16$ | McCollum |  |  | Agenda <br> Sign in sheets |
| 2. Request technical <br> assistance/professional <br> development in the form of a | $5 / 27 / 16$ | We are still <br> sttempting to <br> schedule a date <br> for this PLC. We |  |  |  |  |

Include additional task lines as needed.

## IMO Area 4: Family and Community Engagement

## ADE Recommendation: Not Applicable

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

## Current reality of effective practice (Assess where we are):

The revised home/school compact was reviewed with parents and staff members and has been posted so that it is available to all parties.

## Quarterly Objective:

Make the Home/School Parent Compact available to all parents, students and staff.

| Tasks | Target <br> Date | Completion <br> Date | Person <br> assigned | Met | Not <br> Met | Evidence of Completion |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| 1. Post the updated compact to <br> the website, Cloverdale staff <br> folder and EdLine. (IVA01) | $5 / 20 / 16$ | $5 / 20 / 16$ | Larry |  |  |  |
| 2. Review compact at PTSA and <br> faculty meetings. (IVA01) | $5 / 5 / 16$ | $5 / 3 / 16$ | Bernard |  |  |  |

Include additional task lines as needed.

## IMO Area 4: Family and Community Engagement

## ADE Recommendation: Not Applicable

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice (Assess where we are):

Students from our three main feeder schools came to Cloverdale and met with the administrators, toured the campus, met some of the sixth grade staff members and received information regarding the adjustment to a middle school schedule... Communication has been established between the instructional facilitators at Cloverdale and our feeder high school regarding transitioning to Read 180 and Math 180 classes at the high school level so that there is no gap or repeat of instruction.

## Quarterly Objective:

Implement strategies to prepare students, parents and staff for the transition from elementary to middle school and from middle school to high school.

| Tasks | Target <br> Date | Completion <br> Date | Person <br> assigned | Met | Not <br> Met | Evidence of Completion |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| 1. Extend an invitation to Watson, | $5 / 10 / 16$ | $5 / 10 / 16$ | Baylark |  |  |  |
| Wakefield and Baseline <br> Elementary Schools for 5 |  |  |  |  |  |  |
| grade students assigned to <br> Cloverdale next year (and their <br> parents) to attend a Cloverdale <br> Informational Meeting. Students |  |  |  |  |  |  |

| will receive a gift bag and a <br> Cloverdale fact sheet to take <br> home with them. (VA01) |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 2. The Cloverdale instructional <br> facilitators will meet with the <br> McClellan instructional <br> facilitators to ensure a smooth <br> transition of Read/Math 180 <br> and System 44 students to high <br> school. (VA01) | $6 / 1 / 16$ | $6 / 1 / 16$ | Braswell |  |  |

Include additional task lines as needed.

# PRINCIPAL'S REPORT FOURTH QUARTER 

Has there been a meeting with the District Leadership Team to review the school's needs and progress?

## YES or NO (Please circle)

If yes, what support have you received from the district?

- Weekly reports submitted and comments made
- Bi-weekly meetings with school-based school improvement specialists
- Communication from ADE forwarded

Please describe the interventions your school is utilizing specific to closing the achievement gap (Focus) or for improving the outcomes for students basic and below basic (Priority). (Do not include general school wide efforts.)

- Math and READ 180/System 44 were implemented at the beginning of the school year. We have identified the students who need to continue in phase 2. Some students were able to exit based on their lexile/quantile scores and teacher recommendations. This includes students who will be enrolled in these classes at the high school level this year. Student placement is currently being determined based on SMI/SRI scores from the 2015-2016 school year.
- In our efforts to address the needs of our ELL students, English Language Development (ELD) classes were created for students who scored L1R1W1S1 on the LAS or ELDA. Students will exit the ELD class intervention based on spring 2016 ELPA21 scores.
- A full-time on-site School Improvement Specialist was put in place. He provided professional development and worked with instructional teams, collaboration groups, the leadership team, and the building principal. He brought transparency to some of our barriers. He served as a liaison between the local team, the district team and the state as well as a conduit between content teams and the leadership team. Actions from leadership put in place in classrooms because of communication from the SIS. We will continue to have this position as long as we are a priority school.
- City Year focus groups were established due to weaknesses in academics, behavior and attendance. They fill the gap for students who needed both Read180 and Math180, but are only able to take one of those classes. In addition, they counseled students who struggled with behavior and social issues. Criteria for City Year include high poverty and test scores. They served as a resource for both staff and students.
- Achieve3000 began as a pilot program in the ELD classes in November 2015. The students participating in Achieve3000 nearly doubled their Lexile score from an average of 123L in November to an average of 230L in May.

What support(s) have you or your team received from the external provider, internal SIS, and the ADE SIS Team?

## Internal SIS:

- Disseminates information
- Works with process manager to input information into Indistar
- Participates and provides input in district leadership and instructional team meetings
- Attends trainings and conferences
- Provides job-embedded professional development
- Monitors tasks for completion
- Submits weekly report on school's progress to state and district

## ADE SIS Team:

- Provides professional development
- Provides feedback and recommendations
- Monitors 45-day plan
- Provides technical assistance
- Onsite visit

What are the barriers, if any, in improving student outcomes?

- Teacher absences - We have been brainstorming ways to repair this issue, but have so far been unable to
- Students not in class due to level 3 and 4 sanctions - Classroom rituals and routines will be reviewed and revised prior to the beginning of the 2016-2017 school year
- Lack of resources to meet the needs of LEP students with limited exposure to the English language outside of the school setting - An ESL Coordinator will be hired over the summer and the number of ELD classes will be increased for the next school year
- Inability to communicate effectively with non-English speaking parents - We are working to create a position for an interpreter/paraprofessional to work with both parents and students
- Apathy from some parents - Our new parent coordinator is working positively with parents to decrease this concern

How is your leadership team monitoring student progress in the skill area of science?

- Assessments - formative, summative, performance based
- Student Academic Improvement Plans
- Analyzing data from online textbook assessments
- Pre/posttest data and reflections submitted by all science teachers
- Science portion of the ACT Aspire

How is your leadership team monitoring student progress in the skill areas of math, reading, writing? How are you responding to the results?

- Pre/posttest results
- Math Inventory/Reading Inventory/Phonics Inventory results with programming based on these results
- Instructional analysis tool
- Interim assessments
- Reflection Tool
- Criterion Writing
- Achieve3000

How are you responding to the results?

- Designed appropriate reflection tools
- Planning appropriate professional development
- Data analysis with teachers
- Additional support for teachers
- Curriculum gap analysis
- Identify weak areas and facilitate student reflection
- Collaborative planning
- Schoolwide push for vocabulary building
- Program decision to keep SRI/SMI assessments

What have been the most meaningful decisions and actions made by the School Leadership Team this quarter as documented in the minutes?

- Making connections with high school and elementary school instructional facilitators
- Celebrating student growth
- Collaboration with science teachers
- Posting position for an ESL coordinator
- Parent Center open house

If anything, what do you intend to change or modify for the next quarter?

- Continue to increase focus on science
- Increase push for student organization skills
- Develop parent workshops that will encourage active engagement in academics
- Early detection of high-priority students, based on attendance, academic and discipline trend data, for prevention and intervention strategies
- Additional time spent on pull-ins and push-outs for ELL students
- Expand awareness of resources available to the ELL population

## SCHOOL LEADERSHIP TEAM'S REPORT FOURTH QUARTER

## STUDENT/ TEACHER DATA by Quarter (IMO AREA 2: Student Progress and Achievement)

| Grade Level | Number of students enrolled |  |  |  | Number of SWD enrolled as of October $1^{\text {st }}$ per grade level | Number of EL students enrolled as of October $1^{\text {st }}$ per grade level | Number of students with 5 or more referrals |  |  |  | Number of students who have been absent 10 or more days ( $20 \%$ absence rate) |  |  |  |

## Comments/ Clarifications:

We developed a mentoring program earlier in the year, but realized that we are not truly equipped to mentor. We need to monitor this program and make decisions before assigning student next year. We will continue to track students with a large number of absences on data dashboard.

The reported discipline data accurately depicts the school climate. Very few of our students have 5 or more discipline referrals. Most referrals are category 1 offenses.

Cloverdale has a pretty high attendance rate. The majority of attendance issues are related to student tardies. The parents of students with a large number of absences are mailed letters warning them of this issue. Phone calls are automatically generated each time a student is absent. Court referrals are made by the attendance clerk on a regular basis.

|  |  |  |  |  |  |  |  |  |  |  |  |  |  |

## Comments/ Clarifications:

There is no system in place at this time to encourage positive teacher attendance. We tried a monetary reward a few years ago system through the SIG grant, but there was little to no improvement.

There were several long-term teacher absences that occurred this past year. Several other teachers missed more than 5 days as well. Most of these absences was related to teacher illness/sick leave. Some was due to professional development, but not an excessive amount. The leadership team is concerned about teacher absences and has talked about ways to decrease the number of teacher absences. This is definitely an area that we would like to improve on.

The leadership team is concerned about the increase in students that are 3 or more years below grade placement in ELA in the $7^{\text {th }}$ and $8^{\text {th }}$ grades. This will be addressed at the beginning of next school year.

|  | Grade Level | Number of students that failed Math the previous year | Number of students enrolled this quarter |  | of in M qu 2015 | den <br> cla er <br> 016 | with per | Numb each p | of stud t-unit curre | ts ass sessm quarte | sed on for the | Total number of students assessed on the post-unit tests for each grade level <br> (A) | Total number of students with D or F on unit tests in Math this quarter <br> (B) | Perc D or | (A) | $00=$ | with ts in |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | 1st | 2nd | 3rd | 4th | Unit 1 | Unit 2 | Unit 3 | Unit 4* |  |  | 1st | 2nd | 3rd | 4th |
|  | 6 | 42 | 224 | 91 | 74 | 80 | 43 | 209 | 202 | 204 |  | 615 | 268 | 75 | 43 | 49 | 44 |
|  | 7 | 35 | 180 | 64 | 78 | 86 | 86 | 138 | 141 | 150 |  | 429 | 292 | 51 | 58 | 59 | 68 |
| $\checkmark$ | 8 | 37 | 200 | 32 | 56 | 61 | 68 | 161 | 161 | 178 |  | 517 | 260 | 89 | 77 | 69 | 50 |
| $\underset{y}{\infty}$ |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  | Example |  |  |  |  |  |  | 100 | 90 | 95 | N/A | 285 | 57 | 20\% |  |  |  |

## Comments/ Clarifications:

Teachers are asked to reflect on pretest/posttest results and determine a differentiation plan/remediation plan respectively. Teachers are asked to examine the standards that were not mastered by the majority of the students. The standard is taught using a different approach or strategy. Teachers are free to choose their plans to best meet the needs of their students. Teachers are also asked to use their collaboration to discuss strategies to reinforce/reteach/enrich learning for students. Teachers have also used flex grouping to remediate/enrich students. With flex-grouping, students who need to revisit or enrich a particular skill will be matched with a teacher who has past success with teaching that skill according to the data. During collaborations, teachers are engaged in collegial conversations with each other or the Math IF in order to build capacity across the department.

Teachers and students have expressed concern with test exhaustion. There are a greater number of $D / F$ 's on the posttests. There has been some discussion in the leadership team on how to alleviate some of the testing tension in classrooms.

## LEADERSHIP TEAM REPORT CONTINUED

# End of Year Summary Report FOURTH QUARTER 

2015-2016 School Year

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools, which include a description of the teams' purposes, and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

Current reality of effective practice from the beginning of the year:

- GSGTA's Leadership team was established and met regularly last year. (2014-15)
- Agendas and minutes of the meeting were kept and disseminated to staff through email.
- Bylaws were created.
- The Indistar school improvement process is new to all staff.
- Instructional teams will continue to have agendas and recorded minutes of their meetings.
- There is limited or no participation by PTA at the end of last year.

## Current reality of effective practice:

Established GSGTA teams: school leadership team (SLT), instructional teams, and a now defunct school community council. (PTA was active at the beginning of the year but parents disengaged once the closing of the school was announced.) The teams were supported by district policy and have bylaws, which describe their purpose and govern their membership and operation. The SLT met biweekly (or twice a month), the instructional teams usually met once a week, and the school community council met monthly. Most teams worked from agendas and recorded minutes of the meetings. By the middle of the year, the SLT team became much more data focused in determining actions to be taken. The SLT analyzed data to assess, plan, monitor and develop improvement plans (tasks) to address needs revealed by the data; some instructional teams were proficient in analyzing their own data and determining next steps for instruction.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

## Current reality of effective practice from the beginning of the year:

- Instructional teams meet and plan for instruction weekly.
- Some teachers are administering unit pre- and post-tests.
- Some teachers are using pretest data to differentiate instruction.
- The administrator observes instruction regularly and provides feedback to teachers in emails or through conference. Feedback is also given to some students.

## Current reality of effective practice:

Most grade level instructional teams met at least once a week to plan units of instruction and to develop unit assessments that were used as pre- and post-tests. The goal was to assess three times per quarter. Most instructional teams became more proficient with reviewing pre-/post-test data for the purpose of differentiating instruction, re-teaching, and providing extra help for students. The instructional team members were reflective in their data review. Some students needed intense intervention instruction for foundational deficits. Some students received this opportunity, others did not due to time constraints and staffing issues. One main ways teachers differentiated instruction in the classroom was by flexibly pairing and grouping students based on their learning needs. Students groups rotated between a small teacher groups and other prescribed workstations that were developed to help address the varying needs of students. Teachers felt pinched for time to pre- and post-test students in all areas, and student motivation to take tests was sometimes a challenge. Professional growth by teachers included rich learning activities such as lesson study and STEM classes through the UALR JAVITS grant.

Page 2 of 12

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

## Current reality of effective practice from the beginning of the $\quad$ Current reality of effective practice:

## year:

- Responsive classroom strategies are in place in most classrooms and professional development is ongoing.
- Norms, expectations, and procedures are reviewed daily.
- A school-wide behavior plan is in place.
- Team building is an integral part of daily school life. It is a very intentional goal of GSGTA to build the learning community every day.
- Community Helpers lead daily morning activities and serve as leaders in our school.
- Students participate in multi-age classrooms during Imaginoons and clubs.
- These strategies have greatly influenced our students' confidence in learning that is impacting achievement.
"Responsive Classroom" strategies were utilized to build community and structure for classroom management. The principal established a process for behavior management. Clear, consistent, positive classroom management protocols and classroom rituals and routines were developed and executed by most teachers. These procedures were taught and reinforced daily with the students. A system for collecting behavior data was established and implemented. Collected behavior data was analyzed by SLT and used to help reduce disruptions to instruction. Intense support was given to some new teachers to help with consistent classroom management practices. Growth in their proficiency with classroom management increased. Individual behavior plans were made for students who required more structure and incentive for acceptable and improved behavior.

| IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT |  |  |
| Effective Practice within Category: <br> Defining the purpose, policies, and practices of a school community (IVA01) <br> Description of full implementation of the Effective Practice and/or Recommendation: <br> No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, <br> school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents <br> can work together to help students achieve the state's standards. <br> Current reality of effective practice from the beginning of the <br> year: <br> Many parents have signed the school's Title I Compact.$\quad$ Current reality of effective practice: |  |  |

$\square$
IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

Current reality of effective practice from the beginning of the year:

Third through fifth grade teachers are participating in a three year commitment with the JAVITS grant STEM program to ensure they have full understanding of the careers and colleges to better equip students for the future.

Current reality of effective practice:

Students enrolled in SLUFY, SPARK, and EXXON Mobil Engineering Camp summer programs. Students were excited to be apart of these programs.

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

By committing ourselves to using the Indistar process with fidelity, we steadily improved our school learning community throughout the year. The process helped us keep a pulse on what was occurring in our school and to give teacher and student support where it was most needed.

We changed the format of our leadership meeting. We began to analyze various data at the beginning of each meeting before ever starting any discussions. This information drove our discussions and made the tasks we created much more meaningful. Also, we changed to only creating tasks that could be completed in two weeks. This was doable both in terms of completing the tasks, for the actual monitoring of the tasks, and for enabling us to consistently improve our school process. Tasks didn't get "swept under the rug". Tasks that were not getting accomplished were re-evaluated for their usefulness. New tasks were created as old tasks were completed.

The decision to hold a vertical planning session (3-5 teachers) after the ASPIRE interim tests proved very valuable. Teachers analyzed ASPIRE interim assessments and discussed next steps for instruction and test-taking skills. The session provided an opportunity for teachers to collaborate across grade levels sharing strategies that work in their classroom. This decision was implemented after it was apparent teachers needed more opportunities to share effective instructional strategies, especially with regards to preparing students to optimally perform on high-stakes tests. The diversity of grade levels and backgrounds yielded rich, quality discussions which teachers greatly appreciated. More opportunities for meaningful vertical collaboration need to occur.

Using lesson study as a vehicle for teacher learning has (once again) proven to be very valuable. Vertical groups of teachers are enpowered by this dynamic learning process because they are planning and observing students in an actual lesson they created. Individual and group reflection on the data collected on the students' response to the lesson provides rich sources for discussion on content and effective instructional practices.
If anything, what do you intend to change or modify for the year? The school is closed.

Comments/ Clarifications:

ELA DATA by Quarter for Grades 3-10

## Comments/ Clarifications:

The high numbers of Ds and Fs in second grade are due to one teacher's heavy emphasis on completing lots of paperwork for grades. Some students were not able or were unwilling to do this work.

## (Optional)

Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example: Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.

| National Percentile Rank - IOWA ASSESSMENT |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | ELA |  |  | MATH |  |  | Core Composite |  |  |
| SCHOOL | 2015 | 2016 | +/- | 2015 | 2016 | +/- | 2015 | 2016 | +/- |
| GSGTA - 2nd Grade | 44 | 61 | +17 | 39 | 64 | +25 | 40 | 60 | +20 |

This is the most current data we have on our second grade students whose average score was much higher than the previous year's second grade students.

# End of Year Summary Report 

## FOURTH QUARTER

2015-2016 School Year

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

## Current reality of effective practice from the beginning of the <br> Current reality of effective practice:

 year:- Leadership Team bylaws have been established.
- The Leadership Team needs to establish a subcommittee that meets every two weeks to analyze math and literacy data that is used to determine professional development and identify resources for teachers.
- Leadership Team and Instructional Teams established and meet with agendas and minutes.
- No Student Team, Management Team, or School Community Council has been established.
- A plan established for 2 -way communication.
- SRI, SMI, and CFA data is being discussed at team meetings

## Fourth Quarter

1. School Leadership Team meets twice a month. Agendas and minutes are posted in Indistar and shared with faculty members via email and a common drive.
2. Instructional/Collaboration Teams (common subject) meet at least twice per week during 52 minute collaboration periods. Minutes and agendas (Collaboration Logs) are uploaded to a common drive.
3. Management/Administrative Team meet each Tuesday morning with agendas and minutes kept on file electronically.
4. School Leadership Team is reviewing school performance data to determine school improvement and professional development needs.

|  | 5. Students are providing their input as it relates to school improvement in a variety of formats. <br> 6. Each team has a specific purpose and scheduled time to meet. Teams work from agendas and minutes. |

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.
Current reality of effective practice from the beginning of the year:

- Compact exists.
- Parents, staff, and students are not aware of it.

## Current reality of effective practice:

## Fourth Quarter:

- Hall's Parent Compact outlines how parents, school staff, and students will share responsibility for improving academic achievement.
- The compacts describes how the school and parents can work together to help students achieve the state's standards.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice from the beginning of the year:

- A guidance plan exists.
- Recent graduates are tracked.

## Current reality of effective practice:

## Fourth Quarter:

- Hall's Counselors, AVID Coordinator, and Career Coach work to provide students in $9^{\text {th }}-12^{\text {th }}$ with opportunities to explore their career options and plan for career or college after high school.
- Counselors maintain contact with recent graduates, and are updating records to track their post-secondary activities.
- A data base has been developed to gather the recent graduate information.
- Advertisement of opportunities for summer enrichment programs, ACT preparation classes, college visits to campus, and other career and college related activities are ongoing.

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

The decision to be more open with communication with the staff regarding the school improvement efforts, SLT meetings, and professional development plans.

We can attribute the changes to the overwhelming feeling of not getting much accomplished in the way that we've worked in the past. In an effort to make a difference in our outcome, we recognized that we needed to make a change in the way that we operate as an SLT.

If anything, what do you intend to change or modify for the year?

- Implement meaningful, necessary changes in regards to school climate. We would like for our team to be able to discuss changes that will make a major impact in our school. If we're going to look at data, there must be some follow-through in terms of support and accountability with the teachers in regards to that data.
- There will be a school wide initiative to implement AVID (Achievement Via Individual Determination) instructional strategies which are best teaching practices.
- Implement meaningful professional development opportunities that meet the teaching and learning needs.
- Provide ongoing support and accountability when implementing professional development to the instructional staff.
- Redesigning the $9^{\text {th }}$ Grade Academy.

## SCHOOL LEADERSHIP TEAM'S REPORT FOURTH QUARTER

STUDENT/ TEACHER DATA by Quarter IMO AREA 2: STUDENT PROGRESS AND ACHIEVEMENT

| Grade Level | Number of students enrolled |  |  |  | Number of SWD enrolled as of October $1^{\text {st }}$ per grade level | Number of EL students enrolled as of October $1^{\text {st }}$ per grade level | Number of students with 5 or more referrals |  |  |  | Number of students who have been absent 10 or more days (20\% absence rate) |  |  |  |

|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  | , |  | - | - |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  | - |  |  |  |  |  |  |

Comments/ Clarifications: There was an influx of EL students that enrolled into the school during the $2^{\text {nd }}$ semester. More referrals were actually documented within the AS400 system during the $4^{\text {th }}$ quarter. As a result of noticing from previous quarters' data, the assistant principals entered more referrals into the system during the $4^{\text {th }}$ quarter. As we prepared for the testing cycle, we identified students who were on attendance rosters as absent for multiple days and contacted parents/guardians. Several students were then removed from the teacher rosters. It has been discovered that many students are not following the proper protocols to un-enroll from school. This has prompted discussions to determine a better system for supporting student enrollment and disenrollment.

|  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |

Comments/ Clarifications: It was not required by the district to conduct a second and third SMI or SRI assessment. Some math and literacy teachers chose to conduct a second and a third while the vast majority did not. The percentage of teacher absences went down in the $4^{\text {th }}$ quarter. We feel that we can attribute this to more conversations being held regarding the importance of being in the classroom. Additionally, the school spirit and morale was boosted with successful spring sports and other student activities.

MATH DATA by Quarter for Grades 3-10

Comments/ Clarifications: * Percent of students with D or F on any unit tests and number of students tested were not reported in part due to the following: The math and literacy teachers chose to take the option of utilizing the semester exam rather than conducting a $3^{\text {rd }}$ pre/post exam. Several
math and literacy teachers voluntarily conducted a $3^{r d}$ pre/post assessment and shared their analysis of those results with the local SIS due to the timing of when the SLT met in addition to graduation, AP exams, and other end of year requirements, the semester exam results were not analyzed by the entire SLT. Members from the SLT have reviewed the semester exam results and determined that next school year more emphasis will be placed on providing training and development in the purpose, planning, effective implementation, and data analysis for instructional use of Pre/Post tests. Please see the semester exam charts located in the "other data" category.

ELA DATA by Quarter for Grades 3-10

Comments／Clarifications：＊Percent of students with D or F on any unit tests and number of students tested were not reported in part due to the following：The math and literacy teachers chose to take the option of utilizing the semester exam rather than conducting a $3^{\text {rd }}$ pre／post exam．Several math and literacy teachers voluntarily conducted a $3^{r d}$ pre／post assessment and shared their analysis of those results with the local SIS due to the timing of when the SLT met in addition to graduation，AP exams，and other end of year requirements，the semester exam results were not analyzed by the entire SLT．Members from the SLT have reviewed the semester exam results and determined that next school year more emphasis will be placed on providing training and development in the purpose，planning，effective implementation，and data analysis for instructional use of Pre／Post tests． Please see the semester exam charts located in the＂other data＂category．

## （Optional）

Do you have other data sources that support and／or identify that you are making gains in student outcomes（For example： Interim assessments such as ACT Aspire，TLI，etc．）？You may include a chart to describe your data．

The semester exam class averages were not analyzed by the SLT due to the timing of when tests were given and the end of teacher contracts ending．

test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum.

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).
Current reality of effective practice from the beginning of the $\quad$ Current reality of effective practice: year:

Teachers taught schoolwide and classroom rituals/routines and rules for the first 3 weeks of the school year. All administrators and teachers follow the due process expectation outlined in the Little Rock School District Handbook for category I offenses.

A discipline committee has been formed in an attempt to reduce category one infractions. All administrators and teachers follow the due process expectation outlined in the Little Rock School District Handbook for category I offenses. Some teachers consistently teach the rules and procedures while others are inconsistent.in their reinforcement of classroom rules.

IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

## Current reality of effective practice from the beginning of the

 year:Henderson Middle School Learning compact has been developed for distribution to parents being served.

## Current reality of effective practice:

Henderson Middle School Learning compact has been developed for distribution to parents being served. The learning compact will be modified during the summer for redistribution for the 2016-2017 school year.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

N／A

Current reality of effective practice：

ARKANSAS
DEPARTMENT
OF EDUCATION

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

1. Decision to implement math and literacy intervention
o SRI and SMI data determined that these programs will benefit student growth
2. Resurrection of National Junior Honor Society and Beta Club
o To meet the need of honoring students' academic success as well as promote peer tutoring within the building for 20162017 school year.
3. Formation of a discipline committee to be implemented during the 2016-2017 school year.
o This will reinforce school wide ritual and routines as well as obtain buy in from stakeholders on the development of a new discipline policy.

If anything, what do you intend to change or modify for the year?
o Create a calendar of events to outline academic incentives as well as behavior incentives
o Create a calendar that outlines various data sources that the leadership team will review at leadership team meetings.
o Start of the leadership team meeting with an "ice breaker" or activity to create excitement about leadership meeting.

Comments/ Clarifications:

ELA DATA by Quarter for Grades 3-10

## Comments/ Clarifications:

## (Optional)

## Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example:

 Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.Interpretation of the $4^{\text {th }}$ Quarter SRI Data, there were 249 sixth graders that were tested:

1. 13 students scored Advanced in the Year-End Proficiency Range for 6th Grade
2. 31 students scored Proficient in the Year-End Proficiency Range for $6{ }^{\text {th }}$ Grade
3. 72 students scored Basic in the Year-End Proficiency Range for $6^{\text {th }}$ Grade
4. 133 students scored Below Basic in the Year-End Proficiency Range for $6{ }^{\text {th }}$ Grade

Interpretation of the $4^{\text {th }}$ Quarter SRI Data, there were 222 seventh graders that were tested:

1. 14 students scored Advanced in the Year-End Proficiency Range for $7^{\text {th }}$ Grade
2. 37 students scored Proficient in the Year-End Proficiency Range for $7^{\text {th }}$ Grade
3. 64 students scored Basic in the Year-End Proficiency Range for $7^{\text {th }}$ Grade
4. 107 students scored Below Basic in the Year-End Proficiency Range for $7^{\text {th }}$ Grade

Interpretation of the $4^{\text {th }}$ Quarter SRI Data, there were 281 eighth graders that were tested:

1. 24 students scored Advanced in the Year-End Proficiency Range for $8^{\text {th }}$ Grade
2. 60 students scored Proficient in the Year-End Proficiency Range for 8 th Grade
3. 86 students scored Basic in the Year-End Proficiency Range for $8^{\text {th }}$ Grade
4. 111 students scored Below Basic in the Year-End Proficiency Range for $8^{\text {th }}$ Grade

Interpretation of the $4^{\text {th }}$ Quarter SMI Data, there were 293 sixth graders that were tested:

1. 201 of them completed the SMI assessment; 92 of them currently have an IT (Incomplete Test)
2. 2 students scored Advanced in the Year-End Proficiency Range for $6{ }^{\text {th }}$ Grade
3. 17 students scored Proficient in the Year-End Proficiency Range for $6^{\text {th }}$ Grade
4. 46 students scored Basic in the Year-End Proficiency Range for $6^{\text {th }}$ Grade
5. 136 students scored Below Basic in the Year-End Proficiency Range for $6{ }^{\text {th }}$ Grade

Interpretation of the $4^{\text {th }}$ Quarter SMI Data, there were 257 seventh graders that were tested:

1. 222 of them completed the SMI assessment; 35 of them currently have an IT (incomplete test)
2. 1 student scored Advanced in the Year-End Proficiency Range for 7th Grade
3. 17 students scored Proficient in the Year-End Proficiency Range for $7^{\text {th }}$ Grade
4. 43 students scored Basic in the Year-End Proficiency Range for $7^{\text {th }}$ Grade
5. 161 students scored Below Basic in the Year-End Proficiency Range for $7^{\text {th }}$ Grade

Interpretation of the $4^{\text {th }}$ Quarter SMI Data, there were 205 eighth graders that were tested:

1. 119 of them completed the SMI assessment; 86 of them currently have an IT (incomplete test)
2. 1 student scored Advanced in the Year-End Proficiency Range for $8^{\text {th }}$ Grade
3. 9 students scored Proficient in the Year-End Proficiency Range for $8^{\text {th }}$ Grade
4. 43 students scored Basic in the Year-End Proficiency Range for $8^{\text {th }}$ Grade
5. 158 students scored Below Basic in the Year-End Proficiency Range for $8^{\text {th }}$ Grade
$\square$

# End of Year Summary Report 

## FOURTH QUARTER

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

## Current reality of effective practice from the beginning of the year: <br> Current reality of effective practice: <br> $4^{\text {th }}$ Quarter:

1st Quarter

1. School Leadership Team: Literacy and Math Lead Teachers, Literacy and Math Instructional Facilitators, 9th grade Academy Lead Teacher, City Year Project Manager, Counselor, District Math Lead Teacher, Principal, Assistant Principals.
2. Campus Leadership Team: All Instructional department chairs, Parent Involvement Coordinator, Instructional Technology Specialist, Guidance counselor, Parent, Student representative, Principal and Assistant Principal.
3. School Community Council: Selected Parents for our student body.
4. Student Government Association: Elected student officers from each grade level
5. Collaboration Teams: Common content teachers meet 3 times a week to create CFA's, analyze data, lesson planning.
The School Leadership Team meets on the 1st and 3rd Wednesday of every month. Campus Leadership meets the 2nd Wednesday of every month,
1.The School Leadership Team continues to meet twice monthly. We have continued to share minutes via email of the meetings with staff. We have received comments that this has helped staff's understanding of work that the SLT is doing. We continue to encourage feedback from staff. We added the SLT minutes on the faculty agenda as a standing item to elicit more indepth feedback from all staff members. We surveyed our staff to determine the SLT's effectiveness; 69\% of teachers surveyed feel that the SLT has a plan to increase student achievement.
6. The Campus Leadership Team continues to meet monthly on the 2nd Wednesday of each month. This team continues to discuss management and building level issues. They also are briefed on the SLT minutes. The SLT has the bylaws in electronic format for review by the new administration. 3. The Instructional Leadership Team has a standing, weekly meeting. This quarter the focus of our meetings has been on plans for the 2016-17 school year, which has been challenging since a new administration will be in place.

Student Government meets daily during their Leadership Class Period, The School Community Council meets on the 3rd Wednesday of every month. Each committee has an agenda and minutes for each meeting.
The School Leadership looks at and disaggregates various forms of data, SMI/SRI data, CFA data, Soar Data, grade distributions, discipline reports, attendance reports. After looking at the data the team determines the next steps and/or intervention strategies. This information is shared with the Campus Leadership team, which then is shared in the department meeting and collaboration meetings. Feedback from the various teams drives the instruction and professional development.
4. Grade Level Teams continue to meet on scheduled Collaboration Days.

Digital copies of bylaws/protocols have been provided.
5. Student Council meets daily during their Leadership class to discuss and plan student projects and activities.
6. The School Community Council meets on a monthly basis to elicit parent input.

