Requisition ID – 1416

DATA WAREHOUSE SPECIALIST

Date: April 2, 2021

Position Number: 2208-7432

County: Pulaski

Posting End Date: April 8, 2021

Arkansas Public School Computer Network – Financial Management System

Join the Arkansas Department of Education where each student is recognized as an individual. Through a cultivation of world-class educators, partnering with communities, and an influx of social supports, the Arkansas Department of Education provides multi-level supports that help ensure students will receive a personalized education and develop a life-long love of learning.

Special Application Information:

Incomplete applications will not be considered. List current/most recent job first. Account for all time periods including unemployment, self-employment, and military service. A resume may be attached to your required online application form; however, it may not be used as a substitute for completing any part of our application package. To make a call using the Arkansas Relay Service, dial 1-800-285-1121 (Voice) or 1-800-285-1131 (TDD) and for customer service, dial 1-800-285-7192 (V/TDD).

Duties:

Performs the data modeling design process according to custom specifications and reporting requirements. Implements and supports new system applications, enhancements, and future upgrades for existing applications. Designs, develops, tests, and maintains programs using software development tools. Develops and maintains complete, accurate, and timely documentation for assigned applications. Duties also will include state and federal data reporting as mandated by the state and federal government as well as the development of customized reports to meet client and management needs. Performs other duties assigned. This position will be housed in the Little Rock office.

Preferred Qualifications:

The formal education equivalent of a bachelor's degree in information technology or a related area; plus five years of experience in designing and implementing data warehouse and relational database applications. Working knowledge of SQL databases and SQL reporting services and COGNOS reporting tools. Strong skills in analysis and problem-solving are useful, as in the ability to multitask. Excellent computer skills and oral and written communication skills desired.
