Provide a brief description of the purpose or emphasis of the school:

Mountainburg High School seeks to ensure all students learn at high levels and are prepared for the endless possibilities awaiting them after high school. The focus at Mountainburg High School would be Career and Technical Education with emphasis in agriculture, culinary services, computer sciences, and teacher preparatory programs. Partnering with local agencies, we would expand to include career paths in health care, law enforcement, construction.

We envision a school where students explore multiple career paths and make selections for high school courses based on their interests. Students would travel through high school in academies and graduate with hands-on experiences in the areas that most interest them and sets them up for future success. Students would also have the option to participate in a general education that would be a more traditional path.

The goal for students at Mountainburg High School is to graduate future ready. Our mission is that we will ensure all students are accountable, motivated, resilient, and successful learners with limitless possibilities. We will focus on community service learning and providing more opportunities for internships.