Continued and Ongoing
Agendas for all collaboration meetings are submitted via google forms or to Principal Biggs.
Teachers and staff will continue to obtain professional development on submitting forms using Google Docs.
Agendas and minutes are kept for the School Leadership Team Meetings, Department Meetings, Campus Leadership Meetings, School Community Council Meetings

The 9th and 10th grade teachers are organized into academies. Career academies are being established. These teams along with the Algebra I teachers and the Geometry teachers have a common planning period.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

## Current reality of effective practice from the beginning of the <br> year:

## 1st Quarter

The teachers at JA Fair are divided into common content teams. The content teams meet three times a week. During these meetings teachers will determine the unit of study, identify matching priority standards, unwrap the matching priority standards, write essential questions, write selected response items, write constructed response items and create scoring guides. Each team will administer a CFA for each unit. The same test will be administered as a post test to determine growth and/or remediation. Faculty was provided training on designing pre/post test. Teachers were also given training on how to disaggregate data. All pre/post test are uploaded and shared to Google Drive. Administration monitors the progress of the delivery of pre/post test via Google Docs and shared folders.

## Current reality of effective practice:

## $4^{\text {th }}$ Quarter

This quarter we continued using the shared schedule and timeline to administer pre-post tests. The Grade Level Teams and administrators appreciated this schedule, which allowed everyone to know what to expect and to more effectively monitor progress; however, $4^{\text {th }}$ Quarter Testing interfered with our schedule. Therefore, a request was made to ADE to give only two pre-post tests and the Semester test average as an option. We will look to see how district and state tests affect our pre-post testing schedule for the 2016017 school year. Now that we have an established timeline, we are discussing the alignment of our unit tests to content being taught, the instructional methods used to address student deficiencies based on pre-test results, and interventions needed to assist struggling learners. We rewrote our description of full implementation in this area to include creating a 9 week comprehensive test and dividing that test into three segments, ensuring alignment. We have proposed summer training to the district to address the above topics with teachers.

## Continued and Ongoing

- Currently all teachers have received initial professional development on pre/post test and data analysis.
- During collaboration team time, teachers are discussing pre/post test data and analysis and providing next steps and interventions that will address student needs.
- Teachers complete a 5 -step data analysis for all student data discussed but we feel that this needs to be reviewed. We need to look at software to help teachers with analysis of data.

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom.
Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

## Current reality of effective practice from the beginning of the <br> Current reality of effective practice:

 year:$1^{\text {st }}$ Quarter:
The Campus Leadership Team has initiated a school-wide discipline plan to address minor classroom infractions.
The 9th grade academy has implemented a discipline plan to address minor classroom infractions. All teachers have developed rituals and routines and they're posted in each classroom. Teachers taught their rituals and routines to their classes. Campus Leadership team is in the process of reviewing school-wide rituals and routines that will be shared with all stakeholders and posted school-wide.
$4^{\text {th }}$ Quarter:
The 9th grade academy continues to operate with a Category One discipline plan. The Campus Leadership team meets and discusses school-wide discipline initiatives. We will review classroom rituals and routines and discuss the need to consistently teach the rules to students throughout the year. Reviewing Category I Offences is an area listed on the Needs Assessment. Student Council provides student input for building level policies. The Administration is currently implementing all student safety compliance drills to ensure student safety in the event of an actual crisis.

IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

## Current reality of effective practice from the beginning of the

 year:1st Quarter
The Parent Facilitator Team has been established. The team consists of the Parent Involvement Coordinator, Parent Facilitator, parent representative from each grade level and the Principal. The team has created a parental involvement plan. The team meets during the summer to discuss back to school, provide feedback regarding Title 1, school data, family/curriculum nights, parent link, school community council, parent teacher conferences, information packets, surveys, best communication practices for parents, workshops, volunteer workshop opportunities, email distributions, and PTSA meetings

## Current reality of effective practice:

## $4^{\text {th }}$ Quarter

This quarter we began reflecting on our plan from the previous school year. Parental involvement doubled from the previous year. The guidance counselor is reflecting on the Passport to 10th Grade Program. We held activities in the area of math and literacy while informing parents of their students' progress. The guidance department along with the Career Coach conducted a Parent Workshop for seniors and their parents. A monthly newsletter is sent to our parents, which include tips for academic success. The Guidance office continues to participate in monthly meetings and assists Administration.

## Ongoing

The team has created a parental involvement plan. The team meets during the summer to discuss back to school, provide feedback regarding Title 1, school data, family/curriculum nights, parent link, school community council, parent teacher conferences, information packets, surveys, best communication practices for parents, workshops, volunteer workshop opportunities, email distributions, and PTSA meetings

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice from the beginning of the year:

## 1st Quarter

The guidance department has implemented a senior mentoring program to assist all seniors with their college and career transition.
Students are counseled regarding their current readiness to graduate, apply for post-secondary opportunities and/or vocational career options. FAFSA
financial planning night is held for all parents and seniors. Counselors visit all classrooms to discuss college/career options.

## Ongoing Yearly Activities

We offer a Career/Transition Fair for all students.
All seniors are paired with a caring mentor in the building that will assist the student with college or career decisions.
City Year has added Adopt A Senior. Corp members meet with the students to discuss college and career options during lunch and assist with their needs.
All math club students will qualify for a grant if they decide to work in the educational field upon college graduation. Incentive for students that are currently in the club.
We offer three Career Academies: IT, Sports Medicine and Environmental Science
All 9th grade students take the Kudor Assessment that will assist them with choosing a career academy.
Financial Aid Workshop for all seniors and their parents.
We have a Career Coach-offer the COMPASS test in house to our students

## Current reality of effective practice:

## 4th Quarter

The Guidance Department completes a Post Secondary District Report each year that tracks students through their Freshman Year in College. Based on this report, approximately $46 \%$ of our students enter college. This is determined by the annual follow up report that is conducted each fall. The counselors schedule Senior Exit Surveys with Seniors during the third quarter. JA Fair received 2.7 million dollars in scholarship money for Seniors.

## Ongoing Yearly Activities

We offer a Career/Transition Fair for all students.
All seniors are paired with a caring mentor in the building that will assist the student with college or career decisions.
City Year has added Adopt A Senior. Corp members meet with the students to discuss college and career options during lunch and assist with their needs.
All math club students will qualify for a grant if they decide to work in the educational field upon college graduation. Incentive for students that are currently in the club.
We offer three Career Academies: IT, Sports Medicine and Environmental Science
All 9th grade students take the Kudor Assessment that will assist them with choosing a career academy.
Financial Aid Workshop for all seniors and their parents.
We have a Career Coach-offer the COMPASS test in house to our students

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

- Streamlining the pre/post test process
- Creating the submission of data scheduled for teachers
- Reviewing the data and deciding on the next professional development needed for staff
- Looking at teacher survey results and making professional development decisions
- Sharing SLT minutes with staff, conducting SLT PLC and adding SLT to staff meeting agendas

If anything, what do you intend to change or modify for the year?

- Continue to utilize data to make decisions while filtering the information down to Campus Leadership
- Build on the work we have done with Common Formative Assessments

## ARKANSAS

DEPARTMENT OF EDUCATION

## SCHOOL LEADERSHIP TEAM'S REPORT FOURTH QUARTER

STUDENT/ TEACHER DATA by Quarter IMO AREA 2: STUDENT PROGRESS AND ACHIEVEMENT

|  | Grade Level | Number of students enrolled |  |  |  | Number of SWD enrolled as of October $1^{\text {st }}$ per grade level | Number of EL students enrolled as of October $1^{\text {st }}$ per grade level | Number of students with 5 or more referrals |  |  |  | Number of students who have been absent 10 or more days (20\% absence rate) |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

## Comments/ Clarifications:

The school utilizes progressive discipline. Referrals were decreased from third quarter. Student absences also decreased in all grade levels; except grade 11 from third quarter. The administration discussed the $3^{\text {rd }}$ Quarter data with the Student Behavior Intervention Team and Campus Leadership Team, which led to a decrease in referrals and absences.

|  | Percent of core teachers (Math, Science, Social Studies, ELA) absent 5 or more days (10\%) |  |  |  | Number of ELEMENTARY students that are 2 or more years below grade placement in Math as determined by Test on I (Date) |  | Number of SECONDARY students that are 3 or more years below grade placement in Math as determined by$\qquad$ Test on$\qquad$ I $\qquad$ (Date) |  | Number of ELEMENTARY students that are 2 or more years below grade placement in ELA as determined by Test on I (Date) |  | Number of SECONDARY students that are 3 or more years below grade placement in ELA as determined by <br> Test on $\qquad$ $I$ <br> (Date) |  |

|  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |

## Comments/ Clarifications:

Teacher absences decreased in each grade level from the third quarter to the fourth quarter. The Building Administration implemented the "Letters of Concern" system, which notifies teachers of their absences and allows administrators to express concern and brainstorm strategies for decreasing absences with individual teachers.

|  | Grade Level | Number of students that failed Math the previous year | Number of students enrolled this quarter | Num <br> D or | of in M qua 2015 | uden <br> cla ter 2016 | with per | Num on ea fo |  |  | ssed ment r | Total number of students assessed on the post-unit test for each grade level <br> (A) | Total number of students with D or $F$ on unit tests in Math this quarter <br> (B) | Perc D or | t of on in (A) | udent <br> unit <br> ath <br> $100=$ | with sts |

|  | 10 | 111 | 195 | 104 | 106 | 127 | 119 | 179 | 153 | 191 |  | 523 | 236 | 49\% | 90\% | 65\% | $\begin{aligned} & \hline 45 \\ & \% \end{aligned}$ |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  | Example |  |  |  |  |  |  | 100 | 90 | 95 | N/A | 285 | 57 | 20\% |  |  |  |

## Comments/ Clarifications:

In $9^{\text {th }}$ Grade 95\% of students earned D/F on 4th Quarter pre-post tests, but 49\% earned D/F for the nine weeks. We will discuss this data during our summer workshop to ensure that daily assignments are aligned to pre-post tests and to ensure that proper planning is in place so that state tests and pre-post assessments are given consistently during the $4^{\text {th }}$ Quarter. In $10^{\text {th }}$ Grade $45 \%$ of students earned D/F on pre-post tests, while 61\% earned D/F for the nine weeks. The School Leadership Team is hosting a summer workshop to address re-teaching and remediation of concepts that is preventing
student mastery. The District Leadership Team is providing funding for the summer training and will discuss funding options to allow for blocks of time during the summer or during school time to plan and create pre-post tests and Data Days to analyze data. Ongoing Professional development will be provided to assist teachers in planning and creating aligned pre-post tests to curriculum standards and to ensure student mastery.

## Comments/ Clarifications:

In $9^{\text {th }}$ Grade $53 \%$ of students earned D/F on pre-post tests but $42 \%$ earned D/F for nine weeks. In $10^{\text {th }}$ Grade $31 \%$ earned D/F on pre-post tests and 20\% earned D/F for nine weeks. The District Leadership Team provided funding for summer workshop and will discuss funding to allow for blocks of time
during school time to plan and create aligned pre-post tests. Ongoing Professional development will be provided to assist teachers in planning and creating aligned pre-post tests to curriculum.

## (Optional)

Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example: Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.

# End of Year Summary Report 

## FOURTH QUARTER

2015-2016 School Year

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

## Current reality of effective practice from the beginning of the <br> Current reality of effective practice:

 year:The School Leadership Team meets weekly for 45 minutes during $7{ }^{\text {th }}$ period. There was not enough time to complete tasks during that time frame. Attendance is not regular because some of the members have classes during this time. Agendas are made and minutes are taken but they are distributed to staff. There is currently no active School Community Council, but there is information given to parents at check-in on ways to be involved at the school.

The School Leadership Team consists of building level administrators, district level administrators, specialists, teachers, and instructional facilitators. The team meets every other Wednesday from 4:00-5:00 PM. These meeting times were changed in order to allow more members to be consistently present. The meetings include discussing indicators, disaggregating SOAR data, and coming up with innovative ways to engage students while increasing student achievement. The School Improvement Specialist has begun to send the agenda out via email 48 hours before each team meeting. The building principal shares the team minutes with the entire staff within 48 hours of each meeting. The staff is given an opportunity and encouraged to provide feedback to the

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

## Current reality of effective practice from the beginning of the year:

Instructional Units and Pre/Post tests are beginning to be developed in all Core areas. Most teachers have been consistently administering Pre/Post tests. However, they have not been uniform across grade level content areas. The data has not always been documented to show how instruction is being differentiated based on pre test results. Mabelvale is currently working towards all grade level content areas teachers collaborating on a grade level pre test to be administered to all students prior to beginning a unit. The same type assessment questions will be given at the end of the unit. The data from these assessments will be reviewed by the facilitator and teachers to plan instructional units. Individual student results and class period results will also be used to guide instruction.

## Current reality of effective practice:

Instructional Units and Pre/Post tests have been given in all content areas. All teachers have consistently administered Pre/Post tests this quarter. The data has not always been documented to show how instruction is being differentiated based on pre test results, however; it is being documented more consistently on data analysis forms. The School Improvement Specialist and the building principal met with all teachers to go over the expectations dealing with pre/post assessments, data, and differentiating instruction. A data analysis form was revised and made available to all teachers. The SIS led a PLC to explain and demonstrate the expectations when utilizing this form. The expectation is that this form will be used to analyze pre/post test data and to guide the discussion on instructional practices. The Instructional Facilitators and SIS will analyze data with the teachers using the forms. We are working towards the facilitators bringing back the data and instructional discussion to the leadership team in order to make instructional decisions for the school.

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

## Current reality of effective practice from the beginning of the <br> Current reality of effective practice:

 year:Teachers taught the school wide rituals and routines at the beginning of the year. They continue to review these throughout the school year. They also taught and reviewed classroom rituals and routines. Some teachers follow the due process procedure for most offenses. Mabelvale administration will continue to remind and encourage teachers to send referrals with students when they are sent out of class.

The discipline management plan was reviewed with faculty and staff members through grade level team meetings. Teachers were prompted to reflect on successes, challenges, and the overall effectiveness of the plan. School wide rituals and routines have been posted in each classroom and hallway. Teachers were directed to re-teach school wide and classroom rituals and routines each Monday during the opening of their daily lesson. Leadership team reviewed discipline data and found trends in the time of day and type of offense. Administrators met with individual teachers in need of additional support. These teachers were identified through discipline data and classroom walk through data. Administrators continue to monitor teacher referrals and classroom observations to ensure that each teacher consistently enforces the discipline management plan.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice from the beginning of the year:

Mabelvale has a guidance plan referred to as CAP. CAP stands for Career Action Plan. Students meet with counselors, AVID coordinators, and Career teachers to plan for future goals. Mabelvale is currently in the process of planning ongoing college and career opportunities. There is currently not a process for tracking recent graduates

## Current reality of effective practice:

Mabelvale has a guidance plan referred to as CAP. CAP stands for Career Action Plan. Students meet with counselors, AVID coordinators, and Career teachers to plan for future goals. Students take the Kuder in their career orientation class. Mabelvale is currently in the process of planning ongoing college and career opportunities. There is currently not a process for tracking recent graduates. A Career Day event took place in April 2016. Each Friday staff is encouraged to wear their college paraphernalia.

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

The lack of regular teacher attendance prompted the Leadership Team to come up with incentives for the staff. A member of the team contacted local businesses to get donations for the staff. Teacher attendance increased by double digits in all grade levels from the second to the third quarters. Teacher attendance also improved from the third to the fourth quarters.

Teachers were not consistently reporting pre and post data. We began sending out reminders to teachers with due dates for assessment data.

The Leadership Team also decided to include all content areas in pre-post assessing. We began with English and Math and then added Science and Social Studies. By the end of the year, all content areas were giving pre and post test.

If anything, what do you intend to change or modify for the year?
Teachers will not tell students that the pre-test do not count as a grade. We feel that students do not try their best when they know the grade is not going to count. The Leadership Team expects to see an increase in pre-test score averages next year.

All teachers will also have students do an analysis of pre and post assessments. This will allow students to track their growth and take ownership of their learning.

We are planning to have leadership meeting during the school day for next year if it can be worked into the schedule. We believe that attendance will be more consistent without teachers having to stay after school.

A tentative schedule of due dates for pre and post test will be available for teachers at the pre- school meetings. This will allow teachers to effectively plan for assessments and units.

## SCHOOL LEADERSHIP TEAM'S REPORT FOURTH QUARTER

STUDENT/ TEACHER DATA by Quarter (IMO AREA 2-STUDENT PROGRESS AND ACHIEVEMENT)

| Grade Level | Number of students enrolled |  |  |  | Number of SWD enrolled as of October $1^{\text {st }}$ per grade level | Number of EL students enrolled as of October $1^{\text {st }}$ per grade level | Number of students with 5 or more referrals |  |  |  | Number of students who have been absent 10 or more days (20\% absence rate) |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1st | 2nd | 3rd | 4th |  |  | 1st | 2nd | 3rd | 4th | 1st | 2nd | 3rd | 4th |

## $\stackrel{\rightharpoonup}{\infty}$ Comments/ Clarifications: <br> $2^{\text {nd }}$ Quarter

- The numbers at $8^{\text {th }}$ grade a declining due to students leaving to attend Mann Magnet.
- The numbers given to us by the Crystal report do not match the numbers we have at our school. We have our enrollment as follows: $\mathbf{6}^{\text {th }}$ - 193, $7^{\text {th }}-193,8^{\text {th }}-225$
- The number of students with 5 or more referrals looks to have drastically declined at $6^{\text {th }}$ grade. The referral process is not uniform and these numbers do not depict an accurate representation of the student/administrator interaction or the class time being missed because of being out of class.
- The referral process and a discipline management plan will be discussed among the administrative team and then presented to the leadership team.
- There are several students that have more than 1 referral but less than 5
- We will look deeper into the students who have been absent 10 or more days to see if they are the same students from quarter to quarter.
$3^{\text {rd }}$ Quarter
- All grade levels have declining enrollment from the previous quarter according to Crystal Reports

The number of students with 5 or more referrals went down in $6^{\text {th }}$ and $8^{\text {th }}$ grade and remained the same in $7^{\text {th }}$ grade.
There is a chart with the number of students with $1,2,3$, and 4 referrals.

- There is a chart with the number of students with $5,6,7,8$, and 9 absences.
- The number of students with 10 or more absences increased drastically
- Some of the absences are for long term suspension and/ or ALE
- 15 students have suspensions of at least 10 days

Referrals:

|  |  |  |  |  |  |  |  |  |  |  |  |  |

## Comments/ Clarifications:

## $2^{\text {nd }}$ Quarter

- All students have not completed SMI. There have been multiple problems with internet connections and technology availability.
- SMI will be completed on the 1 week of February.
- The numbers for students that are at least 3 grade levels behind based on SMI results include students that did not complete the assessment.
- Of the results reported $64 \%$ of $6^{\text {th }}$ graders, $69 \%$ of $7^{\text {th }}$ graders, and $73 \%$ of $8^{\text {th }}$ graders are at least 3 grade levels behind in math. Some of these students have been identified and placed in before and after school tutoring.
- SRI has not begun. Subscription was lost and was just recently reinstated. Mabelvale will begin as soon as SMI is complete. The person responsible for SRI has requested a username and password in order to administer and currently still waiting.
- MYON subscription for literacy will be recommended. SIS will research the price for the subscription.
- All grade level core teachers' absences have at least doubled. We will discuss this at leadership and recommend some type of incentive program for teacher attendance.
- Some of the absences include teachers that are attending professional development workshops. There were also two teachers that were out due to injury.

## $3^{\text {rd }}$ Quarter

- All students completed the SMI and SRI
- $85 \%$ of $6^{\text {th }}$ grade students are basic or below basic on the SRI (86/136 tested students are 3 or more grade levels behind)
- $82 \%$ of $7^{\text {th }}$ grade students are basic or below basic on the SRI ( $102 / 162$ tested students are 3 or more grade levels behind)
- $71 \%$ of $8^{\text {th }}$ grade students are basic or below basic on the SRI (99/175 tested students are $\mathbf{3}$ or more grade levels behind)
- Teacher attendance improved in each grade level
- 24 combined personal days were used in the $3^{\text {rd }}$ quarter by teachers
- 131 combined sick days were used in the $3^{\text {rd }}$ quarter by teachers
- Monthly incentives were given at staff meetings to teachers who were present each day

## $4^{\text {th }}$ Quarter

- Teacher attendance improved across the board
- Incentives were given to all teachers who were present each day instead of just having their names in a drawing
- Each grade level improved in SMI
- $\quad 6^{\text {th }}$ grade had 16 less students that were 3 or more grade levels behind.
- $\quad 7^{\text {th }}$ grade had 22 less students that were 3 or more grade levels behind.
- $\quad 8^{\text {th }}$ grade had 28 less students that were 3 or more grade levels behind.

MATH DATA by Quarter for Grades 3-10

| Grade Level | Number of students that failed Math the previous year | Number of students enrolled this quarter |  | ber <br> D o ss $p$ 2015 | stud <br> in M <br> quar <br> 016 |  | Numb on ea fo |  | ents a nit ass ent qua | essed sment er | Total number of students assessed on the post-unit tests for each grade level | Total number of students with D or $F$ on unit tests in Math this quarter <br> (B) |  | nt of stu any un <br> (B/A) | dents with tests in <br> C) $100=C$ | D or F Math |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | 1st | 2nd | 3rd | 4th | Unit 1 | Unit 2 | Unit 3 | Unit 4* |  |  | 1st | 2nd | 3rd | 4th |
| 6 | 15 | 183 | 15 | 22 | 21 | 14 | 172 | 167 | 161 | n/a | 500 | 25 |  | 37.04\% | 57.72\% | 5\% |

| Example |  |  |  |  |  |  | 100 | 90 | 95 | N/A | 285 | 57 | 20\% |  |  |  |

[^10]
## $2^{\text {nd }}$ Quarter

- The numbers are low in grades 6 and 7 because all students were not given post assessments or teachers didn't turn in data on time.
- The numbers also seem low because of a discrepancy in the enrollment.
- The numbers given to us by the Crystal report do not match the numbers we have at our school. We have our enrollment as follows: $\mathbf{6}^{\text {th }} \mathbf{~ 1 9 3 , ~}$ $7^{\text {th }}-193,8^{\text {th }}$ - 225
- There was one teacher that lost her unit 2 post test assessments.
- The D/F count for math is not accurate. There was not a uniform data collection tool utilized . The information was not available for all students.
- We will work on creating a tool to collect the specified data in order to have more accurate results $3^{\text {rd }}$ Quarter

## 3rd Quarter

- The D/F count increased because there was a uniform tool used to collect the data. It is more accurate than before.
- The D/F count decreased because teachers were allowed to strike standards that were not taught on the post test.

ELA DATA by Quarter for Grades 3-10

| $\begin{aligned} & \stackrel{\rightharpoonup}{\infty} \\ & \stackrel{\circ}{0} \end{aligned}$ | Grade Level | Number of students that failed ELA the previous year | Number of students enrolled this quarter | Number of students with D or $F$ in ELA class per quarter 2015-2016 |  |  |  | Number of students assessed on each post-unit assessment for the current quarter |  |  |  | Totalnumberofstudentsassessedon thepost-unittests foreachgradelevel(A) | Total number of students with D or $F$ on unit tests in ELA this quarter <br> (B) | Percent of students with D or $F$ on any unit tests in ELA <br> (C) $(B / A) \times 100=C$ |  |  |  |

|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

Comments/ Clarifications:
$2^{\text {nd }}$ Quarter

- Teachers are becoming more familiar with pre/post assessment requirements.
- Unit 2 post test assessments increased from unit 1.
- The assessments were divided into language and reading.
- Some students didn't take the post test because they were absent
$3^{\text {rd }}$ Quarter
- Literacy test were created as one test
- The D/F count increased because there was a uniform tool used to collect the data. It is more accurate than before.
$4^{\text {th }}$ Quarter
- Many students were absent for post tests in the last unit
- The D/F count decreased because teachers were allowed to strike standards that were not taught on the post test
(Optional)
Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example: Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.
$\square$

# End of Year Summary Report 

## FOURTH QUARTER

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

## Current reality of effective practice from the beginning of the $\quad$ Current reality of effective practice:

year:
McClellan has an Interdisciplinary Leadership Team that is meeting regularly (every two weeks) and addressing various instructional aspects surrounding the various departments of the school. This team looks at scores from SMI, SRI, ACT, Explore, PLAN, attendance data, etc. The Interdisciplinary Team and Leadership team have met in conjunction since July 2015 and have now began to meet separately. The Leadership Team has met and reviewed ASCIP action recommendations and is now working to look at incoming data from TLI. The Leadership team has four new members but is working to bring everyone up to speed on the work completed last year.

The Interdisciplinary Team will now become known as the School Leadership Team, it will continue to meet every other Wednesday from $4-5 p m$. The building management team and the School Climate \& Student Discipline Team will meet regularly with more fidelity next school year.
The Student Advisory Council has been solidified and those students have started meeting. They have elected officers, created their by-laws, and reviewed data from the Student Climate Survey. They also approved the School Learning Compact. The next task is to begin drafting a building wide Homework policy to share with the School Leadership Team.
We are still in the process of creating a School Community Council. We have reached out to members of the community who have agreed to participate. We are currently seeking out parents to participate. We will host a Partner in Education luncheon in August for recruitment purposes

Each team is creating an agenda and sign-in sheet, and taking minutes at every meeting.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

## Current reality of effective practice from the beginning of the year:

McClellan High School Teachers have collaboration periods embedded into their daily schedules. Within this time period, subject and grade-level alike teachers have been working to build units of study and common formative assessments (CFAs) that include differentiation. The results of pre-and post-test data are being recorded and some work has gone into how to let these results drive instruction.

## Current reality of effective practice:

The teachers meet by content area and departments during their collaboration period. All departments are administering pre and posttests. The teachers still need assistance with data disaggregation, how that affects their lesson plans, and creating next steps.

Student attendance is also an issue. It is not uncommon for 5 to 6 students in a class to miss pretest but be present for the posttest or vice versa. During the collaboration times we decided that if a student shows up for class after the pretest date the teacher is to immediately give it upon their return. For this reason our data is ever changing.
We have also made plans to use our 1003a grant money to pay for select teachers to come in during the summer to create the content area pre and posttest for next school year before classes start.

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

## Current reality of effective practice from the beginning of the <br> Current reality of effective practice:

 year:The entire campus has worked on compliance with the tardy policy and hall pass policy. These are posted in every classroom and can be found throughout the building. Teachers are using the hall pass policy to safeguard instructional time. Teachers have worked individually and within their departments to establish routines and rituals that are assisting in cultivating the classroom atmosphere into one that holds learning as the standard.

The teachers have implemented the hall pass policy with fidelity. Students are aware of the rituals and routines for being in the hallway. The tardy policy has been listed and is posted throughout the building; however, tardies and skipping still seem to be an issue for a small population of our students. This behavior is being addressed through an emergency removal process.

The principals have made sure that teachers have their classroom rules and rituals and routines posted in their rooms. Teachers have also started sending emails when they notice that a student is present at school but missing from their class. Mr. Anderson and the security team have also started doing afternoon roundups and addressing students who are either sitting out in front of the building or hanging out at the stadium instead of going to class.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.
Current reality of effective practice from the beginning of the year:

McClellan has a Title I compact that is utilized. There is a need for the compact to be more aligned with our current reality and the direction that we will take to improve our school.

## Current reality of effective practice:

The School Leadership Team, the building management team, and the staff worked together to draft a School Learning Compact that addressed the specific needs of our campus. The Learning Compact was then vetted to the newly created Student Advisory Council, who voted for it unanimously. The plan is to make the Learning Compact part of the check-in process during student registration in early August. The compact will also be shared with our Partners in Education during the Partners in Education luncheon in August. The Student Advisory Council is also beginning work on a school homework policy and a school handbook during their second meeting in May.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice from the beginning of the year:

We have yet to officially address this IMO. Currently, the counseling department works with students as they plan for college and military careers. The AVID Program works diligently with its students regarding college opportunities and selection. The SPED Department works with transition opportunities and programs for its students. Although these actions are taking place, there is not a truly articulated plan that addresses this IMO

## Current reality of effective practice:

The Career Coach and the AVID Coordinator provide the students with the opportunity to visit different college campuses such as: University of Central Arkansas, University of Arkansas at Pine Bluff, the University of Arkansas at Little Rock, Philander Smith College, Pulaski Technical College, and Henderson State University. The Career and Technical Education (CTE) department also hosted a college fair on campus for the students as well. The CTE department also promotes the Jobs After Graduation program where students are connected with employers now and can request to leave school early to go to work. We also have a Marketing program with its own co-op that allows students to leave early to go work and receive real-world work experience. We have a functioning bank here on campus that functions during both lunches and the $9^{\text {th }}$ grade Economics students are encouraged to open an account.

The counselors go through the English classes to provide the upper level students with a hard copy of the scholarship lists every 9 weeks. The students can come to the counselors to request copies of the applications.

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

- Adopted a set of bylaws by which to be governed.
- Assigned roles to members of SLT.
- Assisted teachers in crafting a school learning compact for the 16-17 school year.
- Created a Student Advisory Council that meets twice a month for two hours.
- Starting recruiting parents to participate in the School Community Council.
- Used the Indicators in Action modules with some of the instructional teams.
- Continued (all teams) to create agendas, keep minutes and sign-in sheets for each meeting.
- Continue to have a collaboration period during the school day for instructional teams to meet.
- Worked diligently with the staff to create a School Learning Compact.
- Established a binder system for the Instructional Teams to keep all of their documents (sign-in sheets, agendas, minutes, and test data) on hand.

If anything, what do you intend to change or modify for the year?

- The Interdisciplinary team will be replaced by a school leadership team.
- The School Leadership Team will have fewer members; 10 max.
- We have members who had agreed to serve on the School Community Council for next school year.
- The Student Advisory Council will continue to meet and serve as ambassadors to the school.
- Start the year off with Indicators in Action Leadership modules for the Leadership Team.
- Use the Indicators in Action School Community Modules to train the School Community Council.

## SCHOOL LEADERSHIP TEAM'S REPORT FOURTH QUARTER

STUDENT/ TEACHER DATA by Quarter IMO AREA 2: STUDENT PROGRESS AND ACHIEVEMENT

|  | Algebra II | 137 | 137 | 143 | 140 |  |  |  |  |  |  |  |  |  |  |

## Comments/ Clarifications:

In looking at the data we notice a trend of absences growing throughout the school year. The $9^{\text {th }}$ and $10^{\text {th }}$ grade students seem to have more absences than any other grades. These students continue to struggle with making the transition to high school. On the middle school level students are only required to pass math, English, science or social studies to move forward while every class counts starting $9^{\text {th }}$ grade because the students begin to earn credits. This process is a difficult shift for the students and they have a hard time understanding that they need to earn a certain amount of credits to be classified a $10^{\text {th }}$ or $11^{\text {th }}$ grader.

For the $4^{\text {th }}$ quarter there were 36 students who received Out-of-School Suspensions. There were 84 students who were absent with no reason provided. Eighteen students were absent due to illness. Seventeen students checked out early. Ten students were absent due extenuating circumstances. Eleven students had medical appointments.

There were 14 referrals from 8 students for refusal to follow reasonable directives. Another thirty-one referrals for 16 students for repeated violations of Category I offenses. There were ten referrals for 7 students who had disorderly conduct. There were eight referrals for 5 students who cut class, six referrals for 4 students who were verbally abusive and/or using fighting words. Five students had referrals for being tardy. There were five referrals for 4 students who used profanity
towards a staff member. There was 1 referral for theft and 1 referral for breaking and entering. There were 3 referrals for Category 2 offenses, 1 for use/possession of drugs, 4 referrals for gambling and 2 for fighting.

| 14.29 | 57.14 | $\begin{gathered} 33.3 \\ 3 \end{gathered}$ | 33.33 |  |  |  |  |  |  | 75 |  |
|  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |

Comments/ Clarifications:
Teacher Absences - 42 days were for professional leave by 12 teachers, 62 sick days were used by 15 teachers, and 7 personal days were used by 6 teachers and 1 teacher was out for jury duty. These numbers include 8 ninth grade core teachers, 4 tenth grade core teachers, 1 eleventh grade teacher and two $12^{\text {th }}$ grade core teachers. One teacher is retiring and used 15 sick days by themselves. The policy as it is currently written requires a teacher to take a $1 / 2$ absence at minimum. Going forward next year next teachers will be able to take time off in hour increments to go to the doctor and come back to work rather than miss a $1 / 2$ or whole day of work.

Students below grade level - No SMI or SRI testing were done at the end of the school year.

## Comments/ Clarifications:

Algebra I-9 ${ }^{\text {th }}$ grade -51 students earned Ds and 53 students earned a F.
Geometry - $\mathbf{9}^{\text {th }}$ grade -2 students earned Ds and 12 students earned a F.

Mathematics $\mathbf{- 9}{ }^{\text {th }}$ grade $\mathbf{- 6 1}$ students earned Ds and 75 students earned a F.
Geometry $\mathbf{- 1 0 ^ { \text { th } }}$ grade -36 students earned Ds and 40 students earned a F.
Mathematics $\mathbf{- 1 0}{ }^{\text {th }}$ grade -48 students earned a D and 50 students earned Fs.

ELA DATA by Quarter for Grades 3-10

| Grade Level | Number of students that failed ELA the previous year | Number of students enrolled this quarter | Number of students with D or Fin an ELA class per quarter 2015-2016 |  |  |  | Number of students assessed on each post-unit assessment for the current quarter |  |  |  | Total number of students assessed on the post-unit test for each grade level <br> (A) | Total number of students with D or $F$ on unit tests in ELA this quarter <br> (B) | Percent of students with D or $F$ on any unit tests in ELA <br> (C) $(B / A) \times 100=C$ |  |  |  |

## Comments/ Clarifications:

$\mathbf{9}^{\text {th }}$ grade English - 19 students earned a D and 31 students earned Fs.
$10^{\text {th }}$ grade English - 10 students earned a D and 24 students earned Fs.

The ACT Aspire and $11^{\text {th }}$ grade ACT assessments were given all on line this year. This new testing protocol was a shift for our staff and listed as a barrier for completing the pre and posttests assessments for the $4^{\text {th }}$ quarter.
(Optional)
Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example: Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.
$\square$

# End of Year Summary Report 

## FOURTH QUARTER

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

## Current reality of effective practice from the beginning of the <br> Current reality of effective practice:

 year:(ID01) A leadership team exists. Teacher instructional teams (PLCs) already exist and will be modified. A School Community Council will be established.
(ID04) Agendas are prepared prior to meetings. Details of the agenda are followed. Minutes will be kept during the meetings. The minutes will be uploaded into Indistar and housed in a binder in the SIS's office (will be readily available to team members, faculty, and all stakeholders).
(ID07) The leadership team has been established. A scheduled date and time for meetings has been established. The meeting schedule is in the process of being followed.

All of the effective practices from the beginning of the year, with the exception of consistent PLC meetings, are occurring.

Due to the inconsistency of PLC meetings, we have not shared the LT's goals and visions with the faculty. As a result, there are gaps in sound delivery of instruction in all classrooms.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

## Current reality of effective practice from the beginning of the

 year:(IIB02) Pre/Post tests are administered in English, math, and science.
(IIB04) Students are currently being provided with support and enhanced learning opportunities according to analysis of pre-test results. Teachers use pre-test data to determine pre-requisite skills which the student possesses or does not possess. If a student lacks some of the required skill(s) areas the teachers provides instruction with regard to those skills. In addition to intervening in the core classroom (math and literacy), the pre-test data is shared with the interventionist for students with non-mastery of Student Learning Expectations. The interventionist then works with the student for mastery

## Current reality of effective practice:

Pre/Post unit tests are not being administered consistently in English, math, or science. Teachers stopped administering TLI modular assessments in December because the school was shifting to the administration of ACT Aspire Periodic Assessments (Interim and Classroom). However teachers did not complete the required ACT Aspire training modules to be eligible to administer ACT Aspire Periodic Assessments. For the upcoming school year, the training will be scheduled and completed by September 2016 so that the school can take full advantage of the ACT Aspire Periodic Assessments.

As a result of not consistently completing IIB02, students have not been provided appropriate support to address areas of deficiencies.

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

## Current reality of effective practice from the beginning of the <br> Current reality of effective practice:

 year:IIIC10 Based on the increased number of discipline referrals, positively teaching students has not been a school-wide practice. All teachers do not display the characteristics of teachers who elicit strong achievement scores.

School-wide rules and expectations were established and conveyed. Grade level meetings have been held to inform the students and teachers of the expected rules and procedures which should be adhered to in all classrooms. Posters have been placed in all classrooms. Teachers have received training in Effective Classroom Management.
CWTs, formal observations, and informal observations have been conducted to monitor the implementation and collection of evidence in regards to sound classroom management practices.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.
Current reality of effective practice from the beginning of the year:

IVA01 MEHS's Title I Compact has been developed and distributed to parents. However, not all parents have signed and returned the compact.

## Current reality of effective practice:

Compacts have been signed by all parents/guardians. As a part of the enrollment process for new/transfer students' parents/guardians sign the compact. They are maintained in a binder with administration.

## Effective Practice within Category:

## Post-Secondary School Options (VA01)

The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice from the beginning of the year:

VA01 MEHS has planned and held onsite college and career fairs. Representatives from various colleges/universities, the military, government agencies, and businesses attended the fairs. They distributed information and counseled with the students in regards to opportunities with the organization they represented. Photos, sign in sheets, and flyers announcing the fair are on file. The counselor meets with students and their parents in regards to college and career opportunities. She discusses FAFSA, the ACT Test, transcripts/schedules, and GPA to insure that the students and their parents are aware of the requirements for graduation and college/career opportunities. Agendas and sign-in sheets are on file. The counselor brings in outside representatives and speakers to address and meet with the students.

## Current reality of effective practice:

The principal and counselor conducted student orientation with each grade level on August 17. A meeting for the parents of juniors and seniors was held to discuss graduation requirements, ACT Test, financial aid, college application process, and college/career readiness. The ASVAB was administered to all juniors and seniors.

Representatives from U of A met and advised students on January 14 and 15, 2016. Students attended Career/College Day at PCC/U of A on April 22. The counselor took four (4) seniors to College Day at UAPB on April 29. Fifteen seniors went to PCC/U of A on April 27 and took the Compass Exam.

An ACT Boot Camp was held during January and February.
The ACT Test was administered to all juniors in March.
Four seniors received full scholarships to college. Other students received the Lottery Scholarship and/or private scholarships.

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?
IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE - A Professional Development (PD) Needs Assessment Survey was developed and administered to the teachers. As a result, a second semester PD plan was implemented. The Leadership Team acquired a better understanding of the requirements and expectations for assessing, planning, and monitoring the quarterly indicators.
IMO AREA 3: STUDENT SAFETY AND DISCIPLINE - Rules and expectations for the classrooms were established and conveyed. Teachers received training in Effective Classroom Management and using the handbook to write discipline referrals. As a result, the most severe disciplinary infractions have been reduced.
IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT - A Parent-Community Advisory Council was developed. The council meets monthly to address school culture and assists with getting the parents and community involved in school activities. We have also held parent-community meetings at venues away from the school. An ACT Boot Camp was held and the average ACT scores have increased over last year's scores.

If anything, what do you intend to change or modify for the year?

- Hire a new High School Principal
- Replace appropriate faculty and staff
- Improved communication with parents and the community
- Implement ACT Interim and Classroom Assessments
- Track student progress on AIPs and make adjustments
- Implement Differentiated Professional Development
- Implement Co-Teaching Model in English Language Arts Classrooms
- Conduct Curriculum Re-Alignment
- Conduct Data Disaggregation

## SCHOOL LEADERSHIP TEAM'S REPORT FOURTH QUARTER

STUDENT/ TEACHER DATA by Quarter IMO AREA 2: STUDENT PROGRESS AND ACHIEVEMENT

|  | Grade Level |  | mber en | $\begin{aligned} & \text { stud } \\ & \text { led } \end{aligned}$ |  | Number of SWD enrolled as of October $1^{\text {st }}$ per | Number of EL students enrolled as of October $1^{\text {st }}$ | Numb | stud re | with <br> s | more | Num be | of sen \% |  | have days |

Comments/ Clarifications: One of the teachers who was absent for 5 or more days was out due to the death of his father. He taught all grades. The other teacher was out due to the birth of a child.

Our students did not put forth a serious effort on the STAR Reading or STAR Math assessments given during the fourth quarter. They voiced an attitude that "the test did not matter."

|  | Grade Level | Number of students that failed Math the previous year | Number of students enrolled this quarter | Num D o | of in M qu 2015 | uden <br> Cla ter 2016 | with per | Num on ea for |  | ents as it asse nt qua | ssed ment r | Total number of students assessed on the post-unit test for each grade level <br> (A) | Total number of students with D or $F$ on unit tests in Math this quarter <br> (B) | Perc D or | t of on in <br> /A) | den unit th $00=$ | with sts |

Comments/ Clarifications: In grades, 7, 8, and 9, some students had unexcused absences and could not test. In grades 10 and 11, students were taking multiple math courses.

During my observation of unit and semester examinations, many of our students did not put forth a serious effort on the exams.

ELA DATA by Quarter for Grades 3-10

Comments/ Clarifications: In grades, 7, 8, and 9, some students had unexcused absences and could not test. In grades 10 and 11, students were taking multiple English courses.

During my observation of unit and semester examinations, many of our students did not put forth a serious effort on the exams.

## (Optional)

Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example: Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.

None

# End of Year Summary Report 

## FOURTH QUARTER

2015-2016 School Year

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

## Current reality of effective practice from the beginning of the year: <br> We currently have a leadership team that includes our principal, instructional facilitators, community liaison and lead teachers from each department as well as input from our student leadership team. We meet twice a month for about an hour and have an agenda that is created within Indistar by the principal and the SIS. Our purpose is to improve our communication from district administrators to all stakeholders about school performance data and aggregated classroom observation data. <br> Teacher instructional teams (PLC) meet weekly to communicate information from the district and campus leadership meetings, analyze performance and classroom data and use it to drive instruction. Although some teachers/departments meet to plan according to our common focus, we feel there is a need to improve upon the alignment in certain areas.

## Current reality of effective practice:

The campus leadership team met consistently once a month to receive information from the district leadership team. The second monthly meeting took place only $45 \%$ of the time. December's meeting did not take place due to semester break. March's meeting did not take place due to spring break. April's meeting did not take place due to testing. May was an extremely busy month with graduation and end-of-year activities. It is our hope to have quarterly monthly calendars next year to avoid interference with our monthly meetings.

The management team has been dormant since the last non-academic activity was homecoming which took place in the fall. Prom was handled by the $11^{\text {th }}$ grade class. Going forward, we plan to invite alumni to be a part of this process.

The STAMP committee has made great strides this year with attendance alone. More of our parents are involved that ever before (over 200\% increase). These

The management team has been established and consists of three veteran teachers and our media specialist. This team will manage all non-academic entities that lend themselves to the culture and climate of our campus. We feel that including district alumni on this team will greatly enhance the effectiveness of this team's purpose.

Our students, teachers and motivated parents (S.T.A.M. P.) committee meet monthly with our district parent coordinator and the campus community liaison We currently need to develop a common communication structure that will incorporate our family and community stakeholders into our current process.
parents became more involved with happenings on the campus, thus further improving our climate and culture.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

## Current reality of effective practice from the beginning of the year: <br> Math

In 2 of the 4 math disciplines, post-tests have been utilized to assess mastery of common core math standards. In Algebra I and Algebra II, post-tests are used to differentiate and re-teach based on student mastery of the standards. In Geometry and Pre-Cal/Trig, the teacher resigned and was replaced with a new teacher and no assessments have taken place as of yet. The leadership team is providing ongoing support to fill the gaps that this situation has caused for our students.

Literacy
All grade levels have administered at least 1 unit post-test. The results of the post-test are analyzed and the data is used to restructure the instruction either by extending the standards taught in a current unit or by re-teaching the non-mastered portion of the standards.

## Current reality of effective practice:

## Math

Algebra I students had an average performance year in the classroom. TLI scores show major deficiencies in that the CCSS in math were not mastered for any module. The implementation of a new curriculum, lack of adequate re-teaching/interventions and a great number of teacher absences contributed to the low scores. Geometry students probably performed the lowest overall. The trend of yearly increasing gaps in the expected and actual basic skills knowledge of the students has further amplified the low achievement. Administering and correct usage of pre/posttest in both disciplines continues to be a struggle. Since the curriculum for Algebra II and Advanced Math Topics comes from Virtual Arkansas, we had very little control over the pace or rigor in these classes. Students were not receptive to the digital learning environment in these classes at the beginning, but the push-back waned near the end of the year.

Literacy
Since the beginning of the school year, we observed that we had major deficiencies in grammar at all grade levels. The current curriculum did not include

|  | any grammar instruction. We adjusted our teaching schedule to accommodate for planning and teaching grammar. Next year we will implement a supplemental grammar curriculum to fill these gaps. Due to the intensity and rigor of the current curriculum and the lack of familiarity of the staff with it, we found that we did not have enough time in the school year to complete it in its entirety. Going forward we will use backwards mapping to remedy this problem. |
| :---: | :---: |
| IMO AREA 3: STUDENT SAFETY AND DISCIPLINE |  |
| Effective Practice within Category: <br> Expecting and monitoring sound classroom management (IIIC10) |  |
| Description of full implementation of the Effective Practice and The faculty and staff develop a discipline management plan that guid establishes rituals and routines within the classroom that produces teaches the campus and classroom plans to all students. Each teach classroom. Each teacher consistently enforces the agreed upon rul | Recommendation: <br> es student behavior throughout the school. Each teacher atmosphere conducive to learning. Each teacher consistently her consistently teaches the rules and procedures in their s and regulations (IIIC10). |
| Current reality of effective practice from the beginning of the year: <br> The school leadership team was proactive in this area for the 2015-2016 school year by providing intense back to school professional development for all staff. The school utilized the newly awarded SIG 1003g funds to provide supplemental training in the areas of engaging lesson planning, classroom rules and procedures, school wide expectations and research based instructional strategies. The faculty and staff were involved in the development of the discipline management plan along with behavior intervention guides. A part time behavior interventionist was hired to work with students at risk. Each teacher established rituals and routines within the classroom that is consistent with a learning atmosphere. These routines and procedures were taught throughout the first week of school and follow up is provided as needed. Each teacher was held accountable to teach the campus and classroom plans to all students. Osceola High School observed each teacher consistently teaching the rules and procedures in their classroom. Each teacher is | Current reality of effective practice: <br> Although we were proactive in our approach to solving previous classroom management issues, the struggle that some teachers were having at the beginning of the school year almost became insurmountable by April. Other factors that contributed to the ineffectiveness of the original plan include but are not limited to: having one dean for the majority of the school year, inconsistent consequences in the classroom, inconsistent consequences issued by the dean, not following the handbook for certain punishments, high teacher absenteeism and teachers feeling the lack of support from the dean. Our faculty has already suggested changes that they feel need to be made to the handbook to better serve the students at OHS. |

#### Abstract

currently responsible to consistently enforce the agreed upon rules and regulations. Currently, the goal is to be consistent with rules and procedures to continue to build on the excellent foundation set forth at the beginning of the year. Current reality is some teachers continue to struggle with enforcing consistent classroom procedures. Principal, Dean of students, Academic coaches and external providers continue to work with these teachers to help build better learning environments.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

## Current reality of effective practice from the beginning of the

 year:The Title I program has reviewed and refined the current parent compact which outlines how parents, school staff, and students can be a part of the academic achievement of Osceola High School. The compact currently describes how the school and parents can work together to help students achieve the state's standards. In addition, Osceola High School utilizes a full-time community liaison along with the parent coordinator to coordinate these activities. The weakness of this area is the common vision and goals for parental and community support. The Osceola High School has a supportive group of parents, much like the elementary schools, but common meetings are minimal. Examples of positive involvement is the abundance of business and industry

## Current reality of effective practice:

The communication plan for Osceola High School has been completed which includes consistent monthly calendars, digital sign announcements, School Messenger calls and a student newsletter created in journalism. The STAMP (Students, Teachers and Motivated Parents) have met five times this year. The Parent Facilitator was replaced mid-year with the literacy coach who is a local citizen and has more ties to the community. Public relations remains an area of interest as the local newspaper has been supportive in helping Osceola High School promote a positive culture and climate.

In addition, our social media is an additional area for communication, as of 5/27/2016, the Official Osceola School District Facebook page has 1,106 followers. During the week of May 20-26, 4,816 people were reached with our post, which includes likes, comments and shares. Osceola High School will continue to utilize social media, along with School Messenger to reach parents and community members.
support from the City of Osceola, American Greetings, DENSO corporation, Arkansas Northeastern College and other small businesses. However, the facilitation of these stakeholders is sporadic in meeting the specific objective for our students.

All parents and guardians are provided the Right to Know letter which outlines the information concerning the law for Title 1, Part A programs. Title 1 meetings are held twice a year with which includes a feedback form for parents to comment in their recommendations for utilization of Title 1 funds. The results indicate, additional support in the classroom, along with summer school and after school tutoring as an area of request from parents. All of these areas are currently being funded by Title 1.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice from the beginning of the year:

Osceola High School has a strong career and technical program and provides a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success with follow up completer reports. The current transition from middle level takes place in the Career Orientation classroom with a 9th grade step up day in the spring. Currently the middle level counselor is attending Career Development Facilitator training to aid the high school in the process. In addition, the high school currently utilizes four additional certified Career Development Facilitators (Stefanie Lewallen, OHS counselor, Melissa Aldridge, ANC Career

## Current reality of effective practice:

Osceola High School students have been assessed in the National Career Readiness Certification (NCRC) which is a nationwide credential for work readiness created by ACT to assess work skill levels, with 11 students completing the CRC with 1 Gold, 7 Silver and 3 Bronze.

Coach, Lauren Meeks, ANC Career Coach and Shantele Raper, CTE coordinator who is a Global Career Development Facilitator Instructor) In addition, the high school has access to a current CDF participant Jeremy Cooper, the Career Readiness instructor from ANC. Through this team, along with the Career Technical Educators (A. Landry, A. James, N. Weintz, S. Simeon, S. Cooper, and B. Ivey) the students have access to career programs of study that go above the minimum requirements. Current programs of students include, Theatre Performance, JROTC, Business Management and Finance, Entrepreneurship, Family and Consumer Science, Pre-Engineering Computerized Integrated Manufacturing, EAST Lab and Digital Communications. Our current weakness is the loss of our agricultural instructor and our need to transition to a skilled and technical program to utilize our well stocked shop. Another positive component within this area is the success of the Career Readiness Certification with a high number of students assessing and passing the CRC.

Osceola School District has officially partnered with East Arkansas Planning and Development District (EAPDD), Arkansas Northeastern College, Department of Workforce Services, Great River Economic Development Foundation and Delta Regional Authority (DRA) to support the Mississippi County ACT Work Ready Communities initiative. This includes an official commitment as an "ARKANSAS EMPLOYER IN MISSISSIPPI COUNTY RECOGNIZING THE ACT NCRC IN SUPPORT OF The COUNTY ACHIEVING ITS WRC GOALS". Currently $84 \%$ of the county goals have been attained.

It is important to note, Osceola High School has been proactive in the approach to a Work Ready Community for several years waiting on the initiative to reach our county level.

In addition, Osceola High School has been approved for two new programs of study for 2016-2017, Advanced Manufacturing with an emphasis in Introduction to Mechatronics and Jobs for Arkansas Graduates (JAG). Both of these programs are aligned to our local industry needs and correlate with Local Market Information (LMI). Osceola High School has intent to hire letters from two new Career and Technical teachers, both with experience in the workforce. This includes an experienced Agriculture teacher who will help develop a program which is aligned to the interest of our students and local industry needs.

In addition, all Osceola High School Career and Technical Education (CTE) teachers participate in local and regional advisory meetings. They are scheduled to attend CTE Regional Advisory meeting hosted by Crowley's Ridge Coop in Jonesboro, AR on June $2^{\text {nd }}$. In addition, teachers are scheduled for summer training and certification, including Keystone which is the high school transition program, Jobs for Arkansas Graduates, Principals of Engineering and Introduction to Engineering Process at Northwestern State University in Louisiana, along with EAST Facilitator training and others.

Sixty-six Osceola High School students attended the ANC Completers Banquet with 62 Completion of Program of study awards in the following areas: Pre-engineering, Digital Communications, Power Structural, JROTC, Aviation, Business finance, Medical Professions, Agriculture Plan Systems, Welding, Criminal Justice, Family and Consumer Science, Office Administration, Entrepreneurship and Theatre

Also, Osceola High School pays for additional purchased service of Career Coaches from Arkansas Northeastern College with objectives of:
*Improve the effectiveness of postsecondary advice given to middle/high school students(grades 8-12) and their families
*Provide middle/high school students with information about career opportunities in Arkansas and the level of education and skills required in order to be successful in various career fields.
*Encourage individuals to learn about, prepare for, and finance a postsecondary education.

The Performance Measures for the Career Coaches are listed below:
$90 \%$ of Program Students served during each school year will be participate in at least one career awareness program, services and/or activity each academic year, which shall include completion of their college and career plan through the on-line planning tool.
$75 \%$ of Program Students served during each school year will be classified as a Program Participant by the end of each academic year and have reviewed their college and career plan
The following measures will have an expected growth of $2 \%$ each year through a four year time
PERFORMANCE MEASURE 1: Increase the percent of students who participate in work-based learning
PERFORMANCE MEASURE 2: Increase the percent of students who receive an industry-recognized certification by their twelfth year and ninth month.
PERFORMANCE MEASURE 3: Increase the percent of students exposed to CTE nontraditional careers.
PERFORMANCE MEASURE 4: Increase the percent of eligible seniors who submit a financial aid
PERFORMANCE MEASURE 5: Increase the percent of students placed in postsecondary education or workforce (includes military) by the end of the 2nd quarter immediately following their high school
PERFORMANCE MEASURE 6: Increase the percent of students enrolled in a program of postsecondary education by the fall semester immediately following high school graduation who successfully completes the first academic year and enrolls for the fall term of the second academic year.
Lastly, with the help of the 1003G School Improvement Grant, OHS staff will have an opportunity to support the Career Coach Performance Measures with the newly implemented School Organization Sponsor Criteria which includes the following duties:

- Coordinate and supervise school student council activities.
- Act as a liaison to students and parents regarding student organization activities.
- Organize the election of student organization officers.
- Organize and promote student and school pride activities.
- Guide the organization during student meetings with officers and members.
- Organize and create activities that promote student leadership and a positive school environment.
- Monitor financial records and fund-raising efforts.
- Facilitate communication among the staff, students, and parents.
- Organize community service projects.
- Provide industry certification opportunities to students.
- Assist in transitioning students from middle school to a high school environment.
- Ensure safety precautions are observed during all activities.
- Communicate effectively with all members of the school district and community.
- Be responsible for the advertisement and publicity of all activities and events related to student council.
- Organize events, competitions and fund raisers.

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

- The most meaningful decisions include:
- Addressing the climate and culture of Osceola High School by investing in a team/family atmosphere.
- Adding grammar to instruction based on data review.
- Setting the expectations for research papers in all literacy classes.
- Streamlining our book list to alleviate overlap
- Beginning the Pre, post and Interim assessments to drive instruction in literacy and math.

If anything, what do you intend to change or modify for the year?

- Continuing our work on mapping the Arkansas State Standards with Engage NY curriculum.
- Investing in professional development on the use and purpose of assessments.
- Introduce appropriate intervention process
- Provide additional training on classroom management
- Block schedule 9th grade literacy and math.
- Set higher expectations for Pre-AP coursework.

## SCHOOL LEADERSHIP TEAM'S REPORT FOURTH QUARTER

# End of Year Summary Report 

FOURTH QUARTER

2015-2016 School Year

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)
Description of full implementation of the Effective Practice and/or Recommendation:
District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

Current reality of effective practice from the beginning of the year:
At the start of the year the district, had implemented a communication system (Chain) starting with the district Leadership team to the Campus Leadership team and etc. STEM Academy created a Leadership team comprised of their Arkansas Leadership team and several lead teachers.

- The district leadership team met once a month and this information was conveyed to the Campus Leadership team who met twice a month. The lead teachers took the information to the grade level teams to ensure everyone in the building was being informed.
- The team met to discuss instructional practices, professional development needs and data.

Current reality of effective practice:
By the end of the year, the team structure and communication system was consistently embedded. Teachers felt better about knowing what was going on at district level and campus level. They felt like their campus had some input by the representation of their camp leadership team which was comprised of lead teachers.
The role of the leadership team became more vital as the year progressed. The team met twice a month and discussed the curriculum changes and professional development needs based on data. This was both a growing and learning experience for STEM leadership team. They had to disaggregate the data and present the information to the staff. We also had to adjust our instructional strategies once we found out the curriculum had essential skills missing that are
vital to our student's success on the test. The instructional facilitator had to assist teachers by modeling in the classrooms where needed.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

Current reality of effective practice from the beginning of the year:

At the start of the year, the departmental teams developed pre \& posttest to be administered at two to three week intervals. STEM utilizes the Engage NY Curriculum for both math and Literacy and the content is broken up into modules. We took the module standards and divided it into three sections every quarter. We assessed the students at shorter increments of time and analyzed the data to check for mastery.

Once the post test data of each section was analyzed the teachers either provided Intervention (Tier 2) for students

## Current reality of effective practice:

By the end of the year, teachers were consistently developing their interval assessments and analyzing the data. There were a few concerns with the rigor of these assessments and whether or not teachers were using differentiated instruction to meet all students' needs.
The departmental teams continued to meet and discuss their pre and post data in meetings. These discussions led to great things such as:

- Standards based intervention with individualized stations.
needing extra support or Re-taught (Tier 1) standards that majority of the class didn't master.

The data from the pre \& posttest was used to set up intervention or make adjustments in instruction. Each teacher had to turn in a progress monitoring chart of student mastery at the end of each quarter.

By mid-year, the leadership team found that teachers were not using the progress monitoring data to drive their instruction or intervention. The Principal provided PD on progress monitoring and RTI to giving a more thorough understanding of the purpose of the pre and posttests. We needed to emphasize the importance of student meeting mastery in order to be successful on the spring state assessment.

- Teachers were doing peer-observations to see how other teachers set up intervention.
- Leadership team monitoring intervention and modeling for teachers who needed further assistance.
- Tier 2 instruction that provided individualized instruction.
- Data-driven instruction
- Data led our student growth conversation

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).
Current reality of effective practice from the beginning of the $\quad$ Current reality of effective practice: year:
At the start of the year, each teachers are given two weeks to establish their rules and procedures but modeling and

At the start of second semester there was a high number of office referrals. I analyzed the data and look at specific
enforcing the rules. During early PD, the teachers all agreed upon 3 basic classroom rules that every class would implement to provided unity and consistency across the campus.
The teachers are were provided an office referral procedure form that provides a discipline management system that is consistent across the campus. (They are provided PD on this system a week before the kids start school)This system gives our teachers some autonomy with assigning consequences such as lunch detention, After-school detention, parent conferences and etc..

We had $25 \%$ of our 16 core teachers who was struggling with classroom management by the end of the $1^{\text {st }}$ quarter. There were very little instruction and the atmosphere wasn't conducive to learning. The teachers struggling with management were assigned peer observations in well managed classrooms. The mentors assigned to the new teachers modeled and met with them once a week to reflect and discuss best practices. The principal analyzed discipline and observation data met with these individuals and made suggestions.
teachers, time of day, group of students and etc. I went into classrooms and observed the atmosphere and felt there was a need to call a faculty meeting. I addressed the issue of low student engagement and inconsistency in enforcing rules. By the end of the year, most teachers were consistently enforcing rules and procedure and providing their students a learning environment.
The Leadership team and mentors supported our teacher with low management by modeling and making suggestions. We tried to meet with these teachers once a week and have reflective conversation on what was working or wasn't working. Even after all the support, I had two first year teachers that were still of great concern in management and they were placed on Intensive Growth Plan (IGP) for the next upcoming school year. This plan will consist of extra support off campus from our local Co-Op.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)
Description of full implementation of the Effective Practice and/or Recommendation:
No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

Current reality of effective practice from the beginning of the year:

At the start of the year, we did a parental perception survey on campus and it provided valuable data that I parents didn't feel welcome or included. STEM has very low parental involvement so we decided to restructure our S.T.A.M.P. (Parent organization) meetings and guidelines. This organization was nothing but merely a compliance piece of paper. I wasn't even aware my campus had a parent organization. We developed a yearly calendar with dates and established an agenda for all meetings. We invited Parents to our monthly DLT meetings and to all school events on campus.
Our first event was an angel tree at Christmas for our needy students and it went extremely well. The Committee did this project collaboratively with the community and STEM students and faculty. The committee decided in January to do a Parent appreciation event every month for the remainder of the school year. This Parental involvement initiative has been a huge success.

Current reality of effective practice:

In December, the leadership team decided to do an action research project on parental involvement. We took this information to the S.T.A.M.P. committee who collaboratively worked with STEM in creating these parent appreciation events to increase parental involvement.

The number of parental involvement increased in assemblies, banquets and all school events.

By the end of the year, we had increased parent involvement tremendously. Parents became more involved in assemblies, banquets and all school events.
We even have parents volunteering on campus and helping students in the classrooms.
Examples of positive involvement is the abundance of business and industry support from the City of Osceola, American Greeting, DENSO Corporation, Arkansas
Northeastern College and other small businesses. However, the facilitation of these stakeholders is sporadic in meeting the specific objective for our students. (we still working on it)

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

Current reality of effective practice from the beginning of the year:

Osceola STEM Academy has a strong career and technical program and provides a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success with follow up complete reports. The current transition from middle level takes place in the Career Orientation class with a $9^{\text {th }}$ grade step up day in the spring.

Osceola STEM Counselor has a comprehensive school counseling program to address the academic, personal/social and career needs of all our students. She enters into classrooms monthly and performs guidance activities with all students.

STEM Academy requires all students to take 4 years of PreEngineering program of study and provides 4 years of

## Current reality of effective practice:

Our school builds the foundation for the career classes (electives) that are offered in High School. We have aligned our instruction and standards to teach those prerequisite skills that are necessary for them to be successful in HS.

We attended the STEM festival and competed with hundreds of other students in the state of Arkansas. We also took 75 students to the STEM Expo to view and participate in the exhibits.

We collaborated with the 3 local industries and conducted a local Gateway to Technology \& PLTW STEM Showcase. We had many parents and community people attend the event.

We attended the Regional Science Fair at Arkansas State and had (3) first place winners, (2) second place winners, and several third place winners. We had an $8^{\text {th }}$ grade student who got runner-up to Overall $1^{\text {st }}$ place in Bio-chemistry.
> technology, which includes Career Development. In addition, The middle level students are exposed to exploratory instruction to align interest with career electives at the high school, which include career programs of study which go above the minimum requirements. Current high school programs of study include, Pre-Engineering Computerized Integrated Manufacturing, Theatre Performance, JROTC, Business Management and Finance, Entrepreneurship, Family and Consumer Science, EAST Lab and Digital Communications. Osceola STEM Academy has access to a career coach who is also certified as a Career Development Facilitator. The career coach works with students on career plans, college and career information and exploration of scholarship information.

In the spring the $8^{\text {th }}$ graders attended the HS transition day, students were exposed the variety of programs of study at the high school.

ARKANSAS
DEPARTMENT OF EDUCATION

LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

The decision to increase Parental Involvement by implementing monthly parent appreciation nights has been the most impacting decisions made this quarter. We knew we had to reach out to parents instead of waiting for them to be involved because of their perception. We needed our parents to feel appreciated for allowing our school to be a part of their child education.
There have been several positive changes that have occurred since this Parent Involvement Initiative such as:

- Increase in parents attendance at school events
- More parents involved on campus
- Parents feeling more informed and welcomed
- Teachers interacting more with parents
- Parents more positive about their child school
- Parents supporting the school more

If anything, what do you intend to change or modify for the year?

- I plan to reach out more to community stakeholders and try to influence them more to attend STAMP meeting.
- Send home a weekly newsletter and place information on school website so parents are informed of events starting at the beginning of the school year.
- Provide more Classroom management PD throughout the school year
- Possibly, move some teachers around to break up some negativity and complacement.

End of Year Summary Report
FOURTH QUARTER
2015-2016 School Year

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

 Effective Practice within Category:Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice

 and/or Recommendation:District policy specifies the team structure for all schools which include a description of the team's purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

## Current reality of effective practice from the beginning of the

 year:ID01
Vision statement for Leadership team was written May 2012 and revised August 2014. School Mission Statement revised by all staff June 2012 and revised August 2014. Leadership team revised and updated at building level August 2014.

Leadership team consist of 7 staff members plus external support such as Marie Parker, Arkansas Leadership Academy Building Capacity Leader, Tiah Frazer, ADE School Improvement Advisor, and District-Level Personnel.

Harris team structure consists of a leadership team, instructional team, school community council, and Grade level teams with each knowing their purpose. The student council is in the formation period. The master calendar has been created for the year with scheduled times to meet.

## Current reality of effective practice:

## ID01

Some of the history from previous years for ID01 is kept in this document to note the evolving process of this indicator.

Some personnel changes were made to the Leadership Team composition for the 2015-16 school. Those changes suggest a more cohesive Leadership Team with increased candidness and self-motivation. The Leadership Team continues to meet twice a month, and meetings generally last well over an hour. The team has reviewed high-stakes data results along with diagnostic results. Professional development needs of the faculty and problematic areas (such as lack of the use of technology and classroom management) have been have been put on the table.

## ID04

Vision statement for Leadership Team reviewed and/or revised on 9/3/15.

School Mission Statement reviewed by all staff on 8/26/15.
Leadership team revised and updated at the building level on 8/19/15.

School Community Council revised and updates on 9/28/15

## ID04

Some teams are meeting with agendas and minutes. To further assist with the implementation of this objective, grade level teams will be given binders to document grade level meetings. Minutes, agendas, and sign-ins will be kept as documentation. 2015 All teams are meeting with agendas and minutes. Minutes, agendas, and sign-ins are being kept in binders and documentation containers in the administrators' and facilitators' offices. Leadership team agenda and minutes are entered and kept in the Indistar platform. Community meeting agendas and other pertinent information are being kept by the administrator and counselor.

## ID07

Leadership team has been established that consist of 8 staff members and external support such as Jerry Vaughn, AR Leadership Academy Building Capacity Leader, Camilla Wyley, ADE School Improvement Advisor, and District-level personnel. Monthly meetings have been scheduled. 2015 Leadership team is

Teams maintain agendas minutes, and sign-in sheets. Leadership team agendas and minutes are maintained in Indistar. Counselor maintains agendas and relevant information.

Meeting times of the Leadership Team meeting may vary depending on circumstances, such as testing or district called meetings.

## ID07

The composition of the Leadership Team was changed some at the start of the school year and is comprised of the following individuals with title in parenthesis: Dr. Darnell Bell (principal), Dr. Janice Warren (Central Office), Marie Parker (Arkansas Leadership Academy), Dr. Robert Clowers (SIS/Central Office), Dr. John McCraney (SIS/Central Office, who joined the team at mid-year), Nikki Stolzer (Instructional Facilitator/Literacy), Michele Pickett (Instructional Facilitator/Math) Whitney Abdullah (P.E. Coach), Gloria Loring (Faculty Member). Shawna Blet (Faculty Member), LeAnn Jones-Myers (School Counselor).

| The Leadership Team will continue to meet bi-monthly for a |  |
| minimum of one hour. Additional meetings will be called if needed. |  |

| Effective Practice within Category: |  |
| :--- | :--- |
| Engaging teachers in assessing and monitoring student mastery <br> (IIB02, IIB04) |  |
| Description of full implementation of the Effective Practice <br> and/or Recommendation: <br> The Instructional Teams develop instructional units based on the <br> curriculum standards and the local curriculum document. This unit <br> typically encompasses three to six weeks of work and includes pre- <br> /post tests administered at two to three week intervals (IIB01). The |  |
| pre-test and post-test assess the same learning objectives and |  |
| inform the Instructional Team members' (teachers) plans for |  |
| differentiated instruction within the unit and/or re-teaching as |  |
| necessary following the unit (IIB04). |  |
| The Instructional Team reviews the results of the pre- and post- <br> tests and uses the information to guide efforts to assure that every <br> student masters the instructional standards taught in the <br> instructional unit (IIB03). The Instructional Team also uses the |  |
| results from the pre-/post-test analysis to plan for professional |  |
| development, inform subsequent instructional unit plans and/or |  |
| make adjustments to the curriculum (IIB02, IIB05). |  |
| Current reality of effective practice from the beginning of the <br> year: | Current reality of effective practice: |
| IIB02 |  |

Grade level instructional teams develop units of instruction of two to three weeks in both math and literacy. Pre and post assessments are based on the objectives in these unit plans and are administered at the beginning and end of each unit. Data are analyzed in PLCs, but teacher use of data to differentiate is limited.

## IIB04

Teachers currently administer screening pre-tests at the beginning of the school year such as DIBELS, DRA, STAR reading, DSA, Calendar Math pretest, and Houghton Mifflin Pretest. The Learning Institute module tests are given 4 times a year in math grades 1-5 and literacy grades $2-5$. These tests are used to check for mastery and to plan for intervention and remediation for individual students. Along with TLI tests, progress monitoring of DIBELS, DRA, and DSA are given throughout the year. End of the year post testing includes DIBELS, DRA, STAR reading, DSA, Calendar Math, and Houghton Mifflin Post-test. A system has been put in place for pre and post formative assessments on each math and literacy two/three week unit.

This indicator remains essentially the same. Teacher use of data to differentiate instruction continues to be limited.

## IIB04

STAR Math and STAR Literacy have transitioned this school year from administering three times during the school year to monthly.

ACT Aspire has been incorporated for the 2016-17 school year. This will necessitate some changes in the coming school year. Other diagnostics remain in place to check for mastery and to plan for intervention and remediation. The rigor to which these diagnostics are used vary from faculty to faculty member.

## Curriculum mapping shall be completed prior to pre- and post-test

 assessments.Prior to pre- and post-test assessment administration, copies of the pre- and post-test assessments shall be provided to the Instructional Team no less than one week prior to their administration.

## IIB04

Review and revise the current system in order to monitor the assessment wall (data cards) and report findings to the leadership team for intervention and remediation recommendations and/or changes.

| IMO AREA 3: STUDENT SAFETY AND DISCIPLINE |  |
| :--- | :--- |
| Effective Practice within Category: |  |
| Expecting and monitoring sound classroom management (IIIC10) |  |
| Description of full implementation of the Effective Practice <br> and/or Recommendation: <br> The faculty and staff develop a discipline management plan that <br> guides student behavior throughout the school. Each teacher <br> establishes rituals and routines within the classroom that produces <br> an atmosphere conducive to learning. Each teacher consistently <br> teaches the campus and classroom plans to all students. Each <br> teacher consistently teaches the rules and procedures in their <br> classroom. Each teacher consistently enforces the agreed upon <br> rules and regulations (IIIC10). |  |

| Defining the purpose, policies, and practices of a school <br> community (IVA01) |  |
| :--- | :--- |
| Description of full implementation of the Effective Practice <br> and/or Recommendation: |  |
| No Child Left Behind stipulates that each school in the Title I <br> program develop an agreement, or "compact," that outlines how <br> parents, school staff, and students will share responsibility for <br> improving academic achievement. Compacts describe how the <br> school and parents can work together to help students achieve the <br> state's standards. |  |
| Current reality of effective practice from the beginning of the <br> year: | Current reality of effective practice: |
| IVA01 | IVA01 <br> School has a compact and is discussed in parent meetings. Family <br> meetings are scheduled. Survey data are collected at the <br> beginning of the school year. Math and literacy family nights are <br> scheduled. Parent-teacher conferences are scheduled. |
| Parents were surveyed at the "Back to School Bash" held on <br> Aamily/community involvement meetings on September 28, 2015 <br> The survey results were limited but suggested that teachers were <br> disconnected from the community and that only a few teachers <br> participated in after-school events. |  |

Provide incentives(s) to encourage teachers to attend after-hours school functions in order to develop a sustained relationship between the family/community and the school faculty.

| IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT |  |
| :--- | :--- |
| Effective Practice within Category:  <br> Post-Secondary School Options (VA01)  |  |
| The school has a guidance plan that includes options for students <br> as they plan their college and career opportunities. The school <br> routinely tracks their recent graduates' success at the next level as <br> they pursue their college and career goals. |  |
| ADE will monitor the following: |  |
| • The guidance plan |  |
| • The process of tracking recent graduates |  |

## Current reality of effective practice from the beginning of the year:

## VA01

The school counselor is communicating with the feeder pattern middle school and planning activities for career and college readiness along with activities for students transitioning to middle school.

## Current reality of effective practice:

## VA01

## The guidance plan:

A Sylvan Hills Middle School counselor visited Harris Elementary on February 9, 2016 to discuss course/class selections.

Due to constraints of spring testing and end-of-year, unforseen circumstances at both schools, the 5th grade students were unable to visit the middle school.

## Tracking recent graduates:

The mechanisms are not available to track Harris Elementary students following graduation from high school or college. What we did, however, was to pull Triand transcripts on 22 students (a cohort) that had matriculated from Harris to their Middle School within their feeder pattern.

A comparison was made of their ACTAAP and PARCC results in Mathematics and Literacy, respectively. For the 2015-16 school year, these were students that started their school year as a seventh grader at their middle school. Doing this provided us with

|  |  |
|  |  |
|  |  |
|  |  |
|  |  |

## VA01

Identify key stakeholders at each middle school (to which a 5th grader will matriculate) to take 5th grade students on a mock school day at the middle school they will attend in their 6th grade.

Host a Career Day for 4th and 5th grade students.

Have 6th grade students who attended Harris as a 5th grader to come speak to the current 5th graders at Harris relating the transition from elementary to middle school.

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

The School Leadership Team created a School Improvement Process Journey PowerPoint that reflected the Arkansas Leadership Academy Performance Standards (Setting Clear and Compelling Direction, Shaping Culture for Learning, Leading and Managing Change, Transforming Teaching and Learning, and Managing Accountability Systems) and Indistar Indicators based upon the ADE Quarterly 45-Day Plans.

It allowed the team to reflect upon the beginning steps/stages of the process, the status of our growth ("Where are we today?") and future ("where do we want to be in the future?).

The results of the Scholastic Audit of 2012 and being identified as a Priority School required the implementation of tools/strategies and systems that impact teaching and learning.

Being a participants of ALA, this was culminating product (the "School Journey") for the program.

Additionally, the Leadership Team recognizes how the behaviors of the adult learners (i.e., teachers) have an impact on student achievement and discipline and may drive professional development.

If anything, what do you intend to change or modify for the year?

# End of Year Summary Report 

## FOURTH QUARTER

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).
Current reality of effective practice from the beginning of the $\quad$ Current reality of effective practice:
year:

ID01: An Administrative team is in place consisting of the principal and his assistants. The Leadership team is led by the principal and includes department chairmen, instructional facilitators. Department teams and Professional Learning Communities have become one in the same being led by instructional facilitators or department chairmen, and teachers. The Deep Knowledge team participates in Arkansas Leadership Academy activities. Lastly, there is a Jacksonville Feeder Pattern team involving administration and others from all schools within the Jacksonville and North Pulaski areas. The only concern is a lack of, or limited, School Community Council.

ID01: Pulaski County Special School District does have a Board policy which addresses the team structure(s) expected for all schools within the district. As a new principal, Mr. Smith did meet with the district administration concerning those expectations and the needs of Jacksonville High School. A Leadership Team, Professional Learning Communities, Student Government, Administrative Team, Feeder Pattern Team, Jacksonville Educational Foundation, Multicultural Committee, ----, and a Transition Committee were in place upon Mr. Smith's entry onto the job. He did restructure the Leadership Team to include members that represented all departments and put in place rotating roles of facilitator, recorder, and time keeper. Professional Learning Communities are then lead by the appropriate person(s) from the

ID04: All teams create agendas and maintain minutes and sign in sheets for their meetings. These items will remain located with the appropriate team member and may be requested at any time.

ID07: A Leadership team will be structured to include the principal and key professional staff. They will meet at a minimum of twice monthly for at least of $11 / 2$ hours using a structured agenda. The Leadership team will set and monitor annual learning goals and will monitor progress by reviewing various types of data.
Communication of the team's work will be shared with other staff members via departmental meetings and PLCs.

Leadership Team ensuring that information can be passed through that person to the rest of the staff. The only concern that has been expressed is that there needs to be improvement with open and ongoing communication with the public, allowing the community an insight to what the school is accomplishing and begin to repair and improve our image with the public.

ID04: All teams create and keep agendas, minutes, and sign-in sheets for their Professional Learning Community meetings which are held a minimum of monthly. A google drive folder was created to house documentation of these meetings however not all departments are utilizing it so documentation of those not there can be requested from the department chairmen.

ID07: The Leadership team is structured with administration and representation from each department. The meetings are twice a month, lasting at least an hour. Information that is reviewed by the Leadership Team and shared with various Departments can be found in Agendas and Minutes from Department Meetings, but probably should be more clearly marked in the minutes. For instance, the Social Studies Department regularly meets to disseminate information from the Leadership Team but it would be clearer if a section on the Agenda/Minutes was labeled "Leadership Team Updates" or something similar.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

Current reality of effective practice from the beginning of the year:

IIB02: Pre/post-test are being implemented in some courses. We are working on implementing their use in all courses, with specific attention to core areas (excluding mathematics) measuring ELA standards.

IIB04: Units of instruction have a pre/post-test through various evaluation methods as well as learning activities aligned to the objective. Weekly lesson plans are driven by the curriculum maps and results of pre and post-tests.

## Current reality of effective practice:

IIB02: Pre and post-tests have been implemented in all departments to varying degrees. Some areas use Renaissance or The Learning Institute, while still others use teacher made assessments. Whatever the method the information learned from these was used to differentiate and drive instruction.

IIB04: In areas where there are multiple teachers teaching the same level and content those teachers work together through Professional Learning Communities to assess student knowledge and gain a baseline perception prior to lesson planning with the information gained from pre-tests while using the post-test data to determine what, if any, of the concepts introduced needed to be revisited using a different method of delivery. Those teachers with singleton classes did much the same but instead of planning with another teacher their discussions centered around different methods of differentiating instruction and what was working for different teachers. The Career and Technical Education
department utilized a spreadsheet to input pre and post-test data in order to compare and evaluate results for individualized instruction and re-teaching moments.

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

## Current reality of effective practice from the beginning of the <br> Current reality of effective practice:

 year:IIIC10: Although all teachers begin the school year setting and teaching the rules and procedures of the school and their class not all teachers uniformly reinforce those as the year progresses. Additionally, there are semester courses that are just beginning so teachers will need to establish their classroom rituals and routines. We have developed a common set of expectations that all students, teachers, administrators, and staff will consistently follow throughout the year.

IIIC10: Rituals and procedures are an ongoing task for all staff members due to the number of students being added and/or dropped as late as the week before semester exams. These rituals and procedures are often reviewed and revised by staff and administration depending on their effectiveness and relevancy to the needs of our school and individual classrooms. It seems that some rules have fallen by the wayside as the year progressed due to the difficulty of enforcement.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

Current reality of effective practice from the beginning of the year:

IVA01: Although we do have a Parent Community Liaison on campus that does an outstanding job and a Parental Involvement

Current reality of effective practice:

IVA01: Jacksonville High School does have a Parental
Involvement Plan that was established in collaboration with parents

[^13]that includes programs, activities, and resources that enhance parental involvement and reflects the specific needs of students and their families. Some of these are as follows:
Open House
Teacher/Parent Conferences
Parent Center

- Technology and internet access
- Print and Video resources
- Communications through online and local newspapers, callouts, school marquee
- Home Access Center (HAC)
- Teacher e-mail
- Business Partners
- People Assisting Local Schools (PALS)
- Remind 101 which allows for communication with parents through texting
Group reminders that can be sent out to parents depending on course and section numbers (allowing you to target a specific group)

Additionally, the value placed on parental involvement can be seen when viewing the mission, vision, and core beliefs of Jacksonville High School.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice from the beginning of the

 year:VA01: Jacksonville High School counseling department and teachers do offer college and career guidance to students and parents; however, we realize that we can and should do a better job. We begin by helping students and parents develop a six year plan in the eighth grade, planning classes that students need to take in order to reach their goals. These plans are revisited and updated each year during registration for the following year. The counseling department visits classrooms for lessons on various topics, visits with seniors to verify that they are on track for graduation, hosts college fairs, hold financial planning sessions, assist in completing college applications, arrange military and college recruiting visits, etc... throughout the year. Our teachers, specifically encore, cover job opportunities within their specific content areas and Career Education teachers do track their completers and JAG students after graduation.

## Current reality of effective practice:

VA01: Jacksonville High School counseling department and teachers do offer college and career guidance to students and parents; however, we realize that we can and should do a better job. We begin by helping students and parents develop a six year plan in the eighth grade, planning classes that students need to take in order to reach their goals. These plans are revisited and updated each year during registration for the following year. The counseling department visits classrooms for lessons on various topics, visits with seniors to verify that they are on track for graduation, hosts college fairs, hold financial planning sessions, assist in completing college applications, arrange military and college recruiting visits, etc... throughout the year. Some of the specific programs that they offer to assist parents and students include Upward Bound, Next Step, Donaldson Scholarship, ASVAB testing, and Trio. Our teachers, specifically encore, cover job opportunities within their specific content areas and Career Education teachers do track their completers and JAG students after graduation.

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

Jacksonville High School's progress could be described as slow and sure. We started off the school year with a new principal, Jacob Smith, who was assigned to Jacksonville from North Pulaski the first day that teachers reported back for pre-school in-services. Once all the staff was in place the Leadership Team was reorganized to be inclusive of all departments, instructional facilitators, administration, and a school improvement specialist.

The first order of business was to see what needed to be done and focus on bell to bell instruction, getting every minute out of every day. The Leadership Team helped to create consistent routines and expectations for the students and teachers which allowed teachers and students to better communicate expectations and maintain accountability. Next a sense of commitment and ownership was instilled into the members of the Leadership Team as the three key positions (facilitator, secretary, and timekeeper) were rotated quarterly allowing, eventually, everyone to practice those leadership skills and tools that can be utilized in the Professional Learning Communities and classrooms.

Through some of the work done during our Leadership Team meetings the staff at Jacksonville High School was able to easily recognize team structures, develop an awareness of student reading levels and implement strategies to address the deficiencies, increase the amount of bell-to-bell instruction, increase student engagement within classrooms, decrease the number of discipline issues from the previous year, and focus on authentic real time assessment of student learning that could drive instruction. The last thing that was accomplished was by our Deep Knowledge Team which is a group within the Leadership Team, finished three years of work with the Arkansas Leadership Academy. They were able to present to us the work and the path that Jacksonville High School has taken over that time noting all the positive gains that have been made along with some of the challenges that had been overcome.

If anything, what do you intend to change or modify for the year?
Jacksonville High School is in a situation that is new to everyone involved; they will be combining with another local high school, North Pulaski, in addition to that challenge half of their administrative team is new to either of the schools. It will be imperative that the principal engage both existing and new staff members to identify the teacher leaders to serve on the Leadership Team. They will be
starting fresh and must develop an infrastructure and systems that will allow the school to discover and develop their mission, vision, and core beliefs. These must and will drive the work to be done by the Leadership Team in order to effect practice within the areas of instruction, student safety and discipline, and family and community engagement.

|  | $\mathbf{3 5}$ | $\mathbf{4 0}$ | $\mathbf{3 1}$ | $\mathbf{4 8}$ |

The previous chart does not include students marked as inactive.
Of these students the more interesting numbers are those who did not receive credit due to attendance (NC) or failing a class. There were $549^{\text {th }}$ grade students who did not receive credit for the $1^{\text {st }}$ semester of math; 54 due to failure and - due to no credit. That number dropped to 41 for the $2^{\text {nd }}$ semester, 41 failures and - no credits. Additionally only 18 of those students received an $F$ for both semesters. The $10^{\text {th }}$ grade numbers for the $1^{\text {st }}$ semester were 32 students receiving an F and - no credits for a total of --. Numbers increased over the $2^{\text {nd }}$ semester to --, 47 Fs and - no credits. There were only 16 students who failed both the first and second semesters.

| Totals | $\mathbf{3 7}$ | $\mathbf{5 8}$ | $\mathbf{2 6}$ | $\mathbf{2 3}$ |

The chart above does not include students marked as inactive.

Of these students the more interesting numbers are those who did not receive credit due to attendance (NC) or failing a class. There were -- $\mathbf{9}^{\text {th }}$ grade students who did not receive credit for the $1^{\text {st }}$ semester of math; 85 due to failure and - due to no credit. That number dropped to -- for the $2^{\text {nd }}$ semester, 67 failures and - no credits. Additionally 32 of those students received an $F$ for both semesters. The $10^{\text {th }}$ grade numbers for the $1^{\text {st }}$ semester were 25 students receiving an F and - no credits for a total of --. Numbers increased over the $2^{\text {nd }}$ semester to --, 41 Fs and - no credits. There were only 8 students who failed both the first and second semesters.
(Optional)
Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example: Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.

ARKANSAS DEPARTMENT

DISTRICT: PULASKI CO SPEC SCH DISTRICT SCHOOL: JACKSONVILLE MIDDLE SCHOOL STATUS: PRIORITY, ACADEMIC DISTRESS SITE-BASED SIS: MELANIE CHURCHILL, JO ANN KOEHLER EXTERNAL PROVIDER:
ADE SCHOOL IMPROVEMENT SPECIALIST TEAM: TIA FRAZIER, LISA KNOEDLE

## End of Year Summary Report

## FOURTH QUARTER

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to

## Current reality of effective practice from the beginning of the year:

ID01: The District has no existing policy to address team structures as indicated in Wise Ways. Jacksonville Middle School has limited development and implementation of a school leadership team. School leadership members have been selected and the first meeting was conducted on 9/01/2015. The school is working on the development of roles and responsibilities for the school

## Current reality of effective practice:

ID01: The District has adopted the Arkansas Board Association policy 5.4 School Improvement Teams as established by the State law.
ID04: The Leadership Team has established a meeting schedule of twice per month after school for 1.5 hours. Agendas are established and minutes are recorded. The Leadership Team meets on the second and fourth Tuesday of every month. The
leadership team. Instructional teams (PLCs)have been established and meet weekly. Minutes and agendas are filed and kept by each PLC. The District has assigned two SIS to the school to assist in the school improvement process. Mission, vision, and core belief statements were reviewed and revised September 29 by the school leadership team and on October 06, 2015 by the faculty. A leadership charter was developed by the SLT and shared with the faculty on October 06, 2015 during an after-school faculty meeting. ID04: Currently. agendas and minutes are being kept for school leadership team and instructional team meetings. Agendas and minutes are filed and kept by each instructional leadership team chairperson. There is no systematic process for time-keeping or for monitoring the effectiveness of instructional teams. Members of the SCC have been selected by the principal, but the team has not yet met so there are no agendas or minutes for the Council.
ID07: The school leadership team met several times during the month of September to develop meeting times, processes, roles and responsibilities of members, and goals. The SLT has 12 members consisting of department chairs from math, science, English, social studies, and special education. Also on the team are two guidance counselors, three administrators, two SIS, and the band director. The SLT will meet the 2nd and 4th Tuesday of each month for $11 / 2$ to 2 hours each meeting.
student council was established, but never functional. The parent/community council was selected, but never functional. Plans for implementation of both of these groups are in place for next year, the first year of the JNPSD. Many community members have been hesitant to participate in the PCSSD Jacksonville Middle School, but have expressed interest in being more involved once the separation is complete.
ID07: The Leadership Team meets for at least 1.5 hours, often longer.
ID08: The Leadership Team serves as a conduit of communication between the school faculty and the administration. Input is gathered and communication is dispersed through the meetings of the Instructional Leadership Teams (PLCs). In addition, the Leadership Team has conducted several google surveys to gather teacher and student input.
ID10: The Leadership team has gathered perceptual data as well as achievement and discipline data to conclude the professional development needs of the faculty. This information was presented to the faculty in such a way that they were able to come to their own conclusions about the greatest professional development needs. They were in line with the needs assessed by the Leadership Team: student discipline management and increased student engagement.

post-assessments have been administered for grades 6-8. Those assessments were based on modules aligned with the standards. In Science, one pre- and post-assessment, based on units developed by teachers has been administered to seventh and eighth grade students. Sixth grade Science teachers have administered one post-assessment. Sixth and eighth grade English teachers have administered one pre-assessment based on units aligned with district pacing guides. Seventh grade English teachers have not administered pre- and post-assessments at this juncture. Sixth and eighth grade social studies teachers have administered one pre- and post-assessment based on pacing in textbooks. The special education department is currently working on the development of pre- and post-assessments in mathematics aligned to students learning objectives. Sixty percent of JMS staff are new to the school and many of them are new to the profession. Professional development on unit and assessment development will be critical to effective implementation of this indicator. IIB04: Pre- and post-assessment data are not being used to differentiate teaching and learning or remediate. Currently, department chairs in core areas are working in PLCs to develop unit assessments and establish protocols for the administration of those assessments, collection of the data, and use of data to inform instructional practice. Some pre- and post-assessment data have been collected in Science, Mathematics, and English. Those data have not been reviewed to determine students' needs for differentiation and remediation.
assessments to put this cycle into place. In preparation for the state visit in May, all instructional teams presented sample lesson cycles to demonstrate use of this cycle: pre-test to see what is known, preparation to teach what must be learned, postassessment to see what has been learned, analysis and reteaching as necessary.
IIB02: The Math PLC has been the most advanced in using the data to undergo job-embedded pd on improving the instruction to grow the students' achievement. This is in large part due to the Instructional Facilitator in Math. She has monitored and put into practice the most effective PLC in terms of using data to improve instruction. Because the Literacy facilitator was only here for approximately 12 weeks, we did not see the same growth in her PLC. As JNPSD prepares to use only 1 School Improvement Specialist for their district, it will be imperative that Jacksonville Middle School has two highly qualified and motivated Instructional Facilitators.
There will be a need for additional professional development on this process as JNPSD hires new teachers for the new district. Those teachers who are remaining from this year will be invaluable in getting this process in place.

|  |  |
| :--- | :--- |
| IMO AREA 3: STUDENT SAFETY AND DISCIPLINE |  |
| Effective Practice within Category: |  |
| Expecting and monitoring sound classroom management (IIIC10) |  |
| Description of full implementation of the Effective Practice and/or Recommendation: <br> The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher <br> establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently <br> teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their <br> classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10). <br> ज <br> Current reality of effective practice from the beginning of the <br> year: <br> IIIC10: There is no systemic process to ensure that rules, <br> procedures, rituals, and routines are effectively modeled and <br> taught. The SLT has worked to establish common times for team <br> meetings and faculty meetings to ensure open and clear <br> communication and dialogue. In general, disciplinary issues are <br> addressed by teachers and administration when they occur.$\quad$IIIC10: The greatest change in classroom discipline and <br> management can be attributed to the presence of the <br> administration in the halls daily. Though the fourth nine weeks <br> brought its typical end of the year silliness for middle school <br> students, it also brought some very hopeful signs of success. <br> Students who worked diligently during the ACT testing were given |  |

School leadership has worked to reduce student tardiness to classes and disciplinary issues by being present in the hallways during class transitions. There is inconsistency of teacher supervision in hallways during class transitions. School leadership is working with the district to ensure that students are aware of expectations. Additional security personnel have been assigned to Jacksonville Middle School to ensure close supervision of students. District administration from the Jacksonville North Pulaski School District and the Pulaski County Special School District met on October 13, 2015 to discuss concerns and solutions related to student disciplinary issues. The school leadership team has expressed concerns about the school's culture and has worked to build a positive climate by setting a positive tone at faculty meetings. Door prizes were given to faculty members at the last meeting. An additional ALC classroom will be added for nontraditional learners. A paraprofessional will be added to coordinate ALC activities.
a dance and the celebration went very well. Students were able to happily engage with each other as well as faculty in celebrating their work. In addition, the band held an awards banquet that was attended by many students and parents. Both of these events were positive events that could not have occurred at the beginning of the year. Mr. Hudgeons, Ms. Parker, Dr. Dallarosa, and Mr. Parker have built relationships with the students and their parents that have yielded an overall improvement in climate at the school. Students have a better understanding of appropriate hallway as well as classroom behavior.
There is hopefulness within the leadership team that next year will yield even more positive change in the climate. This is because for the first time in several years, the same Principal and Vice Principal will return. That means two thirds of the students will know and be known by the administration and will understand the behavior expectations. Additional parent participation is also in the forecast as JNPSD begins its own district. Much of the community bears a grudge against PCSSD and have indicated that they will become more involved in the JNPSD.
As indicated in the data portion of this document, at risk students who have 5 or more referrals has dropped during the $4^{\text {th }}$ quarter. At JMS the number of students who had 5 or more referrals fell from 43 in the third quarter to only 14.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

## Current reality of effective practice from the beginning of the

 year:IVA01: JMS has School - Parent - Student Contracts. These contracts detail exactly what kind of behavior is expected. This document defines school responsibilities, parent responsibilities, and student responsibilities. They have not yet been distributed, but they will be distributed to all students.

## Current reality of effective practice:

IVA01: JMS developed the state required parent involvement agreement that is accessible through the JMS website and PCSSD. This will change on June 6, 2016 when the JNPSD begins using its own server. As the JNPSD opens its own district, there will still be the state requirement for the parent contract and parent involvement policy and that will be met. In addition, the Leadership Team believes there will be much greater parent support for the JMS when it is part of the JNPSD. The movement to the North Pulaski building will also be more conducive to community involvement. North Pulaski is located more central to the city of Jacksonville and the recently remodeled auditorium (due to the tornado of 2011) is a better venue for community gatherings.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice from the beginning of the year: <br> VA01: Four-year plans are developed for eighth grade students based on information from EXPLORE test results. Information about paying for a college education is distributed to all students at beginning of each year. JMS hosts a career day inviting community leaders and professionals to speak to students. JMS also hosts a Go College Week in which college recruiters are invited to visit classrooms and speak to students. Students write reports about college interests. College night will be integrated into Literacy for parent's night.

## Current reality of effective practice:

VA01: Four-year plans were developed for eighth grade students by the counselors in collaboration with the students and parents. Information about possible college and technical school funding has been covered in the Career Orientation class as well as in various electives that may bring scholarship money. The Leadership Team plans to make sure the Go College Week occurs next year. Plans for a parent evening that include information about colleges and technical schools are being made by the Leadership Team.

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

The most meaningful decisions made by the Leadership Team this quarter revolve around the transition to the JNPSD. As teachers have been hired, more ownership of the school improvement and future plans has been taken by the Leadership Team. These teachers know they are returning and indicated meaningful investment in preparing for the ADE visit in May. Teachers continued to bring samples of their lesson units and pre and post assessments. This demonstrates a major change from the first of the year. Members of the Leadership Team also looked at survey results of the teachers in terms of what they feel their needs are and what they will need for the future of JMS. As the Leadership Team prepares to go to the School Improvement Conference this summer, they are focused on opening the new JMS with success. There is a definite sense of urgency present in the Leadership Team to make JMS successful.

This change is largely contributed to the leadership of Mike Hudgeons and the excitement generated by becoming a new district. As the JNPSD begins its first year, members of the Leadership Team are preparing to help with orientation and meet the needs of the new employees as well as their students.
If anything, what do you intend to change or modify for the year?
The Leadership Team itself will change. While the members attending the School Improvement Conference will remain in place for 2016-17, there is sure to be some change in the membership as well. The building will change and with that comes the teaming concept in which the instructional teams will be the teams of core teachers that work with a group. This is a change from this year. This year the instructional teams were organized by content matter, i.e. Math team, ELA team. Next year the instructional teams will be organized by grade level pods. This will allow the discussions to focus on the students instead of the content. The expectation here is
that the team can better individualize instruction and intervention.
As the Leadership Team has gotten used to the meeting schedule and using agendas and minutes, we believe this will remain the same.

ARKANSAS
DEPARTMENT
OF EDUCATION

## SCHOOL LEADERSHIP TEAM'S REPORT FOURTH QUARTER

STUDENT/ TEACHER DATA by Quarter IMO AREA 2: STUDENT PROGRESS AND ACHIEVEMENT

| $\begin{aligned} & \stackrel{\rightharpoonup}{0} \\ & \infty \end{aligned}$ | Grade Level | Number of students enrolled |  |  |  | Number of SWD enrolled as of October $1^{\text {st }}$ per grade level | Number of EL students enrolled as of October $1^{\text {st }}$ per grade level | Number of students with 5 or more referrals |  |  |  | Number of students who have been absent 10 or more days (20\% absence rate) |  |  |  |

|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

## Comments/ Clarifications:

As previously noted, with the highly mobile population in Jacksonville, the enrollment numbers change daily.

|  |  |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |  |  |  |
| 12 | 63 | 50 | 100 |  |  |  |  |  |  |

## Comments/ Clarifications:

In the teacher absence chart, Row 1 is Math, Row 2 is Science, Row 3 is ELA, Row 4 is Social Studies and the bottom row is Special Education.

The data for determining the number of students that are 3 or more years below grade placement in Math and in ELA for the 1st quarter, as mentioned in a previous report, is incomplete. Only a sampling of students were actually STAR tested in the first quarter. The data for the 4th quarter does reflect nearly all students, even though the numbers of students "not tested" range from 23 for the 6th Math to 51 on the 7th Math administration. These numbers are taken from the Screening Report. The Screening Report breaks the data into four categories, Exceeding, Ready, $\stackrel{\rightharpoonup}{\circ} \quad$ Close and Needs Support. The numbers listed on this report do not follow those same categories. $\stackrel{\infty}{\sim}$ For this report, the numbers reflect the Grade Equivalency scores that are equal to or less than three years of the end of each grade, i.e. 6th graders that were listed at or below 3.9 in the GE column of the report. It is interesting to note that in some cases, these numbers are less than the number categorized as "Need Support" and in some cases they are higher. For example, on the 8th grade Math Screening Report, students with a GE of 5.9 fell into their category of "Close". That particular report only listed 88 students as "Needs Support" and we are reporting 113 as 3 years or more below grade placement. In 7th grade math, just the opposite situation occurs, with the Screening Report showing 115 students in the "Needs Support" category, but only 71 students are reported with a GE of less than or equal to 4.9.

MATH DATA by Quarter for Grades 3-10

# End of Year Summary Report 

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)
Description of full implementation of the Effective Practice and/or Recommendation:
District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

Current reality of effective practice from the beginning of the year:

Transition to Indistar has been progressing very well.
(ID01): The Mills High School Leadership Team consists of Department Heads, and other key teacher leaders throughout the building. Instructional teams consist of teachers who teach within the same subject area and cross -curricular teams. A Student Team consists of a diverse group of student leaders, $A$ management team consist of campus administrators and other personnel as needed. A School Community Council (PTO) consists of a majority of parents and other key people as needed.
(ID04): All school teams meet at regularly scheduled times

Current reality of effective practice:
School Leadership Team, Instructional/Departmental, Student (Link Crew), SWAG (Students with a Goal), PTO and administrative Teams are in place and meet at least twice monthly. The Parental Involvement Team (PTO) had two parent representative groups, a Community Group PTO), and a Senior Moms and Supporters. Both groups were surveyed about school and parental concerns and possible solutions.

The SLT consists of department chairs and key members/staff of the local community. Indistar is the focus of every SLT meeting. The SLT continues to meet to create, monitor, and assess school improvement tasks and plan. The structure and practice of the SLT welcomes and encourages participation and input of all staff members as all staff are invited to the SLT
with a specific purpose and agenda items to be discussed and follow-up as needed.
(ID07): The School Leadership Team meets twice a month with a regularly scheduled time for at least an hour.

In addition to required indicators for first quarter, the following indicators were assessed: IMO AREA 1-CHANGE IN TEACHER AND LEADER PRACTICE
(ID08): The School Leadership Team regularly communicates to the faculty and staff to give and receive input from the faculty and staff. Minutes and agendas are emailed to staff. Information is shared during department meetings (content area group) and PLC's. Calendar of events/meetings scheduled and available for all teams. The principal publishes a weekly WAAG Report (Week-At-A-Glance)
(ID10): The Leadership Team regularly looks at performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development. The SLT looks at instructional rounds data to inform progress with indicators and decisions made during team meetings that impact school achievement.
meetings. SLT needs to communicate more regularly goals and progress better to staff members with specific details. Teams meet on a regular basis using agendas with intended results in mind. A focus on achievement data (i.e. Star 360, TLI, Pre/Post Tests, CWT's, ACT/Aspire) needs to be continued and enhanced with clear decisions made by the SLT. The SLT communicates to the staff, but there needs to be a way so that staff can submit items for the SLT agenda relevant to the student and staff's needs. Principal publishes a Week-At-A-Glance that contains pertinent information for staff and students.

All Faculty has access to Indistar, and minutes and sign in sheets are available. Attendance and minutes for each SLT meeting were recorded in Indistar. Information from SLT meetings are shared during PLC's and department meetings. The SLT used data from school walk-throughs and teacher suggestions to determine PD specific to the school's needs. The Deep Knowledge Team utilized strategies from the Arkansas Leadership Academy to address school change and PD.

SLT time needs to be more focused on recommendations and how school needs can be met. SLT needs to communicate better about achievement data throughout the year.

Make meeting notes more specific and document results of plans (i.e. accomplished, denied by District Office). The team shall dig deeper to identify the number of students needed to be proficient on accountability exams.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).
Current reality of effective practice from the beginning of the year:
(IIB01): Mills Instructional Teams have developed and implemented instructional units based on the curriculum, common core standards, and local curriculum documents (TLI Trend Data). Pre-Test and Post-Test have been given to all students and data charts are posted with the results. The unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals.
(IIB02 and IIB05): The Instructional Teams are learning how to use the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum. Data from unit exams is reviewed by the school leadership team to determine levels of support to be provided to individual teachers. The Instructional Teams are taking ownership of the results with assistance from Principal, Assistant Principals, Instructional Facilitators, SIS/PM and Learning Services --

Current reality of effective practice:
English/Language Arts Department: Teachers within disciplines have created units based on common core standards and standards outline from TLI. The District currently does not have a curriculum guide for Language Arts, though it is being worked on this year. Pre/Post Test have been given to most students and follow a stated timeline. Some classrooms post data charts with Pre/Post data results. The instructional teams are learning how to use the results of Pre/Post Tests to inform subsequent instruction and make adjustments to the curriculum. The SLT team needs to look more closely at Pre/Post data by department. Progress is being made in Instructional Teams taking ownership of the results of the data with assistance from other leaders; however, Literacy has not had an Instructional Facilitator in place for most of the 2015-2016 school year. The Instructional Team for Literacy has collectively examined the Pre/Post data together, and individual teachers assess the data for their classes to determine re-teaching and intervention. The

## District Office.

In addition to the required quarterly indicators the following were assessed for IMO AREA 1-CHANGE IN TEACHER AND LEADER PRACTICE:
(IIB04): The pre-test and post-test assess the same learning objectives and inform the Instructional Team member teachers on how to plan for differentiated instruction within the unit and/or provide opportunities for re-teaching/intervention and enrichment as needed before, during and after the unit.
(IIB03): The Instructional Teams are learning how to review the results of the pre- and post-tests in order to use the information to guide efforts to assure that every student has an opportunity to master the instructional standards taught in the instructional unit. Data from unit exams will be reviewed by the school leadership team to determine levels of support to be provided to individual teachers. The Instructional Teams are taking ownership of the results with assistance from Principal, Assistant Principals, Instructional Facilitators, SIS/PM and Learning Services-District Office.

Instructional Teams are learning how to use the results of the Pre/Post Test to provide all students the opportunity for mastery of the skill tested as well as spend more time on the students' areas of need. The SLT needs to review the unit exam data.

Math Department: Units have been established in Math. Pre/Post Tests were created and given; however, not all data was posted in $3^{\text {rd }}$ and $4^{\text {th }}$ quarter on the wall. Pre/Post Tests do assess the same learning objectives in Math. Instructional Teams have done very little to plan for differentiated instruction. Each teacher has looked at their own Pre/Post Test data to determine mostly whole group instruction on objectives. Instructional teams are learning how to review the results. Teachers are using strategies to address the needs, such as re-teaching and re-testing. Data from Unit exams needs to be reviewed by SLT. Instructional Teams are taking some ownership. Math teachers will benefit from scheduled common prep time for planning collaboratively next school year so that they have designated time to discuss Pre/Post Tests, student performance, and strategies for improvement. Teachers need help with differentiation.

Social Studies Department: Social Studies have been focusing on writing instruction, use writing assessments as Pre/Post Tests and have collected data throughout the year. Individual teachers are responsible for adapting instructional strategies to improve student written responses. A common rubric needs to be created to determine levels of proficiency. Data from Unit exams are examined by Departmental Instructional Teams who have expertise to draw conclusions about them. The SLT needs to be examined Unit exams data in detail.

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).
Current reality of effective practice from the beginning of the $\quad$ Current reality of effective practice: year:
(IIIC10): The faculty and staff have been trained and are encouraged to follow the district and local school (DMP) Discipline Management Plan that guides student behavior throughout the school. The DMP / Classroom rules are printed and posted in each classroom. Each teacher is encouraged to establish classroom rules, rituals and routines within their respective classroom. Teachers are encouraged to teach the DMP to all students. Some teachers consistently enforce the agreed upon rules and regulations.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

Current reality of effective practice from the beginning of the year:
(IVA01): A Parental Involvement Plan has been written that outlines how parents, school staff, and students will share responsibility for improving academic achievement. The plan outlines all aspects of how the school and parents can work together to help students achieve state standards. A survey is available on the Mills website for parents. A brochure has been completed to inform parents of how they can get involved with school and how can share responsibilities for improving academic achievement.

## Current reality of effective practice:

A PTO exists and a Parental Involvement Plan has been written that outlines how parents, school staff, and students will share responsibility for improving academic achievement. The Plan was completed, approved and uploaded to the school's site. A survey is available to parents, and a link to the survey is on the school website. A similar, but brief survey was printed and distributed to parents at certain after school events. A brochure was created to summarize the plan; identify the roles and responsibilities of parents, students, and staff; and to identify opportunities for parental involvement within the school. The brochure has not been translated to Spanish. The brochure could be handed out at the beginning of school year requesting feedback with all other beginning of the school year paperwork. The Scholars Program has a Parent handbook and also conducts annual Parent Meetings by grade level to provide additional support for parents and special student needs at each grade level of high school. Parents are also involved in special education meetings, IEP meetings, annual reviews, discipline intervention meetings, and parent teacher conferences.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school
routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.
ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

Current reality of effective practice from the beginning of the year:

Mills has a guidance plan that includes options for students as they plan for college and career opportunities. The school's counseling department plans year-long activities for all students.

## Current reality of effective practice:

Mills has a Guidance Plan that includes options for students as they plan for college and career opportunities. The school's counseling department plans year-long activities for all students like the College Fair, Financial Aid Night, and Field Trips to Colleges/Universities. In addition, college recruiters are invited to meet with students during lunch periods. The Counseling Department's Master Calendar is placed in the Mills Faculty Handbook. Freshmen complete a four year plan that guides their course selections in college preparation. A College Seminar for juniors and seniors was held to help students plan for college or career choices after graduation. A Financial Aid night was presented to the parents in preparation for college. It would benefit our students to have a Graduation Coach to help track student progress. The counseling department keeps an active binder of scholarship opportunities and applications for all students.

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

- New formal Intervention/Remediation schedule for students below grade level and ACT preparation.
- Transition Camp for upcoming $9^{\text {th }}$ graders
- Seeing the needs for Professional Development and needs for next school year programs.
- Viewing student data: Math and Literacy
- Discussions during PLC's and Department Meetings on how to grow students.
- Interventionist
- Credit Recovery
- PGP - Bloomboard
- Use of Pre/Post Test
- Team input: ways to serve students better
- Star 360 as a part of our comprehensive data analysis to determine growth of our students.
- The semester test schedule
- Discussion of using beginning of the year PD to meet specific school needs as determined by the SLT.

## If anything, what do you intend to change or modify for the year?

- Looking at Indistar ratings and ranking where we were and what implementations we needed to focus on. We will create more effective plans and actions.
- Accelerate the SLT purpose and procedures
- Build capacity of SLT
- Solicit more SLT members
- Interventions for Math based upon performance data
- Ask for faculty items to be placed on the Agenda.
- Improve lesson planning.
- Focus on helping teachers develop yearly lesson plans with a break down into units and infusion of critical thinking.
- More discussion about how we can make an impact - Action Plans.
- Training to properly implement DMP
- Incentives for students (i.e. good behavior, All A's, A's and B's) Fall and Spring.
- Special Education training on modifications - include the law requirements.
- Dyslexia training and strategies.
- Training to improve awareness of malnutrition and how it affects the brain/student performance.
- Expand Rtl training.

What were the most impactful and/or meaningful decisions made by the leadership team?

- Professional Development Needs identified
- Math Interventions were created
- Credit Recovery was held after school
- PTO involvement with rewards and student celebrations. The college readiness workshop was a success.
- CWT's data reviewed related to PLC's
- Team structure with specific duties
- Analyzing student learning results
- Collaborate, plan, implement instructional needs
- Transition camp plan and implementation in place for July 2016.
- PLC's focusing on enhancing teacher skills
- The PIP
- Knowing the indicators in Indistar helps to see the areas we have to focus on to provide means for student achievement.
- Having a formal schedule that includes intervention and remediation will give teachers and students time to designate specifically for students to work on skills they need and teachers sole purpose of assisting them.

## Describe how this decision impacted the school and/or increased student achievement.

- Knowing the indicators in Indistar helps to see the areas we have to focus on to provide means for student achievement.
- Having a formal schedule that includes intervention and remediation will give teachers and students time to designate specifically for students to work on skills they need and teachers sole purpose of assisting them.
- If teachers implement the strategies presented in the Social Studies PLC, writing should improve.
- Student achievement will rise in Math and English Language Arts.
- Professional development based on student learning.
- PGP's measured by recent classroom results and growth in student achievement.
- Analyzed classroom data reports.
- Identified needs for student learning.
- Funds were spent for learning time (before and after-school tutoring programs).

## Describe what plans will be put in place to achieve full implementation in the following:

1. Change in Teacher and Leader Practice (ID01, ID04, ID07)

- Accountability for PLC attendance.
- Sub-committees to work on focused issues and problems.
- Department chair meeting once a month to create policy and procedures for a variety of issues in the school.
- Student team needs to be more diverse.
- Focus on data analysis and reduce other business to memos if possible.
- Have other teams meet such as Implementation (Deep Knowledge -- Mountain Team) to identify resources needed for staff, students and PD.
- Request meeting time with PCSSD District Team to address needs and barriers (Strengths and Weaknesses)
- Continue with SLT meetings with a focus on procedure and purpose.

## 2. Change in Teacher and Leader Practice (IIB02, IIB04)

- Tracking student progress based on testing resources
- Pull-out Math students based on performance data
- Pre/Post Test to see what students already know
- Common Prep time for math department
- PGP goals monitored using Bloomboard and TESS evaluations
- DMP's posted in all classrooms Pre/Post Test: Math and English Language Arts to see what students already know.

## 3. Student Safety and Discipline (IIIC10)

- PD provided to improve rules and regulations
- Place on Agenda at beginning of school year - August PD.
- Meet with feeder school -
- Assistant principals will create and monitor programs that will fulfill the students' needs and foster positive climate and accountability
- Student voice suggestion box
- Student grade level meetings during homeroom time to address concerns and celebrate successes.

## 4. Family and Community Engagement (IVA01, VA01).

- Brochure outlining the Parental Involvement plan will be printed and mailed to the home of each student.
- The PIP brochure will be translated into required languages for all ESL and ELL students and mailed with the Standard PIP brochure.
- Learning opportunities including HAC training, Bullying Prevention, College Seminar, and Character Education will be offered to the parents. Announcements will be placed in the school website, and call outs will be made to parents to inform them of all learning opportunities.
- Scholars Program will continue to provide support via phone calls, meetings, printed materials. Etc.
- Hand out compact at beginning of school year.
- Monitor recent graduates success as they move to the next level
- Monitor transcripts from Colleges/Universities.
- Workforce Career Education teachers do follow-up on all students who were completers in the CTE Program.

## SCHOOL LEADERSHIP TEAM'S REPORT FOURTH QUARTER

## STUDENT/ TEACHER DATA by Quarter IMO AREA 2: STUDENT PROGRESS AND ACHIEVEMENT

| N | Percent of core teachers Math, Science, Social Studies, ELA) absent 5 or more days (10\%) |  |  |  | Number of ELEMENTARY <br> students that are 2 or more years below grade placement in Math as determined by |  | Number of SECONDARY students that are 3 or more years below grade placement in Math as determined by 1 ${ }^{\text {st }}$ Quarter: <br> Benchmark Exams: Basic/Below Basic $4^{\text {th }}$ Quarter: $\frac{\text { Star- } 360}{6 / 13 / 16}$ |  | Number of ELEMENTARY students that are 2 or more years below grade placement in ELA as determined by |  | $\begin{gathered} \text { Number of SECONDARY } \\ \text { students that are } 3 \text { or more } \\ \text { years below grade } \\ \text { placement in ELA as } \\ \text { determined by } \\ \text { 1 }=\text { st } \text { Quarter: } \\ \text { Benchmark Exams: } \\ \hline \frac{\text { Basic/Below Basic }}{4^{\text {th }} \text { Quarter: }} \\ \frac{\text { Star- } 360}{6 / 13 / 16} \end{gathered}$ |  |

|  |  |  |  |  |  |  |  |  |  |  |  |  |

## Comments/ Clarifications:

First Quarter data for students that are 3 or more years below grade placement in Math and Reading were determined by Benchmark Exams: Basic/Below Basic.

Fourth Quarter data for students that are 3 or more years below grade placement in Reading were determined by Star- 360 . As we transitioned into the $2^{\text {nd }}$ Quarter teachers were more equipped to utilize Star - 360 which gave us a more accurate picture of below grade level placement data.

# End of Year Summary Report 

## FOURTH QUARTER

9002

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)
Description of full implementation of the Effective Practice and/or Recommendation:
District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

Current reality of effective practice from the beginning of the year:

PBLCS has a school leadership team that consists of the School Principal, Directors of Teacher Leadership (2), Special Education Director, Teacher Leader Fellows (2), School Culture Coordinator, and our School Operations Manager. The leadership team meets weekly in regularly scheduled meetings at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observations data and uses data to make decisions about school improvement and professional development (ID10).

Current reality of effective practice:

PBLCS Leadership team has evolved to include the following personnel; Interim Principal, School Improvement Coordinator, Special Education Director, GT/ELL coordinator, Teacher Leader Fellows, SHINE coordinator, and School Operations manager.

Team meetings and agenda are posted to Indistar as well as kept in the Professional Development Binder.

SLT meet at least once a month to discuss academic data, attendance data, as well as discipline data. Student support team meetings are held as needed based on the information from the data and teacher recommendations.

The School Leadership Team agenda/minutes are logged into Indistar. All staff members have easy access to this information via a local SharePoint on LHA Connect. The guest login for Indistar has also been shared with the staff, local school board, and parents via the school newsletter. Staff members are encouraged to ask questions, comment, make suggestions, etc. to the leadership team.

Grade Level Collaboration groups meet each biweekly during a common planning period or after school. Departmental teams will begin to meet monthly to develop units of instruction, design, and differentiate classroom lesson plans, design interventions strategies, guide implementation of the structure, and provide essential professional development for teachers.

We also have a School Based Management Team (SBMT) that meets monthly. The SBMT is a committee comprised of representatives from each of the school stakeholder groupsschool leaders, parent representing the Light Keepers organization, Teacher Leader Fellows, a paraprofessional, a student and a community member. The key charge of the SBMT is to seek broad-based agreement among all the school stakeholders on activities, practices, or policies that significantly impact and improve student achievement. The SBMT is also the group that must ultimately sign off on the ACSIP. The number of educational issues that the SBMT address from year to year is extensive.

The school leaders will be receiving Restorative Practices training on June $9^{\text {th }}$ and $10^{\text {th }}$. This training will provided the staff with effective way to handle discipline.

School Leadership team information is delivered to the other staff members via grade level meetings, as well as the information is on the local SharePoint on LHA Connect and Indistar. All stakeholders have been provided the guest login in via school newsletters and webpage.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

Current reality of effective practice from the beginning of the year:

Lesson Plans are uploaded weekly and teachers are given feedback before the lessons are taught. PBLCS uses LinkIT for quarterly assessments. The assessments are reviewed by the DTL and teacher before the content is taught. Pre/Post tests are being developed during grade level meetings for all 3-8 Math/ELA classes. These Pre/Post are then entered into a tracker. The standards that are not mastered are then retaught by the classroom teacher before the interim assessment is given.

Results will be used in English and Math classes to guide instruction, interventionist will also push into the classrooms to support instruction. The process has been refined to ensure fidelity of the Unit method of instruction, Pre/Post assessment expectation is accurately communicated and adhered to, and daily data drives student instruction in Lesson Planning.

Current reality of effective practice:

The data from the LinkIT interim assessments, pre/post test, and NWEA data are analyzed in grade level meetings as well as SLT meetings. The data results are used to guide classroom instruction, provide focus to the interventionist as they push into the Math and ELA classrooms, and update the groups for RTI throughout the school. Each day students meet with assigned RTI groups to reteach standards that students are not mastering in the classroom or to provide enrichment to the scholars that are achieving mastery. The groups change throughout the year based on the data.

The teachers track and monitor each students pre/post test, interim assessment data, and NWEA data. The teachers work with the DTL/interim Principal to analyze each student's progress. The trackers are then also presented at the SLT meetings.

Teachers receive feedback on lesson plans to ensure the focus is on data to drive the instruction.

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom.
Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

Current reality of effective practice from the beginning of the year:

All PBLCS teachers taught school wide and classroom rituals/routines and rules for the first ten days of school. The entire staff at PBLCS follows the due process defined in the PBLCS Scholar and Family Handbook.

Current reality of effective practice:

All PBLCS teachers taught school wide and classroom rituals/routines. Student incentives are held for students that have exhibited appropriate behavior throughout the quarter.

PBLCS leaders and staff members will receiving training on Restorative Practices (June $9^{\text {th }}$ and $10^{\text {th }}$ )

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.
Current reality of effective practice from the beginning of the year:

PBLCS has a School Compact Agreement that is signed and returned by each family. The contract can found on page 8 of the 2015-2016 PBLCS Scholar and Family Handbook.

## Current reality of effective practice:

PBLCS has a School Compact Agreement that is signed and returned by each family. The contract can be found on page 8 of the 2015-2016 PBLCS Scholar and Family Handbook.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

Current reality of effective practice from the beginning of the year:

PBLCS exposes $7^{\text {th }}$ and $8^{\text {th }}$ grade scholars to college tours each semester. During advisory, all $7^{\text {th }} / 8^{\text {th }}$ graders create a PowerPoint on the college they would like to attend. The University of Arkansas at Pine Bluff comes to the school yearly to pass out information about college enrollment and financial aid. College banners are hanging in each hallway and school pods are named after college mascots. Every classroom teacher is required to have a college wall. WE have weekly town hall meetings that discuss the importance of college. The students are also allowed to wear college paraphernalia every Thursday. All $8^{\text {th }}$ grade take a college aptitude test via Naviance to determine appropriate career clusters and SMART goals.

## Current reality of effective practice:

During the Spring Semester, all scholars received a visit and hands on interaction from the UAPB girls soccer captain. She spoke to the students about her experience as a college student athlete, her major, and the steps she took to apply for college. She also organized the students to play a soccer game.

The students ended the year with their annual college spirit day, wearing their college paraphernalia.

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes

- We have restructured our Leadership Team for the 2016.2017 school year to include: Co-Principals, School Operations Manager, School Culture Coordinator (new hire).
- We have designed our master schedule for the 2016.2017 school year to include: extended time for ELA/Math ( $80-90 \mathrm{~min}$.) grades $3-8$. Small group push in and pull-out.
- We have also designated a classroom for intervention
- We have planned out our 2016.2017 school calendar to include: Parent nights, student activities, etc.
- We have submitted a $21^{\text {st }}$ century grant, that will be the basis for our after school program

If anything, what do you intend to change or modify for the year?
PBLCS is using the turn-around model to restart/revamp the school. All PBLCS staff members had to re-apply for their positions as
PBLCS. The school (along with the network) held many recruitment events around the state. The school will have co-principals for
the 2016-2017 school year. One principal will be over Kindergarten thru 3rd grade. The other principal will be over $4^{\text {th }}$ grade thru $8^{\text {th }}$ grade. The school has applied for the $21^{\text {st }}$ century grant. This grant will provide many additional opportunities for the scholars in Pine Bluff. The school's schedule will be modified during the 2016-2017 school year to provide more instructional time for all grade levels on English Language Arts and Mathematics. Restorative Practices will be fully implemented in the 2016-2017 school year. The school has embedded data days into their school year in conjunction with the surrounding Lighthouse schools. The school will be able to meet together to share instructional practices throughout the year.

# End of Year Summary Report 

## FOURTH QUARTER

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

Districtpolicy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04)

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08).
The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10),
Current reality of effective practice from the beginning of the $\quad$ Current reality of effective practice: year:
Leadership Team: Met twice monthly for at least an hour Instructional Team: Met weekly as an interdisciplinary team.
Student Team: Did not exist
Management Team: Met weekly
School community Council: Did not exist.

Leadership Team: Team met twice monthly for at least an hour. Decisions
Instructional Team: Restructured mid-year. Met by content with Instructional Facilitators (Math and ELA). Made instructional adjustments and decisions based on disaggregated data.
Student Team: Was formed mid-year. Met sporadically.
Management Team: Met weekly.
School community Council: Was not formed.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

## Current reality of effective practice from the beginning of the

 year:1. Instructional Teams \& Instructional Facilitators (Math \& ELA) met weekly to ensure horizontal alignment and to discuss instructional strategies.
2. All had input in the development of common assessments.
3. Assessments were administered every $2-3$ weeks.
4. Team meetings were held weekly to discuss disaggregated data.
5. Lessons were differentiated to address student needs.
6. Professional development was provided regarding preparing for the ACT Aspire, use of data, and differentiated lessons.

## Current reality of effective practice:

1. This practice continued throughout the school year.
2. This practice continued throughout the school year.
3. This practice continued throughout the school year.
4. This practice became problematic in that it was not reported timely andlor consistently from all teachers; thereby skewing the data. Incomplete data had a negative impact on the decision making process.
5. The use of "boot camp" , grouping, and Academic support classes intended to address specific needs of students. Academic goals were not set by all teachers.
6. No professional development was provided during the last quarter.

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

## Current reality of effective practice from the beginning of the <br> Current reality of effective practice:

## year:

Teachers Discipline Management
Inconsistent implementation of effective practices

School-wide Discipline Management Practices
Inconsistent implementation of effective practices

## Teachers Discipline Management

Inconsistent implementation of effective practices

## School-wide Discipline Management Practices

A school-wide protocol was established with input from all stakeholders. However, the failure to revisit, monitor, and adjust the plan resulted in inconsistent implementation of effective practices.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.
Current reality of effective practice from the beginning of the year:

The standard PBSD written compact will distributed to parents at an annual Title I meeting and events such as a back to school carnival, holiday dinners, Saturday School support, parent information nightslevents, and a parent center were established.

## Current reality of effective practice:

Little parent participation, inactive PTSO.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

Current reality of effective practice from the beginning of the year:

Non-existent

Current reality of effective practice:

Non-existent

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

No decisions were made this quarter this quarter.

If anything, what do you intend to change or modify for the year?
The structure of the Leadership Team. Will include representative of all core teachers and paraprofessionals.
Rather than discuss items, the team will address items and take action swiftly. The team with have the critical discussion and make the tough decisions. The minutes will reflect the actions taken.

The team will work collaboratively on Assessing Indicators, the 45 Day Plan, and update it after each meeting with next steps. The Leadership Team will ensure that all indicators are implemented according to the Wise Ways rubric.

## SCHOOL LEADERSHIP TEAM'S REPORT FOURTH QUARTER

| N |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

Comments/ Clarifications:

[^16]MATH DATAby Quarter for Grades 3-10

$5^{\text {th }}$ Grade: More students earned a $70 \%$ or higher on the fraction posttest. Only $23 \%$ of students earned a C or higher on the pretest given on 4-2916. Posttest data shows that $65 \%$ of the students scored $70 \%$ or higher. Students worked in small groups and had daily practice of the skill through bell ringers.
$6^{\text {th }}$ Grade: Based on posttest data, over half of the students in sixth grade scored $70 \%$ or higher on the test focusing on the distributive property. This is a huge increased compared to the pretest were only $30 \%$ of the students scored $70 \%$ or higher. As with $5^{\text {th }}$ grade, sixth grade students worked in small groups and had daily practice of the skill through bell ringers.
Students struggled on the TLI exam (pretest). One main reason noted by teachers was due to not having geometric formulas memorized.

ELA DATA by Quarter for Grades 3-10

Comments/ Clarifications: Teachers attend weekly grade level/content meetings with their Instructional Facilitators (IF) to analyze the data. Data is used to drive instruction in small, individualized, and whole group settings. Instructional Facilitators provide teachers with individualized coaching sessions specific to their individual strengths and weaknesses to improve instruction. The IF provided professional development related to teaching to the standards.

## (Optional)

## FOURTH QUARTER

## Dianna Bradshaw

## IMO Area 1: Change in Teacher and Leader Practice

## ADE Recommendation: Not Applicable

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

## First Quarter reality of effective practice (Assess where we were):

- Professional Learning Communities (PLC) - The Professional Learning Communities at Jack Robey Junior High School are conducted on a weekly basis through common planning periods of English Language Arts and math teachers and are designed to provide a collaborative forum for administration and teachers to analyze the most recent data, share in decision-making concerning instruction and professional development, and articulate clear next steps for faculty and staff implementation. Jack Robey Junior High School's PLCs provide accountability through data gathered from classroom walkthroughs, focus walks and consistent feedback to teachers and devise innovative ways to increase student achievement.
- Departmental Meetings - Jack Robey Junior High School’s departmental meetings are conducted weekly by Science and Social Studies teachers to collaborate and work in conjunction with the English Language Arts and math departments to act as a support system to reinforce literacy and math standards through their course contents.
- Building Leadership Team - The Building Leadership Team consists of school administration, literacy and math facilitators, counselors, the Special Education coordinator, and three teachers. The meetings are scheduled for the first and third Tuesday of each month. The purpose of the Building Leadership Team is to analyze data, construct systems to build capacity and positively impact the quality of instruction, and communicate clear next steps to the faculty and staff. The team uses the 45-Day Plan, the University of Virginia (UVA) 90-Day Action Plan, and Indistar Indicators to address the "Big Rocks" for Jack Robey that affect school turnaround. The "Big Rocks" are School Leadership, Teacher Effectiveness, School Climate/Culture, and Data-Driven Instruction.
- Instructional Leadership Team - The Instructional Leadership Team consists of administration, literacy and math facilitators, and department chairpersons from core and elective disciplines. The meetings are held every second Tuesday of each month. The purpose of the Instructional Leadership Team is to provide cross-curricular insight on the implementation of instructional strategies that address the "Big Rocks" that emanate from the Building Leadership Team, Professional Learning Communities, and Departmental meetings. The team targets specific performance standards for vertical and horizontal alignment and progression of skills as they relate to the Common Core State Standards for the various content areas and create real-world connections within the curriculum.
- Teacher Advisory Committee (TAC) - The Teacher Advisory Committee convenes once a month and/or as needed. The purpose of the Teacher Advisory Committee is to act as a "mouthpiece" between the teachers and building administration. The TAC committee assists in cultivating a positive school culture by espousing teacher morale, teacher professionalism, teacher efficacy, and community involvement.
- Bloomboard - Jack Robey Junior High School administrators and teachers utilize Bloomboard as an effective communication tool between school administration and teachers concerning professional growth and professional development that supports teachers in meeting their professional growth goals. Bloomboard is used as a prescriptive supplement to objectively evaluate teachers and instructional facilitators under the monitoring of the Arkansas Department of Education.

## Is this an accurate description of our school at that time?

Based on my observations, beginning December 1, and subsequent conversations with the staff, this is an accurate depiction of Jack Robey Junior High School during the first quarter.

## What is our current reality for fourth quarter?

- Professional Learning Communities (PLC) - The Professional Learning Communities at Jack Robey Junior High School are conducted on a weekly basis through common planning periods of all four core disciplines. Departments are writing their own
common assessments and gathering data to drive instruction in a two- to three-week unit. Distractor information is aggregated and analyzed by the English department to determine common teaching gaps or best instructional practices for specific skills or standards. Department employees then guide or mentor others through the intervention tasks to maximize student achievement. Accountability for Jack Robey Junior High School’s PLCs is provided through data gathered from cross-curricular PLC attendance, classroom walkthroughs, focus walks and consistent feedback to teachers to devise innovative ways to increase student achievement.
- Departmental Meetings - As the efficacy of Jack Robey Junior High School’s PLCs increased, the need for departmental meetings decreased. Teachers became more cognizant of their time together and handled all administrative issues during the weekly PLC. Cross-curricular PLCs were introduced between math and language arts teachers to discuss specific students and best collaborative exercises. Science and Social Studies teachers began to collaborate and work in conjunction with the English Language Arts and math departments to act as a support system to reinforce literacy and math standards through their course contents.
- Building Leadership Team - The Building Leadership Team consists of school administration, literacy and math facilitators, counselors, the Special Education coordinator, and three teachers. The meetings are scheduled for the first and third Tuesdays of each month. The purpose of the Building Leadership Team is to analyze data, construct systems to build capacity and positively impact the quality of instruction, and communicate clear next steps to the faculty and staff. The team uses the 45-Day Plan, the University of Virginia (UVA) 90-Day Action Plan, and Indistar Indicators to address the "Big Rocks" for Jack Robey that affect school turnaround. The "Big Rocks" are School Leadership, Teacher Effectiveness, School Climate/Culture, and Data-Driven Instruction.
- Instructional Leadership Team - The Instructional Leadership Teams consists of an administrator, literacy or math facilitator, the department chairperson and all instructional personnel involved in the discipline. The meetings are held weekly in conjunction with the PLC meeting.
- Teacher Advisory Committee (TAC) - The Teacher Advisory Committee convenes once a month and/or as needed. As with the Instruction Leadership Team meetings, as PLCs became more efficient, TAC meetings became less frequent. Overall communication was improved through PLC and monthly staff meetings. Teacher Advisory Committee meetings were still held to address the occasional odd issue in keeping with a positive school culture and transparency in communication. TAC Committee
members continue to assist in cultivating a positive school culture by espousing teacher morale, teacher professionalism, teacher efficacy, and community involvement.
- Bloomboard - Jack Robey Junior High School administrators and teachers utilize Bloomboard as an effective communication tool between school administration and teachers concerning professional growth and professional development that supports teachers in meeting their professional growth goals. Bloomboard is used as a prescriptive supplement to objectively evaluate teachers and instructional facilitators under the monitoring of the Arkansas Department of Education.

## How have we progressed as a school?

Professional Learning Community meetings have become much more effective in addressing the specific learning needs of students and/or groups of students as we become intentional with our intervention and remediation strategies. Additionally, departments take advantage of this time to address administrative or planning tasks or staff issues.

## What were the most impactful or meaningful decisions made by the leadership team?

During the winter conference at the University of Virginia, the team made a decision to be specific and intentional with our professional development in our efforts to increase the leadership capacity of the Jack Robey Junior High School staff.

## How has this decision impacted the school or increased student achievement?

Several teachers are taking a stronger leadership role and sharing the vision of administration in building a better educational experience for our students.

## What plans will be put in place to achieve full implementation in Change in Teacher and Leader Practice (ID01, ID04, ID07)?

The School Instructional Specialist will attend the ASCD Summer Conference in Hot Springs and gather information on Google and its many benefits in an educational setting, differentiation in practice, and the Response to Intervention process in preparation for the coming school year. A team of five will attend the School Improvement Conference, including the principal, School Improvement Specialist, and teachers representing language arts, mathematics, and social studies. In July, a team of six, including the School Improvement Specialist, both instructional facilitators, and teachers from language arts, science, and history will attend the Differentiated Instruction Conference in Las Vegas. Returning to the building, training will be given to the rest of the staff
as we prepare to meet the specific goals and needs of all learners at Jack Robey Junior High School. With several trainers in the building for each initiative, support can be embedded and ongoing.

## IMO Area 1: Change in Teacher and Leader Practice

## ADE Recommendation: Not Applicable

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or reteaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

## First Quarter reality of effective practice (Assess where we are):

Teachers are in the process of creating Unit Pre-Tests and Post-Tests based on the curriculum map skills that will be assessed every three (3) to four (4) weeks. The resources that will be utilized to develop assessments will be TLI Quiz Builder, ACT Aspire released items, Common Core aligned texts, internet resources, and TLI curriculum maps. As a result, teachers are required to complete Teacher Action Plans to identify specific students and their deficient skills. The pre-tests are designed to tailor instruction, and the post-tests are used to gauge teacher efficacy with instruction and target deficit skills for remediation.

Is this an accurate description of our school at that time?

Based on my observations, beginning December 1, and subsequent conversations with the staff, this is an accurate depiction of Jack Robey Junior High School during the first quarter.

## What is our current reality for fourth quarter?

Curriculum maps have been updated, providing teachers with the most current view of curriculum, aligned to ASPIRE testing. Teachers will disaggregate data from the 2016 ASPIRE and plan instruction for the first nine weeks. Pre-tests and post-tests will be created to guide instruction and provide target data as we review program effectiveness and content mastery. Teachers will be required to complete Teacher Action Plans after each interim assessment to identify specific student needs and common skill/content intervention targets for the group.

## How have we progressed as a school?

We have learned to target specific skills and utilize the entire instructional staff to reach achievement goals.

## What were the most impactful or meaningful decisions made by the leadership team?

Social studies teachers targeted specific reading strategies, science teachers taught geometry lessons during the first twenty minutes of their class each day, and all teachers reinforced citing evidence and finding main idea.

## How has this decision impacted the school or increased student achievement?

TLI scores and STAR Reading and STAR Math scores increased across the building. From an instructional perspective, all teachers feel a part of the students' learning, increasing accountability.

## What plans will be put in place to achieve full implementation in Change in Teacher and Leader Practice (IIB02, IIB04)?

All teachers will share in the data disaggregation and work collaboratively to target specific deficits, working as a team to cover all instructional gaps, facilitating even greater achievement growth.

IMO Area 3: Student Safety and Discipline

## ADE Recommendation: Not Applicable

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

## First Quarter reality of effective practice (Assess where we are):

- Classroom Walk-throughs - Jack Robey Junior High School has provided School-wide Expectations to all teachers throughout the building for the purpose of establishing rules as a common baseline for the school. Each classroom teacher spends the first week of each quarter (nine weeks) discussing these expectations. Classroom Walk-throughs are essential to monitoring school-wide rituals and routines that have been put in place and gauging the effectiveness of said expectations.
- Focus Walks - Jack Robey Junior High School administration and math and literacy facilitators conduct focus walks to monitor specific aspects of the classroom environment to ensure teachers are enforcing rules and procedures in the classroom that create an atmosphere that is conducive to learning.
- School-wide Expectations - The School-wide Expectations are rules that govern students' behaviors throughout the building and campus to ensure consistency of conduct of the agreed upon rules and regulations.
- Cooperative Learning (Kagan) - Jack Robey Junior High School is a Kagan school. That recognition acknowledges that Kagan structures are a part of the regular curriculum. These research-based structures are designed around routines and rituals for lessons that espouse cooperative learning and foster classroom environments that facilitate student engagement.
- Classroom routines - Each teacher at Jack Robey Junior High School not only promotes the School-wide expectations but also models expected behaviors of the individual teacher's classroom routines.

## Is this an accurate description of our school at that time?

Based on my observations, beginning December 1, and subsequent conversations with the staff, this is an accurate depiction of Jack Robey Junior High School during the first quarter.

## What is our current reality for fourth quarter?

- Classroom Walk-throughs - Jack Robey Junior High School has provided School-wide Expectations to all teachers throughout the building for the purpose of establishing rules as a common baseline for the school. Classroom teachers reinforced the rules as needed and schoolwide morning announcements highlighted a rule. Classroom Walk-throughs routinely verified rules were posted and enforced in each classroom. Data is gathered on a quarterly basis to gauge the effectiveness of the procedural expectations.
- Focus Walks - Jack Robey Junior High School administration and math and literacy facilitators conduct focus walks to monitor specific aspects of the classroom environment to ensure teachers are enforcing rules and procedures in the classroom that create an atmosphere that is conducive to learning.
- School-wide Expectations - The School-wide Expectations are rules that govern students' behaviors throughout the building and campus areas to ensure consistency of conduct. A disciplinary team was assembled and developed an assertive discipline plan and the necessary forms to accompany it, including counseling and parent notifications. Level one referrals decreased during the fourth quarter.
- Cooperative Learning (Kagan) - Jack Robey Junior High School is a Kagan school. However, the program was not implemented with fidelity schoolwide. Even teachers that readily modeled new strategies failed to include them on a regular basis. However, going forward, the School Improvement Specialist and instructional facilitators have access to Kagan, Marzano, and other cooperative learning strategies and will provide embedded professional development when needed to bolster student engagement.
- Classroom routines - Each teacher at Jack Robey Junior High School not only promotes the School-wide expectations but also models expected behaviors for their own classroom routines.

## How have we progressed as a school?

The schoolwide expectations have become a part of the Jack Robey Junior High School culture. Students have expressed that they no longer fear coming to school.

## What were the most impactful or meaningful decisions made by the leadership team?

The adoption of a schoolwide assertive discipline plan helped students be aware of rules and consistent behavioral expectations.

## How has this decision impacted the school or increased student achievement?

The consistency with which expectations are implemented has given teachers more control over students than previously experienced. Their knowing that colleagues share in the expectations for student behaviors has also decreased some of the frustrations experienced by staff.

## What plans will be put in place to achieve full implementation in Student Safety and Discipline (IIIC10)?

Jack Robey Junior High School will be implementing Positive Behavioral Interventions and Supports during the coming school year.

IMO Area 4: Family and Community Engagement
ADE Recommendation: Not Applicable

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)
Description of full implementation of the Effective Practice and/or Recommendation:
No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

## First Quarter reality of effective practice (Assess where we are):

- Title I Compact
- Parent Liaison (Marchelle Knight) has communicated with parents to participate on the Parent-Teacher Organization
- Remind Me 101, digital caller, parent newsletters, emails, text message numbers to build contact database

## Is this an accurate description of our school at that time?

Based on my observations, beginning December 1, and subsequent conversations with the staff, this is an accurate depiction of Jack Robey Junior High School during the first quarter.

## What is our current reality for fourth quarter?

Although the Title I Compact was distributed at the beginning of the school year, communication with parents was ineffective throughout the school year. Sporadic use of contact medium and a non-existent PTO stymied communications.

## How have we progressed as a school?

Although several modes of parent and community contact existed, there was no clear communication plan. Mr. Cegers has agreed to take over as parent facilitator and develop an effective plan that can be facilitated with regularity and consistency.

## What were the most impactful or meaningful decisions made by the leadership team?

"No data is data". The acknowledgement of the lack of a meaningful communication plan and the sincere intent to improve it going forward are our greatest gains.

## How has this decision impacted the school or increased student achievement?

There is no data on parent contact at this point. Our new plan will contain measurable goals for each medium and the implementation of an active Parent Teacher Organization.

## What plans will be put in place to achieve full implementation in Family and Community Engagement (IVA01)?

A new parent facilitator has been chosen and is developing a comprehensive communication plan covering all modes of communication, situational schemas, and parent/volunteer involvement.

## IMO Area 4: Family and Community Engagement

ADE Recommendation: Not Applicable
Effective Practice within Category:
Post-Secondary School Options (VA01)

The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates’ success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## First Quarter reality of effective practice (Assess where we are):

- Conferenced with students and parents about Smart Core curriculum - Jack Robey Junior High School sponsored Transition Meetings/Grade-Level Orientation in response to the reconfiguration of the school. The meetings were held on separate days by grade level to distribute information concerning student schedules, Smart Core, and an overall introduction to the Jack Robey Junior High School environment.
- Monthly Newsletter - The guidance office generates a monthly newsletter designed to inform students, teachers, and parents/community about upcoming school activities/events as well as school, college, and career information.
- ACT Prep Workshop - Jack Robey Junior High School, in conjunction with the University of Arkansas, hosts ACT workshops to orient students on test-taking strategies to improve their performance on the national exam.
- Youth Advisory Council (YAC) - The Jack Robey Junior High School Youth Advisory Council is a group of students who participate in a larger conglomerate with other students in Jefferson County. The students are empowered to be positive role models for other youth at the school and in the community. The students serve as philanthropists to their peers as assess and report the needs of the local youth.
- Career Coach Student Forum - Jack Robey Junior High School, in conjunction with Pine Bluff High School, features a student forum held each semester where the college career coach, Dedrick Jones, provides information about coursework that will be a foundation for career choices.

## Is this an accurate description of our school at that time?

Based on my observations, beginning December 1, and subsequent conversations with the staff, this is an accurate depiction of Jack Robey Junior High School during the first quarter.

## What is our current reality for fourth quarter?

－Conferenced with students and parents about Smart Core curriculum－Jack Robey Junior High School sponsored Transition Meetings／Grade－Level Orientation for rising $7^{\text {th }}$ and $9^{\text {th }}$ grade students．The meetings were held on separate days by grade level to distribute information concerning student schedules，Smart Core，and an overall introduction to the Jack Robey Junior High School or Pine Bluff High School environment．
－Monthly Newsletter－The guidance office is still in the planning stage for a newsletter．
－ACT Prep Workshop－The University of Arkansas is hosting ACT workshops to orient students to test－taking strategies to improve their performance on the national exam．Qualified students were able to apply for fifty slots in the summer program． Students that were chosen will travel to Fayetteville and stay on campus for the week of intense training this summer．
－Youth Advisory Council（YAC）－The Jack Robey Junior High School Youth Advisory Council is a group of students who participate in a larger conglomerate with other students in Jefferson County．The students are empowered to be positive role models for other youth at the school and in the community．
－Career Coach Student Forum－Jack Robey Junior High School，in conjunction with Pine Bluff High School，features a student forum held each semester where the college career coach，Dedrick Jones，provides information about coursework that will be a foundation for career choices．

## How have we progressed as a school？

Based on my observations，beginning December 1，and subsequent conversations with the staff，this is an accurate depiction of Jack Robey Junior High School during the first quarter．

## What were the most impactful or meaningful decisions made by the leadership team？

The University of Arkansas selected 50 scholars to participate in a one week college experience workshop to improve ACT test－taking skills this summer and to familiarize students with aspects of campus life，and encourage them to pursue a post－secondary education without fear or reservation．

How has this decision impacted the school or increased student achievement？
As the selection process was competitive in nature，students dressed professionally，wrote narratives，and addressed the selection panel with enthusiasm to gain a spot in the program．

What plans will be put in place to achieve full implementation in Family and Community Engagement（VA01）？

Still in the planning stages, our new Parent Facilitator will be holding committee meetings to assess the needs of the parental and community units. Plans will then be developed based on the data.

ARKANSAS
DEPARTMENT OF EDUCATION

## SCHOOL LEADERSHIP TEAM'S REPORT FOURTH QUARTER

## STUDENT/ TEACHER DATA by Quarter (IMO AREA 2: Student Progress and Achievement)

| Grade <br> Level | Number of students enrolled |  |  |  | Number of SWD enrolled as of October ${ }^{\text {st }}$ per grade level | Number of ESL students enrolled as of October $1^{\text {st }}$ per grade level | Number of students with 5 or more referrals |  |  |  | Number of students who have been absent 10 or more days ( $20 \%$ absence rate) |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1st | 2nd | 3rd | 4th |  |  | 1st | 2nd | 3rd | 4th | 1st | 2nd | 3rd | 4th |
| $7^{\text {th }}$ | 320 | 313 | 303 | 303 | 63 | 1 | 38 | 28 | 26 |  | 39 | 12 | 31 |  |

|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

## Comments/ Clarifications:

In reference to the absences, 7th and $8^{\text {th }}$ students were removed from school due to lack of up-to-date immunization records, as per state mandate. It is also important to note that referrals are steadily decreasing with the systems that have been put in place (i.e., lunch detention, student peer court).

## LEADERSHIP TEAM REPORT CONTINUED

|  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |

## Comments/ Clarifications:

Two seventh grade teachers were excessively absent due to bereavement; inclement weather and family emergencies contributed to teacher absences for the third quarter.

## LEADERSHIP TEAM REPORT CONTINUED

MATH DATA by Quarter for Grades 3-10

| Grade <br> Level | Number of students that failed Math the previous year | Number of students enrolled this quarter | Number of students with D or F in Math class per quarter 2015-2016 |  |  |  | Number of students assessed on each post-unit assessment for the current quarter |  |  |  | Total number of students assessed on the post-unit tests for each grade level <br> (A) | Total number of students with D or $F$ on unit tests in Math this quarter <br> (B) | Percent of students with D or $F$ on any unit tests in Math <br> (C) $(B / A) X 100=C$ |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | 1st | 2nd | 3rd | 4th | $\begin{gathered} \hline \text { Unit } \\ 1 \\ \hline \end{gathered}$ | $\begin{gathered} \hline \text { Unit } \\ 2 \\ \hline \end{gathered}$ | Unit 3 | $\begin{gathered} \hline \text { Unit } \\ 4^{*} \\ \hline \end{gathered}$ |  |  | 1st | 2nd | 3rd | 4th |
| $7^{\text {TH }}$ | 85 | 303 | 83 | 12 | 65 |  | 281 | 281 | 278 |  | 278 | 203 | 47.3\% | 4.5\% | 73\% |  |
| $8^{\text {TH }}$ | 69 | 206 | 59 | 30 | 53 |  | 159 | 199 | 180 |  | 180 | 113 | 71.1\% | 15.1\% | 63\% |  |
| $\begin{gathered} \mathbf{8}^{\text {th }} \\ \text { (Alg.) } \end{gathered}$ |  | 120 |  |  |  |  | 97 | 96 | 88 |  | 99 | 78 | 88.2\% |  | 95\% |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Example |  |  |  |  |  |  | 100 | 90 | 95 | N/A | 285 | 57 | 20\% |  |  |  |

## Comments/ Clarifications:

Many students at Jack Robey Junior High School do not have prerequisite skills in the four math foundational functions (addition, subtraction, multiplication, and division) to perform proficiently in grade level math. Students who have skill deficiencies in math are currently enrolled in math intervention class. Additionally, science teachers are addressing the skill deficits from the geometry strand identified in mathematics formative assessments. The first twenty (20) minutes of each science instructional block is dedicated to supplemental math instruction. After-school tutoring classes focus on real-time intervention in fractions.

## LEADERSHIP TEAM REPORT CONTINUED

ELA DATA by Quarter for Grades 3-10

| Grade <br> Level | Number of students that failed ELA the previous year | Number of students enrolled this quarter | Number of students with D or $F$ in ELA class per quarter 2015-2016 |  |  |  | Number of students assessed on each post-unit assessment for the current quarter |  |  |  | Total number of students assessed on the post-unit tests for each grade level <br> (A) | Total number of students with D or $F$ on unit tests in ELA this quarter <br> (B) | Percent of students with D or $F$ on any unit tests in ELA <br> (C) $(B / A) X 100=C$ <br> (Below Basic) |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | 1st | 2nd | 3rd | 4th | $\begin{gathered} \hline \text { Unit } \\ 1 \\ \hline \end{gathered}$ | Unit 2 | Unit 3 | Unit 4* |  |  | 1st | 2nd | 3rd | 4th |
| $7^{\text {TH }}$ | 1 | 303 | 84 | 13 | 92 |  | 285 | 279 | 259 |  | 259 | 176 | 41\% | 38\% | 68\% |  |
| $8^{\text {TH }}$ | 5 | 326 | 79 | 30 | 36 |  | 279 | 284 | 277 |  | 277 | 250 | 68\% | 41\% | 90\% |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Example |  |  |  |  |  |  | 100 | 90 | 95 | N/A | 285 | 57 | 20\% |  |  |  |

## Comments/ Clarifications:

According to Star Reading, Common Assessment, and TLI data, reading comprehension school-wide is not commensurate to grade equivalency. Students demonstrating skill deficiencies have been enrolled in reading intervention classes to gain foundational support to increase student performance in the area of reading.

## LEADERSHIP TEAM REPORT CONTINUED

## (Optional)

## Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example:

 Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.End of year STAR Math testing showed all general education classes gaining an average of 44 scale score points, which is significantly above the 35 point target established by RenLearning. Similarly, end of year STAR Reading tests showed the average general education student gaining 61 scale score points.

## Additional Comments:

In accordance with the most recent data, Jack Robey Junior High School is continuously working to put systems in place to positively affect overall school improvement. Common Assessments were conducted during the first week of school for literacy and math to establish baseline data this year from which to work. Based on the data from the assessments, Student Data Portfolios were created so that English Language Arts and math teachers could explain the data to the students, and the students would take ownership of their data by graphing and understanding their academic progress in literacy and math classes. These portfolios are updated after each unit assessment. The teachers are utilizing Teacher Action Plans to document assessment progress by class and identify those students who need remediation for deficient skills from the assessments. The teachers then construct a plan of how the skills will be reinforced through instruction. During Professional Learning Community Meetings, teachers disaggregate common assessment data to identify student learning expectations in which more than $40 \%$ of the students selected the same wrong answer. Distractor information was explored to identify and correct gaps in the learning. Likewise, teachers highlighted those classes in which 70\% or more of the students selected the right answer. Instructional strategies were identified in hopes of replicating the success in those classes not faring as well. Jack Robey Junior High School has also created Reading Intervention and Math Intervention classes for enrollment of students according their entry data. These students are primarily those who have Below Basic performance levels in literacy and/or
math. Jack Robey Junior High School, in conjunction with Renaissance Learning and Compass Learning, conducted the Star Reading and Star Math assessments during the months of September, January, and May. That data was used to quantify academic growth through the Accelerated Reading and Accelerated Math (Math Facts in a Flash) programs and build reading comprehension and math skills for all students. After-school tutoring focused on data manipulation involving fractions. To further bolster reading skills, English Language Arts teachers use Scope/Action, Scholastic, and NewsELA reading materials in classes. The reading materials from these resources provide a grade-level reading component for various articles so students may receive content articles on their reading levels, according to Star Reading data. The same reading article can be computer-generated on individual reading levels so students can comprehend the information on their reading levels. Beginning in January, all ELA classes received trade books to go with the X-Books instructional program. Jack Robey Junior High School became a Kagan school in 2014. Kagan Cooperative Learning Structures and Plickers formative assessments are a regular part of instructional practices throughout the school building in all classes. Many teachers use the Flocabulary program and its collection of short videos to bolster student engagement. The Building Management Team also selects a Kagan Strategy to be implemented in instructional practices each month, and the teachers present the lessons and student artifacts during faculty meetings. These research-based best practices are enacted to build instructional capacity and provide options for differentiated instruction. Administrators conduct weekly classroom walk-throughs and focus walks to monitor the implementation of programs and systems and gauge teacher effectiveness in the instructional cycle. Classroom observations are conducted on a regular basis by leadership members, and timely, specific feedback is given to teachers concerning "glows" and "grows", instructional directives are provided, and a follow-up visit is scheduled with the teacher within 48 hours of the initial observation. Jack Robey Junior High School has established a re-structured Building Leadership Team, Instructional Leadership Team, and a Teacher Advisory Committee. These cohorts were designed to establish effective, clear, and timely communication among school administration, teachers, staff, student, parents and community, and relative stakeholders, in an effort to build bridges between all entities and work collaboratively to increase student achievement at the school. Jack Robey Junior High School is working diligently to ensure that intended outcomes are realized to positively impact school improvement and student success. Finally, prior to state testing more than 100 students were selected to participate in the Saturday Scholars Initiative, in which supplemental instruction was provided in the grade-level standards showing greatest need for improvement. Students were engaged and exhibited more than a $10 \%$ increase in correct responses.

# End of Year Summary Report 

 FOURTH QUARTER
## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

## Current reality of effective practice from the beginning of the <br> Current reality of effective practice:

 year:- Professional Learning Communities (PLC) - Our PLCs meet weekly during teachers' common planning periods and other designated times. Our focus is in $9^{\text {th }}$ and $10^{\text {th }}$ grade math, literacy, and biology. The $10^{\text {th }}$ grade Geometry PLC meets every Wednesday. The Biology PLC meets every Wednesday. The $10^{\text {th }}$ grade literacy PLC meets every Tuesday. The $9^{\text {th }}$ grade literacy PLC meets every Thursday. The $11^{\text {th }}$ grade literacy PLC meets the first Wednesday of each month. The $12^{\text {th }}$ grade literacy PLC meets the first Wednesday of each month. The Algebra I PLC meets every Tuesday and Algebra II meets every Wednesday. The advanced math PLC meets every Wednesday. During these PLCs, the teams discuss and share best practices, review and disaggregate

We have a Leadership Team in place and Curriculum Teams. We are in the process of establishing our Student Team with the support of the District SIS. Instructional Facilitator develops agenda for PLC Meetings with the purpose being for discussion of data, lesson planning using data, addressing state standards, shifts in plans, and collaborating with other content teachers. PLC agendas are developed by the facilitator. The purpose is to address needs of teachers as determined by observations and walk throughs. Building Leadership Team agendas are developed for the next meeting at the conclusion of each Leadership Team meeting. The purpose of the BLT is to discuss data and determine next steps, determine how we will address priority school indicators in order to move forward, and to be the communication bridge to the staff. The Building Leadership Team meets weekly with an agenda, minutes, and attendance recorded in Indistar as documentation. Principal, Counselor, Facilitator, Assistant
data, plan and pace lessons, and make instructional decisions based on data.

- Cross-Curricular PLC - Each team comprises teachers who share the same prep period. All teachers with second period prep will meet first, all teachers with third period prep will meet next, etc. All of the teams meet on the second and fourth Tuesday of each month. Each team was asked to select a committee chair and a record keeper among themselves. The high school is having issues around the following: too many student referrals, student discipline, and student attendance. We asked each team to select one of the following issues to work on starting Oct. 13, 2015. The teams will research and discuss their selected issue and make recommendations to the administration during their first meeting in November.
- Departmental Meeting - This team is comprised of fine arts, business, foreign language, career technical education teachers, and other similar content areas. This team meets monthly to discuss instructional needs, current events, deadlines, professional development and school wide initiatives to improve instruction.
- Building Leadership Team - This team comprises the school principal, assistant principals, instructional facilitators, parents, students and department chairs. This team meets monthly after school to discuss school culture and climate, discipline, safety, attendance (student and faculty), incentives, data analysis, teacher evaluation process (Bloomboard/TESS), community partnerships, and parental involvement.
- Instructional Leadership Team - This team comprises the school principal, assistant principals, and instructional facilitators. This team meets weekly to discuss instructional strategies to be

Principals, District SIS and Internal SIS are members of the Building Leadership Team.

A request has been submitted to the district to formally recognize the building's leadership team, instructional team, and family community support team.

A survey for teachers and staff to access the effectiveness of the team is now being developed and will be given when we return in August.
implemented in classrooms, disaggregate data provided by instructional facilitators, update ACSIP plan, assess and plan indicators, create agendas for staff meetings, update IMOs, discuss upcoming events to be placed on weekly bulletin, school wide initiative, incentives, CWT and focus walk data, and discuss School Improvement Specialist/UVA mandates.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

## Current reality of effective practice from the beginning of the

 year:
## Current reality of effective practice (Assess where we are):

Teachers are in the process of creating Unit Pre-Tests and Post-Tests based on the curriculum map skills that will be assessed. The resources that will be utilized to develop assessments will be TLI Quiz Builder, ACT Aspire released items, Common Core aligned texts, internet resources, and TLI curriculum maps. As a result, teachers are required to

## Current reality of effective practice:

The Pine Bluff High Instructional Teams create Mathematics and Literacy Units based on the State Standards. The units are three to four weeks of instructional units and include pre-/posttests (IIB01). The pre-test and post-test assess the same learning objectives and the teachers plan for differentiation and re-teaching that is documented in lesson plans (IIB04). The PBSD school Instructional Teams reviews the results of the pre- and post-tests and uses the data to guide instruction for all student mastery
complete Teacher Action Plans to identify specific students and their deficient skills. Instructional Facilitators are used as department heads and act as a liaison between administrators and teachers to distribute data. Facilitators lead the PLCs to discuss data analysis and the root cause of student deficiencies. The facilitators present the data reports during Instructional Team meetings. Administrators monitor best practices and high yield strategies, and then provide feedback regarding instructional strategies in order to address student deficiencies. The Instructional Team plans research-based professional development, and then adjusts the curriculum accordingly to ensure student growth. The Instructional Team reviews the data from TLI Unit and Interim assessments to determine areas of need and to inform decision-making. After a review of the data from the current Unit/Interim Assessment in literacy, the team determined that there was a need to examine the data through more than one lens. The team wanted to discover more than the percent of students scoring advanced, proficient, basic, and below basic at each grade level. They also wanted to know why teachers were getting the results they were getting. At first glance of the data below, it may appear that one teacher was superior to another. However, the team realized that other factors contributed to the results of the data. During the data review of the Unit Assessment results for grades nine and ten in literacy, team members began to ponder why the teachers were getting the results they were getting. Through conversations about the data, the team began to dialogue about underlying causes. Some of these variables included the following: the number of students the teachers tested, the disproportion of student teacher ratios in particular class periods both within across the grade levels, and the number of Pre and AP students in the classes. The team determined that some of their short-term tasks will include identifying teachers in need of support and directing resources to support them.
Teachers are required to create teacher action plans based on student data. Therefore, students who did not meet their learning targets on the assessments will receive support with a Tier II or Tier III interventions. In addition, we are in the process of implementing school-wide initiatives in literacy.
(IIB03). Professional Development is implemented as the data is interpreted with instructional rigor and relevance. (IIB02, IIB05). Current reality of effective practice (Assess where we are): (IIB02)
. A schedule of unit pre and posttests has been created, published, and distributed to the Leadership Team and the Faculty. (IIB04) The school is creating pre and posttest in collaborative content teams during PLC's. (IID02) (IID06)The Learning Institute (TLI) interim assessments are administered to all students at least four times a year. The Administrative Leadership reviews the results. Instructional teams and individual teachers review the results to provide support for individual students and group of students. Teachers make adjustments as needed to instructional plans.

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

## Current reality of effective practice from the beginning of the

 year:Pine Bluff High School has implemented school-wide expectations that are posted throughout every building, hallway, and classroom. These expectations are monitored by teachers through schedule or routines and procedures and cooperative learning throughout the lessons (Kagan). Teachers provide parent contact log and student samples of strategies utilized within the lessons. Administrators ensure that each classroom is conducive to learning by monitoring the school-wide expectations through classroom walk-throughs, focus walks and office referrals. The Building Leadership Team meets monthly to review and disaggregate discipline data and make recommendations.

BLT reflective narrative on First Quarter Current Reality( Thursday, May 26, 2016 at 2:30)

Pine Bluff High School has implemented school-wide expectations that are posted throughout every building, hallway, and classroom. These expectations are monitored by teachers through schedule or routines and procedures and cooperative learning throughout the lessons

## Current reality of effective practice:

PBHS has moved from posting school-wide expectations to experiencing student success in adherence to the rules and regulations of the school. Students are more compliant in classrooms and as a result, the school has experienced a higher level of attendance at school celebrations for students who are not violating student behavior policies.

The staff at PBHS has a heightened sense of awareness about the priority status of the school. Through the work of the math and English PLCs, there has been a laser focus on the disaggregation of data to drive instruction. The teaching staff has evolved from recipients of information to active participants in data analysis.
(Kagan). Teachers provide parent contact log and student samples of strategies utilized within the lessons. Administrators ensure that each classroom is conducive to learning by monitoring the school-wide expectations through classroom walk-throughs, focus walks and office referrals. The Building Leadership Team meets monthly to review and disaggregate discipline data and make recommendations.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

## Current reality of effective practice from the beginning of the

## year:

Pine Bluff High School conducted orientation for each grade level. During orientations, parents and students received an overview of Title I Program and requirements. During Open House, parents participated in revising the PBHS Title I Compact. Parent Facilitators presented information about Parent Teacher Organization, resources on campus, location of the Title I Parent Center, and provided handouts on test taking strategies and homework tips. Parents completed Climate Surveys. Community partners presented information to parents and students about the resources they

## Current reality of effective practice:

## Parent Involvement

We have an active PTO that sponsors numerous events for the professional staff, including school-wide breakfast, teacher appreciation, ninth grade spring activity, etc.

PBHS hosted literacy and math night. We had parent night for special needs students addressing independent living and resources for careers. We held Gradpoint parent nights each semester. We combined PTO activities with Honor Society and Beta Club inductions. Parents were

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice from the beginning of the year:

Pine Bluff High School guidance counselors hold Senior class quarterly meetings and individual conferences with 2015-16 Seniors and Juniors to discuss graduation requirements, credit checklist, college and career readiness, credit recovery, testing and tips for student success. Counselors held Freshmen and Sophomore assemblies to discuss required credits towards graduation. The counselors encourage students to measure their progress towards student achievement.

Pine Bluff High School tracks recent graduates who attend one of the two local universities within the city to monitor their academic progress. These students attend the University of Arkansas at Pine Bluff. The University of Arkansas at Pine Bluff is one of the high schools business partners. Our intent is to monitor the number of former graduates who matriculate and stay within Jefferson County area. It is our hope that these students will graduate, gain active employment, and contribute to the local economy. In the class of 2015, of the 288 Seniors, 84 enrolled at UAPB. Of the 84 Seniors enrolled at UAPB, 34 received academic scholarships. In the class of 2014, of the 259 Seniors, 63 enrolled at UAPB. Of the 63 enrolled at UAPB, 28 received academic scholarships.

## Current reality of effective practice:

Students are given support as they prepare to transition from high school to post-secondary education. While our on staff career coaches is our main venue for assisting students with the financial-aid process, college applications, and accompanying essays, students also benefit from the support of campus mentors who track and guide them through the college application process as well as provide them with ACT Preparation. Also the counseling department has offered dedicated time to provide graduation audits. A process for tracking students after graduation is currently being established at the high school.

ARKANSAS
DEPARTMENT OF EDUCATION

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

- Master scheduling for next year
- Transition camp for $8^{\text {th }}$ graders
- Development of the behavior committee including all stakeholders
- Teacher and student incentives/celebrations
- Job embedded professional development
- Reinstate curriculum team meetings afterschool

The numbers increased for participation in the behavior celebrations. Teacher non absences were celebrated on a monthly basis and it decreased teacher absences.

## Change in Teacher Leader Practice

All professional growth plans consisted of at least one goal that was aligned to math, literacy, or science achievement. Teachers, through PLC growth, have become data driven decision makers as a result of continuous and consistent data exposure and analysis. In addition, teachers
facilitate PLCs in literacy. Through the Curriculum PLCs, department chairs collaborate and share with teachers within their departments. Teachers engaged in differentiated instruction using the following strategies: Kagan strategies, MDC activities and hands-on instructional programs. With the Carnegie materials, the teachers created online lesson modules to better prepare students for the assessments. Teachers engaged in common assessment dissemination, and as a result teachers conducted data analysis sessions to identify deficit areas. As a result, teachers selected standards to focus on for remediation. Teacher Action Plans were updated based on deficit skill areas for students in need of interventions.

## (IIIC10) Student safety and discipline

A school-wide emergency plan was formulated with the assistance of the Pine Bluff Fire Dept. and then shared with the professional staff. Active shooter drills were conducted with security staff and the Jefferson County Sheriff's Office. The school has proposed to the administration the idea of fencing off the perimeter of the physical buildings from Olive to Poplar and from $11^{\text {th }}$ to $8^{\text {th }}$ streets. Jefferson County and Pine Bluff police agencies have been asked to continuously patrol the perimeter of campus.

Upon review of the first and second quarter discipline report, the leadership team under the direction of Assistant Principal Claudette White established the Discipline Management Committee. The leadership team researched Positive Behavior Intervention Systems (PBIS) to evaluate its potential use within our discipline structure. Discipline data was examined by the leadership team and a reward/incentive program was adopted for students who received no disciplinary infractions for the previous quarter. Student participation in this program increased which provides a clear indicator of an increase in positive student behavior.

The school leadership team made several suggestions in the form of requests for additional personnel assistance, including a school-court liaison to deal with the inordinate number of students who have active cases in the juvenile justice system. That request was denied. A Saturday School program was developed by assistant principal Lee that was non punitive in nature. This program provided for instructional assistance and social development opportunities for the student, including conflict resolution. This program was revised and resubmitted on multiple occasions to the director of federal programs, yet it was never approved for operational and implementation purposes. This program will be resubmitted for the 2016-2017 school year to be implemented at the beginning of the school year.

## Family and Community Engagement

We have an active PTO that sponsors numerous events for the professional staff, including school-wide breakfast, teacher appreciation, ninth grade spring activity, etc. PBHS hosted literacy and math night. We had parent night for special needs students addressing independent living and resources for careers. We held Gradpoint parent nights each semester. We combined PTO with Honor Society and Beta Club inductions. Parents were given tips at each event. The PTO worked with the parents and Career Coaches to host a Career Fair. The PTO hosted an Easter Egg Hunt and a Clean Water Project for the Flint Water Crisis.

Dr. Nellums received a letter from the Office of Education Policy congratulating the school on its testing achievement among high poverty schools. They compare all high poverty schools within the same region. In central AR, PBHS ranked \#2 on PARCC Literacy.

If anything, what do you intend to change or modify for the year?
As we begin the transition into the work for next year, the focus will be on building a culture and climate in which there is a sense of urgency about the work that has to be done to continue the progress that has been made in teaching and learning at the school. There will be a laser like focus on building systems of assessment, accountability and student teacher engagement to meet the needs of all students.
We will review the discipline policies and procedures to develop and implement a PBIS system that provides structured, differentiated support to those students in need.

Implementation of the district wide systems of meetings and data disaggregation through Data Wise and Meeting Wise.
Create strong instructional team who will support the BLT in the work.
Realign the Building Leadership Team to:

- Make decisions and develop solutions
- Support Individual teachers and students
- Discuss what they can do differently to support/ reach students rather that only reporting the data
- Survey the staff to gain evidence on what the staff perceives as the current effectiveness on of the leadership in the following areas.

1. Teacher support
2. Communications

## 3. Meeting the needs of teachers and students

- The continuous and timely review of student data to make instructional decisions about teaching and learning.

## Comments/ Clarifications:

The Instructional Leadership Team reviews the data report from Post Unit Assessments for Algebra I and Geometry to analyze the data to determine student needs and discuss action plans for math interventions. In Mathematics, the student population for Grade 9 consists of 219 Algebra I and 70 Pre-AP Geometry students.
$9^{\text {th }}$ and $10^{\text {th }}$ Grade mathematics teachers administered three common assessments aligned with the common core standards in mathematics fourth quarter. The $9^{\text {th }}$ Grade PreAP Geometry teacher administered four in the second quarter. After administering these assessments, the teachers and facilitators met weekly during their PLC to make data-driven decisions about determining students’ instructional needs, setting learning targets for students, providing enrichments/interventions, and tracking and monitoring progress. Teachers also administered the Spring STAR Math Assessment and STAR Math Facts in a Flash to determine students' levels of understanding and inform instructional decisions. Teachers, along with the instructional facilitator, disaggregate and analyze the data during Professional Learning Community meetings and data dives. They also identify trends in the data, particularly recurring standards where students performed poorly. The data is shared at faculty meetings and during the Leadership Team Meetings. Based on the outcome of the data disaggregation, the recurring deficit skills become areas of focus for interventions, remediation, and Teacher Action Plans (RTI). Future common assessments are created according to the targeted skills of focus and the standards that are identified as testable standards in the TLI Curriculum/Pacing Guide during that quarter. The cycle continues every two to three weeks, and both Pre and Post Tests are administered.

Pine Bluff High School made gains in mathematics this quarter. As the data below indicates, Geometry showed overall growth on the Pre- and PostUnit Assessments of +7 from the Baseline to the Second Quarter. Additionally, the Pre- and Post-Unit Comparison reflects overall growth by +12 on the recurring standards from Baseline to Quarter 2. As the data reflects Algebra I showed overall growth on the Pre- and Post-Unit Assessments of +12 from the baseline of First Quarter and a decrease of $11 \%$ of D's and F's on the common assessments.

Overall, we attribute the gains to consistent use of data disaggregation and analyses, common assessments based on focus standards, data- driven intervention plans, collaboration, and progress monitoring. The $9^{\text {th }}$ Grade mathematics have committed to Remediation and Enrichment in the Fourth quarter to remediation and enrichment, using Math Facts in a Flash and ACT Aspire exemplars in remediation and enrichment daily prior to the ACT Aspire assessment. The $10^{\text {th }}$ Grade mathematics have committed to two-three times weekly in the Third quarter to remediation and enrichment, using Math Facts in a Flash and ACT Aspire exemplars in remediation and enrichment.

The TLI Geometry Module 1 Unit consisted of 23 teaching days with 2 remediation days after testing. The Unit 1 test was administered on September 18, 2015. The TLI Geometry Module 2 Unit consisted of 21 teaching days with 2 remediation days after testing. The Unit 2 test will be administered on October 23, 2015. The TLI Geometry Module 3 Unit consisted of 27 teaching days with 2 remediation days after testing. The Unit 3 test was administered on December 11, 2015.

The TLI Algebra I Module V Unit consisted of 25 teaching days with 3 remediation days after testing. The TLI Module IV was administered on March 15. The Algebra I students made a 12\% gain from the baseline on the Pre-test which was given August of 2015. The gains are attributed to consistent use of data disaggregation and analysis, common assessments based on focused standards, data-driven intervention, and collaboration, and progress monitoring.

ELA DATA by Quarter for Grades 3-10

Page 16 of 17

## Comments/ Clarifications:

Literacy teachers administered three common assessments in literacy this quarter. The common core aligned assessments were administered to ninth and tenth grade students. The assessments were administered to monitor student progress, determine appropriate interventions, and inform teachers' instructional decisions about student learning. The literacy coach and the teachers disaggregated and analyzed the data during Literacy PLCs. The data was also analyzed during the leadership team meetings. As a result of the data conversations, the leadership team determined the focus would be on remediating deficit skill areas and providing appropriate interventions for students. Teachers updated Teacher Action Plans for Tier I and Tier II Interventions and updated data walls. Remediation packets were created for students. While there was not much growth on Post Unit Assessments one and two, the third Unit Assessment showed some growth. However, one variable to take into consideration might be the type of texts students were required to read across assessments.

## (Optional)

## Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example: Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.

# End of Year Summary Report 

## FOURTH QUARTER

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)
Description of full implementation of the Effective Practice and/or Recommendation:
District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

Current reality of effective practice from the beginning of the year:
SIATech continues to use all four measures of data to monitor student achievement and growth. SIATech's focus on the socioeconomically disadvantaged is still priority. SIATech continued to provide staff with training opportunities to meet school goals, engage disadvantaged youth, and enhance school culture with At Risk students. The staff were able to lead PLC meetings with ideas that promoted positive student interaction within the classroom. The SIATech Leadership team brought in Dr. Jesse W. Jackson III to provide training on "Don't Kick Them Out" the 7 step process to address negative classroom behavior and avoid school suspensions.

Current reality of effective practice:
SIATech will be staring the new school year with two new faculty members in English and Social Studies. Because the school is an anomaly, training will be essential so that these new teachers will be able to effectively meet the needs of each student along with managing the academic, classroom management and navigation of the content that is delivered digitally.
All staff will be retrained on all four measures of data that is used to monitor student achievement. Those four measures are: student achievement, school programs/process data, perception data and demographic data.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

Current reality of effective practice from the beginning of the year:
SIATech is an open entrylopen exit dropout recover/prevention charter school that enrolls new students daily. Learning Support Teams (LST) also known as Instructional Facilitators, meet with core teachers once or twice monthly to provide professional development with curriculum management and assessment trainings for each area. All instructional units/curriculum is developed by the LST and curriculum developers from the National office in California. All instructional units contain pre and post content with remediation sections which can gauge where a student is academically and provide scaffolding methods which will increase skills throughout the unit.

Current reality of effective practice:
SIATech uses a Testing Specialist who test all students upon entry and every six week thereafter on the STAR Reading/Math. Student's gain reports are discussed in the leadership team meeting. The instructional team is then provided with the student's baseline results. The results inform the team the knowledge level of the student and exactly where scaffolding should begin.
Teachers will continue to differentiate instruction as needed to meet the needs of the student's academic level.

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10)
Current reality of effective practice from the beginning of the $\quad$ Current reality of effective practice: year:
Once the teachers were provided with a day of professional development by Dr. Jesse Jackson III, teachers developed classroom rules and routines that maximized a safe and orderly environment. The instructional team relies on the Student Handbook when discipline infractions arise. All rules are enforced daily. Because of the nature of the population, constant redirection is a must. Many of SIATech's students come from juvenile lock up facilities such as: DYS and Juvenile jails. These students have challenges with authority. SIATech has been successful with $90 \%$ of these students because of the methods used to develop rapport and respect.

New teachers will be trained on effective classroom management techniques. SIATech has a Site Mentor who will also provide training to new staff. New Staff members will attend the week long New Staff Orientation in Florida. The ADVANCed accreditation team was impressed with the routines and procedures used by the teachers. All content area classes have students enrolled in them in 9-12 grade courses. Teachers received extensive training on how to effectively manage the blended learning model.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.
Current reality of effective practice from the beginning of the year:
In the beginning of the year, most of our student population was 18 and over. Around the second quarter, younger students were transferring from their home schools due to discipline problems, bullying (from being bullied to them doing the bullying), seniors who were several credits short of graduation, and attendance issues. Parental engagement has improved with the younger students especially with those who have been incarcerated. We schedule PTC in the evening so that we could get better participation from parents who were employed.

## Current reality of effective practice:

SIATech will continue to monitor and adjust meeting times for parents. SIATech met with parents and students before school. The teachers made themselves readily available to assist parents. Teachers provided all students and parents with academic reports which contained goal setting and expectation of progress in the program. SIATech will continue to have an open door policy with parents.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice from the beginning of the

 year:SIATech developed a student tracker for graduates so that we could track all students after they leave the program. SIATech also developed a guidance plan. The plan provided details for the registrar to use and share with all students and their prospective families.

## Current reality of effective practice:

Registrar used ACT waivers and signed up all seniors who were interested in attending college for the ACT. The student tracker has been updated. Out of the 35 summer graduates, five students decided to go active duty military, four have been accepted in college, and the remainder are working various jobs.
$\square$

ARKANSAS
DEPARTMENT
OF EDUCATION

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?
The leadership team decided to schedule dates and times for proficiency test since they have to be proctored. Proficiency tests are options for students who feel they know the content well enough to test (CLEP) out. In the past students were allowed to take the test during a class. The team decided that the students should be allowed to test in the cafeteria with minimal breaks. The team arrived to this decision because of the constant disruption in the classroom with students entering or just simply asking for assistance. Teachers rotated as a proctor. The success rate on proficiency test improved due to the better testing environment. This process will remain in place for the next school term.

## If anything, what do you intend to change or modify for the year?

SIATech currently has 192 dropped students. They were dropped after missing 10 consecutive days. Because of the attendance problem, the board of directors adopted a policy that states students who have been dropped due to attendance are placed on a two week probation and may not re-enroll until their probationary period has been met. SIATech will also try to rehire Kareem Moody and use his Marginalized Male Initiative to help with the incarceration rate of students during the school term. SIATech is implementing a reading program along with the Career and College Pathway program. This program will provide access to $21^{\text {st }}$ Century Job Skills that will ultimately lead to high skill, high wage employment with hopes of breaking the cycle of poverty.

[^19]
## ELA DATA by Quarter for Grades 3-10

## Comments/ Clarifications:

Due to the resignation of the ELA teacher, percent of students with D or F on any unit test in ELA may not be accurate. The $11.7 \%$ was derived at by dividing the number of students enrolled in the course by the number of students receiving a $D$ or $F$.
(Optional)
Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example: Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.

# End of Year Summary Report 

## FOURTH QUARTER

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

## ID01 -The school board policy needed to be updated to include all

 teams.ID04 - The teams needed to shift the focus of agendas to more data driven discussions.
ID04 - The teams needed to assign a member to be the recorder at all meetings.
ID04 - The recorder needed to keep detailed minutes in Indistar.
ID07 - The principal needed to restructure the leadership team with effective team members

- The School Board Policy has been updated and approved.
- The school has a high school leadership team, instructional teams, a parental involvement team, a safety and discipline team, and a student government. Many of the members of the high school leadership team also serve on the district leadership team.
- The principal did restructure all teams at the beginning of the year adding new members. He did make some changes during the year to the high school leadership team when he realized some members were not functioning as true team members but hindering the group.
- The high school leadership team meets twice a month.
- Placing detailed minutes into Indistar is where the school still needs improvements. The team is placing minutes into

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

## Current reality of effective practice from the beginning of the year:

IIB02 - Pre tests were given at the beginning of the year as a way for teachers to determine where their students were after the summer. Teachers knew that they were required to give pre tests and post tests throughout the year.

IIB04 - Some teachers are using a web-based program to differentiate instruction while others are providing remediation enrichment activities by placing work in students' folders.

## Current reality of effective practice:

IIB02 - All teachers are giving pre and post tests. The leadership team realizes that there is more work to be done on the curriculum documents. The school needs to make sure that all curriculum documents next year have the pre and post tests included. Notebooks will be purchased for all teachers to place their curriculum in for each quarter. These notebooks will be monitored on a rotation basis throughout the quarter and will be turned in to the office at the end of each quarter.

IIB04 - A web-based program was used to differentiate instruction. Differentiation was occurring within the classrooms; however, not to the extent that the leadership team knew should be happening. Therefore, a decision was made that each teacher would be assigned a day each week for remediation/enrichment. Teachers could carry their students to the computer lab or use carts of laptops in their classrooms for this remediation/enrichment. This was put into place at the beginning of the second semester.

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).
Current reality of effective practice from the beginning of the $\quad$ Current reality of effective practice: year:

- Teachers were required to spend time at the beginning of the school year teaching their classroom rules and procedures

The number of major discipline issues has decreased significantly. The school still has issues with tardies and cell phones. Both of these issues have been addressed for next year. The handbook committee has updated the handbook for the 2016-2017 year to better address these issues hoping to lessen the number of offenses.
Analyzing discipline data throughout the year identified that the majority of the school's discipline issues occurred after students were out for extended holidays. Because of this realization the principal began having back to school assemblies where he reinforced the rules. Teachers also became more aware of discussions that they heard from the students about possible problems and made the principal aware of these issues so potential major discipline issues could be headed off before they began.

Also community members were asked to keep the school aware of potential situations that could cause potential problems at school.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.
Current reality of effective practice from the beginning of the year:

- The District has a School-Parent Compact but after reviewing the compact the leadership team realized that the compact was generic and did not meet the needs of both the elementary and high schools.

## Current reality of effective practice:

A new compact was written to meet the different needs of both schools. The new compact was mailed to all parents with only about $10 \%$ of the compacts being returned to the high school. The second time copies of the compact were sent home with the students with about $23 \%$ of the compacts returned. The handbook committee has decided that the new compact will be included in the new handbook for the 2016-2017 year. The schools have had more success getting documents read and returned from the handbook.

Students participate in Skills USA to become aware of potential jobs in the construction field.
The KUDER is currently being given to eighth graders to help these students decide on career choices.
The counselor and career teachers work together to help students plan their careers.
materialize, the school will continue to have access to Southern Arkansas' career coach on an as need basis.

The goal for next year is to continue the progress made with the ninth - twelfth grade students in their career planning and move down to students in grades six -eight for career planning.
The counselor and career teachers will continue to work together to help students plan.

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

1. Meaningful decisions made by the School Leadership Team this quarter.

- The team decided to change what the school uses to help with remediation/enrichment. A new program was decided upon and ordered for the 2016-2017 year.
What Attributed to This Change?
- After analyzing student data such as classroom grades, reports from the remediation program used, and The Learning Institute data; it was determined that the current remediation/enrichment program was not giving the school the desired student progress.

2. Meaningful decisions made by the School Leadership Team this quarter.

- The team decided that changes need to be made to the way notes are kept in Indistar. This will be address at the beginning of the 2016-2017 year in the by-laws.
What Attributed to This Change?
- Reviewing the progress reports in Indistar made the team realize that we were not giving enough details in our minutes and that people outside the groups would not have access to the in-depth discussions and the thought processes going into the decisions. The minutes were not reflecting the true work that is being done.

## 3. Meaningful decisions made by the School Leadership Team this quarter.

- The team decided that we need to address the way that we notify parents of upcoming events. A new calling system will be in place for the 2016-2107 year.
What Attributed to This Change?
- After analyzing parent participation data and parent surveys, the team realized that the school must do something to try to reach more parents. Some of the parent surveys stated that the parents were not getting notifications that were sent home and parents wanted to be notified in advance and then again close to the activity.

4. Meaningful decisions made by the School Leadership Team this quarter.

- The team decided that we need to take a different approach next year to student learning. More training to include a book study will be directed toward teachers understanding the culture of the student population of Strong-Huttig. Teachers must realize that the schools' population needs a sense of belonging and shared ownership. We can no longer expect to change the students' and parents' perception of education until we address the above issues.

## What Attributed to This Change?

- After the team reviewed student data and had discussions with teachers, it was determined that the school still is not reaching the student population. The team had a discussion with the Arkansas Department of Education's School Improvement Team that came in May 2016 about this problem. One of the team members brought it to our attention that we could not easily change the students' or parents' perception of education. The first step has to be for the teachers to change their perceptions and make sure students and parents feel valued.

## 5. Meaningful decisions made by the School Leadership Team this quarter.

- The team decided that there needs to be more work done to the curriculum documents. All teachers will receive notebooks to place curriculum documents in for each quarter in 2016-2017. These notebooks will be reviewed on a rotation basis throughout the quarter. The completed curriculum documents will be collected at the end of each quarter and stored in the principal's office.
Professional development related to curriculum development is included in the 2016-2017 Professional Development Plan.

## What Attributed to This Change?

- After teachers' curriculum documents were reviewed, it was determined that some teachers need more assistance and training on what to include in the curriculum notebooks.

If anything, what do you intend to change or modify for the year?
All of the above decisions will be changed and/or modified for the 2016-2017 year. Many of these decisions were based upon the school's three year Priority Improvement Plan.

Other changes as identified in the school's three year Priority Improvement Plan:

- An "All Star Parent Program" will be initiated to recognize parents who turn out for academic functions. The school has excellent turn outs for sporting events but poor participation in academic events. Those parents who do attend academic events will be recognized at sporting events as "All Star Parents" and will be rewarded for participation. The reward will be decided upon at the beginning of the 2016-2017 year.
- The incentive program for student achievement will be continued into the 2016-2017 year with new rewards being considered.
- All activity classes will include character education where appropriate behavior will be stressed.
- The handbook will be changed to address critical discipline issues.
- The district will be looking for feedback from stakeholders for promotional activities that can pull students back into the district.
- The school will use the ACT Aspire interim testing for the 2016-2017 year.

## SCHOOL LEADERSHIP TEAM'S REPORT FOURTH QUARTER

Comments/ Clarifications

## Discipline:

The number of major discipline issues has decreased significantly. The handbook committee has updated the handbook for the 20162017 year to better address these issues hoping to lessen the number of offenses.

Analyzing discipline data throughout the year identified that the majority of the school's discipline issues occurred after students were out for extended holidays. Because of this realization the principal began having back to school assemblies where he reinforced the rules. Teachers also became more aware of discussions that they heard from the students about possible problems and made the principal aware of these issues so potential major discipline issues could be headed off before they began. Also community members were asked to keep the school aware of potential situations that could cause potential problems at school.

## Student Absentees:

$8^{\text {th }}$ Grade Absentees -Both had sicknesses with medical excuses
$\mathbf{9}^{\text {th }}$ Grade Absentees - One student has major medical issues, three have medical excuses, one student went with his family on an extended trip to visit his family in another country, and one student is a special education student whose IEP states that he may not be able to attend school on a full time basis.
$10^{\text {th }}$ Grade Absentees - One student who has had excessive absentees due to suspensions improved tremendously this quarter. This student was not suspended any this quarter. This student did still have a problem with being tardy for first period. The other student is a student who has major medical problems and also missed due to flooding issues.
$11^{\text {th }}$ Grade Absentees - One of the students is a new mother and misses several days due to her baby. The other student has had some medical issues this quarter and has excuses.
$12^{\text {th }}$ Grade Absentees - The student missed several days due to flooding.

|  | Percent of core teachers (Math, Science, Social Studies, ELA) absent 5 or more days (10\%) |  |  |  | Number of ELEMENTARY students that are 2 or more years below grade placement in Math as determined by Test on I (Date) |  | Number of SECONDARY students that are 3 or more years below grade placement in Math as determined by <br> Special Education <br> Automation Software <br> Aug. 2015 <br> Student Classroom <br> Grades and TLI Testing |  | Number of ELEMENTARY students that are 2 or more years below grade placement in ELA as determined by <br> Test on <br> I <br> (Date) |  | Number of SECONDARY students that are 3 or more years below grade placement in ELA as determined by <br> Special Education <br> Automation Software <br> Aug. 2015 <br> TLI Combined Testing Results <br> May 2016 |  |

|  |  |  |  |  |  |  | 5 | 5 |  |  | 2 | 0 |
|  |  |  |  |  |  |  | 3 | 3 |  |  | 1 | 1 |
|  |  |  |  |  |  |  |  |  |  |  |  |  |

## Comments/ Clarifications:

Teacher absentees:

- Grades 7-9 absentees were for the same English teacher who was out several days due to health issues.
- Grades 10-12 absentees were for the same science teacher who was out seven days with $61 / 2$ days being for school business (testing for ACT Aspire, and AP)

## Three or more years behind in Math:

We did not give the SEAs test at the end of the year to determine this but used Classroom Grades and TLI testing to determine growth. Next year the test that is given at the beginning of the year will be given as an end of the year post test.

- Math is the school's weakest area. When the SEAs test was given at the beginning of the year, the new teachers realized that the students did not possess the needed skills to begin the current year's curriculum. The new teachers began the year with intensive interventions to try to build fundamental skills for the curriculum. Math teachers saw a lot of improvement from the beginning of the year to the end of the year, but the students are still behind where they need to be. The elementary is working to help the high school correct this problem by working with students to memorize facts and spending more time on the high school teachers' suggestions of identified areas of weakness.

## Three or more years behind in ELA:

We did not give the SEAs test at the end of the year to determine this but used TLI combined yearly scores to determine growth. Next year the test that is given at the beginning of the year will be given as an end of the year post test.

- $\quad 7^{\text {th }}$ Grade - Two of the students who were three or more years behind made great progress this year. These two students were in the groups that received intense intervention from the Dyslexia Specialist.
- $\mathbf{8}^{\text {th }}$ Grade - Two of these six students are special education students. They have shown some progress but are still behind.
- $9^{\text {th }}$ Grade - There are six students who are special education students. They have shown some progress but are still behind.
- $10^{\text {th }} \mathbf{G r a d e}$ - This group showed tremendous improvements. The improvements are attributed to the intense RTI and high expectations presented by this group's teacher.
- $\mathbf{1 1}^{\text {th }}$ Grade - This group showed tremendous improvements. The improvements are attributed to the intense RTI and high expectations presented by this group's teacher.
- $12^{\text {th }} \mathbf{G r a d e}$ - The one student who was behind was a special education student.

## Comments/ Clarifications:

## NINTH GRADE

The ninth grade Algebra I class was taught through Virtual Arkansas.

- Nine of the 18 students with D's or F's in ninth grade had D's.
- There are six students who are classified as special education.
- One student has an illness with doctors' excuses on file.
- One student went to Mexico for several days and got behind.
- One student spent the first part of the year in a juvenile facility and did not have any algebra background when he came to Strong.
- One student was homebound.

This ninth grade class is the class that made the leadership team ask questions as to how we can change the students' and parents' values for education. The team had a discussion with the Arkansas Department of Education's School Improvement Team that came in May 2016 about this problem. One of the team members brought it to our attention that we could not easily change the students' or parents' perception of education. The first step has to be for the teachers to change their perceptions and make sure students and parents feel valued.

ELA DATA by Quarter for Grades 3-10

# End of Year Summary Report 

## FOURTH QUARTER

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

## Current reality of effective practice from the beginning of the year: <br> The beginning of the year, as evidenced by the first quarter report, the focus was on establishing and defining the roles of a leadership team. Although a team had been in place, the campus leadership restructured the team significantly and redefined it as a school improvement team. Meeting schedules were in place, but were in need of refining and more systemic planning in order to properly utilize them. The leadership team had little to no input in scheduling and/or professional development. <br> Current reality of effective practice: <br> All teams are currently in place and running efficiently. The leadership team meets monthly, with a smaller delegation of the leadership team meeting additional times throughout the year. This smaller delegation attended a leadership institute through Arkansas Leadership Academy. In addition to this, the campus administration meets weekly to discuss important issues. The leadership team has also increased the amount of data disaggregation it does regularly, and, as a result, has begun to participate in the planning of summer PD and next year's academic initiatives.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

## Current reality of effective practice from the beginning of the year:

Teachers meet weekly in team meetings called CIA (curriculum, instruction, and assessment). During the meetings, teachers align the curriculum, scope/sequence, instructional practices and assessments. The unit plans are posted to an electronic platform (Build Your Own Curriculum or BYOC). These units include specific details about lessons and assignments so that students in alternative placement or home bound can access the information. The state of common assessments is developing. Core areas are in the process of development but many course instructors have administered pre-tests and are preparing to administer post-tests These assessments have currently focused on parts of a particular strand of content.
The plan for moving forward is to increase the depth of content assessed and the number of classes utilizing common tests.

## Current reality of effective practice:

CIA meetings have continued, but have expanded in scale to incorporate digital resources that make more efficient use of teachers' time and include all staff members. BYOC is also being expanded to incorporate more elements of curriculum and move closer to becoming a true documentation of the total curriculum. All English, math, and science teachers are utilizing pre- and posttests as well as ACT Inspire interim assessments. They analyze data and make teaching adjustments during CIA meetings.

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

## Current reality of effective practice from the beginning of the <br> Current reality of effective practice:

 year:The policies and procedures for the school are published in the form of a Parent/Student Handbook. Receipt of the Handbook is acknowledged by returned signature sheet. The Handbook contains general information about residence requirements, equal educational opportunities, and other legal stipulations. The Handbook also specifically identifies the categories of offenses due to levels of severity and the corrective actions to address violations. Teachers begin the year with an extensive review of the policies and procedures of the school handbook. Timely follow up is provided by individual teachers.
Teachers develop and post classroom rules, expectations and/or norms with each class. (upload photos of classroom rules). A respected program (Rachel's Challenge) for student behavior to develop ownership in the positive culture of the school was presented to the student body at the beginning of the year. Follow up has been through the monitoring of referrals for "disrespectful" behavior.

Although discipline has decreased, the overall culture of the school still indicates that this is an issue. Measures have been taken to implement PD in the area of classroom management this summer. Also, in a major initiative led by the leadership team, next school year will see two huge changes that are designed to address this issue. First, the ninth grade academy has been purified so that ninth graders will be almost completely isolated (including at lunch) from upper classmen to help with the transition. Secondly, an additional period has been worked into the schedule and designed to help improve teacher-student relationships. Students will have thirty minutes a day to meet with teachers and engage in a variety of highly engaging activities (student and teacher choice). This time can also be used for academic and behavioral RTI.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

## Current reality of effective practice from the beginning of the

 year:A "School Parent Compact" is required to be distributed, read, signed and returned to the school with the beginning of the year information packet. The Compact contains pledge agreements for the parent/caregiver, school staff member and student.

## Current reality of effective practice:

Although the simple goal of distributing parent compacts proved to be much more difficult than it appears on paper, parental communication increased exponentially this year. The amount of weekly communication between the school and parents increased from approximately 100 impressions per week to over 800 impressions per week. The primary reason for this increase was the Weekly Happenings newsletter straight from the principal. This newsletter allowed the campus leadership to routinely communicate information about the school community with parents.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice from the beginning of the year:

## CAREER FOLDERS

Career Education and training for students in grades 9 through 12 at Arkansas High School starts in junior high school. During the 8th grade Career Class, students develop long-range plans concerning their proposed high school classes and career choices. These plans along with State and national testing results, 8th grade KUDER results, and other vocational inventories are placed in individual folders. These Career Folders accompany our students to high school. As our students progress in high school, students identify their strengths and weaknesses as they take tests such as PSAT and KUDERs (taken in the 10th grade and 12th grade). Their original long-range plans are updated to electronic plans via KUDER Navigator System in the 10th grade. Also added to the folders are certificates or honors, transcripts, and ASVAB results. KUDER Navigator System gives the students opportunities to develop resumes that are completed as seniors. All this information is contained in the student's individual Career Folder, and upon graduation, the student is given his/her folder.
Student Vocational Counseling:

## Current reality of effective practice:

Much was being done in this area when the year began, and it continues. Most notably is our Transitions Program for SPED students. The program helps place students in work environments and helps them transition into a plan for post-secondary life. This program has proven to be award winning, including earning our principal the Principal of the Year honor from the Council of Exceptional Students. Our Transitions Program staff have been asked to present state-wide on this program.

```
Each year students review their Career Folders at the first of the
school year, and in the spring when they register for classes.
During class talks, grade level presentations, or individual
meetings, students are free to ask questions to clarify the meaning
of the data in their folders. Students make choices for their next
year's schedules with their plans and their data in mind. The plans
are not limiting; the student may alter/update the plans as they
progress through high school. Counselors and Career Coaches
use the data in these Career Folders as tools to assist students
and their parents to identify their student's academic and vocational
interests. It is our goal that students make the best vocational fit to
assure their success in the future.
Our Graduate Trailing Program (GTP) begins the day seniors pick
up their diplomas. Currently, graduates document the pathway they
intend to pursue while signing for their diplomas. As we refine this
process, the students will be urged to sign up on the district's
alumni page and to join the alumni association. GTP will continue
yearly through electronic surveys such as survey monkey. The
questions will be developed to amass long-term data needed to
assure academic/vocational success.
Smart Core Informed Consent Forms and Smart Core Waiver
Forms are included in the Student Handbook to be read, reviewed
and receipt acknowledged by signature with the other beginning of
school packet of information.
Meetings with the parents and students (by grade level) are
conducted by the counselling staff to provide information
concerning course offerings, advanced placement opportunities
and scholarship opportunities and requirements.
```

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

- Rewards for hard work from students on tests.
- To offer CIA on the computer so I can make use of my conference time to work on student stuff (lesson plans, grade papers, etc)
- To allow departments to meet in CIA without meeting in the CIA room.
- Fewer meetings
- Collecting data for the Reading Strategies and concentrating on how we can implement reading passages with high school students.
- They have decided to support the special education transition programs. Including Taste of Hog Heaven and job searching.
- The back to school bash was a great way to involve the community and come together to meet students in a fun environment.
- BYOC is the most useful tool implemented.
- The most meaningful actions made by school leadership this year has been to at least identify overwhelming problems that teachers face in the classroom, including overcrowded classes, too many lesson preps, and an ineffective policy on cell phones and ear buds.
- Online CIA meetings
- Discipline
- Shared vision and values that have led to a collective commitment of school staff, as well as leading to an ongoing quest for improvement and professional learning.
- AEP improvements. Backing of teachers who are having discipline problems.
- Not sure leadership made this decision but the Transition program is most helpful and necessary.
- Putting a teacher in Alternative and Content Mastery should have been first on my list. Woo hoo for them!
- The splitting of 2 large classes into 4 classes when the addition of a new teacher became possible.
- Our leadership have seemed to be more intentional about including the voices of all stakeholders in the decision-making process.
- The strive to make staff input a factor in the policies of the school.
- The decision to compile information and inform us through survey monkey with us contributing with our thoughts through the surveys.
- Gathering data and information through Monkey Survey.
- Managing content mastery which has allowed to those students who attend to stay caught up on their work while also effectively applying their modifications and accommodations.
- The one thing I have noticed is that leadership at this school has made decisions that enable students to be successful.
- Giving incentives for all grades for doing well on the ACT Aspire, opening Gold cards up for younger grades.
- Unnecessary meetings were not held, showed respect for our time.
- Content mastery has been helpful.

If anything, what do you intend to change or modify for the year?

- Not letting the seniors out so early. Having finals scheduled the same way every time.
- Admin should listen to their staff.
- Discipline Enforcement and Stricter - Students are out of control. Cell phones are a major issue, dress code, disrespect, etc.
- Consistent semester exam schedule. More visible administration.
- Continue CIA on computer :)
- We need to continue to be consistent in disciplining students. We should consider shortening the school day as students get tired and burned out by the end of the day. I would like to see the culture at AHS be improved and for the AHS staff to be a close family instead of distant relatives.
- There would be a Chrome cart in every classroom/
- Class Size
- better communication
- This school is frighteningly understaffed. The students are unable to get the attention they need. If budgets would permit there should be a new teacher in each department, there should also be part time counselors JUST for scheduling and tests freeing up the counselors to actually work with the student's mental health issues that they could not afford to address otherwise.
- Make sure that you include Special Services teachers on you E-mails regularly. We may not have the same conference Period as our core class.
- There needs to be more enforced guidelines for teachers on lesson plans, activities, and BYOC.
- More support from administration for discipline referrals
- School rules in the handbook. If a rule is stated in the handbook it should be enforced. If it is not enforced, what are we teaching our kids? The cell phone policy needs to be revisited.
- More access to the library for the students. It seems it's closed often and the students feel unwelcome there.
- That we need to stick to the same rules all year
- More relevant professional development
- Better support for those teachers who are dedicated to great teaching (not just a "good job, everyone" email. Real actions-such as a prep period for tested area department heads, could help retain our best.
- Smaller class sizes.
- The culture of the campus needs to be elevated to a culture of academic success. When students arrive at AHS they should have the atmosphere of success, obtaining a meaningful education.
- Consistent disciplinary measures for all students from all administrators.
- Disciplinary, staff morale
- Have freshmen start in foundation courses to get an understanding of the subject instead of skipping ahead to the more in depth courses.
- Start with programs, ideas, etc at the beginning of the year and stick to them all year.
- Continue to inform us through the use of survey monkey.
- Admin needs to be consistent in decisions. Also, ALL faculty should be more involved in decision-making processes instead of just a select few teachers and staff members. We all have ideas that should be heard.
- Consistent testing schedule, consistency in applying discipline policies, and more informational CIA and staff meetings. Meetings should include beneficial content that will help students and staff immediately instead of sessions dominated by asking what are the issues and what seemed like very little response to those issues.
- Better discipline policies or decisions. Possibly changing testing schedules where they are standard, as there is already a lot of stress during this time, without having to worry about constant changing bell schedules. Also, a little more warning for paperwork that may be required from the teacher to turn in, such as the BYOC activities having to be printed and turned in with only a few days notice. The GT program does a wonderful job on this!
- There should be a plan, quite jumping in on any idea that sounds good. Think through the consequences and long term commitment. The major complaint of teachers is the behavior of the students, classroom management training would be good but also, administration needs to be tougher. And above all, they should back the teachers over the students and parents.
- Students should not double up on core classes. The reading program should be implemented next year (Students should have books with them and read whenever they have spare time and for a certain amount of time during the class period).
- Have teacher input before decisions are made.
*The Leadership Team elected to put this out as a staff survey. These are the results.

## SCHOOL LEADERSHIP TEAM'S REPORT FOURTH QUARTER

STUDENT/ TEACHER DATA by Quarter IMO AREA 2: STUDENT PROGRESS AND ACHIEVEMENT

Comments/ Clarifications:

- The lack of students with 5 or more referrals reflects sound discipline policies. However, as addressed earlier, the need for further classroom management training is still needed.
- The ninth grade absences are being addressed by attempting to make a more pure Freshman Academy next year to assist with student transitions.

| Percent of core teachers （Math，Science，Social Studies，ELA）absent 5 or more days（10\％） |  |  |  | Number of ELEMENTARY students that are 2 or more years below grade placement in Math as determined by Test on$\qquad$ 1 （Date） |  | Number of SECONDARY students that are 3 or more years below grade placement in Math as determined by$\qquad$ Test on$\qquad$$\qquad$ （Date） |  | Number of ELEMENTARY students that are 2 or more years below grade placement in ELA as determined by Test on 1 $\qquad$ （Date） |  | Number of SECONDARY students that are 3 or more years below grade placement in ELA as determined by Test on$\qquad$ 1 $\qquad$ （Date） |  |

# End of Year Summary Report 

## FOURTH QUARTER

2015-2016 School Year

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

## Current reality of effective practice from the beginning of the <br> Current reality of effective practice:

 year:All subject areas are broken into hallways with the exception of one teacher (Hubbard) who is on another hallway. The teams meet weekly to discuss subject specific information. Meetings are occurring with agendas prepared for the majority of meetings. The agendas do not get sent prior to the meeting. We have a leadership team that meets every 2nd and 4th Wednesday from 3:40-4:45. Each team member represents each subject area/content of the school.

During the school year we lost leadership team committee members. The team has decided to make changes to teacher room for next school year and to include all content area special education classes will be held in the regular education content hallway. History team has not met weekly due to a loss of teachers and changes of teachers during the school year. Department heads will be required to handle more leadership roles within the next school year. They will have a job description that states their role and responsibilities. They will also have a period to complete these responsibilities.

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

Current reality of effective practice from the beginning of the year:

Math, science and literacy all have content-driven pre and postassessments. Special education teachers' pre and post testing was reading, spelling, and math through the Brigance. The instructional facilitators and external providers are working with teachers to analyze pre and post-test data to determine what instructional strategies to use based on the students' performance. Pre-test are being developed in literacy and math and will be developed in other content areas.

## Current reality of effective practice:

The English department had content-driven pre and post assessments. The first semester there was miscommunication with the math and science teams and this was not carried out. The advanced math classes were not tested due to miscommunication as well. Once the communication was clear, all students were tested. Currently, English, math, and science have pre and post-test developed. History will be developed throughout the summer.

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).

## Current reality of effective practice from the beginning of the $\quad$ Current reality of effective practice:

 year:The majority of teachers have given students a syllabus for class at the beginning of the year. Rules and procedures are established and posted in classrooms at the beginning of the year. Some teachers reinforce the rules and procedures consistently throughout the year and revisit them as needed. At the beginning of the year, rules and procedures are discussed and implemented with more rigor than as the year progresses.

Some teachers became relaxed on the procedures and reminders were needed. Teachers who have great classroom management were consistent throughout the year. Teachers are trying to do the right thing but many of the teachers who did not comply have resigned. We have a high number of substitutes in the building and that causes discipline issues that distract other classes. ALE was closed during the school year and the students were placed back into the regular classes and some caused discipline issues. All teachers were not consistent on providing syllabus to students.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

Current reality of effective practice from the beginning of the year:

Teachers are in communication with parents in regards to students who are failing a course. The school is planning to have parent nights in which data is shared and explained for all students and parents.

## Current reality of effective practice:

Some teachers are in communication with parents regarding student success or weak area. Our newly hired dean of students has been working with students using restorative justice. She has also made numerous home visits during the week and on weekends. She has created a relationship with parents and students that is bridging the gap of communication. Data nights were offered for parents and students although the participation was low.

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Post-Secondary School Options (VA01)
The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

## ADE will monitor the following:

- The guidance plan
- The process of tracking recent graduates

## Current reality of effective practice from the beginning of the year: <br> Currently, there are bulletins, college booklets, test information available to all students. ACT prep classes are offered. Career days and visits from colleges and armed forces are scheduled. Counselors' conference with parents and teachers throughout the year. Free ACT, PSAT, etc. testing is available to students qualified for free or reduced lunch.

## Current reality of effective practice:

Currently, there are bulletins, college booklets, test information available to all students. ACT prep classes are offered. Career days and visits from colleges and armed forces are scheduled. Counselors' conference with parents and teachers throughout the year. Free ACT, PSAT, etc. testing is available to students qualified for free or reduced lunch.

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?

1. Teaching students and teachers to track data and their progress using the data

- This decision made students more accountable and aware of where they are, it created a sense of ownership within the students. It also allowed teachers and students to track progress. Teachers became aware of the students actual level of reading and math which caused various conversations regarding differentiation and instructional strategies.

2. More student discussions - revising student policies with students (student inclusive) (tardy)

- Some students tried harder because they felt they had a voice. Student buy-in increased cooperation which increased academic achievement.

3. Different modes of writing instruction

- Students knew the expectation of the test and they were more successful

4. Teacher accountability

- Inspecting what we expected caused most teachers to do what was required of them. Although not all teachers were accepting of the changes that were implemented, many did work very hard to help increase student achievement. This also allowed team leaders to become more cognizant of the needs of teachers.

5. Meetings with $10^{\text {th }}$ graders on expectations for testing and behavior

- Students were able to understand the importance of the test and decided to take it seriously which showed an increased in STAR math reading and math. The students became aware of the behavioral expectations and some students had a positive influence on peers that were not conforming to the behavioral expectations.

## If anything, what do you intend to change or modify for the year?

- Department heads will be required to take more of a leadership role
- Protocols for communication will be put in place for next year and the administrators will follow up with all department heads to ensure communication was made and understood
- Removal of the ALE environment from the campus to an off campus location for next year
- Procedures and protocols will be communicated at the beginning of the year and will remain consistent.
- Investigate ways to restart the discipline policy in order to implement with teacher professional development at the beginning of the year. We only have 4 behavior consequences (detention, ISS, OSS, work detail) for over 100 infractions. Revising the policy will include other methods of consequences.
- Implement and follow through with teachers utilizing the RTI process for behavior issues as well as academic issues as well.
- Employ a school climate coordinator to:
o To assist with teachers having to shift the mindset to where they are not focused on discipline but on teaching and learning.
o Teachers have to meet the students at their current ability level and engage them to minimize discipline issues.
o Bridge the gap between parents and teachers to increase communication and build relationships.
o Shift the school culture in order for the teachers to focus more on meeting the needs of students at their level
- Employ a Career Coach on campus for the next school year that will assist with career options and various college scholarships.
- Offer more small group session to deliver information to students regarding college applications, scholarships, and work force opportunities

## Comments/ Clarifications:

## (Optional)

Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example:
Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.

## STAR Growth Report:

10th Grade: $40.19 \%$ (84/209) showed growth from third quarter to fourth
$15.3 \%$ (32/209) tested on grade level or above
11th Grade: $33.15 \%$ (62/187) showed growth from third to fourth quarter
$25.66 \%$ (48/187) tested on grade level or above

## Supplemental Services Report:

## First Semester:

We have 41 students receiving pull out tutoring during the first semester and 33 ( $80 \%$ ) made growth in math 8 students tested out on grade level during the first semester

Second Semester
We have 30 students receiving pull out tutoring during the second semester and 22 (73\%) made growth in math
6 students tested out on grade level during the second semester

# End of Year Summary Report 

## FOURTH QUARTER

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Establishing a team structure with specific duties and time for instructional planning (ID01, ID04, ID07)

## Description of full implementation of the Effective Practice and/or Recommendation:

District policy specifies the team structure for all schools which include a description of the teams' purposes and how they are constituted. New school leaders are apprised of this expectation and how the effectiveness of teams is determined. A common team structure for a school consists of (but not limited to) a Leadership Team (consisting of principal and teacher leaders), teacher Instructional Teams (teaching common subject area or grade level), student team (a diverse group of student leaders), management team (campus administrators and other personnel as needed) and a School Community Council (with a majority of members being parents (ID01). Each team has a specific purpose and scheduled time to meet and works from agendas and minutes (ID04).

The Leadership Team meets at least twice a month in regularly scheduled meetings of at least an hour (ID07). They serve as a conduit of communication to the faculty and staff in a way that enables the Leadership Team to receive input from the faculty and staff (ID08). The Leadership Team regularly looks at school performance data and aggregated classroom observation data and uses that data to make decisions about school improvement and professional development (ID10).

## Current reality of effective practice from the beginning of the <br> Current reality of effective practice:

 year:Wonder Jr. High has developed and is implementing the following team structures:
The Administrative Leadership Team consisting of principal, instructional coaches, parent coordinator, technology specialist, media specialist, interventionist, and school counselor serves as a conduit of communication to the faculty and staff. The team shares in decisions of real substance pertaining to curriculum, instruction, and professional development. The Leadership Team meets weekly for $1-1 / 2$ hours and analyzes school performance data and aggregated classroom observation data. The team uses data to make decisions about school improvement and professional development needs. Current teams maintain meeting agendas and minutes.

Fully implemented:

- District Policy was adopted by school board and specifies each team's purpose
- Leadership Team meets weekly for an hour or more
- District Leadership Team meets twice per month
- Teaming structures allow for Leadership Team members (liaisons) to serve as a conduit of communication to their instructional teams
- School Leaders analyze and utilize multiple sources of data to determine school improvement goals and professional development needs
o School wide PGP goal developed by Insight Report analysis

Teachers are organized into grade level or subject area Instructional Teams. Instructional Teams utilize PLC meetings to develop and refine units of instruction and review student learning data.
English Language Arts - daily
Math - daily
AVID/Freshman Seminar $=3$ times a week
The School Leadership team is comprised of administrative leadership team members and department chairs. The team meets twice a month following faculty meetings.

The Student Leadership team will consist of 4 freshmen, 4-8th grade students, and 4-7th grade students. The team will meet monthly.

Current teams maintain meeting agendas and minutes.
o Unit pre and post test data used to determine need for curriculum alignment
o Unit pre and post test data used to determine focus areas for re-teaching
o Weekly assessments reviewed and reported assessment analysis was used to support teachers development of quality assessments
o STAR data supported identification of students for intervention
o STAR data was used to support district needs assessment (and ultimately used to focus district on literacy initiatives)

## IMO AREA 1: CHANGE IN TEACHER AND LEADER PRACTICE

## Effective Practice within Category:

Engaging teachers in assessing and monitoring student mastery (IIB02, IIB04)

## Description of full implementation of the Effective Practice and/or Recommendation:

The Instructional Teams develop instructional units based on the curriculum standards and the local curriculum document. This unit typically encompasses three to six weeks of work and includes pre-/post tests administered at two to three week intervals (IIB01). The pre-test and post-test assess the same learning objectives and inform the Instructional Team members' (teachers) plans for differentiated instruction within the unit and/or re-teaching as necessary following the unit (IIB04).

The Instructional Team reviews the results of the pre- and post-tests and uses the information to guide efforts to assure that every student masters the instructional standards taught in the instructional unit (IIB03). The Instructional Team also uses the results from the
pre-/post-test analysis to plan for professional development, inform subsequent instructional unit plans and/or make adjustments to the curriculum (IIB02, IIB05).

## Current reality of effective practice from the beginning of the year:

The math department conducts weekly informal pre-assessment driven by grade level standards to create the instructional pacing for the week. The informal assessment is performed through written, verbal, or by an activity that allows students to demonstrate their prior knowledge of standards. In addition, the math teachers administer a weekly written post-test after instruction has been taught using the gradual release of responsibility model.

Literacy teachers utilize a pre-assessment of reading, writing, and language standards prior to the teaching of each of the four instructional modules. The standards that are included on the pretests include the standards that will be tested on the TLI summative exam that is given at the end of each module.

## Current reality of effective practice:

Wonder Jr. High Leadership Team agrees that while this practice is "fully implemented"; it will continue to be a substantial work in progress.

- Indistar training was provided to ELA and Math teams
- ELA and Math curriculum documents have been revised to include units of instruction that will support pre/post testing
- 2016-17 $1^{\text {st }}$ quarter assessments have been developed for ELA and Math
- ELA and Math teams continue to need support for developing unit assessments and utilizing data for differentiation
- Math unit assessments will be utilized and reported as district assessments in the upcoming school year (coaching structures and protocols are being developed to allow for all junior high schools to review and compile school level unit assessment questions and develop a quarterly district assessment)
- ELA teams will utilize DRA assessment and progress monitoring data to enhance differentiated/individualized instruction - unit assessments will focus on grade level standards but supported through student access to leveled text

## IMO AREA 3: STUDENT SAFETY AND DISCIPLINE

## Effective Practice within Category:

Expecting and monitoring sound classroom management (IIIC10)

## Description of full implementation of the Effective Practice and/or Recommendation:

The faculty and staff develop a discipline management plan that guides student behavior throughout the school. Each teacher establishes rituals and routines within the classroom that produces an atmosphere conducive to learning. Each teacher consistently teaches the campus and classroom plans to all students. Each teacher consistently teaches the rules and procedures in their classroom. Each teacher consistently enforces the agreed upon rules and regulations (IIIC10).
Current reality of effective practice from the beginning of the $\quad$ Current reality of effective practice: year:

The Student Handbook addresses Student Code of Conduct, which includes school offenses and consequences. Each parent and student at Wonder Jr. High signs a student handbook card acknowledging that they have read and understand everything is the student handbook. During the 2014-15 school year, a school wide PGP goal was developed for 2d - Managing student behavior. All teachers teach classroom rules during the first week of school

Fully Implemented - Practices will continue for upcoming school year

- Wonder Jr. High will re-address the importance of teaching rituals routines and procedures during summer retreat
- Each teacher will establish ritual and routines to produce an atmosphere conducive to learning

## IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT

## Effective Practice within Category:

Defining the purpose, policies, and practices of a school community (IVA01)

## Description of full implementation of the Effective Practice and/or Recommendation:

No Child Left Behind stipulates that each school in the Title I program develop an agreement, or "compact," that outlines how parents, school staff, and students will share responsibility for improving academic achievement. Compacts describe how the school and parents can work together to help students achieve the state's standards.

## Current reality of effective practice from the beginning of the

 year:As of August 17, 2015, the parent compact from the previous school year will be revised, in conjunction with parents, faculty, and students.

## Current reality of effective practice:

Fully Implemented - Practice will continue for upcoming school year

- All compacts are on file in principal's office
- Al mact

[^21]| IMO AREA 4: FAMILY AND COMMUNITY ENGAGEMENT |  |
| :---: | :---: |
| Effective Practice within Category: Post-Secondary School Options (VA01) |  |
| The school has a guidance plan that includes options for students routinely tracks their recent graduates' success at the next level as <br> ADE will monitor the following: <br> - The guidance plan <br> - The process of tracking recent graduates | they plan their college and career opportunities. The school ey pursue their college and career goals. |
| Current reality of effective practice from the beginning of the year: <br> All 9th grade students are required to take Freshman Seminar/AVID. Through this course students are exposed to the | Current reality of effective practice: <br> Fully Implemented - practice will continue in upcoming school year <br> - Student interviews for $9^{\text {th }}$ grade AVID have been conducted |

three academies and programs of study that are available on the high school campus or at Arkansas State Mid-South campus. This course also links programs of study to careers. Students take interest inventories that may aid in their program of study choice. During freshman orientation, the $10^{\text {th }}$ grade counselor speaks to parents and students about AWM expectations. AWM showcases their programs of study by having an Academy Fair for 9th grade students. Leading up to pre-registration, students take a tour to ASU-Midsouth to observe the programs offered on their campus. Parent meetings are held to inform parents of the registration process and course offerings. During pre-registration, the $10^{\text {th }}$ grade counselor reviews the registration and course-offering book with all $9^{\text {th }}$ grade students in a classroom setting. The 10th grade school counselor meets one-on-one with each $9^{\text {th }}$ grade students to select course for the upcoming school year.

Currently, the Wonder Jr. High Freshman Planning Team meets weekly to discuss high school preparedness and interventions for 9th graders.

- Freshman seminar will continue
- ACT prep will continue - student progress will be checked
- All $9^{\text {th }}$ grade students have preregistered for high school courses
- Critical reading course will be offered to identified $9^{\text {th }}$ grade students
- DRA was given to identified $9^{\text {th }}$ grade students - students will be placed in Critical Reading course based on scores
- $9^{\text {th }}$ grade AVID and Freshman Seminar students went on vocational tour of ASU-Mid South
- $9^{\text {th }}$ grade ACT prep students attended Historically Black College University College Fair and Lion Fever Day at UAPB
- District will provide focused support for freshman seminar and AVID teachers during the upcoming school year

## LEADERSHIP TEAM REFLECTION

Thinking about meetings throughout the year, what have been the most meaningful decisions and actions made by the School Leadership Team this quarter? And what attributed to those changes?
$1^{\text {st }}$ Quarter:

- Instructional team structure was revised to include all faculty in Instructional Teams
- Master schedule revisions were made to support Instructional Teams
- Leadership Team members were assigned as liaisons to Instructional Teams - Liaisons provide instructional support based analysis of school performance and observational data
- Instructional calendar was developed for the school year - calendar includes dates for review of school performance data and instructional team meeting dates
- Plan for providing reading interventions to identified $9^{\text {th }}$ grade students was developed and will be implemented $2^{\text {nd }}$ quarter
$2^{\text {nd }}$ quarter:
- $1^{\text {st }}$ quarter 45-day report data analysis was used to determine a need for monitoring weekly assessments in all classrooms. The instructional leaders for each department are monitoring weekly assessments by requiring the teachers to submit a copy of their current assessments and assignments that will be used for grading and monitoring student progress during the current instructional week. The instructional leaders provide feedback to the teachers, when needed, in the areas of rigor, relevance, and effective grading practices.
- Ron Clark Academy - Five members of the administrative leadership team and seven classroom teachers attended the Ron Clark Academy December. Participants observed live classroom lessons and attended teacher workshops. Academic rigor, student engagement, high expectations, and school climate are major strategies in the Ron Clark Model. Teachers returned and implemented several strategies into their classroom teaching structure. Administrative leadership and school leadership have decided to send several faculty members to the Ron Clark Academy during the second semester. The faculty will implement the Ron Clark model after training.
$3^{\text {rd }}$ Quarter:
- Creating a Culture of Reading - Leadership Team reviewed 6 elements of effective reading instruction. The team discussed each element and determined next steps for developing a school-wide culture of reading. School leaders provided faculty professional development and promoted healthy discussions on developing a school wide focus on reading. All faculty members were encouraged to check out a young adult book from the library. School leaders are recognizing teachers by displaying current books that are being read throughout the building. Teachers are continuously encouraged to promote reading by incorporating elements into daily instruction.
- Priority Improvement Plan Goals/Actions - Leadership Team collaboratively developed goals and actions focused on school needs. The PIP is focused on developing well aligned curriculum/assessments, effectively using school data, fostering a learning environment, and supporting transition both to and from WJHS.
$4^{\text {th }}$ Quarter:
- Wonder Jr. High Reading Initiatives
o Wonder Junior High School Summer Reading Programs
- Summer Of Amazing Reading- developed to address 30 students identified below grade level from $6^{\text {th }}, 7^{\text {th }}$ and $8^{\text {th }}$ grade
- Intensive Summer Reading Program - developed to address 18 students identified as significantly below grade level from $6^{\text {th }}, 7^{\text {th }}$, and $8^{\text {th }}$ grade
o Critical Reading classes will be offered to identified struggling $8^{\text {th }}$ grade students during the 2016-17 school year
- District Reading Initiatives
o West Memphis School District will implement a Literacy Assessment Plan that was introduced to the district administrators and curriculum coaches. The plan includes an outline of districts focus on DRA assessment, student achievement expectations, and data reporting protocols for grade, school, and district level analysis. The assessment plan also includes expectations and protocols to monitor the fidelity of Readers and Writers Workshop implementation.
o Identified $9^{\text {th }}$ grade students were given the DRA - student data was used to determine placement in a new Critical Reading class that will be offered at the high school
- AVID summer training will be provided to selected teachers - WICOR strategies will be included as PD in upcoming faculty summer retreat
- Math, Literacy, and Science utilized Indistar process to revisit and revise curriculum alignment documents

If anything, what do you intend to change or modify for the year?

- Master schedule will be revised to include $7^{\text {th }}$ and $8^{\text {th }}$ grade literacy a continuous instructional block ( 90 min )
- $9^{\text {th }}$ grade Critical Reading course will be provided for identified struggling students
- AVID class will be offered to a select group of $7^{\text {th }}$ grade students - master schedule will be revised to include AVID class
- School wide initiative for integration of RCA, CHAMPS, and AVID - this initiative is focused on both transforming school culture and increased student achievement (professional development for school wide initiative will be provided during summer retreat)
- All students' reading comprehension will be assessed and progress monitored using the DRA - Individualized instruction will be provided based on students needs
- Book room will be developed to include leveled books based on student needs and interests

## SCHOOL LEADERSHIP TEAM'S REPORT FOURTH QUARTER

STUDENT/ TEACHER DATA by Quarter IMO AREA 2: STUDENT PROGRESS AND ACHIEVEMENT

## Comments/ Clarifications:

According to teacher referrals, the majority of the classroom discipline infractions are for talking, not following directions, inappropriate speech or gestures, off task, and/or disruptive behavior.

Interventions that have been used as a result of the infractions are phone calls to parent(s), conference with students and with parent and student, Saturday School, In-School Suspension, corporal punishment, referral to school counselor and Out-of-School Suspension.

The majority of the discipline problems are occurring in the art class.

## Comments/ Clarifications:

$1 / 127^{\text {th }}$ grade teachers, $3 / 138^{\text {th }}$ grade teachers, and $2 / 89^{\text {th }}$ grade teachers were absent due to illness.

Comments/ Clarifications: The number of $7^{\text {th }}$ and $8^{\text {th }}$ grade students receiving a D or F for current quarter reflects students taking 2 Math classes (Grade Level Math and Math Skills)

## ELA DATA by Quarter for Grades 3-10

## Comments/ Clarifications:

Do you have other data sources that support and/or identify that you are making gains in student outcomes (For example: Interim assessments such as ACT Aspire, TLI, etc.)? You may include a chart to describe your data.

[^0]:    Susan K. Stewart

[^1]:    ${ }^{1}$ Data source: Kathy Pruner via ETS Data Manager
    ${ }^{2}$ IA cut scores at $25^{\text {th }}$ percentile required by law

[^2]:    ${ }^{1}$ When a district tests virtually all students with the ACT, as is often done with ACT state and district testing, a district's mean ACT Composite score measures the mean achievement level of the district's graduating students.
    ${ }^{2}$ There is one norming sample for each grade level and subject area.
    ${ }^{3}$ Estimated from Market Data Retrieval (MDR) data, the target population includes 90.5\% public-school and 9.5\% private-school enrollees.
    ${ }^{4}$ The public school target population relative frequencies for race/ethnicity and school FRL are derived from the Common Core of Public School Universe Survey Data provided by the National Center for Education Statistics.

[^3]:    ${ }^{5}$ See Table 1.3 for the categorization of district mean ACT Composite score.

[^4]:    ${ }^{6}$ ACT state and district testing public school sample weighted to national population of U.S. elementary and secondary students on race/ethnicity and school FRL.
    ${ }^{7}$ For the public school target population, the relative frequency for Unknown/Other is obtained by subtracting the sum of the individual race/ethnicity counts from total enrollment counts. For the ACT data, the unknown/other category includes Native Hawaiian/Other Pacific Islander, two or more races, prefer not to respond, and no response.

[^5]:    ${ }^{8}$ Frequencies from ACT public school population.

[^6]:    * For more information about the national average and $\mathbf{N}$ counts please see the document Upd

    ## Effective Practice within Category:

    Post-Secondary School Options (VA01)
    The school has a guidance plan that includes options for students as they plan their college and career opportunities. The school routinely tracks their recent graduates' success at the next level as they pursue their college and career goals.

    ## ADE will monitor the following:

    - The guidance plan
    - The process of tracking recent graduates

    Current reality of effective practice from the beginning of the year:

    All 9th grade students are required to take Freshman Seminar/AVID. Through this course students are exposed to the
